

2020 Health Education Standards of Learning Curriculum Framework

March 17, 2022

INTRODUCTION

Health Education increases health literacy, helps students understand how to achieve and maintain a healthy lifestyle, and fosters motivation, skills, and self-efficacy necessary to make informed and healthy choices, avoid high-risk behaviors, and build healthy families, relationships, schools, and communities. Effective health education programs help every child in Virginia become health literate, creative problem solvers, self-directed learners, effective communicators, and ultimately responsible and productive citizens who live healthy productive lives. The knowledge and skills described in the 2020 *Health Education Standards of Learning Curriculum Framework* are the culmination of work led by dedicated writing committees composed of Virginia educators, subject matter experts, and other stakeholders who shared the overarching goal of building a supportive foundation for teaching and learning relevant content, rigorous instruction, and academic excellence.

The 2020 Health Education Standards of Learning Curriculum Framework aligns with Priorities 1 and 3 of the Virginia Board of Education's (Board) Comprehensive Plan: 2018-2023, and supports the Profile of a Virginia Graduate through the development and use of communication, collaboration, critical thinking, and civic responsibility skills necessary to adopt and maintain health-enhancing behaviors, manage feelings, build healthy relationships, successfully navigate social environments, make safe life choices, advocate for personal health and the health of others. It includes actionable indicators, and provides meaningful enriching classroom experiences for students to apply health education skills to real-life, challenging situations throughout their lives.

The 2020 *Health Education Standards of Learning Curriculum Framework* is organized into strands to provide clarity for learning expectations and guide learning progressions.

1. Demonstrate the knowledge and skills to make healthy decisions that reduce health risks and enhance the health of oneself and others. (Essential Health Concepts)

The intent of this goal is for students to become health-literate, self-directed learners who recognize the relationship between personal behavior and personal health and can skillfully apply health-promotion and disease-prevention strategies as a foundation for leading healthy and productive lives. This includes the development of the capacity to acquire, interpret, and understand health concepts and the development and application of a range of health skills. Instruction will focus on the topics of hygiene, communicable and noncommunicable disease prevention, dental health, nutrition, sleep, mental wellness and social and emotional skills, drug use, physical activity, body systems, safety, intentional and unintentional injury and violence prevention, Internet safety, gangs, bullying, and preventive health care. As a result, students will have a comprehensive understanding of essential health concepts related to health promotion and risk/disease prevention, self-awareness and social awareness, and an enhanced ability to engage in lifelong health behaviors.

2. Demonstrate the ability to access, evaluate, and use health information, products, and services that influence health and wellness in a positive manner. (**Healthy Decisions**)

The intent of this goal is for students to demonstrate the ability to identify valid and accurate health information, products, and services. This ability is critical for the prevention, early detection, and treatment of most health problems. Valid health information raises awareness of the long-term consequences of unhealthy decisions and enables students to make decisions that support lifelong health. Students will experience many opportunities across their school years to use information-analysis and responsible decision-making skills as they compare, contrast, analyze, synthesize, and evaluate materials, products, and services related to a variety of health issues. As they become informed consumers, students will become aware of and able to analyze the influence of culture, media, technology, and other factors on health. Upon the completion of the health education program, students will be able to make constructive choices about personal behavior and social interactions based on ethical standards, safety concerns, and social norms, and accept responsibility for personal health practices and engage in healthy decision making.

3. Demonstrate the use of appropriate health practices and behaviors to promote a safe and healthy community when alone, with family, at school, and in other group settings. (Advocacy and Health Promotion)

The intent of this goal is for students to become responsible, health-literate citizens who demonstrate an understanding of how to create and maintain an environment that serves to protect and promote the health and wellness of individuals, families, and communities. Students will develop awareness of social and media influences that affect their decision making and develop skills to effectively navigate and resist negative influences while building positive, healthy rewarding relationships with diverse individuals and groups. Students will develop healthy habits for managing emotions including stress, anger, and impulse control, and learn how to effectively advocate for themselves and their communities, which also supports equity. Specifically, upon completing their health education program, students will demonstrate a variety of healthy practices and behaviors and advocate for ways in which peers, families, and community groups can work together to promote safe and healthy communities.

The three strands identify a core set of concepts and skills that facilitate the formation and promotion of healthy behaviors and practices. Embedded at each grade level are indicators that align with the three content strands and address four dimensions of health (i.e., physical, emotional, social, environmental), as well as health careers. The indicators are sequenced to progress in complexity from grade level to grade level, across several topic areas (i.e., Body Systems, Nutrition, Physical Health, Disease Prevention/Health Promotion, Substance Abuse Prevention, Safety/Injury Prevention, Mental Wellness/Social and Emotional Skills, Violence Prevention, Community/Environmental Health).

The 2020 Health Education Standards of Learning Curriculum Framework, a companion document to the proposed 2020 Health Education Standards of Learning, amplifies and supports the Health Education Standards of Learning and delineates in greater

specificity the minimum content that all teachers should teach and all students should learn. The standards and curriculum framework are not intended to encompass the entire curriculum for a given grade level or course. School divisions are encouraged to incorporate the standards and curriculum framework into a broader, locally designed or selected curriculum.

The format of the 2020 *Health Education Standards of Learning Curriculum Framework* aligns with each topic in the 2020 *Health Education Standards of Learning* and facilitates teacher planning by identifying the key concepts, knowledge, and skills for each standard. It is divided into two columns: *Essential Understandings* and *Essential Knowledge and Skills*. The purpose of each column is explained below.

Essential Understandings

This section includes content and key concepts that assist teachers in planning instruction. The statements may provide definitions, explanations, examples, and information regarding connections within and between grade level(s)/course(s).

Essential Knowledge and Skills

This section provides an expansion of the knowledge and skills that each student should know and be able to demonstrate. This is not meant to be an exhaustive list of student expectations.

In addition, the standards for each grade level are grouped into three content strands—*Essential Health Concepts*, *Healthy Decisions*, and *Advocacy and Health Promotion*—that align with the overarching learning goals of the 2020 *Health Education Standards of Learning*.

Strand: Body Systems

Standards:

- K.1.a Identify major body parts (e.g., head, torso, arms, legs, hands, feet, muscles, bones).
- K.2.a Recognize how the major body parts work together to move.
- K.3.a Describe the different body parts involved in one movement (e.g., jumping, walking, biking).
- K.1.b Describe the five senses (i.e., sight, hearing, smell, taste, touch).
- K.2.b Identify situations that require the use of each of the five senses.
- K.3.b Describe ways to protect the five senses.

Essential Understandings

Body parts work together so that people can move, write, draw, play, learn, participate in sports and games, and engage in other activities.

- Major body parts include the head, torso, arms, legs, hands, feet, muscles, and bones. (1.a)
- Different body parts work together for different movements. To ride a bike, arms and hands steer, legs and feet pedal, the torso keeps the body upright in the seat, and muscles give the strength for these movements. (2.a, 3.a)

The five senses are sight, hearing, smell, taste, and touch.

- Ways to protect the five senses include:
 - o Sight: to see, to read; wear sunglasses outside, wear goggles to protect the eyes when doing things like playing some sports, have eyesight checked regularly (school vision checks and Optometrist) (1.b, 2.b, 3.b).
 - o Hearing: ears; to listen, to respond; wear earplugs when around loud noise, use low volume when wearing headphones or ear buds, do not put things in the ears that do not belong there (1.b,

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

• identify major body parts on a diagram, to include the head, torso/trunk, arms, legs, hands, feet, muscles, and bones (1.a);

Grade: Kindergarten

- identify the body parts that people use to perform one movement (e.g., jumping, walking, and biking) (2.a, 3.a);
- identify the body part associated with each of the five senses (1.b);
- identify what each sense does (when is each sense used) (2.b);
- list ways to protect the five senses (3.b).

Additional resources:

Health Smart Virginia

Essential Understandings		Essential Knowledge and Skills
	2.b, 3.b).	
О	Smell: nose; to breathe, to smell; do not put things in the nose	
	(1.b, 2.b, 3.b).	
О	Taste: mouth, tongue; to taste, to eat; be careful with hot food and	
	drinks that can burn the tongue; do not put objects or toys in	
	mouth (1.b, 2.b, 3.b).	
О	Touch: fingers, skin; to hold things, to feel things; protect skin by	
	wearing sunscreen and bug spray (1.b, 2.b, 3.b).	

Strand: Nutrition

Standards:

- K.1.c Identify the MyPlate food groups (i.e., dairy, proteins, vegetables, fruits, grains) and a variety of foods and beverages from each group.
- K.2.c Describe healthy meal, snack, and beverage options that include food from the MyPlate food groups (i.e., dairy, proteins, vegetables, fruits, grains).
- K.3.c Create a shopping list that includes foods from each MyPlate food group.
- K.1.d Explain what it means to have a food allergy.
- K.2.d Identify foods that most often cause allergies.
- K.3.d Describe how to help people with food allergies (e.g., being respectful of restrictions in the classroom and cafeteria, not sharing food, getting help from an adult).

Essential Understandings	Essential Knowledge and Skills
Eating a variety of healthy foods from the five food groups every day is a part of	In order to meet these standards, it is expected
overall health. These foods can be fresh, frozen, or canned. (1.c)	that students will
• Fruits (e.g., apples, berries, bananas, raisins, melons, peaches, plums)	list/select each food group for each MyPlate
• Vegetables (e.g., carrots, broccoli, spinach, peas, squash, beans)	section (1.c);
• Grains (e.g., rice, oatmeal, whole wheat bread, pasta, pretzels)	• list/select one food in each food group (1.c);
• Protein (e.g., meat, poultry, fish, eggs, beans, nuts, seeds)	select a variety of foods from every group to
• Dairy (e.g., milk, yogurt, cheese, ice cream)	create a shopping list (2.c, 3.c);

• Clas	ss celebrations can include alternatives to food to protect people with	<u>EVERFI</u>
aller	rgies. Some examples might be a craft project, stickers, a special movie	
or v	ideo, or a book to share with the class. (3.d)	

Strand: Physical Health

Standards:

- K.1.e Describe different types of physical activity and recognize the need for regular physical activity.
- K.2.e Identify positive physical activity options and the benefits of being physically active every day.
- K.3.e Describe ways to participate regularly in physical activities inside and outside of school.
- K.1.f Recognize the importance of a regular bedtime routine and enough sleep.
- K.2.f Describe alternatives to screen time.
- K.3.f Describe ways to calm down before bed to prepare for sleeping.

Essential Understandings

Physical activity is a part of overall health.

- Physical activity is needed every day. Physical activity is important because it can help you feel good, sleep well, and be able to move more easily. (1.e, 2.e)
- During school: physical education, playing during recess, and walking or biking to and from school (1.e).
- Outside school: biking, walking, swimming, riding a scooter, dancing, stretching, martial arts, sports/games, and playing on the playground (1.e).

Sleep is essential for good health.

- Students in kindergarten need about 10-11 hours of sleep per day (<u>CDC</u>).
 (1.f)
- Getting enough sleep is as important as eating healthy foods and exercising daily. Sleep gives your body time to rest, grow, and can help to keep you from getting sick. Sleep helps you feel better. (1.f)
- Daily exercise helps to fall asleep easier at night. Limiting screen time before bedtime also helps you fall asleep easier at night. Screen time includes TV time, using a tablet computer, and games that are mainly sedentary.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Kindergarten

- identify physical activities that can be done at school, home, and in the community (1.e, 2.e, 3.e);
- describe why regular physical activity is important (1.e, 2.e);
- identify/write the number of hours students in kindergarten need each day for enough sleep or times to go to sleep and wake up (1.f);
- list/draw/select activities that do not involve screen time (2.f);
- list/draw/select activities that can help someone calm down before going to bed (3.f).

Additional resources:

Health Smart Virginia

E	sential Understandings	Essential Knowledge and Skills
	Alternatives to screen time include biking, walking, swimming, riding a	
	scooter, dancing, stretching, martial arts, sports/games, playing on the	
	playground (2.f).	
•	A regular bedtime routine helps you prepare for sleep. Screen time before	
	bed can affect falling asleep. Quiet and calming activities like taking a bath,	
	reading a book, yoga, or mindfulness activities can help you relax and fall	
	asleep. The room should be dark, quiet, and at a comfortable temperature.	
	Try to go to sleep at the same time each night. (3.f)	

Strand: Disease Prevention/Health Promotion

Standards:

- K.1.g Define germs and describe how germs (e.g., bacteria, viruses) may cause common diseases (e.g., cold, flu).
- K.2.g Explain how hand washing helps remove bacteria and viruses that can make people sick, and describe situations where it is important to wash hands.
- K.3.g Demonstrate proper hand washing.
- K.1.h Describe the function of the teeth, how to take care of them, and the health professionals that help care for teeth (e.g., dentist, hygienist).
- K.2.h Discuss the benefits of personal hygiene practices (e.g., tooth brushing, flossing, hand washing, grooming).
- K.3.h Demonstrate how to brush and floss teeth correctly.

Essential Understandings	Essential Knowledge and Skills
Germs can cause some illnesses. Hand washing helps remove germs and keeps	In order to meet these standards, it is expected that

Teeth are important for health and need to be taken care of by brushing and	
flossing.	

Ess	ential Understandings	Essential Knowledge and Skills
•	Teeth chew food and help break down food for the digestive system. Teeth	
	help you speak. (1.h, 2.h)	
•	Teeth need daily brushing and flossing. (1.h)	
	o Brush twice a day for two minutes each time; use a soft bristle brush,	
	toothpaste with fluoride, and brush all teeth; get a new toothbrush about	
	every three to four months. (3.h)	
	 Place your toothbrush on your teeth and use a circular motion to 	
	brush the outer surfaces, the inner surfaces, and the chewing surfaces	
	of the teeth.	
	 To clean the inside surfaces of the front teeth, tilt the brush and make 	
	several circular strokes.	
	 Brush your tongue to remove bacteria. 	
	o Flossing (cleaning between your teeth) may help prevent cavities and	
	gum disease. Floss once a day. (3.h)	
•	To help care for teeth, visit the dentist every six months. The hygienist	
	cleans teeth, and the dentist checks teeth to see if they are healthy. (1.h)	

Strand: Substance Use/Misuse Prevention

Standards:

- K.1.i Identify medicine as a pill or liquid that can be taken to feel better when sick but can cause harm if misused.
- K.2.i Describe the consequences of taking medications unsupervised.
- K.3.i Discuss why medicines should only be taken under the supervision of a parent/guardian.
- K.1.j Describe how medicine and other substances can be helpful or harmful and recognize poison warning labels.
- K.2.j Identify the meaning of safety signs, symbols, and warning labels and understand the dangers of white powder and other unknown substances.
- K.3.j Identify adults to ask for help and assistance with harmful and unknown substances.

Essential Understandings	Essential Knowledge and Skills
Medicine can be helpful when used correctly but harmful if used incorrectly.	In order to meet these standards, it is expected that
Medicine is given to someone who is sick to feel better. Medicine comes	students will

substances can be misused and harmful to the body.	

Essential Understandings	Essential Knowledge and Skills
Most household cleaners (e.g., dusting polish, toilet cleaner, disinfectant)	
have a warning label on them because they are poisonous. Household	
cleaners and other poisonous substances should be kept in a safe place in	
the home and out of reach of small children. (1.j)	
No one should taste or eat unknown substances. There are white powder	
substances such as flour or salt that is used in cooking and does not harm	
people; there are other white powder substances, such as household	
cleaners and drugs, that are very harmful to people. (2.j)	
 Notify a parent or adult if there is an unknown substance before smelling, 	
touching, or picking it up. (2.j)	
 Helpful adults include parents/guardians, grandparents, adult relatives, 	
and adults at school or in the faith community. (3.j)	

Strand: Safety/Injury Prevention

Standards:

- K.1.k Describe pedestrian, bike, bus, and playground safety practices.
- K.2.k Describe how safety choices can prevent injuries (e.g., wearing a helmet, tying shoelaces, using seat belts and safety seats, sitting in the back seat of vehicles with airbags).
- K.3.k Describe common safety rules and practices at home, at school, and in communities.
- K.1.1 Describe emergency and nonemergency situations.
- K.2.1 Identify people who can help in an emergency and in nonemergency situations.
- K.3.1 Describe why it is important to ask adults for help in an emergency, how to ask for help, and how to call 911.
- K.1.m Identify household products that are harmful or poisonous.
- K.2.m Recognize that not all products advertised or sold are healthy or safe.
- K.3.m Recognize that some household products are harmful if touched, ingested, or inhaled and the importance of asking adults before touching, ingesting, or inhaling white powder or other unknown substances.

Essential Understandings	Essential Knowledge and Skills
Making safe choices and observing safety protocols will prevent injury.	In order to meet these standards, it is
Walking: Use the sidewalk when walking, use the crosswalk when crossing the	expected that students will

• Car: Ride in the back seat; use safety belts and child safety seats (1.k).	involving an emergency (who to ask for

Essential Understandings

• Making safe choices can prevent injury/getting hurt (2.k).

Emergencies are situations where help is needed immediately. Children may need help with non-emergencies, but the situation is not life-threatening.

- Examples of emergencies include when someone is not breathing, cannot talk normally, or falls and cannot get up, a car crash if people are hurt, or fire. In these situations, call 911. If an adult is not present to help, be able to explain what is happening and give a location for the emergency people to help. (1.1)
- 911 should only be called in an emergency. If you need to call 911, tell the person who answers the phone (dispatcher) your name, what the emergency is, your phone number, and where you are. The dispatcher may give you directions to follow. Do not hang up the phone unless the dispatcher tells you to. (3.1)
- Sometimes you may need help, but the situation is not an emergency, or a nonemergency. Some examples of situations that are not an emergency/nonemergency are scrapping a knee or elbow, a lost pet, misplacing a toy or someone taking a toy. (1.1)
- Adults can help you in an emergency. Adults may know how to handle an
 emergency and can help children feel less scared. Parents/guardians, adult family
 members, adult neighbors, and adults at school can help with emergencies. If you
 need help but don't see an adult you know, look for a police officer, firefighter, or
 other adult wearing a nametag, such as a store employee or amusement park
 worker. (2.1)

Many items sold in stores and found around the house can be harmful to your health if they are sniffed, ingested (swallowed), sometimes touched, or misused.

• Most household products (e.g., dusting polish, toilet cleaner, laundry detergent, batteries, insect repellent, disinfectant, batteries) have a warning label on them because they are poisonous. Household cleaners and other poisonous substances

Essential Knowledge and Skills

help, how to ask, calling 911 if appropriate) vs. nonemergency situation and how to handle each (2.1, 3.1);

Grade: Kindergarten

• identify household products that can be harmful if sniffed, swallowed (put in/near mouth), or touched and why it is important to ask an adult before touching, smelling, or putting unknown substances in the mouth (1.m, 3.m).

	white powder, because these substances may be harmful. (3.m)	
•	If an unknown substance is present, notify an adult. Do not smell, touch, or pick it	
	up (3.m)	

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- K.1.n Identify a variety of feelings (e.g., happiness, sadness, anger, fear, frustration, and calmness).
- K.2.n Describe how feelings can influence actions.
- K.3.n Demonstrate how to use words to express feelings.
- K.1.0 Describe what it means to be a friend and how to show kindness, consideration, and concern for others (i.e., self-awareness, social awareness, and relationship skills).
- K.2.o Identify strategies for making friends and how to show kindness, consideration, and concern for others, including how to cooperate and share with others.
- K.3.o Demonstrate strategies for making friends and showing kindness, consideration, and concern for others.
- K.1.p Describe personal space.
- K.2.p Identify ways to tell someone they are entering one's personal space.
- K.3.p Demonstrate how to tell someone they are entering one's personal space and when to ask an adult for help.

Essential Understandings	Essential Knowledge and Skills
Note: The terms "feeling" and "emotion" are used interchangeably; at the	In order to meet these standards, it is expected that

• Examples of feelings include happiness, excitement, sadness, anger, fear,	(2.0, 3.0);
frustration, and pride. (1.n)	create two pictures that show what personal

Essential Understandings

- It is important to express feelings in an appropriate way. If you are very happy or excited you may feel like jumping, running, or screaming. These behaviors may not be OK in all settings/places. Feeling anger or being mad is normal and happens sometimes. It is not OK to hit, push, throw things, or scream. It is not OK to use words or use physical acts to harm someone. (2.n)
- To learn about managing new and difficult feelings (3.n):
 - o Talk to an adult you trust (parents/guardians, adult family member, teachers, or school counselors).
 - o Draw a picture or write a story.
 - o Exercise or play with friends.
 - o Take a break.
 - o Take some deep breaths to calm down.
- Using words to express feelings is one way to manage feelings. For example, "When you did not want to play with me, I felt sad." (3.n)

Friends are important for social and emotional development.

- Friends are people who you enjoy playing with/being with. Friends may be interested in some of the same things you are. Friends listen to your ideas and tell you their ideas. (1.0)
- Showing kindness (wanting to help others, doing good things, being nice), consideration (not doing things that will upset someone, not arguing), and concern (being interested in/caring, getting along) for others are ways to make friends. (2.0)
- Other ways to make friends include introducing yourself and telling them who you are; asking another person their name; asking questions about them such as where they live, how old they are, what they like to do; and offering to play or share a toy with the other person. (2.0)

Essential Knowledge and Skills

space is and is not (1.p);

• demonstrate how to ask someone if they want a hug or to hold hands and how to respond "yes" and "no" (2.p, 3.p).

Grade: Kindergarten

Additional resources:

Health Smart Virginia

Essential Understandings	Essential Knowledge and Skills
 Social and physical barriers include the concept of space and learning how to manage space in a social and/or school setting. Personal space is the amount of space between you and another person that makes you feel comfortable being near that person. (1.p) Not everyone wants to be hugged, pushed, or have others close to them, even if it is done in a playful way. (1.p) Always ask first before touching others. This includes greetings such as fist bumps, high-fives, hugs, or kisses. (2.p) Everyone has different needs for personal space. It is important to respect your own and others' personal space. (2.p) If someone enters your personal space, you could say, "Please don't stand so close to me." You can ask, "Is it OK if I stand here?" You can ask an adult for help if someone is not respecting your personal space. (2.p) 	
Teacher note: Reminder that all school personnel are mandated reporters. Child abuse and recognition training is required for initial licensure and renewals; training and resources are available at the <u>Virginia Department of Education</u> .	

Strand: Violence Prevention

Standards:

- K.1.q Recognize that classroom rules are important for school (e.g., sharing, respecting others).
- K.2.q Explain how classmates can support one another at school.
- K.3.q Demonstrate acceptable behavior in classrooms and during play, including showing respect for the personal space of others.

Essential Understandings

Rules are important to keep people safe.

- Classroom and school rules help keep students and teachers/staff safe. Rules help students learn to share and respect others. (1.q)
- Respect is how you treat someone. Showing respect means being a good listener, staying quiet when someone is talking and not interrupting, sharing toys, and taking turns. (2.q, 3.q)
- Not everyone wants to be teased (a way to joke with friends that is not intended to be harmful; however, teasing can hurt), hugged, or like others being close to them, even if it is just playing. Always ask first. (3.q)

Note: Teachers may want to instruct these standards with the Mental Wellness/Social and Emotional Skills content.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Kindergarten

- create/review/draw classroom rules (1.q);
- draw/select examples and non-examples of acceptable classroom and school behavior (2.q, 3.q);
- practice respectful behavior, such as helping someone up if they fall, speaking kind words, listening to other ideas, and sharing books/toys (3.q);
- practice showing respect for the personal space of others (3.q).

Additional resources:

Health Smart Virginia

Strand: Community/Environmental Health

Standards:

- K.1.r Identify items and materials that can be reused (e.g., grocery bags, paper, water bottles, other containers).
- K.2.r Describe ways to reuse items and materials in the classroom.
- K.3.r Share the importance of reusing items and materials with school and family.

Essential Understandings	Essential Knowledge and Skills
Reusing items helps to reduce waste and helps the environment. • Some examples of reusing items include using the second side of paper in class to draw, taking reusable shopping bags to the store, sharing toys or books with friends, using water bottles instead of paper or plastic cups, or giving used clothing to younger siblings, neighbors, or relatives who can use them. (1.r, 2.r)	 Essential Knowledge and Skills In order to meet these standards, it is expected that students will draw/select items that can be reused in the classroom (1.r); create bins/storage spaces for reusable items in the classroom (2.r); explain the importance of reusing items and materials with classmates and/or family members (3.r). Additional resources: Health Smart Virginia EVERFI

Strand: Body Systems

Standards:

- 1.1.a Identify major body organs (e.g., heart, brain, lungs, stomach) and location of the organs.
- 1.2.a Describe the importance of having a healthy heart, brain, and lungs.
- 1.3.a Share ways to maintain a healthy heart, brain, and lungs for lifelong health.

Essential Understandings

There are ways to help maintain a healthy heart, brain, and lungs for lifelong health.

- Body systems are made of organs and other body structures that work together to perform important specific functions. (1.a)
- The lungs are used to breathe. Oxygen is brought into the body and carbon dioxide leaves the body through the mouth and nose. (1.a)
- The heart pumps blood, which circulates through the body carrying oxygen and nutrients. (1.a)
- The stomach digests food for energy. (1.a)
- The brain is the communication center that keeps all body systems and organs functioning, keeps the body moving, has all your memories, and helps you think. (1.a)
- An organ that is not functioning properly will affect a person's overall health. (2.a)
- It is important to keep organs such as the heart, brain, and lungs healthy so the body can function effectively. (2.a)
- Ways to keep the heart, brain, and lungs healthy include regular physical activity, eating healthy foods, and staying away from cigarette smoke and other air pollution. (3.a)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- label a diagram of the human body to show the locations of major body organs including the heart, brain, lungs, and stomach (1.a);
- write a sentence to explain why it is important to have a healthy heart, brain, lungs, and stomach (2.a);
- list/identify ways to keep the heart, brain, lungs, and stomach healthy (3.a).

Health Smart Virginia

Strand: Nutrition Standards:

- 1.1.b Identify why it is important to consume a variety of foods and beverages from the five MyPlate food groups (i.e., fruits, vegetables, grains, protein, dairy).
- 1.2.b Identify "sometimes foods" (e.g., candy, cookies, chips, ice cream, soda) and recognize that not all food products advertised or sold are healthy.
- 1.3.b Explain that all foods can fit into a healthful diet through balance, variety, and moderation.
- 1.1.c Explain what physical reactions may occur if someone is having an allergic reaction.
- 1.2.c Explain how allergens remain on surfaces and why it is important to clean surfaces and hands before and after eating.
- 1.3.c Describe how one can get help from an adult if a classmate is having an allergic reaction.

Essential Understandings

Good nutrition helps the body function and includes eating a variety of foods from the five MyPlate food groups and moderation of "sometimes foods."

- Healthy food choices can help keep the body working and growing. Unhealthy choices can lead to injury or illness, feeling tired or frustrated, not being able to keep up with your friends, and not doing your best in school. (1.b)
- Healthy food choices include a variety of foods from the MyPlate food groups—fruits and vegetables, proteins, grains, and dairy with limited amounts of "sometimes foods." Fruits and grains are a great source of energy and vitamins; vegetables provide vitamins and minerals to help keep people from getting sick; protein builds muscle; and dairy/soy helps bone health.
- "Sometimes foods" (e.g., candy, cakes, cookies, ice cream, and soda) usually have a lot of added sugar and should be consumed once in a while (sometimes), not daily. (2.b)
- Many foods advertised on television and through social media may not be

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create/select pictures of healthy food choices from each food group and pictures of "sometimes foods" (1.b, 2.b);
- identify ways to incorporate "sometimes foods" into a healthy diet through balance, variety and moderation (3.b);
- list/select pictures of possible physical reactions to a food allergy (1.c);
- identify areas of the classroom or cafeteria that need to be respected for students with food allergies (2.c);
- make a list/select ways to help people with food allergies, including adults, who can help (3.c)

Essential Understandings

healthy and should be eaten in moderation. For example, some cereals and snacks that are advertised and sold contain a lot of added sugar, therefore making it a "sometimes food." (2.b)

People who have allergic reactions to food can be supported by helping to keep surfaces clean, keep hands clean, and getting help from an adult if needed.

- Some people have allergic reactions to foods and can be harmed by these foods. The person's body reacts to the food item in which they are allergic. Common foods that may cause allergies include tree nuts, peanuts, eggs, fish, shellfish, soy, and wheat/gluten.
- Reactions to food allergies may include an upset stomach, runny nose, itchy skin rash, or trouble breathing. (1.c)
- In addition to foods that can cause allergic reactions, food allergens can remain on surfaces touched by the food for many days if not cleaned. In areas such as school cafeterias, a student with allergies can have a reaction from a food allergen that came into contact with a cafeteria table from another class if not cleaned. Cleaning tables, desks, and hands after eating can help reduce the chance of an allergic reaction. (2.c)
- Anyone can help people with allergies by following rules in the classroom and cafeteria and by helping keep surfaces clean, washing hands before and after eating, not sharing food, and getting help from an adult if you think someone is having a food allergy problem. (3.c)
- Class celebrations can include alternatives to food to protect people with allergies. Some examples might be a craft project, stickers, a special movie or video, or a book to share with the class.

Essential Knowledge and Skills

- name something that can be brought in or an activity to be done for class celebrations that does not involve food
- demonstrate proper hand and surface cleaning to protect someone with a food allergy.

EVERFI

Strand: Physical Health

Standards:

- 1.1.d Recognize that physical activity is a form of healthy entertainment.
- 1.2.d Identify ways to increase physical activity.
- 1.3.d Encourage classmates to be physically active inside and outside school.
- 1.1.e Identify behaviors that promote health and wellness, including personal hygiene, sleep, physical activity, and healthy food choices.
- 1.2.e Determine how sleep habits affect mood and academic performance.
- 1.3.e Promote behaviors that affect health and wellness.

Essential Understandings

Physical activity is fun, good for the body (helping growth and body function), and helps a person feel good.

- Physical activity is needed every day. During school, physical activity happens in physical education and playing during recess. Physical activity can include walking and biking to and from school (where permitted/as safe). (1.d, 2.d)
- Outside school, physical activity options include biking, walking, swimming, riding a scooter, dancing, stretching, martial arts, sports, and playing on a playground. (2.d)

Healthy choices keep the body working and growing.

- Personal hygiene includes washing hands, brushing teeth, brushing/combing hair, and bathing/showering. (1.e)
- Getting enough sleep is an important part of a healthy lifestyle. Sleep gives the body rest, helps thinking, can improve your mood, helps with energy, and helps children do better in school. Most children between the ages of 5 and 12 need 10 to 11 hours of sleep each night (CDC). (1.e, 2.e)
- Healthy food choices include a variety of foods from the <u>MyPlate</u> food groups—fruits and vegetables, proteins, grains, and dairy with limited

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- draw/select a variety of physical activities that can be done inside or outside school and share with classmates (1.d, 2.d, 3.d);
- create a brief (count of ten) exercise that can be done in the classroom (teachers may use as assessment and as ongoing classroom activity breaks) (3.d);
- draw/select pictures of healthy behaviors students engage in each day (1.e);
- select a healthy behavior and share why it is important with a peer or family (2.e, 3.e).

<u>Health Smart Virginia</u> EVERFI

Essential Understandings	Essential Knowledge and Skills
amounts of "sometimes foods." (1.e)	

Strand: Disease Prevention/Health Promotion

Standards:

- 1.1.f Identify adults who keep children healthy (e.g., parents/guardians, teachers, school counselors, nurses, dentists, doctors).
- 1.2.f Explain the need for regular health checkups and screenings (e.g., medical, dental).
- 1.3.f Describe how one selected health professional/adult helps keep children healthy.

Essential Understandings

Throughout life, it is important to get regular/yearly checkups and screenings (called well checkups/well-child visits).

- Parents/guardians help children with daily health. Adults at school, such as teachers, counselors, and school nurses, also help children with their daily health. (1.f)
- Well checkups/well-child visits and screenings are done by doctors, nurses, dentists, optometrists, and other health care providers. These checkups may include checking vision, hearing, temperature, height, weight, listening to the heart and lungs, immunizations (shots to prevent diseases), and asking questions about daily activities, sleep, and healthy eating. (1.f, 2.f, 3.f)
- Regular checkups can help find potential health issues before they become a problem. When you see a doctor regularly, they are able to detect health conditions or diseases early. (2.f)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- draw/select adults that help children stay healthy (1.f);
- match diverse pictures of health professionals (be mindful of gender bias) to a picture of what they do (1.f);
- select one health professional and draw/write what they do (example: eye doctor checks vision, dentist checks health of teeth, nurse takes temperature, doctor listens to heart and lungs) and why they are important (2.f, 3.f).

Additional resources:

Health Smart Virginia

Strand: Substance Use/Misuse Prevention

Standards:

- 1.1.g Identify that medicines can be both helpful and harmful.
- 1.2.g Explain the harmful effects of misusing medicines and drugs.
- 1.3.g Create safety rules for medications in the home.

Essential Understandings

Medicines/medication can help a person feel better but can be harmful if not used correctly.

- Medications are used to cure, prevent, or manage (i.e., allergies, asthma) disease and used to ease symptoms such as fever, cough, or pain. Some medicines are given to a person by a doctor, or the doctor prescribes the medicine that is picked up at a pharmacy/drugstore. Some medicine can be bought at the store without visiting the doctor. (1.g)
- Medicine should only be used for the illness or problem it is meant for and only for the person it is meant for. Medicine can be harmful to the body if taken incorrectly. It can lead to illness or injury of the body organs. (1.g)
- Children should only take medicine given to them by a parent/guardian, doctor, nurse, or other trusted adult. Children should not take medication from a friend (peer) or a stranger. (3.g)
- Parents/guardians should have a safe place to keep medications at home. (3.g)
- No one should taste or eat unknown substances. There are white powder substances such as flour or salt that are used in cooking and do not harm people; there are other white powder substances, such as household cleaners and drugs, that are very harmful to people. Stop! Ask an adult first before smelling, touching, tasting, or picking up an unknown substance. (2.g)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- draw two pictures (or select from a variety of pictures)—one that shows the safe use of medicine and the second showing harmful use of medicine; write a sentence explaining the pictures or importance of only taking medicine safely (1.g, 2.g);
- create a list of safety rules for medications in the home (3.g).

Health Smart Virginia
EVERFI

Strand: Safety/Injury Prevention

Standards:

- 1.1.h Identify safety rules and guidelines for bus and automobile safety, pedestrian safety, playground safety, fire safety, water safety, Internet safety, and safety when biking and using other recreational equipment.
- 1.2.h Explain why it is important to follow safety rules and guidelines for personal safety.
- 1.3.h Promote positive behaviors for personal safety, including bus and automobile safety, pedestrian safety, playground safety, fire safety, water safety, Internet safety, and safety when biking and using other recreational equipment.
- 1.1.i Compare and contrast personal safety behaviors at home, at school, and in the community.
- 1.2.i Describe how to report a dangerous situation.
- 1.3.i Practice fire safety and emergency/disaster procedures.
- 1.1.j Describe sun safety practices.
- 1.2.j Identify the importance of sun safety.
- 1.3.j Describe the proper way to apply sunscreen.

Essential	Understandings

Following safety rules and guidelines keep people safe.

- Unsafe behaviors have consequences that could be harmful and result in temporary or permanent injury. (2.h)
- School bus: Stay seated and face forward; keep feet, backpack, and other items out of the aisle; talk quietly; cross the street in front of the bus after checking to make sure all other traffic has stopped. (1.h)
- Car: Sit in the rear seat, using a car seat or booster seat as appropriate; wear a seatbelt. (1.h)
- Pedestrian: Look for cars before crossing the street; cross the street at the crosswalk, when available; wait for the crossing signal, if available; use the sidewalk; if walking in the road, walk on the left side facing traffic; if walking at night, use a flashlight and wear reflective clothing. (1.h)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- identify pictures of or create a poster for bus, automobile, pedestrian, playground, fire, water, Internet, biking, or recreational equipment safety (1.h, 2.h, 3.h);
- list/select at least one safety rule for the home, school, and in the neighborhood and write why it is important (1.i);
- name/list adults who can help in an

Essential Understandings

- Playground: Use equipment correctly; wait your turn. (1.h)
- Fire: Know two escape routes from the home; practice evacuation drills at school; do not play with matches; do not use the stove or oven without supervision or permission; leave immediately if there is smoke or you see fire; stop, drop, and roll if clothes catch fire. (1.h)
- Water: Do not swim alone; know laws for wearing a personal floatation device (life jacket) when boating or swimming; follow lifeguard's directions; walk around the pool; don't push others, and don't jump on others. (1.h)
- Internet: Only visit sites approved by a parent/guardian, teacher, or other trusted adults; do not provide personal information on websites—don't give your name, your age, where you live, what school you go to, or your phone number; ask a parent/guardian before providing information on a website; tell an adult if something makes you feel uncomfortable. (1.h)
- Biking: Always wear a helmet, even for short rides; wear bright-colored clothing; only bike on roads or trails you are comfortable on; ride on a sidewalk, trail, or the right side of the road; use hand/arm signals to let others know you are turning; stop at stop signs; walk bike across roads; look for cars before crossing the road. (1.h)
- Recreational equipment (scooter, skateboard, inline skates)—wear a helmet, elbow and knee pads, and wrist guards; be aware of others when using a skate park; only ride in appropriate areas; be aware of others on sidewalks. (1.h)

Safety includes knowing what to do in case of an emergency and how to report a dangerous situation at home, at school, and in the community.

• Home: Safety practices include using the stove, oven, or microwave with adult supervision, not playing with matches, not touching medicines or household cleaners (poisons) without an adult present; know and practice an escape plan in case of fire; don't play in the road; ask for help if a ball or other toy goes into the road. (1.i)

Essential Knowledge and Skills

emergency or dangerous situation and what information to tell the adult (2.i);

- create a map showing two ways to exit the home safely in case of a fire (3.i);
- demonstrate safe participation in school safety drills (3.i);
- explain orally or in writing why sun safety is important (2.j);
- create a sun safety poster that includes how to be safe in the sun and how to put on sunscreen (1.j, 3.j);
- explain the importance of accessing the Internet only with approval from a trusted adult (1.h, 3.h).

Additional resources: Health Smart

Virginia EVERFI

Essential Understandings Essential Knowledge and Skills Home: Fire safety includes not playing with matches, knowing at least two routes out of the home, having a meeting spot for family outside the home, and practicing family escape plan. (1.i) School: Safety practices include walking and not running in the hallways; following directions and remaining quiet during fire/evacuation drills, participating in tornado drills and lock-down drills to prepare for emergencies; keeping medications in clinic or nurse's office; and following safety rules on playground. (1.i)Community: Safety practices include staying with an adult or older sibling, being aware of your surroundings when crossing the street, being careful when talking with strangers, and paying attention in parking lots and parks. (1.i) It is important to report any dangerous situations to an adult. For situations like getting hurt on the playground, being uncomfortable about something on the Internet, or finding broken glass on the sidewalk, a child can tell an adult. The child should tell the adult what happened, when it happened, and where it is located. (2.i) In an emergency situation a child may call 911 for help. Emergencies include fire, a person who can't wake up or speak, or an injury where there is a lot of bleeding. When calling 911 it is important to identify yourself, tell the dispatch operator (the person who answers 911 calls) what the emergency is and where you are, follow instructions given by the dispatch operator, and don't hang up the phone unless you are told to do so. (2.i, 3.i) The sun has many benefits, including providing the body with Vitamin D (bones health), lowering blood pressure, promoting relaxation, improving mood, and supporting better sleep. However, sun can be harmful to people's skin if exposed for long periods. Sun safety includes wearing sunscreen with sun protection factor (SPF) of 30 or

Es	sential Understandings	Essential Knowledge and Skills
	higher, reapplying sunscreen every two to three hours or more often if swimming,	
	wearing clothing with long sleeves and pants, wearing a hat, and avoiding being in	
	the sun between 10 a.m. and 4 p.m. when the sun's rays are strongest. (1.j, 3.j)	
•	Exposure to the sun can cause skin to burn/sunburn. Sunburn can cause blisters on	
	the skin. Sunburns can lead to skin cancer. (2.j)	

Strand: Mental Wellness/ Social and Emotional Skills

Standards:

- 1.1.k Identify comfortable and uncomfortable feelings and when one might experience these feelings.
- 1.2.k Identify appropriate ways a person may express feelings (e.g., happy, unhappy, mad) and trusted adults to share feelings with at school and at home.
- 1.3.k Demonstrate ways to express feelings appropriately.
- 1.1.1 Describe positive characteristics that are unique to each individual.
- 1.2.1 Explain the importance of showing kindness, consideration, and concern for others.
- 1.3.1 Demonstrate cooperation with friends and classmates.
- 1.1.m Identify effective listening skills.
- 1.2.m Explain how listening is important for effective communication.
- 1.3.m Demonstrate effective listening skills.
- 1.1.n Identify cooperative and responsible behaviors, such as respect for others, adherence to school rules, acceptance of responsibility, and respect for the property of others.
- 1.2.n Identify strategies for respecting others' personal space, boundaries, and belongings.
- 1.3.n Apply strategies for establishing and respecting others' personal space, boundaries, and belongings.

Essential Understandings	Essential Knowledge and Skills
Note: the terms "feeling" and "emotion" are used interchangeably; at the primary	In order to meet these standards, it is expected that
grade levels, "feeling" is used as the age-appropriate term.	students will
	• create or select an "I feel" statement describing
Everyone experiences different feelings. Some feelings are comfortable, and	various scenarios/feelings (each student should
some may be uncomfortable. It is important to express feelings in a healthy way.	be able to explain how to deal with each

sometimes uncomfortable feelings, such as sad, unhappy, mad, frustrated,	 draw a self-portrait that shows one or more
and angry. (1.k)	positive personal characteristics (1.1);

Essential Understandings

- Feelings are not bad, but sometimes people express feelings in ways that can be harmful to themselves or others. (1.k)
- Different experiences may cause different feelings. A person may feel happy when they play with a friend, go to a birthday party, do well in school, or visit family. A person may feel sad or unhappy if they lose a game or toy or have a disagreement with a friend or sibling. A person may feel mad if someone takes something that belongs to them or a parent/guardian tells them they can't do something they want to do. (1.k)
- Feelings need to be expressed in a healthy way to prevent harm to yourself or others. It is not healthy to hit someone who takes your toy and makes you mad. (2.k)
- A healthy way to express feelings is to write/draw about them in a safe place or share feelings with a parent/guardian or trusted adult that can help by talking out the problem. If you feel mad, you can also try some other strategies to start to feel better, such as counting to ten, playing a game, being physically active outside, taking a break, taking some deep breaths, or getting a hug. (2.k)

Everyone is unique and should be respected for their different characteristics. Differences are what makes people special. Showing respect for others may include being kind, considerate, and cooperative.

- Each person has positive characteristics or qualities that make them unique/different. Characteristics may include physical appearance or things a person enjoys or is good at, such as being math smart, good with people, or playing the piano. (1.1)
- Accepting others who are unique helps people to get along with others and make friends. Being kind (saying/doing nice things), considerate (thinking about others' feelings), and showing concern (care about others) for others

Essential Knowledge and Skills

- add a friend or adult to the drawing that shows their positive personal characteristics, how they are different (1.1);
- create a story about being a good friend or classmate (2.1, 3.1);
- demonstrate listening by repeating what someone else says; follow instructions for a game/activity; or in small groups do an add-on story (one person starts and after a few sentences the next person continues the story) (1.m, 3.m);
- write a sentence or create a poster for one thing students can do to be responsible and respectful to others in the classroom/in school (1.n, 2.n, 3.n).

Grade: One

Strand: Violence Prevention

Standards:

- 1.1.0 Describe feelings that may result from hearing kind and unkind words and when experiencing problems (e.g., someone not sharing).
- 1.2.0 Explain the importance of responsible behaviors when interacting with others.
- 1.3.0 Demonstrate responsible behaviors when interacting with others.
- 1.1.p Describe personal space and boundaries for oneself and others.
- 1.2.p Explain how to listen and use words to respond to and solve problems.
- 1.3.p Demonstrate best ways to solve social problems.

Essential Understandings

Note: Teachers may want to instruct these standards with the Mental Wellness/Social and Emotional content.

Everyone has feelings.

- When someone tells a person how good they are at something or invites them to play, it probably makes them feel happy. If someone says unkind or mean things, teases, or takes the toy they are playing with, the person may feel unhappy, sad, or mad. (1.0)
- Behaviors and words can make others feel unhappy, sad, or have other uncomfortable feelings. Thinking about others before saying or doing unkind things is showing how to be responsible. (2.0)
- Responsible behaviors (e.g., sharing toys, using kind words, including others in activities) are important in building friendships and relationships with others. (3.0)

Everyone has different needs for personal space. It is important to respect your own and others' personal space and boundaries.

• Personal space is the amount of space between you and another person that makes you feel comfortable being near that person. (1.p)

Essential Knowledge and Skills

- select or draw emojis that correspond to statements about how someone might feel (e.g., Great job on your art project ☺, I don't want to share my toy with you ເ♡) (1.0);
- write a sentence/kindness rule for one thing a student can do to be responsible and respectful to others in the classroom/in school (2.o, 3.o);
- draw/select pictures that show what personal space is and is not;
- identify or create class rules to help solve problems (e.g., I will

Essential Understandings

- Not everyone wants to be hugged or likes it when people get close, even if it is just "playing." Always ask first. (1.p)
- Listening is important to solving problems between people. Good listeners are better communicators. (2.p)
- Sometimes people do not get along with one another and it causes a problem. Listening and using words to solve problems shows responsibility and respect. It is also important to use words that are kind, such as "please" and "thank you" and ask before taking or touching things. (2.p)
- Listening skills (see Mental Wellness/Social and Emotional topic). (2.p)
- Social problems or social conflicts, such as an argument over whose turn it is to use a toy, are usually between friends or classmates. Learning to solve social problems/social conflict can make friendships and other relationships stronger. You can ask an adult for help with social problems. Many adults (e.g., parents/guardians, teachers, and school counselors) are available to help children with social problems. (3.p)

Essential Knowledge and Skills

listen first, I will ask questions, I will say how I feel or ask about the other person how they feel, I will suggest a solution, we will choose a solution, I will ask the teacher if we cannot solve the problem for help) (2.0, 3.0);

• demonstrate how to ask someone if they want to play, share a toy, or want a hug, and how to respond with a "yes" and then with a "no" (3.0).

Additional resources: Health Smart

Virginia EVERFI

Strand: Community/Environmental Health

Standards:

- 1.1.q Identify items and materials that can be reduced, recycled, repurposed, or reused.
- 1.2.q Explain why it is important to dispose of trash properly, recycle materials, conserve water, and prevent water pollution.
- 1.3.q Create strategies to keep the environment healthy, including proper disposal of trash, recycling or reusing, and water conservation.

Essential Understandings

Everyone shares the responsibility to protect the environment—the water, land, and air we breathe.

- Examples of reducing and reusing items include using the second side of paper in class to draw, taking reusable shopping bags to the store, swapping toys or books with friends, using water bottles instead of paper or plastic cups, or giving used clothing to younger siblings or donating them to others. Items that can be recycled at home include things made from aluminum, glass, plastic, and paper. (1.q)
- Reduce, reuse, recycle and proper disposal of trash keeps the community and Earth clean, prevents disease, and provides a place where people can enjoy. (2.q)
- Water pollution is any substance found in a river, stream, lake, or ocean that harms the natural resources found in those environments. Preventing water pollution is important so that there is access to clean water. All living things (i.e., people, plants, and animals) depend on water. It is up to all of us to help keep our water clean. (2.q)
- Children can conserve water by taking a shorter shower (use less water and less fuel since your house uses fuel to run the water heater); turning off water while brushing teeth; and drinking tap water instead of bottled water (using a reusable water bottle). (3.q)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create/select a picture(s) with items that can be recycled or reused (1.q);
- create a picture or tell a story about water pollution or water conservation (2.q);
- create a classroom recycling/upcycling plan that includes cleanup and categories to recycle or reuse various items (3.q).

Health Smart Virginia

Strand: Body Systems

Standards:

- 2.1.a Identify structures that form body systems, including the heart and lungs (cardiorespiratory system), bones (skeletal system), and muscles (muscular system) and how the systems work together.
- 2.2.a Identify possible consequences of not caring for cardiorespiratory, skeletal, and muscular systems.
- 2.3.a Explain how daily physical activity and healthy eating habits contribute to healthy cardiorespiratory, skeletal, and muscular systems.

Essential Understandings

Body systems have different structures that work together to help the body function.

- The cardiorespiratory system includes the heart and lungs. Its function is to circulate blood through the body to provide oxygen and nutrients to the body's muscles and organs. (1.a)
- The skeletal system is the body's bones. The function of bones is to hold the body up, help in all movement, and protect organs. (1.a)
- The muscles of the body make up the muscular system. The muscular system works with the skeletal system to make movement. (1.a)
- Not taking care of the cardiorespiratory, skeletal, and muscular systems reduces or limits the ability of the body to function properly. (2.a)
- Ways to keep the cardiorespiratory, skeletal, and muscular systems healthy include regular physical activity; wearing protective gear; eating healthy foods—dairy/soy milk for bone health, fruits, vegetables and lean protein for heart health, and protein for muscle health; getting enough sleep; and staying away from cigarette smoke, vaping, and other air pollution. (3.a)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- label a diagram of the human body that shows the heart and lungs (cardiorespiratory system), bones (skeletal system), and muscles (muscular system) (1.a);
- write a few sentences to describe what would happen if the major body systems were not taken care of (2.a);
- write or draw/select pictures of ways to keep the cardiorespiratory, skeletal, and muscular systems healthy (3.a).

Health Smart Virginia

Strand: Nutrition

Standards:

- 2.1.b Identify where and how fruits and vegetables are grown.
- 2.2.b Describe why fruits and vegetables are essential components of a healthy lifestyle.
- 2.3.b Identify ways to incorporate fruits and vegetables into daily food choices (i.e., breakfast, lunch, dinner, snacks).

Fruits and vegetables provide nutrients and vitamins to help the body grow and function.

- Everyone should eat fruits and vegetables daily. They can be fresh, frozen, dried, or canned.
- Fruits and vegetables come from different types of plants. (1.b)
- Fruits grow on
 - o trees (e.g., apples, peaches, bananas).
 - o vines (e.g., strawberries, grapes, watermelons, tomatoes).
 - o bushes (e.g., blueberries and raspberries). (1.b)
- Vegetables are grown
 - o underground (e.g., carrots, parsnips, radishes, onions, potatoes).
 - o on vines (e.g., pumpkins, peas, cucumbers, squash).
 - o above ground (e.g., asparagus, broccoli, and lettuce). (1.b)
- Fruits and vegetables can be grown indoors or outdoors at home, on a farm, or hydroponically (growing plants in water instead of soil).
- Fruits are sources of many essential nutrients, including potassium, dietary fiber, Vitamin C, and folate (folic acid). These nutrients help fight germs, maintain body function, blood pressure, provide fiber for digestion, and contribute to healthy teeth and gums (Choose MyPlate Fruits). (2.b)
- Vegetables have many of the same health benefits as fruits and provide Vitamin A. Vitamin A keeps the eyes and skin healthy and helps to protect against infections (Choose MyPlate Vegetables). (2.b)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- select one fruit and one vegetable, identify how they are grown, and write one sentence about why it is important to eat the selected fruit and vegetable (1.b, 2.b);
- create a healthy meal or snack that includes fruits and vegetables (3.b).

Health Smart Virginia

Strand: Physical Health

Standards:

- 2.1.c Describe correct posture for sitting, standing, and walking.
- 2.2.c Practice correct posture for sitting, standing, and walking.
- 2.3.c Demonstrate proper lifting and carrying techniques for handling backpacks and book bags.

Essential Understandings

Using correct/proper posture when sitting, standing, and walking can prevent stress and injury, make it easier to breathe, allow for better movement, and have better endurance.

- Posture is the position of the body when sitting or standing. (1.c)
- Sitting: back straight, shoulders back, not slouching or being hunched over. (1.c)
- Standing: tall with ears, shoulders, hips, and knees in a straight line. (1.c)
- Walking: tall with eyes forward, transfer of weight from one foot to the other; foot lands heel to toe, one foot is always in contact with the floor, arms at sides (may be slightly bent) and move in opposition to legs. (1.c)
- Backpacks: If the weight of the backpack forces the person to lean forward, then it is too heavy. Children should not carry more than ten percent of their weight. (1.c)
 - o Put heavier items in the bottom of the backpack and closer to the body.
 - o When checking the weight of the backpack before putting it on, use both hands and lift with the legs.
 - o Backpacks should be worn on both shoulders (padded straps are optimal).
 - o Straps should be snug but not tight.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Two

- identify correct and incorrect posture for sitting, standing, and walking (1.c);
- demonstrate correct posture and encourage peers to do the same for sitting, standing, and walking (2.c);
- demonstrate the proper way to lift and carry backpack/book bag (3.c).

feels, thinks, and acts. (1.e)	substance (3.e);
Tobacco and/or nicotine products include cigarettes, electronic cigarettes,	respond to scenarios to refuse tobacco, nicotine
and electronic vaping products. These products are harmful to the body and	products, alcohol, unknown substances, and/or

Essential Understandings

are especially damaging to the lungs. (1.e, 2.e)

- Tobacco smoke is harmful to be around, both for the smoker and anyone near someone smoking (secondhand smoke). (1.e, 2.e)
- Alcohol affects the way a person thinks and acts because it affects the brain.
 With good health, the brain continues developing into the mid-20s; alcohol and other drugs affect brain development.
- Alcohol can also affect the heart and liver. (1.e)
- No one should smell, sniff, taste, or eat unknown substances, including/especially white powder, because these substances may be harmful. (3.e)
- Notify a parent or adult if there is an unknown substance before smelling, touching, or picking it up. (3.e)

Saying "no" to doing things a person thinks are wrong or unhealthy are referred to as refusal skills.

- Verbal Refusal Skills (1.f)
 - Say "no." There is no substitute for the word "no." It makes any refusal stronger.
 - o Repeat the "No."
 - o Suggest an alternative (suggest something else to do instead).
 - o Use a firm tone of voice: Be strong and business-like.
- Nonverbal Refusal Skills (1.f)
 - O Direct eye contact (look the person in the eyes).
 - O Serious expression (use your best "I mean it" face).
 - o Leave (get out of the situation).
 - o Avoid situations where there may be pressure.

Prescription and nonprescription medications

• People may take medicine to control a known condition or when they are

Essential Knowledge and Skills

medications not appropriate for children; scenarios may be written or use role-play as appropriate (1.f, 3.f);

Grade: Two

- identify a prescription medication and nonprescription medication (1.g);
- create a safety message poster to share with parents and include discussion questions to review harmful substances in the home (2.g, 3.g).

Additional resources:

Health Smart Virginia

Essential Understandings	Essential Knowledge and Skills
sick or have pain.	
Some medicines are given to a person by a doctor. These are called	
prescription medications. (1.g)	
Some medicine can be bought at the store, such as aspirin and cough	
medicine, without visiting the doctor. These are called nonprescription or	
over-the-counter medications. (1.g)	
• It is important to follow the doctor's orders for prescription medication or	
the safety regulations printed on nonprescription medicines.	
Medicine should only be used for the illness or problem it is meant for and	
only for the person it is meant for. Medicine can be harmful to the body if	
taken incorrectly. It can lead to illness or injury of the body organs. (2.g)	
Many medicines can look similar. For example, an acetaminophen pill may	
look similar to an allergy pill in color or shape. However, it is important to	
look at the packaging to ensure you are taking the proper medication at the	
proper dosage. (2.g)	
Children should only take medicine given to them by a parent/guardian,	
doctor, nurse, or other trusted adult. Children should not take medication	
from a friend (peer) or a stranger. (2.g)	
Medications should be locked and kept away from children. Childproof caps	
on medicine bottles help keep children from taking medication. Medications	
may look like candy, but they are not candy. (3.g)	

Strand: Safety/Injury Prevention

Standards:

- 2.1.h Explain the importance of assuming responsibility for personal safety.
- 2.2.h Identify ways that students can take responsibility for personal safety at home, at school, and in the community.
- 2.3.h Identify emergency resources, services, and health care professionals in the community that influence health, safety, and wellness.

Essential Understandings

Safety is everyone's responsibility—at home, at school, and in the community.

- Rules are made to keep people safe. Sometimes rules are different at school, at home, and in the community. Following rules is taking responsibility for personal safety. (1.h)
- Responsibility means taking ownership of one's actions and safety. (1.h)
- Taking responsibility for safety includes following rules, wearing safety equipment, helping others, knowing the difference between an emergency and a non-emergency, and knowing how to get help from an adult if needed. (2.h)
- Many communities have a police station, fire station, and community centers where events are held to promote safety and health. (3.h)
- Emergency/community resources for health and safety include 911 operators/dispatchers, police officers, firefighters, emergency medical technicians, hospitals, emergency care centers, doctors, nurses, and other health care providers. (3.h)
- People who help keep children healthy and safe include parents/guardians, older siblings, other adult family members, teachers and school staff, counselors, psychologists, doctors, nurses, hearing specialists, eye doctors, coaches, 911 operators, police officers, and firefighters. (3.h)

Essential Knowledge and Skills

- create a safety poster to be safe at home (2.h);
- create a safety poster for different areas around the school (hallways, cafeteria, gym, classroom, playground) (2.h);
- create rules for indoor and outdoor recess that students can follow to be safe (2.h);
- locate the nearest police station to home on a map (3.h);
- identify emergency resources, services and health care professionals by uniforms or other images (e.g., firehouse, uniforms) (3.h);
- write short stories about situations that would require seeking help from an emergency responder and how to contact them (3.h):

Essential Understandings	Essential Knowledge and Skills
	 demonstrate dialing 911 on a disconnected/nonworking phone and role-play: what they would say in an emergency; listening skills; and staying on the line (3.h); list health care providers that keep children healthy (3.h); draw a picture of a favorite community helper and explain their job (3.h).
	Additional resources: Health Smart Virginia EVERFI

Strand: Mental Wellness/ Social and Emotional Skills Standards:

- 2.1.i Identify feelings associated with disappointment, loss, and grief.
- 2.2.i Explain healthy ways to express feelings associated with disappointment, loss, and grief.
- 2.3.i Identify adults who can help with disappointment, loss, and grief.
- 2.1.j Describe personal strengths and identify how individuals are unique.
- 2.2.j Discuss how empathy, compassion, and acceptance help one understand others.
- 2.3.j Identify and discuss how to show respect for similarities and differences between individuals.
- 2.1.k Describe characteristics of a trusted friend and a trusted adult.
- 2.2.k Identify trusted adults at school and at home.
- 2.3.k Identify situations where trusted friends and adults can help.

Note: The terms "feeling" and "emotion" are used interchangeably; at the primary grade levels, "feeling" is used as the age-appropriate term.

Everyone experiences different feelings. Some feelings are comfortable, and some may be uncomfortable. It is important to express feelings in a healthy way.

- Disappointment: Someone feels unhappy because something was not as good as expected or something that was hoped for or expected did not happen (rain caused a game to be cancelled). (1.i)
- Loss: The experience of having something taken from you. (1.i)
- Grief: A deep sadness caused by someone's death. (1.i)
- People have different feelings when experiencing disappointment, grief, or loss. Feelings may include sadness, anger, or feeling alone. These feelings are normal. (1.i)
- People have unique ways of expressing emotions. For example, some might

Essential Knowledge and Skills

- draw a feeling face and show what disappointment, loss, and/or grief might look like; identify the feeling, a healthy way to cope, and name an adult who can help (1.i, 2.i, 3.i);
- draw or select examples of showing empathy, compassion, and/or acceptance of others (e.g., sharing a toy, helping someone who has fallen, including others in a game/activity (2.j);
- identify ways that individuals are similar and different and create a cooperative art project that celebrates uniqueness (1.j, 3.j);

Essential Understandings

show their feelings by doing things rather than talking about them. They may feel better going on a walk or swimming, or by doing something creative like writing or painting. For others, it may be more helpful to talk with family and friends about the person who's gone, or with a counselor. (2.i, 3.i)

• Cultural beliefs and traditions can influence how someone expresses grief and how they mourn. For example, in some cultures, grief is expressed quietly and privately. In others, it can be loud and out in the open. Culture also shapes how long family members are expected to grieve. (2.i)

Everyone is unique and should be respected for their different strengths and characteristics. Showing respect for others includes being kind, considerate, and cooperative.

- Personal strengths are the things a person is good at and likes to do. Everyone has different strengths that make them unique/different from others. Strengths may include (1.j)
 - o things of interest (e.g., music, art, science, building things, cooking, reading).
 - o skills (e.g., painting, playing an instrument, playing a sport).
 - o good qualities (e.g., kindness, humor, leadership).
- Understanding that everyone has different strengths that make each person unique improves understanding of one another along with empathy, compassion, and acceptance. (2.j)
 - o Empathy: The feeling that you understand and share another person's experience and emotions/ability to share another's feelings.
 - o Compassion: A feeling of wanting to help someone who is sick, injured, in trouble, needs help, or needs a friend.
 - Acceptance: The act of accepting someone or something.

Essential Knowledge and Skills

- list trusted friend(s) and adult(s) (2.k);
- draw a trusted friend or adult and list their characteristics (1.k);

Grade: Two

• read (or listen to) scenarios and decide whether a trusted friend or trusted adult can help and identify a trusted person who can help (3.k).

Additional resources:

Health Smart Virginia

Essential Understandings	Essential Knowledge and Skills
• A trusted friend also shows reciprocity. If being trustworthy, honest, loyal, a good listener, and supportive are characteristics of a trusted friend, then you should be those things for the other person.	
Teacher note: Reminder that all school personnel are mandated reporters. Child abuse and recognition training is required for initial licensure and renewals; training and resources are available at the <u>Virginia Department of Education</u> .	

Strand: Violence Prevention

Standards:

- 2.1.1 Explain the difference between joking, teasing, and bullying, and identify how each may impact the recipient.
- 2.2.1 Identify ways to respond appropriately to joking, teasing, and bullying.
- 2.3.1 Use appropriate strategies to safely stand up to teasing and to report bullying.
- 2.1.m Define conflict and describe situations in which conflict may occur.
- 2.2.m Describe how to work and play cooperatively and how to use nonviolent strategies to resolve conflict.
- 2.3.m Demonstrate nonviolent strategies to resolve conflict and support peers in school and in the community.

Essential Understandings

Bullying is an intentional way to hurt someone's feelings, reputation, or to physically hurt someone. It is usually targeted at the same person over time. Bullying is a serious problem and often the person being bullied does not know how to safely seek help. (1.1)

- Joking is something said or done to cause laughter. People may not know that a person is joking and may take the action or words seriously. Ask the person if they are joking or tell them how their joking makes you feel. (1.1)
- Teasing is a way to joke with friends that is not intended to be harmful. However, teasing can hurt. Teasing that is ongoing is bullying. Tell the person teasing how it makes you feel if you feel safe. Get help from an adult if the teasing does not stop or the teasing makes you feel unsafe. (1.1)
- Bullying can be done in person or online (cyberbullying). Bullying can be verbal (i.e., teasing, taunting, name-calling, threatening to cause harm), physical (i.e., hitting/kicking/pinching, spitting on, tripping/pushing, or taking or breaking someone's things), or social (i.e., leaving someone out on purpose, telling other children not to be friends with someone, spreading rumors about someone, or embarrassing someone in public). (1.1)
- Kids who are bullied can feel different, powerless, unpopular, and/or alone. They can also feel sad, lonely, or nervous; feel sick; have problems at school; or may bully other

Essential Knowledge and Skills

- compare and contrast the difference between joking, teasing, taunting, and bullying; identify how each may affect the recipient (1.l);
- list strategies for dealing with unwanted joking, teasing, and bullying (2.l);
- use strategies to describe how they could help themselves or a friend who is being teased or bullied and the positive benefits of being a helper (3.l);
- create a "no bullying" campaign for the school that includes how to report/get help. Create slogans,

Essential Understandings kids. (1.1)

- There are ways to deal with and report bullying and unwanted teasing. (2.1)
- What can kids do? (StopBullying)
 - o Nobody should be mean to others.
 - o Treat everyone with respect.
 - o Stand up for others.
- Responding (3.1)
 - o Look at the kid bullying you and tell them to stop in a calm, clear voice.
 - o If speaking up seems too hard or not safe, walk away and stay away. Don't fight back. Find an adult to stop the bullying on the spot.
 - Talk to an adult you trust. Don't keep your feelings inside. Telling someone can help you feel less alone. They can help you make a plan to stop the bullying.
 - o Stay away from places where bullying happens.
 - o Stay near adults and other kids. Most bullying happens when adults aren't around.

Conflict is different from bullying. Resolving conflict can be done without hitting, pushing, or other physical means. Adults can be asked for help.

- Conflict is a strong disagreement between people or groups. Conflict can occur when people want different things (play kickball vs. play basketball), think different things, or may be related to being able to express emotions (feelings of frustration). (1.m)
- Communication is an effective and nonviolent strategy in conflict resolution. Skills to address conflict (2.m):
 - o Able to reduce own stress quickly (calming down before addressing the conflict).
 - o Be emotionally aware of yourself and the other person (How are you feeling? How is the other person feeling?)
 - o State what the conflict is about.
 - o Communication skills
 - Listening carefully to others.

Essential Knowledge and Skills

messages for morning announcements, or posters (3.1);

Grade: Two

- create class rules that ensure positive language is used to promote healthy relationships and create a no bullying learning environment (3.1);
- define conflict and give examples of conflict (1.m);
- participate in cooperative group work and reflect on the positive feelings of working together and helping one another (2.m);
- role-play settling an argument in a responsible way (e.g., someone's turn with recess equipment)
 (3.m);
- identify ways to welcome a new student to the class (3.m).

Additional resources: <u>Health Smart Virginia</u>

o showing concern for classmates' feelings.	

Strand: Community/Environmental Health

Standards:

- 2.1.n Describe how the environment influences health.
- 2.2.n Describe ways to protect the environment.
- 2.3.n Promote a strategy to protect the environment.

Essential Understandings

The environment is everything around you—air, water, land, plants, and manmade things. The environment affects personal health, and everyone has a part in taking care of it.

- We get oxygen by breathing air. Besides oxygen, air also contains pollutants, which can be harmful. Many human activities create air pollution. Clean air to breathe and clean water for drinking, cleaning, and land/space to grow food are essential for health. (1.n)
- Infants and children are uniquely sensitive to air pollution, because their organs are developing and they have higher air per body weight intake. Health effects linked to air pollution include not only increasing the severity of respiratory diseases but also reducing lung function development and increased asthma incidence (Ambient Air Pollution: Health Hazards to Children American Academics of Pediatrics). (1.n)
- Ways children can help improve and protect the environment: (2.n)
 - o Reducing the amount of items that are used and thrown away.
 - o Reusing items when possible.
 - o Recycling cans, bottles, paper, books, and toys.
 - Enjoy the Earth—walk in the woods, plant a tree, and eat some of the delicious food it produces.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create digital posters with drawings/select pictures that illustrate how students can create a healthier environment and why it is important (1.n, 2.n);
- create a classroom, school, family, or neighborhood plan to support clean air, water conservation or reduce, reuse, and recycle (3.n).

Health Smart Virginia

Strand: Body Systems

Standards:

- 3.1.a Identify the major structures and functions of the digestive system.
- 3.2.a Describe how the body uses digested food molecules.
- 3.3.a Evaluate the role of the digestive system in providing energy for the body.

Essential Understandings

The digestive system works to help maintain a healthy body by digesting food to provide nutrients and energy for body systems (including cardiovascular and muscular systems).

- Digestion is important to deliver important nutrients throughout the body. Food is converted into energy for the body to use (for all body functions—moving, breathing, eating) or converted to waste as part of digestion. (1.a)
- The major structures/parts of the digestive system. (1.a)
 - o Mouth: Food is broken down by chewing.
 - Salivary glands: Glands in the mouth that add saliva (spit) to break down food.
 - Esophagus (a muscular, stretchy tube about ten inches long): Food is pushed from the mouth, through the esophagus, and into the stomach.
 - Stomach (stretchy sack): Food is broken down by acids, turned into a liquid substance, and then slowly empties the liquid into the small intestine.
 - Small intestine: Where the body absorbs vitamins, minerals, proteins, carbohydrates, and fats. Nutrients pass from the intestines into the blood so that the nutrients can be carried throughout the body for the energy it needs. (2.a, 3.a)
 - o Liver: The body's largest organ. The liver filters the nutrient-rich blood and stores some nutrients for energy, and it filters other nutrients out to the rest of the body. The liver also gets rid of harmful substances. (2.a, 3.a)
 - o Large intestine/rectum: Any undigested food passes into the large intestine,

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- label major parts of the digestive system and describe the main function of each part (1.a);
- explain how (i.e., write a short story on the travels of) a healthy food or beverage travels through the digestive system and how it helps the body function (2.a, 3.a);
- draw or create a digital flow chart of food moving through the digestive system (1.a, 3.a).

Additional resources:

Health Smart Virginia

Essential Understandings	Essential Knowledge and Skills
where water is removed for the body to use. At the end of the large intestine	
is the rectum, where unused waste is stored until eliminated from the body.	
(2.a)	

Strand: Nutrition

Eccontial Understandings

Standards:

- 3.1.b Explain the importance of water and healthy food choices for digestion and body function.
- 3.2.b Describe why digestion is important for body function.
- 3.3.b Identify healthy food and beverage choices to support digestion and body function.
- 3.1.c Identify whole grain and refined grain food items.
- 3.2.c Explain the difference between a whole grain and a refined grain and the nutritional benefits of eating whole grains.
- 3.3.c Explore how grains are grown and the careers related to it (e.g., agriculture, farming, food science, environmental science).
- 3.1.d Identify foods that most often cause a food allergy.
- 3.2.d Explain your school's food policy as it relates to food allergens (e.g., peanut-free classrooms, cafeteria options for children with food allergies).
- 3.3.d List alternatives (e.g., stickers, pencils, games) for school celebrations that are safe for someone with a food allergy.

Essential Understandings
Digestion of water and food extracts important nutrients, which are absorbed
throughout the body to help body systems function.

- Food is converted into energy for the body to use (for all body functions) or converted to waste. (1.b, 2.b)
- Water (the main ingredient in sweat) helps the body by regulating body temperature, helps with digestion and elimination of waste, and helps with body systems that fight illnesses. Without enough water (dehydration), a person can feel sick. Children ages four to eight should drink about five cups of water per day (five eight-ounce cups); older children seven to eight cups of water a day. Children may need more water depending on activity level and heat/humidity. (1.b, 3.b)
- Sport and vitamin/electrolyte-infused drinks can help during long, difficult exercise when a person sweats a lot. Outside difficult exercise activities,

Essential Knowledge and Skills

- explain why digestion is important and identify foods and beverages that help digestion (1.b, 2.b, 3.b);
- create a plan for when and how to consume five eight-ounce cups of water in a day (3.b);
- create a plan to eat three to eight ounces of whole grains in a day (what could be eaten for breakfast, lunch, dinner, and a snack) (1.c, 2.c)
 - o identify whether the grain is a whole

Essential Understandings

electrolyte sports drinks typically contain unhealthy amounts of added sugar. (3.b) Most people are able to properly hydrate and rehydrate by drinking water. (3.b)

• Eating foods from the five MyPlate food groups will provide the nutrients the body needs to function. The digestive system functions more efficiently with proper consumption of water and foods rich in fiber. High-fiber foods include fruits, vegetables, and whole grains. (3.b)

Whole grains help prevent some chronic diseases (heart disease) and provide dietary fiber (aid in digestion), minerals, and B vitamins essential for health, energy, and body cell function.

- Bread, pasta, breakfast cereals, grits, tortillas, popcorn, rice, and oatmeal are examples of grain products.
- The daily amount of grains each person needs can vary between three and eight ounces. At least half of the grains should be whole grains.
 - o One ounce—a fistful of cereal; a slice of bread; an ice cream scoop of cooked rice, pasta, or oats
- Grains are divided into two subgroups: *whole grains* and *refined grains*. (1.c, 2.c)
 - o Whole grains contain the entire grain kernel. Examples include whole-wheat flour, bulgur (cracked wheat), oatmeal, whole cornmeal, and brown rice. Whole grains provide dietary fiber, iron, and B vitamins.
 - o Refined grains have been milled, a process that removes the bran and germ. The process gives grains a finer texture and improves shelf life, but it also removes dietary fiber, iron, and many B vitamins. Examples of refined grain products are white flour, de-germ cornmeal, white bread, and white rice.
 - o Most refined grains are enriched. This means certain B vitamins (thiamin, riboflavin, niacin, folic acid) and iron are added back after processing. Fiber

Essential Knowledge and Skills

grain or refined grain;

- explain how grains are grown and one related career (3.c);
- list/identify foods that can cause allergies (1.d);

Grade: Three

- identify areas of the classroom or cafeteria that may need rules to be followed to support students with food allergies (2.d);
- name an item to share or an activity that can be done for school celebrations that do not involve food (3.d).

Essential Understandings	Essential Knowledge and Skills
is not added back to enriched grains. Some food products are made from mixtures of whole grains and refined grains. Grain is the harvested seed of grasses such as wheat, oats, rice, corn, sorghum, millet, rye, and barley. These grasses can be grown in a garden, but most grains come from large farms. (3.c) Agriculture-related careers (agriculture is the science or occupation of farming) (3.c) Farmers, farm workers, equipment operators, food packers and packagers o Scientists Food scientists improve food products and create new ones by researching and experimenting with combinations of raw ingredients, food sources, and food processing techniques. Environmental scientists assess the environmental health of an area; create surveys and research projects to collect and analyze soil, water, and air samples for signs of pollution or other negative environmental things.	
 People who have allergic reactions to food can be supported by helping to keep surfaces clean, keep hands clean, and getting help from an adult if needed. Common foods that may cause allergic reactions include tree nuts, peanuts, eggs, milk, fish, shellfish, soy, and wheat (gluten). (1.d) Allergic reactions may include an upset stomach, runny nose, itchy skin rash such as hives, or trouble breathing. People at risk for serious allergic reactions must be careful and need a plan for handling emergencies. Sometimes people need special medicine to stop allergic reaction symptoms from getting worse. School policies are made to reduce the chance of exposing students with allergies to something that causes the allergy. Strategies may include no nuts/peanuts in any food brought into a classroom, an "allergy-free" table in the

cafeteria, foodless classroom celebrations (a craft project, stickers, a special	
movie or video, or a book to share with the class), gluten-free (wheat-free)	
options for class parties, keeping surfaces clean in classrooms and cafeterias	
where food is eaten, washing hands before and after eating, not sharing food, and	
how to get help from an adult if someone is having a food allergy problem. (2.d,	
3.d)	

Strand: Physical Health

Standards:

- 3.1.e Describe the benefits of getting enough sleep and the consequences of the use of electronic devices (i.e., screen time) on sleep.
- 3.2.e Evaluate how sleep, physical activity, screen time, and healthy food and beverage choices affect one's personal health.
- 3.3.e Set a goal for a positive health practice and monitor progress.

Essential Understandings

Healthy choices keep the body working and growing.

- Sleep: For optimum health, getting enough sleep is as important as eating the right foods and being physically active daily. Children between the ages of 6-12 need 9-12 hours of sleep a night to maintain their health (<u>CDC</u>). (1.e)
- Sleep gives the body rest, helps thinking, improves mood, helps with energy, and helps children do better in school. (1.e)
- In order to get enough sleep, go to bed at the same time every night, be calm and quiet before going to bed, don't eat much before bedtime, and don't drink (especially caffeine) before bedtime. (1.e)
- Screen time (e.g., watching TV, playing video games) can affect sleep by making it difficult to fall asleep or not getting enough sleep during the night (sleep deficit). More than four hours of screen time has been associated with sleep disturbances and increases in body weight (1.e)
- Physical activity is fun, good for the body (helping growth and body function), and helps a person feel good. (2.e)
- Eating foods from the five MyPlate food groups will provide the nutrients the body needs to function—fruits and vegetables, proteins, carbohydrates, and dairy, along with five eight-ounce glasses of water each day. (2.e)
- Healthy choices can reduce injury and illness, provide energy and positive feelings, improve time with friends, and academic success. (2.e)
- SMART goals are specific, measurable, attainable, realistic, and timely. (2.e)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- list/identify why sleep is important for good health and consequences of electronic devices on sleep (1.e);
- create a diagram to show how sleep, physical activity, screen time, and healthy food and beverage choices affect a person's health (2.e);
- set a one-week SMART goal to improve personal health (sleep, physical activity, drinking water, monitoring screen time, or healthy food/beverage choices) (3.e);
- create a checklist of activities each day to meet the goal and write each day how/whether goal was met (3.e).

<u>Tips to Reduce Screen Time</u> <u>EVERFI</u>

Strand: Disease Prevention/Health Promotion

Standards:

- 3.1.f Describe causes of communicable disease (i.e., how viruses, bacteria, parasites, and fungi are spread).
- 3.2.f Analyze strategies for preventing communicable diseases.
- 3.3.f Develop a plan to prevent the spread of communicable disease.
- 3.1.g Describe the types and causes of noncommunicable/chronic diseases.
- 3.2.g Explain the role of heredity in some chronic diseases.
- 3.3.g Explore methods to reduce risks associated with noncommunicable/chronic disease.

Essential Understandings

Note: Teachers may want to instruct this content with the Body Systems topic.

Communicable disease (cold, flu, some viruses) is spread from one person to another. A communicable disease can be spread by germs getting on hands and then hands touching the face or touching others, spreading the disease.

- Diseases that spread from one person to another are communicable diseases. (1.f)
- Communicable disease may be caused by (1.f)
 - o Bacteria: Bacteria, such as strep throat, can be spread by an infected person's coughing or sneezing, or sharing forks, spoons, or straws (to eat or drink). Communicable diseases caused by bacteria are usually treated with antibiotics.
 - o Viruses: Viruses, such as cold and flu, can be passed to others by coughing or sneezing when tiny drops come out of the mouth and nose. These drops can be full of a virus if the person is infected. Others can breathe in the drops or get the drops on their hands. People may not know they have a virus and can spread it without knowing. That is why it is always important to cover your mouth/nose when sneezing or coughing

Essential Knowledge and Skills

- identify the causes of communicable diseases and how they are spread (1.f);
- create strategies/plan for school and home to reduce risk of spreading communicable disease (2.f, 3.f);
- list types of noncommunicable/chronic diseases and causes (1.g);
- create a diagram to explain how lifestyle choices can cause/affect chronic disease and how heredity may affect chronic disease (1.g, 2.g, 3.g);
- identify ways to reduce risk of noncommunicable/chronic disease (3.g).

Essent	ial Understandings	Essential Knowledge and Skills
	and wash hands often. Antiviral drugs (not antibiotics) can ease	Additional resources:
	symptoms and shorten length of illness.	Health Smart Virginia
О	Parasites: Parasites, such as head lice, are small insects. Parasites are	<u>EVERFI</u>
	usually spread through contact with an already infected person from	
	direct contact (head-to-head with lice) and can be spread by sharing	
	clothing (i.e., hats, scarves, coats, sport uniforms), articles (i.e., hair	
	ribbons, combs, brushes, towels, or stuffed animals), or lying on a bed,	
	couch, or pillow that has recently been in contact with an infected person.	
	Dogs, cats, and other pets do not play a role in the spread of head lice.	
O	Fungi: They are everywhere, and sometimes they are too small to see	
	with the naked eye. Molds, yeasts, and mushrooms are all types of fungi.	
	Only a few hundred of the millions of fungal species can make people	
	sick. Fungi can cause different types of illnesses, including	
	 Asthma or allergies. 	
	Rashes or infections on the skin (ringworm) and nails (finger and	
	toenails).	
	 Lung infections (pneumonia). 	
	 Bloodstream infections. 	
	Meningitis.	
To	keep germs—bacteria, viruses, parasites, and fungi—from spreading (2.f)	
O	Wash your hands often, for at least 20 seconds with soap and water,	
	especially before eating and after coughing, sneezing, or blowing your	
	nose, and after touching pets.	
O	Use a tissue or elbow for sneezes and coughs instead of the hands.	
О	Keep your hands out of your eyes, mouth, and nose.	
О	Do not share clothing (i.e., shirts, pants, hats, scarves, coats, sport	
	uniforms), personal items (i.e., combs, brushes, towels), or forks, spoons,	
	or beverage containers.	

Essential Understandings		Essential Knowledge and Skills
Noncommunicable diseases are not contagious, and many develop from unhealthy		
lifestyle choices over time or m	ay be inherited. Healthy choices begin early in	
life.		
Noncommunicable diseases	s are not spread from one person to another. They	
are mainly the result of lon	g-term lifestyle choices or may be related to	
genetics (inherited from pa	rents) and often create a need for long-term	
treatment and care. (1.g)		
 Common noncommunicable 	e diseases include cardiovascular disease,	
diabetes, cancers, and chron	nic respiratory/lung diseases. (1.g)	
 Noncommunicable/chronic 	diseases may also be related to a person's genes	
or genetics. Genetics is the	study of how certain traits are passed on from	
parents to their children, or	what is inherited from a parent. For example,	
genes control your eye colo	or, height, and facial features. Certain genes can be	
passed on from parent to ch	nild that may increase risk of	
chronic/noncommunicable	diseases. This increased risk may be referred to as	
hereditary disease (passed	from one generation to another—grandparent to	
parent to child). (2.g)		
 Chronic diseases related to 	genetics/heredity may not be preventable, but risk	
can be reduced by reducing	/eliminating common risk factors, such as tobacco	
use, alcohol use, physical in	nactivity, and unhealthy eating habits. (3.g)	
• For any disease or illness, i	dentifying it early allows for treatments to	
begin—from monitoring, to	medications, to medical procedures, if needed—	
and lifestyle changes to beg	gin or change (e.g., not smoking, avoiding alcohol,	
increasing physical activity	, making healthy food and beverage choices).	
(3.g)		

Strand: Substance Use/Misuse Prevention

Standards:

- 3.1.h Describe proper and improper use of prescription (e.g., taking medication prescribed for someone else) and nonprescription medications.
- 3.2.h Explain the consequences of disregarding medical recommendations for prescription and nonprescription medications.
- 3.3.h Create a health message about the proper use of prescription and nonprescription medications.
- 3.1.i Identify body systems affected by the use of alcohol, tobacco, nicotine products (e.g., electronic smoking devices), inhalants, and other drugs.
- 3.2.i Analyze the harmful short- and long-term effects of alcohol, tobacco, nicotine products, common household inhalants, and other drugs on body systems.
- 3.3.i Encourage others to use refusal skills to avoid alcohol, tobacco, nicotine products, inhalants, other drugs, and unknown substances.

Essential Understandings

All drugs (prescription and nonprescription) will affect the body and how it functions. Some effects are helpful, but some are harmful if used incorrectly or at all.

- Some medicines are given to a person by a doctor, or a doctor writes an order and the person picks the medicine up from a pharmacy/drug store. These are called prescription medications.
- Some medicine, such as aspirin and cough medicine, can be bought at the store without visiting the doctor. These are called nonprescription medications or over-the-counter medications.
- It is important to follow the doctor's orders for prescription medication or the safety regulations on nonprescription medicines. (1.h)
- Medicine should only be used for the illness or problem it is meant for and only
 for the person it is meant for. Many medicines can look similar, but each
 medicine has a unique function and when taken by accident, or in excess, can be

Essential Knowledge and Skills

- compare and contrast prescription and nonprescription drugs (1.h);
- create a health message for the proper use of and consequences of improper use of prescription and nonprescription medications (2.h, 3.h);
- choose one substance, draw an outline of the human body and label the effect of the substance on different body parts/systems (1.i);
- role-play effective refusal skills (3.i);
- create an antidrug message that illustrates

Essential Understandings

harmful to the body. It can lead to illness or injury of body organs. Children should only take medicine given to them by a parent, doctor, nurse, or other trusted adult. Medications may look like candy, but they are not candy. Children should not take medication from a friend (peer) or a stranger. (1.h, 2.h)

Medications should be in a locked cabinet and kept away from children.
 Childproof caps on medicine bottles help keep children from taking medication.
 Parents/guardians should dispose of any unused medications properly.

Alcohol, cannabis, tobacco, nicotine products, inhalants, and other drugs affect the body and how it functions. They also affect how people think and act. Drugs have short- and long-term effects on the mind and body. With good health, the brain continues developing until 25 years of age. Alcohol, marijuana/cannabis and other drugs affect brain development.

- Alcohol is a drug; it is a depressant, meaning that it slows down or depresses the brain. Alcohol changes a person's ability to think, speak, and see things as they really are. A person might lose their balance and have trouble walking properly. The person might feel relaxed and happy and later start crying or get in an argument. Long-term effects of alcohol include damage to the liver. People who drink alcohol are at risk for injury and can put others around them at risk, especially when driving a car. (1.i, 2.i)
- Tobacco is a plant that can be smoked in cigarettes, pipes, or cigars. It is the same plant that's in smokeless tobacco, known as dip, chew, snuff, spit, or chewing tobacco. Nicotine comes from tobacco and is an addictive substance. This means that a person becomes so used to it that they need to have it just to feel OK. Nicotine and other chemicals in tobacco cause diseases, including lung problems, heart disease, and some kinds of cancer that can cause death. Tobacco can damage the mouth, throat, lungs, kidneys, bladder, and other parts of the body, depending on how it is being ingested. Tobacco smoke can also be

Essential Knowledge and Skills

the consequences of drug use, includes an appropriate message about prescription or over-the-counter medication, and may include how to use refusal skills (2.i, 3.i).

Additional resources:

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
harmful to nonsmokers (secondhand smoke). (1.i, 2.i)	
Nicotine products, including e-cigarettes, vape pens, pods, and hookahs (water)	
pipes) are filled with tobacco, nicotine, and/or other harmful chemicals. Health	
experts report serious lung damage in people who vape, including some deaths.	
There is still much that is not known about the short- and long-term effects of	
these devices. (1.i, 2.i)	
• Inhalants are substances that give off fumes. The fumes may cause people to	
become violent and may cause headaches, sneezing, slowed breathing, nose	
bleeds, coughing, brain damage, slowed heart rate, and upset stomach. They	
may injure the lungs, olfactory system (nose), brain, nervous system, heart, and	
stomach. They may also cause death. An inhalant, such as glue or gasoline, is	
sniffed or "huffed" to give the user an immediate high. Inhalants produce a	
quick feeling of being drunk—followed by sleepiness, staggering, dizziness,	
and confusion. (1.i, 2.i)	
Note: other drugs such as marijuana/cannabis may cause lung, memory, and	
motivation problems.	
No one should smell, sniff, taste or eat unknown substances,	
including/especially white powder, because these substances may be harmful.	
• Always ask a parent or adult if there is an unknown substance before smelling,	
touching, or picking it up-Stop! Ask an adult first.	
Refusal Skills (3.i)	
Verbal	
o Say "no." There is no substitute for the word "no." It makes any refusal	
stronger.	
o Repeat the refusal.	
o Suggest an alternative (suggest something to do instead).	
o Build the friendship. Say something to let the person so they know you are	
his/her friend and want to spend time with them. (This is especially	

Essent	ial Understandings	Essential Knowledge and Skills
	important because a major reason for ineffective refusals is not wanting to	
	hurt the other person's feelings or make them mad.)	
О	Use a firm tone of voice: Be strong and business-like.	
No	onverbal	
О	Direct eye contact (look the person in the face).	
О	Serious expression (use your best "I mean it" face).	
О	Hands-off hands (put your hands up in front of you when you refuse). This	
	is especially useful in situations involving physical pressure.	
О	Leave (get out of the situation).	
О	Avoid situations where there may be pressure.	

Strand: Safety/Injury Prevention

Standards:

- 3.1.j Explain safety rules at home and when riding in a motor vehicle.
- 3.2.j Explain the importance of following safety rules at home and when riding in a motor vehicle.
- 3.3.j Discuss and develop a family safety plan to prevent injuries at home and when riding in a motor vehicle.
- 3.1.k Explain the need for personal safety strategies when interacting with others online.
- 3.2.k Identify situations when adult assistance may be needed with online interactions.
- 3.3.k Create strategies for personal safety when online.
- 3.1.1 Identify different safety drills that are important for home and school.
- 3.2.1 Demonstrate proper behavior during safety drills at school.
- 3.3.1 Practice disaster-preparedness procedures at home and at school.

Essential	Understandings
Eallowing	mulas and hains sa

Following rules and being safe are part of a healthy lifestyle.

- Home safety (1.j, 2.j)
 - o Electricity is a form of energy that can produce light, heat, or motion. When used incorrectly, electricity can cause fire, burns, or other injuries. Electrical cords carry electricity. To avoid burns or other electrical injury, when unplugging cords from an outlet hold the plug, not the cord. Never stick a finger or other objects into an outlet. Never run a cord under a carpet. Don't plug in or turn on electrical items with wet hands. Make sure kitchen counters are dry before plugging in any kitchen appliance (e.g., blender, coffee maker, can opener, toaster). Never touch outdoor power lines.
 - o To further avoid burns, do not touch or play with matches, candles, or fireplaces.
 - o Always ask an adult before using any kitchen appliances. To avoid, being pierced or cut, do not use sharp knives. Always carry scissors with the blade

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Three

- create a poster illustrating (or identify) one or more home safety rules (e.g., electricity, fire hazards, kitchen appliances and utensils, or motor vehicle safety) (1.j, 2.j);
- create a digital poster illustrating how they are safety smart!;
- demonstrate refusal skills to avoid peer pressure to engage in unsafe behaviors (e.g., not buckling up, not wearing a helmet) (2.i);
- create a family or living environment safety plan—how to evacuate and where

pointing down while walking.

- o Do not touch or play with matches, candles, or fireplaces.
- o If someone is cut or injured, wash the injury with soap and water, cover the wound with a bandage, and tell an adult.
- o Wear protective equipment (e.g., helmet, knee pads, elbow pads, wrist guards, sneakers, gloves) when riding a bike, skateboard, scooter, or rollerblading to avoid injuring your head, breaking bones or other injury.
- o Follow safety rules on community playgrounds and playground equipment.
- Emergency planning: A family plan for injury should include a location for a first aid kit, family member to call, and directions to the closest emergency center.
- Motor vehicle rider safety: To avoid brain or bodily injury or being ejected from the vehicle, sit in the rear seat (safest for children); use a car seat or booster seat as appropriate on every trip, no matter how short; properly belt the car seat/booster seat; do not play with door locks and window switches; do not get out of your seatbelt and climb around the car; and keep noises and voices low so that the driver is not distracted. (1.j, 2.j)

The Internet is an amazing place to learn new things, but there are things to be aware of to stay safe.

- Social media sites help people stay in touch, share pictures, and play games online. Meeting new people online is something to be aware of. People are not always who they say they are, and this could be dangerous. Do not talk to people you meet online without a parent present, and do not agree to meet the person, send them any pictures, or tell them personal information. Kids and adults have been tricked by online strangers. If you feel uncomfortable or do not know the person trying to contact you, tell a parent. (1.k, 2.k)
- Online safety rules may include (3.k)

Essential Knowledge and Skills

to meet in case of an emergency, list of emergency phone numbers, family member or trusted adult to call, location of the closest emergency room, first aid kit for injuries (3.i);

Grade: Three

- create a personal safety plan for being online (3.k);
- apply strategies from an online safety plan to role-play safe versus unsafe internet scenarios (e.g., friends, neighbors, family members, strangers asking for personal information) (1.k, 2.k, 3.k);
- identify different home and school safety drills and how to behave in each for safety of self and others (1.1);
- participate in school safety drills demonstrating appropriate behavior (2.1, 3.1).

Health Smart Virginia
EVERFI

Essential Understandings	Essential Knowledge and Skills
other physical means. Adults can be asked for help.	
Conflict is a strong disagreement between people or groups. (1.0)	
• Conflicts may happen at home, school, or in the neighborhood, and with family,	
friends, teachers, students, or others. Conflict can occur when people want different	
things (play kickball vs. play basketball), think different things, or may be related to	
being able to express emotions (feelings of frustration). (1.0)	
Skills to address conflict (3.0)	
o Being able to reduce your own stress quickly (calming down before addressing	
the conflict).	
o Being emotionally aware of yourself and the other person—how are you	
feeling, how is the other person feeling (you may need to walk away and come	
back to address the conflict or get assistance from an adult).	
o Stating what the conflict is about.	
o Using communication skills:	
 Listening carefully to others. 	
 Speaking directly to each other. 	
 Speaking honestly, and with kindness. 	
o Proposing solutions or compromises.	
o Agreeing on a solution or a compromise to try.	
• When using the steps to resolve a conflict, use "I" messages to tell how you feel;	
listen to each other and consider the other person's point of view; negotiate/talk	
about how to resolve the problem; and compromise on the resolution of the conflict.	
o Compromise is when all participants agree on a solution even if it is not	
everyone's first choice.	
Adults can be asked for assistance with conflicts if strategies do not work or if there	
is the potential for a physical altercation. (3.0)	

Strand: Violence Prevention

Standards:

Grade: Three

- 3.1.p Describe what bullying is and how to identify it.
- 3.2.p Identify ways to safely stand up to bullying and how to get help.
- 3.3.p Describe how to report bullying and how to advocate for oneself and for others who are bullied.
- 3.1.q Explain the benefits of positive communication on relationships with family and friends.
- 3.2.q Describe how to communicate directly, respectfully, and assertively with family and friends.
- 3.3.q Demonstrate positive ways to communicate with family and friends.

Note: Teachers may wish to invite the school counselor to co-teach lessons.

Bullying is a serious problem, and often the person being bullied does not know how to safely seek help.

- Bullying is an intentional way to hurt someone physically, emotionally or socially. It is usually targeted at the same person over time/repeatedly. (1.p)
- Bullying can be done in person or online (cyberbullying). Bullying can be verbal (teasing, name-calling, threatening to cause harm), physical (hitting/kicking/pinching, spitting, tripping/pushing, or taking or breaking someone's things), or social (not including someone on purpose, telling other children not to be friends with someone, spreading rumors about someone, or embarrassing someone in public). (1.p)
- Kids who are bullied can feel different, powerless, unpopular, and/or alone. They can also feel sad, lonely, or anxious; feel sick; have problems at school; or may bully other kids. (Stop Bullying) (1.p)

There are ways to deal with and report bullying. (2.p)

- What can kids do? (Stop Bullying)
 - o Nobody should be mean to others.
 - o Treat everyone with respect.
 - o Stand up for others.
- Not saying anything could make it worse for everyone. The kid who is bullying will

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Three

- evaluate scenarios to determine whether the behavior is bullying and what the indicators of bullying are in the scenario(s);
- for one or more of the scenarios that are bullying, describe how the person could safely stand up to the bullying, how to report/get help, how to help a person with a decision about whether to report bullying, and what a witness to the bullying could do (1.p, 2.p, 3.p);
- develop posters to show classmates how to report bullying, stand up to bullying, and help friends who are being bullied (3.p);

think it is OK to keep treating others that way. Telling is not tattling. Tattling is intended to get someone into trouble. Telling an adult about bullying is intended to help someone who is struggling or being hurt.

How to advocate for yourself appropriately if bullied. (3.p)

- o Ask the person who is bullying to stop in a calm, clear voice.
- o If speaking up seems too hard or not safe, walk away and stay away. Don't fight back. Find an adult to stop the bullying on the spot.
- Talk to an adult you trust. Tell an adult what the person who bullied did. Don't keep your feelings inside. Telling someone can help you feel less alone. They can help you make a plan to stop the bullying.
- o Stay away from places where bullying happens.
- o Stay near adults and other kids. Most bullying happens when adults are not around.
- o Avoid bullies and tell an adult you trust if you feel threatened. (3.p)
- o Review class- and school-specific reporting protocols for bullying. (3.p)
- When you see bullying, there are safe things you can do to make it stop. (3.p)
 - o Talk to a parent, teacher, or another adult you trust. Adults need to know when bad things happen so they can help.
 - o Be kind to the kid being bullied. Show them that you care by trying to include them. Sit with them at lunch or on the bus, talk to them at school, or invite them to do something. Just hanging out with them will help them know they are not alone.

Communication is an important part of any relationship. Positive relationships require communication, compromise, and understanding.

- Communication is an exchange of information through symbols, signs, or behaviors. Communication may be written, verbal, or nonverbal. Communication allows for the exchange of ideas, knowledge, understanding, what a person's needs are, and what people are experiencing that helps build healthy positive relationships. (1.q)
- Positive and respectful ways to communicate include talking at an appropriate tone,

Essential Knowledge and Skills

Grade: Three

- create stories that demonstrate effective and ineffective communication with friends and family members (stories should include evidence of verbal and nonverbal communication strategies) (1.q, 2.q);
- demonstrate positive and effective ways to communicate with friends and family members (3.q).

Additional resources:

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
waiting for a turn to speak, allowing others to provide feedback, and using appropriate	
body language (i.e., eye contact, gestures). (2.q)	
• Assertive communication is when a person expresses their point of view while being	
respectful of the views of others. Assertive communication is direct and respectful,	
using honest words and direct eye-contact, and voice is clear (not too loud or too soft).	
(2.q)	
• Verbal communication: The use of words to send an oral or written message (e.g.,	
conversation, text messages, phone calls, social media posts). Verbal communication	
skills may include: (3.q)	
o Be friendly.	
o Think before you speak.	
o Be clear.	
o Focus on your body language (nonverbal communication).	
o Be an active listener. Focus on what the other person is saying, ask questions to	
make sure you understand what they are saying, and show respect.	
 Nonverbal communication includes facial expressions, body language, gestures, and 	
tone and voice volume. Nonverbal communication skills may include: (3.q)	
o Eye contact.	
o Facial expressions (smile, frown).	
o Gestures (nodding).	
o Posture (facing person you are speaking with).	
o Tone of voice.	
o Volume of voice.	

Strand: Community/Environmental Health

Standards:

- 3.1.r Explain what happens with waste and recycled materials.
- 3.2.r Analyze how reducing, reusing, and recycling products promotes a healthier environment.
- 3.3.r Demonstrate ways to reduce, reuse, and recycle at home, at school, and in the community.

Essential Understandings

Recycling is the process of collecting and processing materials that would otherwise be thrown away as trash and turning them into new products. Recycling can benefit the community and the environment. (Environmental Protection Agency)

- Waste/garbage is picked up and taken to a landfill. In a landfill, tightly packed mounds of waste are sealed under a rubber and clay barrier, and over a liner that keeps liquids from seeping out. Landfills are not designed to break down waste, only to store it. Waste in a landfill does decompose, slowly and in a sealed, oxygen-free environment. Because of the lack of oxygen, bacteria in the waste produce methane gas, which is highly flammable and dangerous if allowed to collect underground. It is also a potent greenhouse gas and contributes to global warming. When the landfill has reached its capacity, the waste is covered with clay and another plastic shield. Above that, several feet of dirt fill is topped with soil and plants. (1.r)
- After collection, recyclables are sent to a recovery facility to be sorted, cleaned, and processed into materials that can be used in manufacturing. Recycling reduces the amount of waste in landfills. (1.r, 2.r)
- Ways to reduce, reuse, and recycle at (3.r)
 - o Home: Find out the recycling requirements from the local waste management program. Many electronics can be donated. Reusing a computer, smartphone, or video game console is a form of recycling.
 - Items that can be recycled at home include clean glass bottles; aluminum, tin and steel cans; dry paper, newspaper, magazines and

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a flowchart that shows what happens to waste and what happens to recyclables (1.r);
- research the recycling of a certain material, such as paper, plastic, or metal; create a story of an item that was reused or recycled and why it is important to reuse and recycle (2.r);
- create a plan or activity to help school or family recycle more; include things that can and cannot be recycled (3.r).

Essent	ial Understandings	Essential Knowledge and Skills
	cardboard; plastic bottles and containers, but not all plastic is recyclable.	
	Plastic bags may not be part of home pick-up services, but many grocery	
	stores have special containers to collect plastic bags for recycling.	
О	School: Reuse the second side of paper for artwork; recycle paper and	
	plastic; pick up any litter on the school grounds; throw trash in the trash bin;	
	find out about your school's recycling program; have a school clean-up day	
	(inside and outside)	
О	Community: Pick up and dispose of waste and recyclables properly; have a	
	community cleanup day.	

Strand: Body Systems

Standards:

- 4.1.a Identify the major structures and functions of the immune system.
- 4.2.a Describe how the immune system defends against germs.
- 4.3.a Describe the effects of nutrition, personal hygiene, and sleep on the immune system.

Essential Understandings

The immune system is responsible for protecting the body from germs, viruses, and other foreign substances.

- The immune system is made of tissues and organs that produce, store, and carry white blood cells that fight infections and other diseases. White blood cells are a type of blood cell that is made in bone marrow and found in the blood and tonsils, spleen, bone marrow, lymph nodes, and lymphatic vessels. They help the body fight infection. (NIH National Cancer Institute) (1.a)
- When germs, such as bacteria or viruses, invade the body, they attack and multiply. This invasion, called an infection, is what causes illness. The immune system uses white, or immune cells, for fighting infection.
 - o The largest type of white blood cells swallows up and digest germs, plus dead or dying cells. White blood cells leave behind parts of the invading germs called antigens. The body identifies antigens as dangerous and stimulates antibodies to attack them.
 - o There are also defensive white blood cells. They produce antibodies that attack the antigens left behind.
 - o Another type of defensive white blood cell attacks cells in the body that have already been infected. (CDC) (2.a)
- To strengthen the immune system, it is important to maintain healthy lifestyle. (3.a)
 - o Eat a diet high in fruits, vegetables, and whole grains, and low in saturated fat.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Four

- label/list structures where white blood cells are found (1.a);
- describe how the immune system protects the body from germs (bacteria, viruses) and other harmful substances (2.a);
- explain the concept of infection (2.a);
- list strategies for building immunity against disease (3.a).

Additional resources:

<u>Health Smart Virginia</u> EVERFI

Essential Understandings		Essential Knowledge and Skills
0	Exercise regularly.	
О	Get adequate sleep.	
О	Take steps to avoid infection, such as washing your hands frequently.	
О	Get regular medical checkups, which may include vaccines/shots.	
О	Avoid alcohol and substance use/misuse.	

Strand: Nutrition

Standards:

- 4.1.b Identify foods that contain saturated and trans fat.
- 4.2.b Describe the effects of saturated and trans fat on overall health.
- 4.3.b Identify ways to moderate intake of foods high in saturated and trans fats, including understanding the role of serving sizes.
- 4.1.c Describe the importance of protein for growth and development.
- 4.2.c Identify a variety of animal and plant-based protein foods.
- 4.3.c Design snack options that include protein, vegetables, and fruit.
- 4.1.d Determine how serving sizes, additives, preservatives, sodium, and added sugar content for a variety of foods and beverages affect health.
- 4.2.d Compare the serving sizes, additives, preservatives, sodium, and added sugar content of a variety of foods and beverages.
- 4.3.d Explain how serving sizes, additives, preservatives, and added sugar affect one's health over time (e.g., increased vulnerability to disease and obesity).

Essential Understandings

Fat is an important part of a healthy diet. Some kinds of fat are better than others and are actually good for your health. Eating more unsaturated fat than saturated and trans fat can reduce your risk of heart disease and improve "good" (HDL) cholesterol levels. Fat from foods gives you energy. Fat fuels the body, helps absorb some vitamins, and insulates the body. Some foods, including most fruits and vegetables, have almost no fat. Foods that have fat include nuts, oils, butter, milk and meats like beef. (1.b)

- Major types of fat. (1.b)
 - o **Saturated fat:** Saturated fat is found in beef, pork, and chicken. Leaner animal products, chicken breast, or pork loin often have less saturated fat. Saturated fat can be found in desserts and baked goods, cheeses and foods containing cheese, hot dogs, ice cream, fried potatoes (if fried in saturated

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- analyze a variety of food labels for saturated fat, trans fat, additives, preservatives, sodium, sugar, and serving sizes (3.b, 2.d);
- compare and contrast two food labels and/or two beverage labels (one healthier than the other), such as two cereals, and explain which would be the healthier choice and why (1.b, 2.b, 2.d, 3.d);
- analyze snack options using USDA's

fat), whole milk, and full-fat dairy foods.

- o **Trans fat:** Trans fat is naturally found in small amounts in some animal products, such as meat, whole milk, and milk products. Trans fat can be found in cakes, cookies, doughnuts, crackers, icings, margarines, and microwave popcorn. Trans fat is listed on the food label.
- O **Unsaturated fat:** Unsaturated fat is found in plant foods and fish. These fats are good for heart health, especially when they are used in place of saturated and trans fats. Unsaturated fats are found in salmon, avocados, olives, and walnuts, and vegetable oils like soybean, corn, canola, and olive oil.
- Saturated fat and trans fat can raise cholesterol and increase the chance of getting heart disease and/or diabetes. (2.b)
- Choose the right amount of fat and the right kind of fat—lean meats, fish, and heart-healthy oils. Reduce the amount of processed foods, fast foods, and fried foods. (3.b)

Protein is one of the five MyPlate food groups and is important for building, maintaining, and replacing tissues in the body.

- Protein builds, maintains, and replaces the tissues in the body. Muscles, organs, skin, and the immune system are made up mostly of protein. (1.c)
- Protein is in foods like eggs, meat, poultry (chicken), seafood, milk, and plant-based proteins. (2.c)
- Plant-based proteins include nuts (peanuts and almonds), beans, soybeans (soy products, tofu, and edamame), quinoa, lentils, chickpeas, beans with rice, and dark leafy greens and vegetables. (2.c)

Eating a variety of healthy foods every day contributes to good overall health. Food

Essential Knowledge and Skills

MyPlate recommendations (3.c);

• explain the importance of protein for body function and list examples of foods with protein (1.c);

Grade: Four

- create a snack that includes lean protein, fruit, and/or vegetables (3.c);
- compare and contrast a variety of food labels for serving size and sugar content (2.d);
- explain the effects of saturated fat and trans fat on overall health and how to use serving size to moderate intake (1.b, 3.b).

Additional resources:

<u>Health Smart Virginia</u> EVERFI

Essential Understandings	Essential Knowledge and Skills
labels should be evaluated to make nutritional decisions.	
Additives and preservatives: Used to add nutrients, enhance flavor, enhance the	
appearance or texture of a product, or used to extend a product's shelf life.	
Some of these substances have been associated with adverse health effects and	
should be avoided, while others are safe and can be consumed with minimal	
risk. (1.d, 2.d)	
o Artificial food coloring: More research is needed to evaluate the safety and	
potential health effects of artificial food coloring for humans.	
o Sodium nitrite is found in bacon, sausage, hot dogs, and ham. A higher	
intake of nitrites may be linked to higher risk of several types of cancer.	
o High-fructose corn syrup is found in soda, juice, candy, breakfast cereals,	
and snack foods. High-fructose corn syrup is associated with weight gain	
and diabetes.	
o Artificial sweeteners (e.g., Aspartame, Sucralose, Acesulfame K.,	
Saccharine) are used to enhance sweetness while reducing caloric content.	
Certain types may cause mild side effects like headaches but are generally	
considered safe in moderation.	
o Natural sugars (e.g., stevia, monk fruit).	
o Artificial flavors are chemicals that mimic the taste of other ingredients.	
Some animal studies have found that artificial flavoring may be toxic to	
bone marrow cells. More research is needed to evaluate the effect in	
humans.	
• Sodium: Most people get the amount of sodium they need. Packaged, canned,	
and processed foods available in the supermarket, in restaurant foods, and in	
fast foods tend to have larger amounts of sodium. Too much sodium can	
increase the risk for high blood pressure. The American Heart Association	
recommends about 1500 milligrams of sodium per day (less than one-quarter	
teaspoon). (1.d, 2.d)	

Essential Understandings	Essential Knowledge and Skills
Added sugar: Sweeteners and syrups that are added when foods or beverages	
are processed or prepared (e.g., candy, soft drinks, baked goods, processed	
foods); add calories but no nutrients. Eating too much added sugar is linked	
to weight gain and disease like obesity, diabetes, and heart disease. The	
American Heart Association recommends a maximum of 150 calories (37.5	
grams or 9 teaspoons) for men and 100 calories (25 grams or 6 teaspoons)	
for women of added sugar a day. One 12-oz can of cola contains about 140	
calories from sugar and a regular-sized Snickers bar contains 120 calories	
from sugar.	
Serving sizes: Nutrition Facts labels list a serving size, which is an amount of	
food, such as one cup of cereal or two cookies. Nutrients listed are based on one	
serving size (which may not be the whole package/container). (1.d, 2.d, 3.d)	
o If there are 30 cookies in a box and 15 servings in a box of cookies, then the	
nutrients listed are for two cookies, not all 30 cookies.	
o Serving sizes help people understand how much they are eating. If you ate	
four cookies, that would be two servings. That would mean twice the	
nutrients listed but also twice the calories and twice the sugar, additives,	
preservatives, and sodium listed in the food or beverage.	

Strand: Physical Health

Standards:

- 4.1.e Describe the benefits of rest, sleep, and a physically active lifestyle.
- 4.2.e Explain how physical activity, rest, and sleep affect physical and mental health.
- 4.3.e Create a plan to meet the daily requirement for physical activity, rest, and sleep, using valid and reliable resources.

Essential Understandings

A balanced healthy lifestyle includes sufficient physical activity, healthy food choices, and sleep.

- Physical activity is movement that makes the heart beat faster. Physical activity helps control weight, builds lean muscle, reduces fat, promotes strong bone, muscle and joint development, and decreases the risk of obesity. Physical activity also helps people feel better. (1.e, 2.e)
- Recommendations for physical activity: 60 minutes daily of moderate to vigorous physical activity (activity that increases heart rate). (3.e)
- Sleep helps your brain, mood, and dealing with stress. Lack of sleep can affect mood, energy, attention, and academic performance. (1.e, 2.e)
- Elementary students between the ages of 6-12 need 9-12 hours of sleep a night to maintain health (<u>How Much Sleep Do I Need</u>). (3.e)
- In order to get enough sleep, go to bed at the same time every night, avoid screen time right before bedtime, be calm and quiet before going to bed, don't eat much before bedtime, and don't drink (especially caffeine) before bedtime. (3.e)
- Rest is a state of being calm but still alert to surroundings. Rest can include stopping activity and relaxing, sitting or lying down, eyes open or shut, and being quiet. Rest does not involve napping or sleeping, but resting can lead to sleeping. There is not a recommendation for rest; however, the body usually gives signs that rest is needed, such as feeling tired. (1.e, 2.e)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a physical activity plan for 60 minutes a day, including inside and outside of school activities (1.e, 2.e, 3.e)
 - o track activities for three days to one week and reflect on meeting the goal of 60 minutes per day.
 - o reflection should include why physical activity is important and if they noticed a difference in how they felt when getting enough physical activity;
- create a sleep and rest plan (1.e, 2.e, 3.e)
 - o track rest and sleep for three days to one week and reflect on meeting sleep goal of 9-12 hours each night
 - o reflection should include why rest and sleep are important and whether they noticed a difference in how they felt when getting enough sleep.

Essential Understandings	Essential Knowledge and Skills
	Additional resources:
	Health Smart Virginia
	<u>EVERFI</u>

Strand: Disease Prevention/Health Promotion

Standards:

- 4.1.f Describe causes of communicable disease (i.e., how viruses, bacteria, parasites, and fungi are spread).
- 4.2.f Analyze strategies for preventing communicable diseases.
- 4.3.f Develop a plan to prevent the spread of communicable disease.
- 4.1.g Describe the types and causes of noncommunicable/chronic diseases.
- 4.2.g Explain the role of heredity in some chronic diseases.
- 4.3.g Explore methods to reduce risks associated with noncommunicable/chronic disease.

Essential Understandings

Note: Teachers may want to instruct this content with the Body Systems topic.

Communicable disease (cold, flu, some viruses) is spread from one person to another and can be spread by germs getting on hands and then hands touching the face or touching others spreading the disease.

- Diseases that spread from one person to another are communicable diseases. (1.f)
- Communicable disease may be caused by (1.f)
 - o Bacteria: Bacteria, such as strep throat, can be spread by an infected person's coughing or sneezing, or sharing forks, spoons, or straws (to eat or drink). Communicable diseases caused by bacteria are usually treated with antibiotics.
 - o Viruses: Viruses, such as cold and flu, can be passed to others by coughing or sneezing when tiny drops come out of the mouth and nose. These drops can be full of a virus if the person is infected. Others can breathe in the drops or get the drops on their hands. People may not know they have a virus and can spread it without knowing. That is why it is always important to your cover mouth/nose when sneezing or coughing

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- identify communicable disease causes and how they are spread (1.f);
- create strategies/plans for school and home to reduce risk of spreading communicable disease (2.f, 3.f);
- list types of noncommunicable/chronic diseases and causes (1.g);
- create a diagram to explain how lifestyle choices can cause/affect chronic disease and how heredity may affect chronic disease (1.g, 2.g, 3.g);
- identify ways to reduce the risk of noncommunicable/chronic disease. (3.g).

	nose, and after touching pets.		
(Jse a tissue or elbow for sneezes and coughs instead of your hands.	
(Keep your hands out of your eyes, mouth, and nose.	
(Do not share clothing (i.e., shirts, pants, hats, scarves, coats, sport	
		iniforms), personal items (i.e., combs, brushes, towels), or forks, spoons,	
	or beverage containers.		

Esse	ential Understandings	Essential Knowledge and Skills
Nor	communicable diseases are not contagious, and many develop from unhealthy	
lifes	tyle choices over time or may be inherited. Healthy choices begin early in	
life.		
•	Noncommunicable diseases are not spread from one person to another. They	
	are mainly the result of long-term lifestyle choices or may be related to	
	genetics (inherited from parents) and often create a need for long-term	
	treatment and care. (1.g)	
•	Common noncommunicable diseases include cardiovascular disease,	
	diabetes, cancers, and chronic respiratory/lung diseases. (1.g)	
•	Noncommunicable/chronic diseases may also be related to a person's genes	
	or genetics. Genetics is the study of how certain traits are passed on from	
	parents to their children, or what is inherited from a parent. For example,	
	genes control your eye color, height, and facial features. Certain genes can be	
	passed from parent to child that may increase risk of	
	chronic/noncommunicable diseases. This increased risk may be referred to as	
	hereditary disease (passed from one generation to another—grandparent to	
	parent to child). (2.g)	
•	Chronic diseases related to genetics/heredity may not be preventable, but risk	
	can be reduced by reducing/eliminating common risk factors, such as tobacco	
	use, alcohol use, physical inactivity, and unhealthy eating habits. (3.g)	
•	For any disease or illness, identifying it early allows for treatments to	
	begin—from monitoring, to medications, to medical procedures, if needed—	
	and lifestyle changes to begin or change (e.g., not smoking, avoiding alcohol,	
	increasing physical activity, making healthy food and beverage choices).	
	(3.g)	

Strand: Substance Use/Misuse Prevention

Standards:

- 4.1.h Compare the short- and long-term consequences of the use of alcohol, tobacco, nicotine products, marijuana, inhalants, and other drugs.
- 4.2.h Examine factors that can influence an individual's decision to use or avoid alcohol, tobacco, nicotine products, marijuana, inhalants, and other drugs.
- 4.3.h Determine the importance of resistance/refusal skills in saying no to alcohol, tobacco, inhalants, and other drugs.
- 4.1.i Identify effective verbal and nonverbal communication skills to resist/refuse alcohol, tobacco, nicotine products, marijuana, inhalants, and other drugs.
- 4.2.i Describe the effects of peer pressure on use of alcohol, tobacco, nicotine products, marijuana, inhalants, and other drugs.
- 4.3.i Demonstrate effective refusal skills for situations involving peer pressure to use harmful substances.

Essential Understandings

All drugs (medicines and medications) will affect the body and how it functions. The brain continues developing until roughly 25 years of age. Alcohol, drugs, cannabis, insufficient physical activity, and poor nutrition affect brain development. Drugs that are misused or abused have negative and sometimes lasting effects on body systems.

- Alcohol is a depressant. It slows down or depresses the brain; changes a person's ability to think, speak, and see things as they really are. A person might lose their balance and have trouble walking properly; might feel relaxed and happy and later start crying or get in an argument. Drinking too much alcohol can lead to alcohol poisoning, which can cause death. Long-term use of alcohol will cause liver failure, cancer, and affect motor (movement) functions. (1.h)
- Tobacco: Tobacco in any form is unsafe. Nicotine is found in tobacco and tobacco products. It affects brain function and leads to addiction. Nicotine is

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a chart with body organs/systems listed and identify harmful substances and how they affect the organ/system (1.h);
- describe how alcohol, tobacco, inhalants, and marijuana/cannabis affect the body and mind (1.h);
- describe reasons why students may start using drugs, include a description of peer pressure (2.h, 2.i);
- list reasons why students avoid using drugs (3.h);
- create a positive message about refusing

quickly absorbed into the bloodstream. Within ten seconds of entering the body, nicotine reaches the brain. It causes the brain to release adrenaline, creating a buzz of pleasure and energy. The buzz fades quickly and leaves the person feeling tired, a little down, and wanting the buzz again. This feeling is what makes a person light up the next cigarette. A person will need to smoke more cigarettes to get the nicotine's pleasurable effects and prevent withdrawal symptoms. This cycle repeats again and again, leading to addiction. Addiction keeps people smoking even when they want to quit. Smoking harms nearly every organ of the body causing many diseases, including cancer, heart disease, and respiratory (lung) diseases. (CDC)(1.h)

- Nicotine products: Nicotine products, including e-cigarettes, vape pens, vape pods, and hookahs (water pipes) are filled with tobacco, nicotine, and other harmful chemicals. The use of e-cigarettes is unsafe for all ages. E-cigarettes are advertised as "less harmful" and have flavors to attract kids. Most e-cigarettes contain nicotine. Nicotine is highly addictive and can harm adolescent brain development, which continues into the early to mid-20s. Young people who use e-cigarettes may be more likely to smoke cigarettes in the future. Health experts report serious lung illnesses in some people who vape, including some deaths. There is still much that is not known about the short- and long-term effects of these devices. (NIDA/CDC) (1.h)
- Marijuana (NIDA): the dried leaves and flowers of the *Cannabis* plant. Of the more than 500 chemicals in marijuana, THC (*delta-9-tetrahydrocannabinol*) is responsible for the drug's mind-altering effects. THC is the ingredient that makes a person high. THC distorts how the mind perceives the world. Marijuana/cannabis is used by smoking, inhaling smoke, inhaling vapor through devices and can be in tea and foods. (1.h)
 - o Using marijuana/cannabis can cause breathing problems, increased heart rate, and intense nausea and vomiting.

Essential Knowledge and Skills

drugs or alcohol; include a slogan or catchphrase that can empower others and write a brief summary about the picture (3.i);

Grade: Four

• apply and justify use of refusal/resistance skills to a variety of situations (1.i, 2.i, 3.i).

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
o Short-term effects on the brain: When a person smokes marijuana/cannab	ois,
THC quickly passes from the lungs into the bloodstream. The blood carrie	es
the chemical to the brain and other organs throughout the body. Effects	
include:	
 Altered senses (for example, seeing brighter colors). 	
 Altered sense of time. 	
Changes in mood.	
 Impaired body movement. 	
 Difficulty with thinking and problem-solving. 	
 Impaired memory. 	
 Hallucinations, delusions, and psychosis possible when taken in high 	
doses.	
o Long-term effects on the brain: Marijuana/cannabis affects brain	
development. It may impair thinking, memory, motivation, and learning	
functions and affect how the brain builds connections between the areas	
necessary for these functions. Researchers are still studying how long	
marijuana's effects last and whether some changes may be permanent. (1.	.h)
Inhalants: Inhalants are various products—such as nail polish remover, paint	
thinner, spray paints, markers, glues, butane lighters, and cleaning fluids—	
found in the home or workplace. They contain dangerous substances that have	re l
psychoactive (mind-altering) properties when inhaled. These products are not	t
intended for getting high, but some people use them for that purpose. When	
these substances are used for getting high, they are called inhalants. Inhalants	S
are the only substance used more by younger than by older teens. (1.h)	
o Short-term effects may include dizziness, disorientation, emotional	
volatility, loss of coordination, distortion of perception, cognitive	
impairment (thinking is impaired), hallucinations, tremors, lightheadedness	ss,
diminished sensitivity to pain, and slurred speech.	

making a certain choice, good or bad. (2.i)

Essential Understandings	Essential Knowledge and Skills
o Long-term effects of inhalant use may include liver and kidney damage,	
hearing loss, bone marrow damage, loss of coordination and limb	
spasms (from nerve damage), delayed behavioral development (from brain	
problems), and brain damage (from cut-off oxygen flow to the brain).	
It is possible to overdose on inhalants, can cause seizures and coma, and can	
even be fatal. Many solvents and aerosol sprays contain a large amount of	
chemicals. Sniffing these products can cause the heart to stop within minutes.	
Known as sudden sniffing death, this can happen to otherwise healthy young	
people the first time they use an inhalant. Using inhalants with a paper or plastic	
bag or in a closed area may cause death from suffocation (being unable to	
breathe).	
Note: other drugs that are a concern in the community may be included.	
 No one should smell, sniff, taste or eat unknown substances, 	
including/especially white powder, as these substances may be harmful.	
Always ask a parent or adult about the composition of an unknown substance	
before smelling, touching, or picking it up-Stop! Ask First.	
The adage that "everyone is doing it" is incorrect. It is important to be able to say no	
and create a safe and drug-free environment. (2.h)	
• Reason's people use: Curiosity, peer pressure, a desire to fit in with friends, a	
desire to be liked, appear older, avoid conflict, experiment, see others doing it,	
have easy access to it, are influenced by social media, use to control weight, and	
look cool.	
• Pressure is the feeling that you are being pushed toward making a certain	
choice—good or bad.	
A peer is someone in your own age group.	
• Peer pressure is the feeling that someone your own age is pushing you toward	

Essent	ial Understandings	Essential Knowledge and Skills
Resear	ch shows using refusal skills is one of the best ways to prevent substance	
abuse.	(3.h)	
• Re	asons people avoid: They get involved in activities, talk to trusted adults,	
pr	actice how to say no, set goals to achieve, understand the consequences, and	
ma	ike a conscious choice not to start.	
• Re	fusal Skills (1.i)	
Ve	rbal	
О	Say "no." There is no substitute for the word "no." It makes any refusal	
	stronger.	
О	Repeat the refusal.	
О	Suggest an alternative (suggest something to do instead).	
О	Build the friendship. Say something to let the person know you are their	
	friend and want to spend time with them. This is especially important	
	because a major reason for ineffective refusals is not wanting to hurt the	
	other person's feelings or make them mad.	
О	Use a firm tone of voice: Be strong and business-like.	
No	onverbal	
О	Direct eye contact (look the person in the face).	
О	Serious expression (use your best "I mean it" face).	
О	Hands-off hands (put your hands up in front of you when you refuse). This	
	is especially useful in situations involving physical pressure.	
О	Leave (get out of the situation).	
О	Avoid situations where there may be pressure.	

Strand: Safety/Injury Prevention

Standards:

- 4.1.j Explain appropriate protective gear when engaged in physical activities such as cycling, rollerblading, skateboarding, and water sports.
- 4.2.j Explain the health consequences of not following safety practices for recreational activities.
- 4.3.j Promote safe participation in recreational activities.
- 4.1.k Describe safe and unsafe use of the Internet, including online gaming.
- 4.2.k Explain the consequences of unsafe Internet use.
- 4.3.k Develop strategies for safe Internet and online gaming use.

Essential Understandings

Safety measures are put in place to help prevent accidents and tragic events from happening.

- Biking: Wear a helmet; wear bright color clothing; only bike on roads or trails you are comfortable on; ride on a sidewalk, trail, or the right side of the road; use hand/arm signals to let others know you are turning; stop at stop signs; walk bike across road; and look for cars before crossing the road. (1.j)
- Recreational equipment (scooter, skateboard, inline skates/rollerblading): Wear a helmet, elbow and knee pads, wrist guards, and sneakers; be aware of others when using a skate park; only ride in appropriate areas; and be aware of others on sidewalks. (1.j)
- Water: Learn how to float, and take swim lessons; wear a personal floatation device (lifejacket) when swimming if not comfortable in the water or when boating; do not swim alone; follow a lifeguard's directions, walk around the pool, and don't push or jump on others. Know the laws for wearing a personal floatation device when swimming or boating. (1.j)
- Falling can happen when biking, skateboarding, or using other recreational activities. Protective equipment helps prevent or lessen the severity of brain

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a poster illustrating someone handling a situation safely versus unsafely (i.e., riding bike with helmet or without a helmet) (1.j);
- create and perform a skit to convince friends to wear safety gear and include the hazards of not following safety practices (2.j, 3.j);
- list/identify safe and unsafe uses of Internet/online gaming; explain what to do if someone asks for personal information or wants to meet (1.k, 2.k);
- create a personal safety plan for being online (internet use/online gaming) (3.k);
- identify locations where swim lessons are

Essential Understandings	Essential Knowledge and Skills
and body injuries that may result from falling. Safety is not just about the	provided in your community.
person doing the activity like biking; bikers need to be aware of the	
movements of others (e.g., cars, pedestrians, other bikers). (2.j)	Additional resources:
	Health Smart Virginia
The Internet is an amazing place to learn new things; but there are things to be	EVERFI
aware of to stay safe. People are not always who they say they are online.	
• Internet: Only visit sites approved by a parent/guardian, teacher, or other	
trusted adult. Do not provide personal information on websites; don't give	
your name, age, where you live, what school you go to, or a phone number.	
Ask a parent/guardian before providing information on a website, and tell an	
adult if something makes you feel uncomfortable (1.k)	
 Social media sites help people stay in touch, share pictures, and play games 	
online. Meeting new people online is something to be aware of. People are	
not always who they say they are, and this could be dangerous. Do not talk to	
people you meet online without a parent present, and do not agree to meet the	
person, send any pictures, or tell them personal information. Kids and adults	
have been tricked by online strangers. If you feel uncomfortable or do not	
know a person trying to contact you, tell a parent. (1.k, 2.k)	
• Online safety rules (3.k)	
o Tell my parents or other adult if something online makes me	
uncomfortable or if a stranger/someone I do not know wants to talk with	
me, meet me, or wants pictures.	
o Tell my parents before sharing any personal information (i.e., name,	
address, phone number, school).	
o I will not meet someone in person that I have only met online.	
o I will not be mean or rude online.	

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 4.1.1 Identify feelings and emotions associated with loss and grief and their impact on one's health.
- 4.2.1 Describe healthy coping skills for handling the emotions of loss and grief.
- 4.3.1 Identify strategies and resources, including understanding the role of school counselors, psychologists, and social workers, to manage feelings that may result from loss and grief.
- 4.1.m Describe self-concept and how it can be influenced by internal and external factors.
- 4.2.m Describe how developing a healthy self-concept is an ongoing and essential life skill.
- 4.3.m Explain how challenges and successes provide learning experiences to help develop a healthy self-concept.
- 4.1.n Identify effective verbal and nonverbal communication skills (e.g., speaking, listening, eye contact, body language).
- 4.2.n Explain how bullying affect individuals and one's health.
- 4.3.n Practice initiating, sustaining, and ending conversations.
- 4.1.0 Recognize that every person is different and has different needs.
- 4.2.0 Analyze positive strategies for resolving conflict.
- 4.3.0 Describe ways to show compassion for others.

Essential Understandings	Essential Knowledge and Skills
Note: Teachers may want to invite the school counselor, social worker, or	In order to meet these standards, it is expected
psychologist to co-teach this content.	that students will
	describe the feelings/emotions associated
Emotions are part of human nature. Everyone experiences different emotions. Some	with loss and grief (1.l);
emotions are comfortable, and some may be uncomfortable. It is important to	list healthy coping skills for handling loss
express emotions in a healthy way.	and grief (2.1);
• The death of a loved one is a big change and may be difficult to understand.	write a letter to a friend to help them with
People cope and grieve in different ways. Coping and grieving are two	loss and grief, including coping skills and
words that describe the way people adjust to or deal with a difficult change	adults who can help at home and in school

or loss in their lives. (1.1)

- Loss and grief may cause sadness, anger, fear, stomachaches, headaches, and difficulty sleeping. These emotions and responses may affect a person's ability to concentrate and learn in school. (1.1)
- Being aware of emotions, noticing them, and naming them as they are felt can help people manage their emotions. (2.1)
- Naming emotions, noticing how long emotions last, and talking about them with others are ways to manage emotions. (2.1, 3.1)
 - o Talk to a parent or other trusted adult (i.e., school counselor, social worker, or psychologist) or a friend.
 - School counselors can help students cope with change, develop positive feelings, develop self-knowledge, make effective decisions, develop relationship skills, make healthy choices, and resolve conflicts.
 - School social workers help students cope with crisis situations and conflict and help students and families access community resources.
 - School psychologists help students with academic, mental health and behavioral needs.
 - o Think positively. Think about one or two good things about yourself or the situation.
 - o Play a game or sport, ride a bike, dance, run, take a walk, make art or music, read, write about the feelings, or spend time with someone you like.

A healthy self-concept can positively affect life choices and relationships. Self-concept refers to how you see yourself in relation to your environment, relationships with others, and cultural beliefs.

• Self-concept is the mental image one has of oneself; individual perceptions

Essential Knowledge and Skills

(3.1);

• create a picture of healthy self-concept (Who am I?), including strengths, weaknesses, attributes, traits, and relationships (individuals and groups) (1.m);

Grade: Four

- explain how facing challenges and solving problems can help build a healthy self-concept (3.m);
- list effective communication skills and use them to practice role-plays of different situations (1.n, 2.n, 3.n);
- use a Venn diagram to compare and discuss attributes, traits, strengths, and weaknesses for two different people (1.0);
- develop posters or other media that can be shared in the school to show classmates how to report bullying, stand up to bullying, and how to show compassion for anyone being bullied (2.0, 3.0).

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
of our behavior, abilities, and unique characteristics; and answers, "Who am I?" (1.m)	
 Self-concept includes perceived personal attributes, personality traits, 	
strengths, weaknesses, relationships with others, and membership in social groups. (1.m)	
• Self-concept is influenced by internal and external factors. Influences can be positive and negative. (1.m)	
o Internal factors include what you think about yourself and/or others, what you pay attention to, how you interpret the events and circumstances of your life, and how you reframe both failure and success.	
 External sources include the environment you spend time in and interactions with others. 	
o Successes, challenges, and failures all contribute to development of self-concept. Learning from successes, challenges, and failures can positively affect a healthy self-concept. (3.m)	
 Self-concept begins at birth and continues to develop throughout life. Self- 	
concept effectively determines what a person will do or choose not to do at any given moment in time. (2.m)	
Communication is an important part of any relationship. Positive relationships	
require communication, compromise, and understanding.	
 Positive and respectful ways to communicate include talking at an appropriate tone, waiting for a turn to speak, allowing others to provide 	
feedback, and body language (eye contact, gestures). (1.n)	
• Effective communication gives the best chance of successfully delivering a	
message. (1.n)	
 Verbal communication: The use of words and sounds to send an oral or 	
written message (e.g., conversation, text messages, phone calls, social media	

Essential Understandings	Essential Knowledge and Skills
posts). This is generally used to describe oral communication. Verbal	
communication skills may include (1.n)	
o Think before you speak/write.	
o Be clear.	
o Focus on your body language (nonverbal communication).	
o Be an active listener.	
 Active listening: Focus on what the other person is saying, make 	e sure
you understand what they are saying (ask questions), and show	
respect.	
 Nonverbal communication includes facial expressions, body language, 	
gestures, and tone and voice volume. Nonverbal communication skills	may
include (1.n)	
o Eye contact.	
o Facial expressions (smile, frown).	
o Gestures (nodding).	
o Posture (facing the person with whom you are speaking).	
o Tone of voice.	
o Volume of voice.	
Everyone is unique and should be respected for their different strengths and	
characteristics. Showing respect for others includes being kind, considerate, an	nd
cooperative.	
 Everyone has different strengths that make them special, unique and dif 	fferent
from others. Personal strengths are the things a person is good at and like	kes to
do. Understanding that everyone has different strengths that make each	of us
unique helps us to understand one another. (1.0)	
Bullying is a serious problem, and often, the person being bullied does	not
know how to safely seek help. (StopBullying.gov)	

Understandings	Essential Knowledge and Skills
Bullying is an intentional way to hurt someone's feelings. It is usually	
targeted at the same person over time. Bullying can be done in person or	
online (cyberbullying). Bullying can be verbal (teasing, name-calling,	
threatening to cause harm), physical (hitting/kicking/pinching, spitting,	
tripping/pushing, or taking or breaking someone's things), or social	
("cancelling" a person—leaving someone out on purpose, telling other	
children not to be friends with someone, blocking someone on social	
media or public shaming, spreading rumors about someone, or	
embarrassing someone in public). (2.0)	
Kids who are bullied can feel different, powerless, unpopular, and/or	
alone. They can also feel sad, lonely, or nervous; feel sick; have	
problems at school; or may bully other kids. (2.0)	
owing compassion can include actively listening to others to understand	
at they are experiencing or feeling, treating others as you would want to	
treated, and what you can say and do to support them. (3.0)	
ote: Reminder that all school personnel are mandated reporters. Child	
recognition training is required for initial licensure and renewals; training	
ces are available at the Virginia Department of Education.	
	targeted at the same person over time. Bullying can be done in person or online (cyberbullying). Bullying can be verbal (teasing, name-calling, threatening to cause harm), physical (hitting/kicking/pinching, spitting, tripping/pushing, or taking or breaking someone's things), or social ("cancelling" a person—leaving someone out on purpose, telling other children not to be friends with someone, blocking someone on social media or public shaming, spreading rumors about someone, or embarrassing someone in public). (2.0) Kids who are bullied can feel different, powerless, unpopular, and/or alone. They can also feel sad, lonely, or nervous; feel sick; have

Strand: Violence Prevention

Standards:

- 4.1.p Explain the difference between teasing and taunting and when teasing and taunting can be considered bullying.
- 4.2.p Explain the importance of seeking assistance from a trusted adult when in unsafe or uncomfortable situations.
- 4.3.p Promote strategies to report bullying and aggressive behaviors and to safely advocate and stand up for others.
- 4.1.q Describe steps to resolve a conflict.
- 4.2.q Demonstrate effective communication skills.
- 4.3.q Demonstrate strategies to resolve conflict in a variety of situations.
- 4.1.r Recognize harmful or abusive relationships.
- 4.2.r Explain why bullying or teasing someone who may have different needs or abilities is inappropriate.
- 4.3.r Identify trusted adults at home, in school, and in the community who can help with unsafe or uncomfortable situations.

Essential Understandings

Everyone does not enjoy teasing, and people do not like being taunted. These situations can make people feel bad and may be considered bullying. Bullying is never the right thing to do.

- Teasing is a way to joke with friends that is not intended to be harmful and is stopped when someone is uncomfortable. However, teasing can hurt. Unwanted teasing should be addressed. Teasing may be considered a form of verbal bullying if it becomes harmful and is not stopped. Tell the person teasing how it makes you feel if you feel safe. Get help from an adult if the teasing does not stop or the teasing makes you feel unsafe. (1.p)
- Taunting is intended to hurt someone's feelings and can be seen as a form of verbal bullying. Taunting may include mocking, insulting, hassling, or ridiculing (making an object of laughter, belittling). (1.p)
- It is never acceptable to bully anyone for any reason. Children with disabilities—such as physical, developmental, intellectual, emotional, and sensory disabilities—are at an

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- explain the differences and similarities between teasing, taunting, and bullying (1.p);
- explain why people with different needs or abilities are at higher risk to be bullied and how to help someone who is being bullied (2.p);
- role-play scenarios dealing with reporting and/or coping with bullying situations (3.p);
- list conflict resolution skills and

increased risk of being bullied. Any number of factors—physical vulnerability, social skill challenges, or intolerant environments—may increase the risk. Kids with special health needs, such as epilepsy or food allergies, also may be at higher risk of being bullied. Bullying can include making fun of kids because of their allergies or exposing them to the things that can cause an allergic reaction. In these cases, bullying is not just serious, it can mean life or death. One reason children and young adults with special health care needs might be at higher risk for bullying is a lack of peer support. Having friends who are respected by peers can prevent and protect against bullying. (Bullying and Youth with Disabilities and Special Health Needs) (2.p)

- There are ways to deal with and report bullying and unwanted teasing and taunting. What can kids do? (stopbullying.gov) (3.p)
 - o Nobody should be mean to others.
 - o Treat everyone with respect.
 - o Stand up for others.
- Not saying anything could make it worse for everyone. The kid who is bullying will think it is OK to keep treating others that way. How to advocate for self appropriately if bullied: (3.p)
 - o Ask the person who is bullying to stop in a calm, clear voice.
 - o If speaking up seems too hard or not safe, walk away and stay away. Do not fight back. Find an adult to stop the bullying on the spot.
 - o Talk to an adult you trust. Do not keep your feelings inside. Telling someone can help you feel less alone. They can help you make a plan to stop the bullying.
 - o Stay away from places where bullying happens.
 - o Stay near adults and other kids. Most bullying happens when adults are not around.
- Avoid bullies and tell a trusted adult if you feel threatened. (3.p)
- Review class- and school-specific reporting protocols for bullying. (3.p)
 - o Example: PBIS Bully Prevention's Stop Walk and Talk Strategy—(1) Indicating through words and gesture to stop, (2) walking away if the problem continues, and

Essential Knowledge and Skills

apply to a variety of conflict situations (1.q, 2.q, 3.q);

Grade: Four

- create a story about someone who was able to recognize and get out of an abusive friendship (1.r, 2.r);
- identify five trusted adults by tracing around the hand on a piece of paper and on the drawing of each finger write down a grownup that can be trusted; on the palm area, students can describe a trusted adult or identify why seeking help from a trusted adult is important (2.r, 3.r).

<u>Virginia</u> EVERFI

Essential Understandings	Essential Knowledge and Skills
finally (3) talking to an adult if the issue is still not resolved.	
• When you see bullying, there are safe things you can do to make it stop. (3.p)	
o Talk to a parent, teacher, or another adult you trust. Adults need to know when bad	
things happen so they can help.	
Be kind to the kid being bullied. Show them that you care by trying to include them.	
Sit with them at lunch or on the bus, talk to them at school, or invite them to do	
something. Just hanging out with them will help them know they are not alone. (3.p)	
Resolving arguments/disagreements/conflict can be done without hitting, pushing, or other	
physical means. Adults can be asked for help if the conflict cannot be resolved.	
Conflict can occur when people want different things (play kickball vs. play	
basketball), think different things, or may be related to being able to express emotions	
(feelings of frustration).	
Skills to address conflict (1.q)	
o Be able to reduce your own stress quickly (calm down before addressing the	
conflict).	
o Be aware of how you and the other person are feeling.	
o State what the conflict is about.	
o Use clear communication skills (2.q):	
Listen carefully to others.	
Speak directly to each other.	
Speak honestly and with kindness.	
o Propose solutions or compromises.	
o Agree on solution or a compromise to try.	
• When using the steps to resolve a conflict, use "I" messages to tell how you feel; listen	
to each other and consider the other person's point of view; negotiate how to resolve	
the problem; and compromise on the resolution of the conflict. (3.q)	
o Compromise happens when all participants agree on a solution even if it is not	

Essential Understandings	Essential Knowledge and Skills
everyone's first choice.	
A relationship where one does not feel physically safe, mentally safe, or both, is harmful.	
• Harmful or abusive relationships (child abuse) can affect anyone, any child. Any time	
a child feels unsafe or uncomfortable (physically safe, mentally safe, or both) they	
should tell a trusted adult and keep telling until they get help. A child can experience	
abuse from a friend/peer, sibling, parent, other family member, babysitter, coach, or	
anyone. (1.r)	
• Note: It is at the discretion of the school division to determine the extent of inclusion	
of different types of abuse.	
• It is important to have a trusted adult to talk with when faced with an uncomfortable	
situation. Children/students could talk to (3.r):	
o parent or caregiver.	
o another family member.	
o friend's parent.	
o teacher.	
o doctor.	
o school nurse.	
o counselor, social worker, psychologist.	
o neighbor.	
o sports coach.	
o religious leader.	

Strand: Community/Environmental Health

Standards:

- 4.1.s Describe the effects of water pollution on health.
- 4.2.s Explain the health consequences associated with water pollution.
- 4.3.s Develop strategies to reduce water pollution.
- 4.1.t Identify community health issues.
- 4.2.t Discuss the benefits of volunteering and identify local volunteer opportunities.
- 4.3.t Identify possible solutions for a community health issue and volunteer opportunities to address the issue.

Essential Understandings

The Earth has a limited amount of water that always gets recycled. It is in a closed system. Because we do not lose or gain water from other sources, it is important to protect the water we have. (NIH National Institute of Environmental Health Sciences)

- Water plays a big role in supporting our communities. Firefighting, municipal
 parks, and public swimming pools all need water. Pipes, canals, and pumping
 stations managed by public water systems are needed to bring a reliable supply
 of water to taps each day. Water is used to grow food, manufacture goods, keep
 businesses running smoothly, and used to meet some of the nation's energy
 needs.
- Water pollution: Caused by rainfall or snowmelt moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into lakes, rivers, wetlands, coastal waters, and ground waters. These pollutants have harmful effects on drinking water supplies, recreation, fisheries, and wildlife. Water pollution can include (EPA) (1.s, 2.s):
 - o Heavy metals and chemicals from construction sites and factories.
 - o Oil, grease, and chemicals from our vehicles.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- describe water pollution and its effects on health and reasons to conserve water and reduce water pollution (1.s, 2.s);
- create and share strategies for conserving water and reducing water pollution at home, school, and in the community (3.s);
- list community health issues (1.t);
- research opportunities to address one or more community health issues (1.t);
- identify three upcoming community volunteer events that raise awareness about health issues (2.t);
- introduce students to various community service options (e.g., scouts, health walks, neighborhood clean ups) (3.t);
- have students create a plan to protect their

amount of consumable water decreases. Therefore, it is important to use water	<u>EVERFI</u>
wisely, only use what is necessary, and protect water from pollutants.	
Contaminated water can spread disease and cause illness. (1.s, 2.s)	
Conserving/reducing water use can be done by practices, such as turning the	
water off while brushing teeth or running washing machines only when they are	
full. Water pollution can be reduced by recycling plastics, throwing garbage	
away in proper containers and not litter (Litter can be washed into lakes, rivers,	
streams, oceans, and water systems.). Only flush toilet paper in toilets (no paper	
towels, tissues, plastics, or medications). (3.s)	
Community health issues may affect families, schools, neighborhoods, cities,	
counties, and the nation.	
The Virginia Department of Health provides local health districts with data on	
community health issues. Community health issues may include pollution,	
prevention of chronic disease, drug use prevention, homelessness, access to	
healthy foods, lack of exercise, and mental health issues. (1.t)	
Ways to get involved in the community to address health issues include	
volunteering at local races, homeless shelters, sporting events, and school	
projects. (2.t)	
A benefit people get from volunteering is the satisfaction of incorporating	
service into their lives and making a difference in their community and country.	
Other benefits include pride, satisfaction, and accomplishment. In addition,	
when we share our time and talents we can (2.t):	
o Solve problems.	

Essen	ial Understandings	Essential Knowledge and Skills
О	Strengthen communities.	
0	Improve lives.	
0	Connect to others.	
О	Transform our own lives.	

Strand: Body Systems

Standards:

- 5.1.a Identify the major structures and functions of the integumentary (skin, hair, and nails) system.
- 5.2.a Describe the importance of maintaining a healthy integumentary system.
- 5.3.a Describe ways to care for the integumentary system (e.g., personal hygiene, sun safety).
- 5.1.b Identify the major structures and functions of the eyes and ears.
- 5.2.b Identify behaviors and environments that can lead to vision and hearing loss.

away germs, dust, and other particles.	
 Cornea: The clear dome in front of the colored part of the eye; helps to 	
focus.	
 Sclera: The white outer part of the eye. 	
 Iris: The color of the eye; helps to control amount of light. 	
 Pupil: The black circle in the center of iris; lets light into the eye. 	
 Retina: Takes light and changes it to nerve messages for the brain. 	
 Optic nerve: Carries the nerve messages from the retina to the brain. 	
o Care:	
 Wear eye protection (e.g., goggles, special glasses) during sports, 	
activities, or classes (i.e., science labs) that could injure the eyes.	

Essential Understandings	Essential Knowledge and Skills
 Wear sunglasses: Too much light can damage your eyes and cause vision 	
problems later in life.	
 Limit screen time: Blue light emitted from screens can damage the eyes 	
and may disrupt sleep. (2.b)	
o Eye care professionals (3.b)	
 Optometrist (for eye exams, vision tests, eyeglasses and contact lenses). 	
 Ophthalmologist (provide vision services, eye care, medical eye care, 	
surgical eye care).	
Ears: Take in sounds (auditory) and balance information and send the	
information to the brain to process (Note: Information about the ears is	
background knowledge for understanding noise pollution in	
Community/Environmental Health topic.).	
o The ear has three main parts (1.b):	
• Outer ear (includes the ear canal; gathers sounds).	
 Middle ear (includes ear drum, eustachian tubes, and three small bones; 	
turns sounds into vibrations).	
• Inner ear: Receives vibrations and hair cells change to electrical impulses	
for the nerves to take to the brain to interpret for both sound and balance.	
Cochlea, vestibule (process sound and send messages to the brain via	
the auditory nerve).	
Semicircular canals (process information about balance and send	
messages to brain via the vestibular nerve).	
o Care:	
• Don't insert things like cotton swabs (Q-tips) and fingernails into the ears.	
These can scratch the ear canal, push earwax deeper into the ear, or	
rupture the eardrum. If earwax bothers you, talk to a parent, who can talk with a doctor.	
 Turn down volume on video games, TV, and phones. 	

Essential Understandings	Essential Knowledge and Skills
Wear hearing protection (like earplugs or protective earmuffs/	
headphones) when around loud noises (i.e., music concert, lawn mowers,	
or other equipment). (2.b)	
o Ear care professionals (3.b):	
 Audiologist (diagnoses and treats hearing and balance problems). 	
 Otolaryngologist (ear, nose, and throat specialist [ENT]): Doctors that 	
treat ear conditions—such as hearing loss, infection, and trouble with	
balance—and perform surgery if needed.	

Strand: Nutrition

Standards:

- 5.1.c Define macronutrients and micronutrients and how the body uses each.
- 5.2.c Explain the Recommended Dietary Allowance (RDA) for macronutrients and micronutrients.
- 5.3.c Analyze and interpret information on food packaging, including Nutrition Facts Labels, ingredient lists, and health claims.
- 5.1.d Explain RDA and the concepts of eating in moderation and energy balance in relation to healthy weight.
- 5.2.d Analyze food labels for a selected meal that meets RDA and energy balance for health.
- 5.3.d Design marketing materials to increase the sale and consumption of healthy foods and beverages that meet RDA and energy balance for health.
- 5.1.e Describe the effects of caffeine on the body.
- 5.2.e Identify the influence of marketing techniques on food and beverage choices (e.g., caffeinated beverages).
- 5.3.e Promote sale and consumption of healthy beverages.

Essential	Unders	tandings
Essenuai	Unucis	tanumgs

Eating a variety of healthy foods every day contributes to good overall health and energy balance.

- Macronutrients: Substances (carbohydrates, fats, and protein) that are essential in larger amounts (compared to micronutrients) for growth and health (1.c, 2.c).
 - o Carbohydrates: A major source of energy for the body.
 - Recommended Dietary Allowance (RDA) recommendation: 45-65 percent of your total daily calories. For 2,000 calories per day, between 900 and 1,300 calories should be from carbohydrates. That translates to between 225 and 325 grams or 8 to 11 ounces of carbohydrates a day.
 - o Fats: Provide energy for the body, absorb some vitamins, and insulate the body.
 - RDA recommendation: No more than five to six percent of total daily calories should come from saturated fats, according to the American Heart Association. For 2,000 calories per day, saturated fat limit is 16 grams or

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- list macro- and micronutrients and how they support body function (1.c);
- analyze and interpret information on food packaging, including nutrition facts label and ingredient lists (2.c, 3.c);
- explain energy balance (1.d);
- analyze food labels for a selected meal that meets RDA and energy balance for health (2.d);
- list the effects of caffeine on the body (1.e);
- identify marketing techniques used to promote

Essential Understandings

140 calories or 1 ounce.

- o Protein: Builds, maintains, and replaces tissue. Muscles, organs, skin, and the immune system are made of mostly of protein.
 - RDA recommendation: between two and six and one-half ounces each day or 56-184 grams.
- Micronutrients: Chemical elements or substances that are essential in very small amounts for growth and health; vitamins (D for bones, A helps vision health) and minerals (calcium for bones and teeth, iron to help provide oxygen to muscles, potassium for fluid in cells and muscle function); used for energy, immune system health, blood clotting, growth, bone health, and fluid balance. (1.c, 2.c)
 - o RDA recommendation:
 - Vitamins: The body is able to get the vitamins it needs from the foods eaten; different foods contain different vitamins. You need to eat different foods to get an assortment of vitamins.
 - Minerals: The body is able to get the minerals it needs from the foods eaten.

Eating a variety of healthy foods every day leads to good overall health and energy balance. All foods can fit in a healthy diet, with moderation (sometimes foods).

- RDA: The amount of nutrient and calorie intake per day considered necessary for the maintenance of good health, as recommended by the Food and Nutrition Board of the National Research Council/National Academy of Medicine (formerly known as Institute of Medicine). (1.d)
- Moderation in diet generally means avoiding excessive or extreme amounts of empty calories (1.d).
- Energy is another word for "calories."
- Energy balance: The balance of calories consumed through eating and drinking (energy in) compared to calories burned (energy out) through physical activity and basal metabolic rate (BMR). Energy in and out does not have to balance every day.

Essential Knowledge and Skills

food and beverages (2.e);

• create marketing slogans and one-page ads for print or social media that promote healthy foods and beverages (non caffeinated) (3.d, 2.e, 3.e).

Grade: Five

EVERFI

Worksheet: (Energy In vs. Energy Out)

Essential Understandings	Essential Knowledge and Skills
It's having a balance over time that helps a person stay at a healthy weight for the	
long term. Energy balance in children happens when the amount of energy in and	
energy out supports natural growth without promoting excess weight gain.	
(National Institutes of Health) (1.d)	
Nutrition fact labels: Include serving information, calories, nutrients (macro- and	
micronutrients) and percent daily value (The percentage of how it meets RDA. Five	
percent is low for a nutrient, while 20 percent is high in a nutrient.). Ingredients for	
all foods must be listed on the food label. The label must also list the FDA-certified	
color additives by name. Ingredients are listed in descending order by weight (the	
highest amount of an ingredient is listed first). (2.d)	
Caffeine is a chemical naturally occurring in tea leaves, coffee beans, cacao (used to	
make chocolate) and kola nuts (gives cola soda its flavor).	
Caffeine is found in many common foods and drinks, such as coffee, tea, energy	
drinks, hot cocoa, soda, chocolate, and some medicines. Caffeine is a stimulant.	
Caffeine is not needed for growth and development. (1.e)	
• Caffeine may boost a person's energy and make a person feel hyper, but too much	
caffeine can make a person feel nervous or jumpy, their make hands shake, it may	
make it hard to fall asleep, or cause a stomachache, headache, or racing heartbeats.	
Individuals with heart problems should not drink caffeine. (1.e)	
• Food and beverage marketing greatly influence children's diets, from the foods they	
prefer to how much they eat. Marketing reaches children on TV and in print, via	
packaging and in-store displays, online and through social media, and through	
smartphones. Recent research suggests that social media's influence on the	
marketing of unhealthy foods increased children's immediate food intake of	
unhealthy foods. Marketing influences extend to caffeinated beverages, showing	
people who say they have more energy, promoting that everyone drinks it, and not	
showing potential consequences. (2.e)	

Strand: Physical Health

Standards:

- 5.1.f Explain the effects of physical activity, sleep, and personal health habits and behaviors on heart health.
- 5.2.f Review personal health habits that support heart health and the ability to perform various physical activities.
- 5.3.f Support family and peers in making positive food, physical activity, and sleep choices that promote heart health.
- 5.1.g Examine the health risks associated with unprotected sun exposure.
- 5.2.g Determine strategies to protect against the harmful effects of the sun.
- 5.3.g Identify strategies to protect against the harmful effects of the sun.
- 5.1.h Describe hygiene habits that promote good health.
- 5.2.h Explain the importance of dental care, hand washing, and other personal hygiene habits for good health.
- 5.3.h Explore the role of parents/guardians and health professionals as resources to promote health, prevent disease, and create a healthy community.

Essential Understandings

Heart disease is the leading cause of death in the United States. Personal habits that influence heart health include a healthy diet, enough sleep, and routine physical activity.

- Risk factors for heart disease can include high blood pressure, high blood cholesterol, and smoking. (1.f)
- High blood pressure and high blood cholesterol may be influenced by family history (genetic/inherited). Both may be prevented and/or managed by eating a healthy diet, keeping a healthy weight, being physically active, not smoking, and getting enough sleep. (1.d)

The sun is important for plants to grow, provides light and warmth, and provides Vitamin D for muscle and bone health. Spending time in the sun can be healthful but can be harmful to skin if exposed to the sun for long periods of time.

• Exposure to ultraviolet (UV) rays causes most cases of melanoma, the deadliest kind

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a diagram that demonstrates understanding of heart health, including risk factors and preventive strategies (1.f);
- create an infographic on one prevention strategy/personal health habit, Explain its importance and explain ways to implement the health habit and ways to promote the healthy habit for peers and family (1.f, 2.f, 3.f);

Essential Understandings

of skin cancer. To lower your skin cancer risk, protect your skin from the sun and avoid indoor tanning. (1.g)

- Sun safety (2.g)
 - o Stay in the shade, especially during late morning through mid-afternoon (10 a.m. and 4 p.m.) when the sun's rays are strongest.
 - o Wear a long-sleeved shirt and pants to protect the skin.
 - o Wear a hat with a wide brim that shades the face, head, ears, and neck.
 - o Wear sunglasses that block UVA and UVB rays.
 - o Use/wear sunscreen with SPF 30 or higher with UVA and UVB (broad spectrum) protection. Remember to reapply sunscreen at least every two hours and after swimming, sweating, or toweling off.
 - Two types of UV light are proven to contribute to the risk for skin cancer (Skin Cancer Foundation):
 - Ultraviolet A (UVA) has a longer wavelength and is associated with skin aging and eye damage.
 - Ultraviolet B (UVB) has a shorter wavelength and is associated with skin burning and eye damage.

Good hygiene is important to keep the teeth healthy, the body germ free, and maintain a clean appearance.

- Bathe regularly: Wash the body and hair. The body constantly sheds dead skin cells; regular bathing helps eliminate the dead cells and washes away bacteria and oil. (1.h, 2.h)
- Trim your nails: Keep fingernails and toenails trimmed and clean. Reducing nail issues and athlete's foot infections helps to keep from spreading germs into the mouth (don't bite/chew nails). (1.h, 2.h)
- Brush your teeth with fluoride toothpaste and floss after every meal or at least brush teeth two times a day and floss once a day. Focus on the upper and lower gums and

Essential Knowledge and Skills

• create a story of a day in the life of skin in the summer (include possible dangers of sun exposure and ways to protect skin from sun) (1.g, 2.g, 3.g);

Grade: Five

- create an action plan that demonstrates good personal hygiene habits and how it can lead to good health; as an option, have students create and track a three- to five-day calendar/checklist (1.h, 2.h);
- list/identify adults and professionals that promote good health and prevent disease (3.h).

Strand: Substance Use/Misuse Prevention

Standards:

- 5.1.i Analyze the effects of the use of alcohol, tobacco, nicotine products, marijuana, inhalants, and other drugs on relationships with family, peers, and other individuals.
- 5.2.i Describe effective communication skills to request assistance in situations where alcohol, tobacco, nicotine products, marijuana, inhalants, and other drugs are being abused.
- 5.3.i Encourage others not to use alcohol, tobacco, nicotine products, marijuana, inhalants, or other harmful drugs.
- 5.1.j Explain the connection between mental health and substance use.
- 5.2.j Describe how to get help and assistance with mental health and substance use concerns.
- 5.3.i Identify prevention resources and strategies for avoiding alcohol, tobacco, inhalants, and other drugs.

Essential Understandings

Relationships with friends, family, and others can be negatively affected by substance use because of secrecy, lies, and the effects of substance use disorders.

- A substance use disorder occurs when a person's use of alcohol or another substance (drug) leads to health issues or problems at work, school, or home. (1.i)
- All drugs (medicines, medications, and illicit drugs) will affect the body and how it functions. Drugs can change the way a person thinks, feels, and acts. In addition to the physical and psychological harmful effects of substance abuse, it also affects relationships with peers, families, and others. (1.i)
- Once a person has a drug addiction, they usually have a single focus: using the substance. Relationships can become secondary to the addiction. People may become secretive about where they are going, who they are with, and what they are doing. The secrecy and lies affect trust, respect, honesty, and loyalty. There are drugs that are known to cause anger and violence. These issues may lead to frustration, anger, or violence in relationships between the non-substance user and the substance user. (1.i)
- Use resistance and refusal skills to counter peer pressure to use drugs. (2.i)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- use problem solving skills to analyze different scenarios involving pressure to use substances or situations where substances are being used;
- explain how drugs can be harmful, how to avoid the situation or get help leaving a situation, what refusal skills can be used, and how to be a leader in those situations to encourage others not to use (1.i, 2.i, 3.i);
- describe the stages of addiction (1.j);
- explain the relationship between substance use and mental health (1.j);
- develop a list of trusted adults and resources for help and assistance with concerns about mental health or substance use (2.j, 3.j).

Essential Understandings	Essential Knowledge and Skills
o Verbal	
Say "no." There is no substitute for the word "no." It makes any refusal	Additional resources:
stronger.	Health Smart Virginia
 Repeat the refusal. 	EVERFI
 Suggest an alternative (suggest something to do instead). 	
 Build the friendship. Say something to let the person know you are his/he 	er
friend and want to spend time with them. (This is especially important	
because a major reason for ineffective refusals is not wanting to hurt the	
other person's feelings or make them mad.)	
 Use a firm tone of voice. Be strong and business-like. 	
o Nonverbal	
 Direct eye contact (look the person in the face). 	
Serious expression (use your best "I mean it" face).	
 Hands-off hands (put your hands up in front of you when you refuse). The 	his
is especially useful in situations involving physical pressure.	
■ Leave (get out of the situation).	
 Avoid situations where there may be pressure. 	
• If you are in a situation where substances are being used (2.i)	
o If possible and safe to do so, leave the situation.	
o Pretend to get a text/message that you have to call home or go home for a fam	nily
emergency.	
o Have parents, trusted adults, and friends you can call for help.	
 Create a code word with a parent, good friend, or trusted adult that you can 	n
use to help get out of a situation involving drug use that is uncomfortable.	
Many individuals who develop substance use disorders (SUDs) are also diagnosed wit	th
nental disorders and vice versa. (National Institute on Drug Abuse) Compassion and	
inderstanding about the disease of SUD and mental disorders is important in getting	

Essential Understandings	Essential Knowledge and Skills
people the help they need.	
Multiple national population surveys have found that about half of those who	
experience a mental illness during their lives will also experience a substance use	
disorder and vice versa. (1.j)	
Although drug use and addiction can happen at any time during a person's life, drug	
use typically starts in adolescence, a period when the first signs of mental illness	
commonly appear. (1.j)	
Having a mental disorder in childhood or adolescence can increase the risk of later	
drug use and the development of an SUD. Some research has found that mental	
illness may precede an SUD. (1.j)	
Help and resources are available for mental health disorders and SUDs. Talk with a	
parent, trusted adult at school, home, or in the community if you have concerns	
about yourself, a friend, or a loved one. (2.j)	
 Parents can help access the health care and resources needed. 	
 School counselors, psychologists, and social workers can also help with 	
accessing community services.	
o In Virginia, Community Services Boards throughout the state can be accessed	
for information and treatment.	

Strand: Safety/Injury Prevention

Standards:

- 5.1.k Analyze why people choose to follow or not follow safety rules at school.
- 5.2.k Examine one's role and the role of others in causing or preventing injuries at school.
- 5.3.k Promote safety procedures schoolwide.

Essential Understandings

Safety rules are put in place to help prevent injuries, accidents, and keep tragic events from happening.

- Rules help make school safe and welcoming for everyone. School safety rules are put into place to protect people from injury and dangerous situations. (1.k)
- People may choose not to follow rules because they are trying to be funny, pushing the limits of a teacher to see what might get them into trouble, on a dare, not understanding the rule or possible consequences if it is not followed, or may think that nothing bad will happen (e.g., not following rules during school safety drills). (1.k)
- Planning for safety, following safety rules, and practicing school safety drills helps everyone know what to do in a real emergency and helps keep everyone safe. (2.k)
- Review school- and classroom-specific safety rules and their importance. (3.k)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a list of school safety rules; use a tchart to compare and contrast reasons to follow rules and reasons people may not follow the rules (1.k);
- select one rule and explain the effects of following and not following the rule (including the effects/possible consequences on the individual and others) (2.k);
- record incidences of students following and not following rules; create ways to reward or remind people of rules (3.k).

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 5.1.1 Define stress and identify physical and emotional responses caused by stress.
- 5.2.1 Identify positive and negative ways to manage stress in a variety of situations.
- 5.3.1 Practice strategies for managing stress.
- 5.1.m Define positive self-image.
- 5.2.m Recognize the importance of developing and maintaining a positive self-image.
- 5.3.m Analyze positive and negative influences on self-image (e.g., media, peers).
- 5.1.n Identify components of healthy relationships and the social skills that are essential for building and sustaining relationships with family and friends.
- 5.2.n Describe the benefits of healthy relationships with family, friends, and other adult mentors.
- 5.3.n Identify healthy activities that students can do with friends and family to build positive relationships.

Everyone feels stress. Stress can be positive and negative.

- Stress is a state of mental tension and worry due to problems in life. (1.1)
- Physical responses may include rapid heartbeat or faster breathing, sweaty palms, or shaky knees. (1.1)
- Emotional responses may include feeling tense, nervous, or on edge. (1.1)
- The stress response can help a person face a challenge by being more alert or focused. When the stress ends, the response system shuts down and the person can relax. Facing challenges is part of learning and growing up. (1.1)
- Sometimes stress occurs when facing difficult situations, and the stress can last longer and leave a person feeling tired or overwhelmed. (1.1)
- There are strategies to manage stress, but sometimes, people need help dealing with difficult situations that lead to intense or lasting stress. (2.1)
 - o Strategies and positive ways to manage stress can include physical activity;

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- define stress and the physical and emotional responses (1.1);
- list positive and negative ways to manage stress (2.1);
- select and practice positive stress management strategies (Option: Discuss stress management strategies and have students exercise a strategy of their choosing for two to five minutes (e.g., physical movement, creative expression, talking with a peer, breathing, mindfulness) (3.l);

Essential Understandings

using time management and communication skills; counting to 10; thinking positively; using relaxation and breathing exercises; mindfulness; breaking larger problems into smaller problems; making time for hobbies, interests, and fun; eating a healthy diet; getting exercise and enough sleep' positive self-talk ("I can do this"); and spend time with people you enjoy. Talk with a parent, counselor, or friend.

o Negative ways to manage stress may include yelling, acting out (with anger or violence), negative self-talk, overeating, drinking alcohol, smoking, or using caffeine or drugs/pills.

Self-image is important because how we think about ourselves affects how we feel about ourselves and how we interact with others and the world around us.

- Self-image is the way a person thinks about themselves and their strengths, abilities, weaknesses, or appearance. (1.m)
- Self-image is a product of learning through experiences and relationships that help to shape self-image. The image seen in the mirror may be a real or distorted view of who a person really is. Self-image affects how a person feels and acts. People continually take in information and evaluate themselves in several areas, such as physical appearance (How do I look?), performance (How am I doing?), and relationships (How important am I?). (1.m)
- With a positive self-image, a person recognizes their assets/strengths and potential while being realistic about weaknesses, challenges, or areas for growth. With a negative self-image, people may focus on faults and weaknesses. (2.m)
- A positive self-image can boost physical, mental, social, emotional, and spiritual well-being, while a negative self-image can decrease satisfaction and the ability to function in these areas. A positive self-image begins with accepting and loving oneself. (2.m)
- Forms of media include TV, print, movies, music, advertisements, Internet, and

Essential Knowledge and Skills

- respond in writing to:
 - o When stressed, I feel... and

Grade: Five

- O When I feel stressed I will...(selecting one or more positive strategies) (3.1);
- create a self-portrait and explain/describe outside influences (e.g., media, friends) on self-image (1.m, 2.m);
- list strategies for minimizing negative influences on self-image (3.m);
- select a healthy relationship with a friend, parent, family member, or other adult, and list the positive qualities of the relationship and what keeps the relationship healthy (1.n);
- explain the importance of healthy relationships (2.n);
- list activities to do with family, friends, or others to promote healthy relationships (3.n).

social media. The majority of narratives and images posted on social media are	
positive and celebratory and do not include the ups and downs of everyday life.	
Social media and other media images may cause people to compare themselves with	
what they think are the perfect lives and looks of others and may influence what	
people think will make them popular/unpopular, attractive/unattractive, or	
happy/unhappy. (3.m)	
• It is also important to remember that kids today not only are consumers of media but	
also are active creators. On one hand, kids may grapple with how to present	
themselves online and manage their online appearances, or they may find themselves	
comparing the way they look to how their friends look, or they may get a boost of	
confidence from friends' reactions to their personal photos. On the other hand, kids	
may see friends, celebrities, and others who use online media to challenge harmful	
stereotypes about appearance ideals. (3.m)	
Research has shown that people with social supports are happier, have fewer health	
problems, and live longer.	
Components of healthy relationships: mutual respect, trust, honesty, support,	
fairness, separate identities, good communication, and kindness. (1.n)	
Social skills that promote healthy relationships: communication (verbal and)	
nonverbal), listening, empathy, cooperation, express feelings in a positive way,	
negotiation, and compromise. (1.m)	
• Benefits of healthy relationships: boosts happiness, increases sense of belonging and	
purpose, reduces stress, helps to cope with challenges, improves self-confidence,	
self-image, and self-worth. Research has shown that people with social supports are	
happier, have fewer health problems, and live longer. (2.m)	

Strand: Violence Prevention

Standards:

- 5.1.0 Identify effective verbal and nonverbal communication skills for resolving conflict situations.
- 5.2.0 Ability to analyze the role of feelings/emotions in conflict resolution situations.
- 5.3.0 Demonstrate effective communication skills to defuse or resolve conflict.
- 5.1.p Define cyberbullying and its impact on one's health and well-being.
- 5.2.p Describe how to report cyberbullying at school and at home.
- 5.3.p Describe ways to offer friendship and support to someone who has been cyberbullied.
- 5.1.q Recognize the influence of violence in the media on behaviors.
- 5.2.q Demonstrate how to show respect for individual differences.
- 5.3.q Advocate for a caring school environment.
- 5.1.r Define and describe harassment.
- 5.2.r Describe how to respond to and report harassing behaviors.
- 5.3.r Practice ways to respond to and report harassing behaviors.

Compromise is when all participants agree on a solution even if it is not everyone's first choice. (1.0, 2.0) Additional resources: Health Smart There are times when conflicts or arguments can be helped by using strategies to Virginia defuse them, meaning to make the situation less tense or less emotional before **EVERFI** addressing solutions. Ways to defuse an argument/conflict include speaking to the other person with a calm voice, having a mediator, or taking a break from the situation when needed. (3.0)

Cyberbullying is a serious problem. Kids who are bullied can experience negative physical, emotional, and mental health issues, as well as issues in school.

• Cyberbullying: Bullying that takes place over digital devices; it can occur through

Essential Understandings	Essential Knowledge and Skills
text, apps, or online in social media, forums, or gaming where people can view,	
participate in, or share content. Cyberbullying includes sending, posting, or sharing	
negative, harmful, false, or mean content about someone else and can include sharing	
personal or private information about someone else causing embarrassment or	
humiliation. Some cyberbullying crosses the line into unlawful or criminal behavior.	
• Some youths bully to fit in, to control the behavior of others, may have been bullied,	
do not understand others' emotions, may not have skills to handle social situations, or	
may come from an environment where bullying occurs. (1.p)	
Effects of cyberbullying are the same as bullying that may be done face-to-face,	
including depression and anxiety, increased feelings of sadness and loneliness,	
changes in sleep and eating patterns, loss of interest in activities, physical health	
complaints, and decreased academic achievement (missing, skipping, or dropping out	
of school). Some of these issues may persist into adulthood. (1.p)	
• Reporting: When cyberbullying happens, it is important to document and report the	
behavior so it can be addressed. (2.p)	
o Steps to take immediately:	
 Do not respond to and do not forward cyberbullying messages (unless sharing 	
with a trusted adult for help).	
 Keep evidence of cyberbullying. Record the dates, times, and descriptions of 	
instances when cyberbullying has occurred.	
 Save and print screenshots, emails, and texts. Use this evidence to report 	
cyberbullying to online service providers.	
 Block the person who is cyberbullying. 	
o Report to parents, online service providers, law enforcement (if it includes threats	
of violence or private images), and school personnel (teacher, counselor, or	
administrator).	
o Review school-specific reporting protocols for cyberbullying.	
Be kind to the person being bullied. Show them that you care by trying to include	

Essential Understandings	Essential Knowledge and Skills
them. Sit with them at lunch or on the bus, talk to them at school, or invite them to do	
something. Just hanging out with them will help them know they aren't alone. (3.p)	
Violence in the media can influence people and affect behavior and health in a negative	
way.	
Although experts agree that no single factor can cause a nonviolent person to act	
aggressively, some studies (though not all) suggest that heavy exposure to violent	
media can be a risk factor for violent behavior. Research shows that viewing (or	
playing) violent content could increase the chance that a child will act aggressively.	
Heavy exposure to violent media can lead to desensitization—being less affected by	
violence. (1.q)	
Respecting similarities and differences (ways to respect people who are different	
from us): (2.q)	
o Listen to others when they speak.	
o Be sensitive to other people's feelings.	
o Ask people questions; try to learn something from the other person.	
o Show interest and appreciation for other people's cultures and backgrounds.	
o Be considerate of others.	
o Do not insult, tease or taunt, or make fun of people.	
o Do not talk about people behind their backs.	
A safe and caring school environment is one in which students feel positively	
connected to others, respected, that their work is meaningful, and that they are good	
at what they do. A safe and caring school has an environment where students, staff	
and parents feel safe, comfortable, and accepted. It is a culture of high expectations	
for students and adults—staff, parents, and community members. (<u>Inclusive Schools</u>	
Network) (3.q)	
Harassment is a repetitive behavior that is intended to disrupt or upset another individual.	
Harassment can be in person or online.	

Essential Understandings	Essential Knowledge and Skills
Harassment means to annoy or bother someone in a constant or repeated way; may	
include threats, intimidation, or putting a person in fear of their safety. Harassment is	
unwanted, unwelcomed, and uninvited behavior that demeans, threatens, or offends	
the victim and results in a hostile environment for the victim. (1.r)	
• Responding to harassment may include telling the person to stop. If it does not stop,	
tell an adult—a parent, teacher, school counselor, or other adult you trust. Most	
schools have policies that address harassing and bullying behaviors. The policies are	
in place to help students. (2.r)	
• Review school-specific reporting protocols for harassment. (2.r, 3.r)	

Strand: Community/Environmental Health

Standards:

- 5.1.s Describe the effects of air and noise pollution on health and the environment.
- 5.2.s Describe strategies to decrease the effects of air quality and noise pollution on body function and the environment.
- 5.3.s Research community service opportunities to address air, noise, and other environmental health issues for peers and community groups to volunteer and work on together.

Essential Understandings	Essential Knowledge and Skills
Caring for the environment is a global responsibility.	In order to meet these standards, it is expected that students will
Air pollution: Hazardous air pollutants are those known to cause cancer and other serious health effects. (1.s)	 describe air and noise pollution and strategies to reduce or prevent pollutants (1.s);
 Outdoor air pollution examples include: (1.s) Fine particles produced by the burning of fossil fuels (i.e., the coal and petroleum used in energy production). Noxious gases (sulfur dioxide, nitrogen oxides, carbon monoxide, chemical vapors, etc.) such as from vehicle emissions. Ground-level ozone (a reactive form of oxygen and a primary component of 	 select one or more strategies to design a pollution solution project (2.s); research opportunities in the community to address air, noise, and other environmental issues and how students can help (3.s).
urban smog). o Tobacco smoke.	Additional resources: Health Smart Virginia
 Outdoor air pollution can make its way indoors by way of open windows, doors, and ventilation. 	<u>EVERFI</u>
• Indoor air pollution involves exposures to particulates, carbon oxides, and other pollutants carried by indoor air or dust. Examples include gases (i.e., carbon monoxide, radon), household products and chemicals, building materials (i.e., asbestos, formaldehyde, lead), tobacco smoke, mold, and pollen.	
• According to research, health effects associated with air pollution exposure include respiratory diseases (including asthma and changes in lung function), cardiovascular diseases, adverse pregnancy outcomes (such as preterm birth), and even death. (1.s)	

Essential Understandings	Essential Knowledge and Skills
• In 2013, the World Health Organization concluded that outdoor air pollution is	
carcinogenic to humans. (1.s)	
• Indoor air pollution can be reduced by making sure that a building is well ventilated	
and cleaned regularly to prevent the buildup of agents like dust and mold. It is also	
important to remove any known pollutants and or irritants (e.g., aerosols, stringent	
cleaning supplies) whenever possible. (2.s)	
Outdoor air pollution exposures can be reduced by checking the Air Quality Index	
(AQI) especially during summer months, avoiding heavy traffic when possible, and	
avoiding secondhand tobacco smoke. (2.s)	
Noise pollution: unwanted or disagreeable sound.	
Primary sources of noise in the United States include road and rail traffic, air	
transportation, and occupational and industrial activities. Additional individual-level	
exposures include amplified music, recreational activities (including concerts and	
sporting events), and firearms. Personal music player use appears to be common	
among adolescents and may involve potentially harmful sound levels. Exposures	
from recreational activities and music are not "noise" in the sense of being unwanted	
sound, but adverse health effects are possible even from desirable sounds. (1.s)	
Chronic environmental noise causes adverse health effects, including sleep	
disturbance, annoyance, stress, noise-induced hearing loss (NIHL), cardiovascular	
disease, endocrine effects, and increased incidence of diabetes. The effects of sleep	
disturbance, annoyance, and stress can affect learning and productivity.	
(Environmental Noise Pollution in the United States: Developing an Effective Public	
<u>Health Response</u>). (1.s)	
• Review parts of the ear: The tiny hair cells in the inner ear receive vibrations from	
the middle ear and change them to electrical impulses to be sent to the brain to	
interpret. High decibels of noise can damage the hair cells. When those hair cells are	
damaged, they do not heal and can cause hearing loss. Sound is measured in decibels	

Essential Understandings	Essential Knowledge and Skills
—85 decibels and above can be harmful to hearing. The louder and longer you listen	
to a sound, the more likely that damage will occur to your hearing.	
o Whisper: 20 decibels.	
o Talking at a normal volume: 60 decibels.	
o Washing machine/vacuum cleaner: 80 decibels.	
o Gas lawn mower: 85 decibels.	
o Stereo headphones with volume turned up: 105 decibels.	
o Police siren: 125 decibels.	
o Fireworks: 140 decibels.	
• To protect hearing and health from the effects of loud sound, turn down the volume,	
wear hearing protectors, such as earplugs or earmuffs, and make your environment	
noise-free. (2.s)	

Grade: Six

Strand: Body Systems

Standards:

- 6.1.a Identify and describe the major structures and functions of the renal and urinary systems (kidneys, ureters, bladder, and urethra).
- 6.2.a Describe the importance of proper hydration to support renal function.
- 6.3.a Describe strategies to promote renal health.

Essential Understandings	Essential Knowledge and Skills
The renal (kidney) and urinary systems are responsible for removing waste and excess	In order to meet these standards, it is expected that
water from the body.	students will

bladder.	
o Bladder: A sac that holds urine; when the bladder is full, the smooth muscle of	Additional resources:
the bladder contracts to move urine into the urethra.	Health Smart Virginia
o Urethra: A tube that carries urine out of the body.	<u>EVERFI</u>
Hydration is important for all body functions. All fluids help, but water is best.	
Sixty percent of body mass is water. Drinking water helps us feel better and think	
better. Dehydration is not drinking enough water for body function and can make a	
person feel dizzy or sick. (2.a)	
Kidney disease can be caused by high blood pressure, diabetes, cardiovascular	
disease, or a family history of kidney diseases. To keep kidneys healthy (3.a):	
o Eat healthy and exercise regularly.	
o People with diabetes need to control blood sugar.	
o Drink plenty of fluids, six to eight eight-ounce glasses of water a day	
(depending upon activity level).	

Essential Understandings	Essential Knowledge and Skills
o Don't smoke. Smoking can damage blood vessels, which decreases blood flow	
and kidney function.	
• It is important to listen to your body when it is time to eliminate waste and excess	
water from your bladder in order to prevent a urinary tract infection (UTI) in the	
urethra, bladder, ureters or kidneys.	

Grade: Six

Strand: Nutrition Standards:

- 6.1.b Compare the Recommended Dietary Allowance (RDA) of macronutrients (i.e., carbohydrates, fat, protein) for adolescent males
 - and females.
- 6.2.b Analyze the benefits of following RDAs for macronutrients when selecting beverages and planning meals and snacks.
- 6.3.b Create a one-day plan for meals, snacks, and beverages that includes the RDA for macronutrients.
- 6.1.c Explain ingredients in foods that may cause an allergic reaction.
- 6.2.c Interpret information on a food label to identify a food product that may cause an allergic reaction.
- 6.3.c Promote the understanding of the effect of food allergies on individuals.

Essential Understandings

Eating a variety of healthy foods every day leads to good overall health and energy balance. All foods can fit in a healthy diet with moderation (sometimes foods).

- Recommended Dietary Allowance (RDA): The average daily level of intake sufficient to meet the nutrient requirements of nearly all (97-98 percent) healthy people. RDAs and Dietary Reference Intakes (DRIs) are set by the Food and Nutrition Board of the National Research Council/National Academy of Medicine (formerly known as Institute of Medicine) (dietaryguidelines.gov). (1.b)
- Macronutrients: Substances that are essential in larger amounts (compared to micronutrients) for growth and health; macronutrients include carbohydrates, fats, protein. (1.b)
- <u>USDA Dietary Guidelines 2020-2025</u>: Differences vary depending on activity level, height, special needs; these amounts are general guidelines. (1.b)
 - o For ages 9-13
 - Carbohydrates: 130 grams or 4.5 ounces (45-65 percent kcal)
 - Protein: 34 grams or 1.2 ounces (10-30 percent kcal)
 - Fats: Less than ten percent of kcal/calories

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- create a one-day plan for meals, snacks, and beverages that includes the daily recommended macronutrients for an average sixth-grade student (1.b, 2.b, 3.b);
- analyze a variety of food labels' ingredients list to identify potential food allergens (1.c, 2.c);
- create strategies to help people understand the effects of food allergies on individuals and how to help those with food allergies (3.c).

Additional resources:

Health Smart Virginia

EVERFI

• Benefits of following RDAs along with physical activity leads to energy balance. Energy balance: The balance of calories consumed through eating and drinking compared to calories burned through physical activity. What a person eats and drinks is energy in. What a person burns through physical activity is energy out. Energy in and out does not have to balance every day. It's having a balance over time that helps a person stay at a healthy weight for the long term. Energy balance in children happens when the amount of energy in and energy out supports natural growth without promoting excess weight gain (National Institute of Health). (2.b)

People who have allergic reactions to food can be supported by helping to keep surfaces and hands clean and getting help from an adult if needed.

- Common foods that may cause allergies include tree nuts, peanuts, eggs, milk, fish, shellfish, soy, and wheat/gluten. (1.c)
- Nutrition Fact Label: Lists ingredients for all foods. Ingredients are listed in descending order by weight (the highest amount of an ingredient is listed first). Reading the food label can help prevent an allergic reaction. FDA requires that the name of the food source of a major food allergen must appear. (2.c)
 - o Foods that may cause an allergic reaction are listed in parentheses following the name of the ingredient.
 - Examples: "lecithin (soy)," "flour (wheat)," and "whey (milk)."
 - o Foods that may cause an allergic reaction can also be listed immediately after or next to the list of ingredients in a "contains" statement.
 - Example: "Contains Wheat, Milk, and Soy."
- There is no cure for food allergies. Strict avoidance of food allergens and early recognition and management of allergic reactions to food are important measures to prevent serious health consequences. (3.c)
- Allergic reactions may include an upset stomach, runny nose, itchy skin rash such as hives, or trouble breathing. People at risk for serious allergic reactions have to be

Essential Understandings	Essential Knowledge and Skills
careful and need a plan for handling emergencies when they might need to get	
special medicine to stop these symptoms from getting worse. (3.c)	
• Strategies for schools to help those with food allergies may include:	
o no nuts/peanuts in any food brought into a classroom.	
o an "allergy-free" table in the cafeteria.	
o foodless classroom celebrations.	
o gluten-free (wheat-free) options for class parties.	
o keeping surfaces clean in classrooms and cafeterias where food is eaten.	
o washing hands before and after eating.	
o not sharing food.	
o knowing how to get help from an adult if someone is having a food allergy	
problem. (3.c)	

Strand: Physical Health

Standards:

- 6.1.d Describe causes of heart disease, cancer, and diabetes.
- 6.2.d Identify strategies to prevent heart disease, cancer, and diabetes.
- 6.3.d Promote strategies to prevent heart disease, cancer, and diabetes.
- 6.1.e Identify a variety of immunizations and vaccines available to prevent communicable disease and illness.
- 6.2.e Describe the effect of immunizations and vaccines on individuals and others.
- 6.3.e Identify strategies to reduce illness at home and at school.
- 6.1.f Identify influences (e.g., family, peers, culture, screen time, media) on personal health choices.
- 6.2.f Explain the effect of external influences (e.g., family, peers, screen time, social media) on personal health choices.
- 6.3.f Monitor personal progress toward physical activity, nutrition, and sleep goals.
- 6.1.g Describe persuasive tactics used by various types of media.
- 6.2.g Analyze a variety of media to identify tactics used to persuade consumers regarding physical activity, nutrition, sleep, or other areas of personal health products.
- 6.3.g Analyze the reliability of health product claims for physical activity, nutrition, sleep, or other areas of personal health.

Essential Understandings	Essential Knowledge and Skills
Note: this is repeated in Physical Health document.	In order to meet these standards, it is
	expected that students will

Essential Understandings

Heart disease also includes symptoms of high blood pressure, chest pain, heart attacks, and strokes. (1.d)

- Causes: High blood pressure, high blood cholesterol, and smoking are key risk factors for heart disease. Other medical conditions and lifestyle choices can also put people at a higher risk for heart disease, including diabetes, overweight and obesity, unhealthy diet, physical inactivity, and excessive alcohol use. (1.d)
- Prevention: Risk factors for cardiovascular disease that cannot be controlled are age and family history (genetics). Risk factors for cardiovascular disease that can be controlled include smoking, having high blood pressure, being overweight, and not exercising. (2.d)

Cancer (NIH National Cancer Institute)

- There are more than 100 types of diseases known collectively as cancer. Cancer results from an overgrowth of cells, tiny units that make up all living things. Cancer (malignancy) occurs when cells begin to grow and multiply in an uncontrolled way. These cells gather to form tumors. Tumors are lumps that can interfere with the body's normal processes. The most common types of cancer include bladder, breast, cervical, colorectal, gynecologic, head and neck, kidney, liver, lung, lymphoma, myeloma, prostate, skin, and thyroid.
- Causes: It is usually not possible to know exactly why one person develops cancer and another does not. Research has shown that certain risk factors may increase a person's chances of developing cancer. Cancer risk factors include exposure to chemicals or other substances (i.e., tobacco, alcohol), as well as certain behaviors like sun exposure, diet, or obesity. Risk factors also include things people cannot control, like age and family history. A family history of certain cancers can be a sign of a possible inherited cancer syndrome. These types of risk factors act on the body slowly over time, so the cancers that may result from them may not show up until a person is an adult. Healthy choices begin early in life. (1.d)
- To lower the risk of getting cancer, maintain a healthy lifestyle, avoid exposure to

Essential Knowledge and Skills

- compare/contrast the benefits and risks of immunizations (1.e, 2.e);
- explain an external influence on personal health choices and the effects of the influence (1.f, 2.f);
- create a plan to meet goal(s) for improving or maintaining healthenhancing physical activity, nutrition, and/or sleep; monitor progress for three to five days (3.f);
- identify a variety of media advertisements (TV, social media, radio,) for physical activity, nutrition, sleep, or personal health products; analyze for persuasive tactics and accuracy of claims (1.g, 2.g, 3.g).

<u>Health Smart Virginia</u> EVERFI

Essential Knowledge and Skills

Essential Understandings Essential Knowledge and Skills changes, such as losing weight, eating healthy food, and being active. (1.d, 2.d) Vaccines can prevent infectious diseases that once killed or harmed many infants, children, and adults. Without vaccines, children and adults are at risk for getting seriously ill and suffering pain, disability, and even death. (CDC) A vaccine is a substance that is usually injected into a person to protect against a particular disease. Immunization means to give (someone) a vaccine to prevent infection by a disease. Vaccines work by preparing the body's immune system for future exposure to disease-causing viruses or bacteria. After receiving the vaccine, if the virus or bacteria that cause the real disease should enter the body, the immune system is prepared and responds quickly and forcefully to attack the disease-causing agent to prevent the person from getting sick with the disease. Vaccines are frequently given by injection (a shot), but some are given by mouth and one is sprayed into the nose. Babies are particularly at risk for infections. Vaccines reduce babies' risks by working with their body's natural defenses to help safely develop immunity to disease. Some vaccines are required for school-age children before entering school and at certain grade levels. Some students are exempt from immunizations for religious or medical reasons. Types–Name (description)–age(s) of vaccination (1.e) o Diphtheria, tetanus (lockjaw), pertussis (whooping cough)-(DTaP) one shot for all three given multiple times between infancy and age seven; booster shot at age 10 or 11. Bacterial meningitis (an infection of the tissue covering the brain and spinal cord, which can lead to lasting brain damage and deafness)-between infancy and age five. Coronavirus (COVID-19) vaccine—age dependent upon FDA approvals.

Essent	ial Understandings	Essential Knowledge and Skills
О	Hepatitis A (virus that causes jaundice [yellow skin or eyes], tiredness,	
	stomachache, nausea, and diarrhea)-12 months and older.	
O	Hepatitis B (can lead to chronic hepatitis [liver inflammation], liver cancer, and	
	death)-newborns to adults.	
О	Human papillomavirus (HPV) (virus that causes some cancers)-three shots	
	given on a schedule between for ages 9 to 45.	
О	Influenza/Flu-annual shot or nasal spray to protect against different types of flu.	
О	Measles (respiratory disease), mumps (fever, swollen cheeks, and jaw), and	
	rubella (type of measles) (MMR)–12 months and older.	
О	Meningococcal (bacterial illness that affects the lining that surrounds the brain	
	and spinal cord; two different types)-children through adult, depending on type.	
О	Streptococcus pneumoniae (bacterial infection affecting blood, middle ear,	
	spinal cord, and pneumonia)-infant to adult.	
О	Polio (virus that can cause paralysis or death)—as young as six weeks of age.	
О	Rotavirus (can cause severe diarrhea and dehydration)—as young as six weeks of	
	age.	
О	Varicella Virus/Chickenpox (can cause skin infections, pneumonia)–12 months	
	of age and older.	
• Ef	fect of vaccines/immunizations on individuals and others (2.e):	
О	Vaccinations are a highly effective, safe, and an easy way to help keep people	
	healthy, and they limit the effect of spreading diseases to others.	
О	On-time vaccination throughout childhood is essential because it helps provide	
	immunity before children are exposed to potentially life-threatening diseases.	
O	Vaccines are tested to ensure that they are safe and effective for children to	
	receive at the recommended ages.	
0	There are some allergens, such as eggs, that may cause adverse reactions with	
	some vaccines. Parents should discuss their child's allergies with their health	
	care provider.	

Essential Understandings	Essential Knowledge and Skills
Strategies to reduce illness at home and at school: Talk with a health care provider	
about available vaccines. If a person is ill with a communicable disease, they should	
stay home to limit spreading illness to others. (3.e)	
There are external influences that can affect personal health choices in positive and	
negative ways.	
Family: Research has shown that friends and families are one of the biggest	
influences on lifestyles and nutrition. Family can influence factors that are inherited	
that may affect personal health, from food choices to types of physical activity	
people engage in. (1.f, 2.f)	
Peers: Peers influence teenagers to do things they might not do on their own.	
Research has shown that the mere presence of peers—not their direct	
verbal/nonverbal pressure—affects adolescents' decision-making. (1.f, 2.f)	
• Culture: can influence health attitudes, beliefs, and practices. (1.f)	
• Environment: the way community is designed to include access to health care,	
healthy foods, and places for activity; social networks and social supports. (1.f, 2.f)	
• Screen time: can provide access to health information and applications that promote	
healthy food choices and physical activity; can negatively affect sleep, mental,	
emotional, and social health, physical health (posture, lack of physical activity,	
vision, weight gain, increase risk of diabetes and heart disease); still much that is	
not known about long-term effects of screen time on health (1.f, 2.f)	
Social media: can inspire but can also foster unrealistic expectations for health; can	
provide information to support healthy choices but can also promote negativity,	
false information and unhealthy products (1.f, 2.f)	
The goal of advertisements is to sell; to influence buyers by promoting a product,	
service, or company.	
Advertisement techniques may include (1.g):	

C_{max}	٠.	C.	٠.,
Grad	Ю.	. 7	ΙX

Essent	ial Understandings	Essential Knowledge and Skills
О	Bandwagon (everyone else is doing it).	
О	Fear (scare people into buying/believing something).	
О	Conflict (uses an unresolved problem or situation).	
О	Shock (uses controversy to gain attention).	
О	Problem/Benefit (convince someone they have a problem and the product is	
	the solution).	
О	Testimonial/Celebrity/Endorsements (provide credibility; believe a personal	
	story).	
О	Anti-Ad (tells the audience they are smart enough to see through the tricks	
	played by advertisers).	
О	Association (linking a product to certain values, groups, or people).	
О	Additional advertising tactics include recognizable logos, repetition, bribery	
	(deals/sales), emotional appeal, and slogans.	

Strand: Disease Prevention/Health Promotion

Standards:

- 6.1.d Describe causes of heart disease, cancer, and diabetes.
- 6.2.d Identify strategies to prevent heart disease, cancer, and diabetes.
- 6.3.d Promote strategies to prevent heart disease, cancer, and diabetes.
- 6.1.e Identify a variety of immunizations and vaccines available to prevent communicable disease and illness.
- 6.2.e Describe the effect of immunizations and vaccines on individuals and others.
- 6.3.e Identify strategies to reduce illness at home and at school.
- 6.1.f Identify influences (e.g., family, peers, culture, screen time, media) on personal health choices.
- 6.2.f Explain the effect of external influences (e.g., family, peers, screen time, social media) on personal health choices.
- 6.3.f Monitor personal progress toward physical activity, nutrition, and sleep goals.
- 6.1.g Describe persuasive tactics used by various types of media.
- 6.2.g Analyze a variety of media to identify tactics used to persuade consumers regarding physical activity, nutrition, sleep, or other areas of personal health products.
- 6.3.g Analyze the reliability of health product claims for physical activity, nutrition, sleep, or other areas of personal health.

Essential Understandings	Essential Knowledge and Skills
Noncommunicable diseases are not contagious, and many develop from unhealthy	In order to meet these standards, it is expected that
lifestyle choices over time or may be inherited. Healthy choices begin early in life.	students will
• Common noncommunicable diseases include cardiovascular/heart disease, cancer,	 identify causes of and strategies to prevent
and diabetes.	heart disease, cancer, and diabetes (1.d, 2.d);
Heart Disease (Centers for Disease Control (CDC)	 promote a prevention strategy for heart
• In the United States, the most common type of heart disease is coronary artery	disease, cancer, and diabetes using persuasive
disease (CAD; decreased blood flow to the heart), which can lead to heart attack.	tactics (3.d, 1.g);
Heart disease also includes symptoms of high blood pressure, chest pain, heart	 list available vaccines and compare/contrast
attacks, and strokes. (1.d)	the benefits and risks of immunizations (1.e,

- Causes: High blood pressure, high blood cholesterol, and smoking are key risk factors for heart disease. Other medical conditions and lifestyle choices can also put people at a higher risk for heart disease, including diabetes, overweight and obesity, unhealthy diet, physical inactivity, and excessive alcohol use. (1.d)
- Prevention: Risk factors for cardiovascular disease that cannot be controlled are age and family history (genetics). Risk factors for cardiovascular disease that can be controlled include smoking, having high blood pressure, being overweight, and not exercising. (2.d)

Cancer (NIH National Cancer Institute)

- There are more than 100 types of diseases known collectively as cancer. Cancer results from an overgrowth of cells, tiny units that make up all living things. Cancer (malignancy) occurs when cells begin to grow and multiply in an uncontrolled way. These cells gather to form tumors. Tumors are lumps that can interfere with the body's normal processes. The most common types of cancer include bladder, breast, cervical, colorectal, gynecologic, head and neck, kidney, liver, lung, lymphoma, myeloma, prostate, skin, and thyroid.
- Causes: It is usually not possible to know exactly why one person develops cancer and another does not. Research has shown that certain risk factors may increase a person's chances of developing cancer. Cancer risk factors include exposure to chemicals or other substances (i.e., tobacco, alcohol), as well as certain behaviors like sun exposure, diet, or obesity. Risk factors also include things people cannot control, like age and family history. A family history of certain cancers can be a sign of a possible inherited cancer syndrome. These types of risk factors act on the body slowly over time, so the cancers that may result from them may not show up until a person is an adult. Healthy choices begin early in life. (1.d)
- To lower the risk of getting cancer maintain a healthy lifestyle, avoid exposure to known cancer-causing substances, and take medicines or vaccines that can prevent cancer from developing. (2.d)

Essential Knowledge and Skills

2.e);

• explain an external influence on personal health choices and the impacts of the influence (1.f, 2.f);

Grade: Six

- create a plan to meet goal(s) for improving or maintaining health-enhancing physical activity, nutrition, and/or sleep; monitor progress for three to five days (3.f);
- identify a variety of media advertisements (TV, social media, radio,) for physical activity, nutrition, sleep, or personal health products; analyze for persuasive tactics and accuracy of claims (1.g, 2.g, 3.g).

Vaccines can prevent infectious diseases that once killed or harmed many infants,

stomachache, nausea, and diarrhea)-12 months and older.

o Hepatitis B (can lead to chronic hepatitis [liver inflammation], liver cancer, and

Essential Understandings		ial Understandings	Essential Knowledge and Skills
		death)-newborns to adults.	
	o	Human papillomavirus (HPV) (virus that causes some cancers)-three shots	
		given on a schedule for ages 9 to 45.	
	o	Influenza/Flu-annual shot or nasal spray to protect against different types of flu.	
	o	Measles (respiratory disease), mumps (fever, swollen cheeks, and jaw), and	
		rubella (type of measles) (MMR)–12 months and older.	
	o	Meningococcal (bacterial illness that affects the lining that surrounds the brain	
		and spinal cord; two different types)-children through adult, depending on type.	
	o	Streptococcus pneumoniae (bacterial infection affecting blood, middle ear,	
		spinal cord, and pneumonia)-infant to adult.	
	O	Polio (virus that can cause paralysis or death)—as young as six weeks of age.	
	O	Rotavirus (can cause severe diarrhea and dehydration)-as young as six weeks of	
		age.	
	O	Varicella Virus/Chickenpox (can cause skin infections, pneumonia)–12 months	
		of age and older.	
•	Ef	fect of vaccines/immunizations on individuals and others (2.e):	
	O	Vaccinations are a highly effective, safe, and easy way to help keep people	
		healthy, and they limit the effect of spreading diseases to others.	
	O	On-time vaccination throughout childhood is essential because it helps provide	
		immunity before children are exposed to potentially life-threatening diseases.	
	O	Vaccines are tested to ensure that they are safe and effective for children to	
		receive at the recommended ages.	
	O	There are some allergens, such as eggs, that may cause adverse reactions with	
		some vaccines. Parents should discuss their child's allergies with their health	
		care provider.	
•		rategies to reduce illness at home and at school – Talk with a health care provider	
	abo	out available vaccines. If a person is ill with a communicable disease, they should	
	sta	y home to limit spreading illness to others. (3.e)	

o Conflict (uses an unresolved problem or situation).

Essential Understandings	Essential Knowledge and Skills
There are external influences that can affect personal health choices in positive and	
negative ways.	
• Family: Research has shown that friends and families are one of the biggest	
influences on lifestyles and nutrition. Family can influence factors that are inherited	
that may affect personal health, from food choices to types of physical activity	
people engage in. (1.f. 2.f)	
• Peers: Peers influence teenagers to do things they might not do on their own.	
Research has shown that the mere presence of peers—not their direct	
verbal/nonverbal pressure—affects adolescents' decision-making. (1.f, 2.f)	
• Culture: can influence health attitudes, beliefs, and practices. (1.f)	
• Environment: the way community is designed to include access to health care,	
healthy foods, and places for activity; social networks and social supports. (1.f, 2.f)	
• Screen time: can provide access to health information and applications that promote	
healthy food choices and physical activity; can negatively affect sleep, mental,	
emotional, and social health, physical health (posture, lack of physical activity,	
affect vision, weight gain, increased risk of diabetes and heart disease); still much	
that is not known about long-term effects of screen time on health. (1.f, 2.f)	
• Social media: can inspire but can also foster unrealistic expectations for health; can	
provide information to support healthy choices but can also promote negativity,	
false information and unhealthy products. (1.f, 2.f)	
The goal of advertisements is to sell; to influence buyers by promoting a product,	
service, or company.	
• Advertisement techniques may include (1.g):	
o Bandwagon (everyone else is doing it).	
o Fear (scare people into buying/believing something).	

Essenti	al Understandings	Essential Knowledge and Skills
О	Shock (uses controversy to gain attention).	
О	Problem/Benefit (convince someone they have a problem and the product is	
	the solution).	
O	Testimonial/Celebrity/Endorsements (provide credibility; believe a personal	
	story).	
О	Anti-Ad (tells the audience they are smart enough to see through the tricks	
	played by advertisers).	
О	Association (linking a product to certain values, groups, or people).	
О	Additional advertising tactics include recognizable logos, repetition, bribery	
	(deals/sales), emotional appeal, and slogans.	

Strand: Substance Use/Misuse Prevention

Standards:

- 6.1.h Differentiate between proper use and misuse of prescription and nonprescription medications.
- 6.2.h Evaluate the influence of media and marketing techniques on prescription, nonprescription, and unregulated medication choices.
- 6.3.h Describe where to access accurate information on the proper use of prescription, nonprescription, and unregulated medications.
- 6.1.i Recognize social influences/influencers on both the reduction and promotion of the use of alcohol, tobacco, nicotine products, and other drugs.
- 6.2.i Identify the benefits of a smoke- and tobacco/nicotine-free environment.
- 6.3.i Examine the changes in school and community policies and laws regarding tobacco/nicotine-free environments.
- 6.1.j Define addiction and substance use disorder.
- 6.2.j Describe characteristics of substance use disorder.
- 6.3.j Describe the types of support available at school and in the community for substance use disorders.
- 6.1.k Identify different types of opioids.
- 6.2.k Differentiate between legal and illegal drugs that fall into the opioid category.
- 6.3.k Describe the dangers of opioids in the home and the community effects of the national opioid epidemic.
- 6.1.1 Explain the importance of accepting responsibility for personal actions to avoid risk-taking behaviors related to substance use.
- 6.2.1 Analyze family and peer pressure as influences on the use and nonuse of opioids, alcohol, tobacco, inhalants, and other drugs.
- 6.3.1 Identify mental and health professionals and explain their role in preventing the use/abuse of prescription opioids and other drugs.

All drugs (medicines, medications, and illicit drugs) affect the body and how it functions. Some effects are helpful, but some are harmful if used incorrectly or at all.

- Prescription medications require a doctor/health care provider order.
- Nonprescription medications or over-the-counter medications, such as aspirin and cough medicine, can be bought at the store without visiting the doctor.
- Unregulated medications may include vitamins and supplements (herbal, dietary). The Food and Drug Administration (FDA) is not authorized to review dietary supplement products for safety and effectiveness before they are marketed; therefore, dietary supplements are not subject to the strict standards governing the sale of prescription and nonprescription drugs.
- Proper drug use: It is important to follow doctor's orders for prescription medication or the safety regulations on nonprescription medicines. Medicine should only be used for the illness or problem it is meant for and only for the person it is meant for. Medicine can be harmful to the body if taken incorrectly. It can lead to illness or injury of the body organs. Many medicines can look similar, but each medicine has a unique function and when taken by accident, or in excess, can be harmful to the body. (1.h)
- Children should only take medicine given to them by a parent, doctor, nurse, or other trusted adult, not from a peer or a stranger. (1.h)
- Drug misuse: When a person is prescribed a drug but does not follow directions on the label, it is considered drug misuse. Prescription drug misuse can include taking the incorrect dose, taking a dose at the wrong time, forgetting to take a dose, and stopping medicine too soon (Institute for Safe Medication Practices). (1.h)
- Drug abuse: The use of a medication without a prescription in a way other than as prescribed or for the experience or feelings created when taking the medicine is drug abuse (<u>National Institute on Drug Abuse</u>). For example, when a person takes a prescription drug to feel good or "get high." (1.h)
- Review persuasive tactics from Disease Prevention/Health Promotion content. (2.h)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- list appropriate use and misuse of prescription, nonprescription/over-the-counter, and unregulated medications (1.h);
- identify marking techniques and influences on medication choice and where to access accurate information (2.h, 3.h);
- respond to the statement, "but everyone is doing it (taking drugs)"; include what influences students in positive and negative ways regarding substance use and how students can be leaders in prevention (1.i, 1.l, 2.l);
- list the benefits of a smoke- and tobacco/nicotine-free environment (2.i);
- list school or local laws/policies related to smoke/nicotine-free environments and why they are important (3.i);
 - Option: Identify gaps in laws/policies and write supporting letters to school administrators/state legislators.
- create a conversation (written or oral) with a peer that may be thinking about or has started using drugs and explain addiction, substance use disorder, and resources for help and assistance (1.j);
- create a fact sheet to explain the opioid crisis

Essential Understandings

• Accurate information about prescription, nonprescription, and unregulated medications can be accessed from health care providers, FDA, and National Institutes of Health (NIH) MedlinePlus. (3.h)

Social learning is considered the most important single factor in addiction. It includes patterns of use in the addict's family or subculture, peer pressure, and advertising or media influence.

- Influences include other people (peers, parents, and adults), popular media (make it seem like it is OK/cool), for escape and self-medication (manage stress or regulate their lives without a healthy outlet), boredom, rebellion, instant gratification (shortcut to happiness), lack of confidence, and misinformation about the risks of drug use. (1.i)
- Social status is important to teens. Teens may use drugs to fit in, impress new friends, or to be social. (<u>Teenagers and Drugs</u>) There is particular concern during transitions—elementary to middle school, middle school to high school, and relocating/moving. (1.i)
- Prevention may include the effects of alcohol, marijuana/cannabis, and drug use on things teens personally care about and personal short- and long-term goals.
 Protective factors include supportive parents, a strong parent-child bond, parental monitoring, self-control, engaging in healthy activities, friends/peers who support nonuse, academic competence, and strong neighborhood attachment (<u>Preventing Drug Use among Children and Adolescents</u>) (1.i)
- Smoke and tobacco/nicotine-free environments protect people from exposure to secondhand smoke (2.i)
 - o Smoke travels through walls, ventilation systems, and hallways, which exposes nonsmokers to the same health threats faced by smokers. Smoke-free environments are helpful for children, who have still-developing lungs and are easily harmed by smoke exposure. Children exposed to tobacco smoke are at

Essential Knowledge and Skills

to a parent or peer (1.k, 2.k, 3.k);

• List mental and health professionals that can help with preventing the use/misuse of substances and how they can help (3.1).

Health Smart Virginia

EVERFI

	Τ		
Essential Understandings	Essential Knowledge and Skills		
risk for asthma and other respiratory illnesses, and earaches.			
o Tobacco smoke can be measured in high quantities more than 20 feet from an			
outdoor source.			
School and community policies and laws (3.i):			
o In Virginia, smoking is prohibited in government buildings, health care			
facilities, restaurants, bars, retail stores, public schools, and recreational and cultural facilities.			
o Virginia law states that, "Smoke" or 'smoking' means the carrying or holding			
of any lighted pipe, cigar, or cigarette of any kind, or any other lighted smoking			
equipment, or the lighting, inhaling, or exhaling of smoke from a pipe, cigar, or			
cigarette of any kind." (§15.2-2820 Code of Virginia)			
• Review school policies for smoke and tobacco/nicotine (3.i).			
The preferred term for drug addiction is substance use disorder (SUD). Compassion and			
understanding about this disease are important in helping people access resources for			
assistance.			
Drug addiction/SUD/substance abuse disorder is defined as a chronic, relapsing			
disorder characterized by compulsive drug seeking and use despite adverse			
consequences. It is considered a brain disorder because it involves functional			
changes to brain circuits involved in reward, stress, and self-control, and those			
changes may last a long time after a person has stopped taking drugs. (National			
<u>Institute on Drug Abuse</u>) SUD/substance abuse disorder is characterized by			
symptoms such as excessive use of a substance, difficulty limiting its use, craving,			
impaired social and interpersonal functioning, a need for increased amounts of the			
substance to achieve the same effects, and withdrawal symptoms upon			
discontinuance. (1.j, 2.j)			
Support available for substance use disorders include (3.j)			
o School (school counselors, psychologists, social workers, substance abuse			

Essential Understandings	Essential Knowledge and Skills
counselors).	
o Community (Community Services Board, health care providers, SAMHSA's	
National Helpline at 1-800-662-HELP, behavioral health treatment centers and	
services (<u>FindTreatment</u>); and recovery and recovery support services.	
The misuse of and addiction to opioids—including prescription pain relievers, heroin,	
and synthetic opioids such as fentanyl—is a serious national crisis that affects public	
health as well as social and economic welfare. (Opioid Overdose Crisis)	
All opioids are chemically related and interact with opioid receptors on nerve cells	
in the body and brain. Regular use—even as prescribed by a doctor—can lead to	
dependence and, when misused, opioid pain relievers can lead to addiction,	
overdose incidents, and deaths. Opioids are a class of drugs that include the illegal	
drug heroin, synthetic opioids such as fentanyl, and pain relievers available legally	
by prescription, such as oxycodone (OxyContin), hydrocodone (Vicodin), codeine,	
morphine, and many others (<u>Prescription Opioids Drug Facts</u>). Pain medications	
may be prescribed for sports injuries, dental work, or surgery. Opioids are highly	
addictive and should only be taken under a doctor's care. (1.k, 2.k)	
National opioid epidemic (3.k)	
o In 2016, the federal government declared opioid addiction a public health	
emergency.	
o From 1999-2019, nearly 500,000 people died from an overdose involving any	
opioid, including prescription and illicit opioids. (<u>Understanding the Epidemic</u>)	
o The economic burden of opioid use disorder and fatal opioid overdose was	
estimated to be \$1.02 trillion in 2017, with a majority of the costs attributed to	
reduced quality of life from opioid use disorder and the value of life lost due to	
fatal opioid overdose. (<u>Health Topics – Opioid Overdose</u>)	
o Review prescription/nonprescription precautions.	
 Keeping pain medications/opioids in the home can lead to an increased risk 	

Essential Understandings	Essential Knowledge and Skills
of theft and accidental poisoning. Prescription opioids and all medications	
should be in a locked container or safely disposed (do not flush leftover	
medication; check with the local Community Services Board for national	
take-back days and information about safe disposal of medications).	
 Parents and children can talk with physicians about non-opioid pain options 	
for surgical procedures or other medical needs.	
Adolescents need to be aware of the social effects that influence the use and nonuse of	
substances in order to make healthy decisions to avoid risk-taking behaviors related to	
substance use.	
• Research has found that adolescents possess the knowledge, values, and processing	
efficiency to evaluate risky decisions as competently as adults; however,	
adolescents are particularly sensitive to social stimuli (acceptance, fitting in,	
pressure) and this may affect their capacity to "put the brakes on" acting	
impulsively. (1.l)	
• Review influences and protective factors for use and nonuse of drugs (see 1.i). (2.l)	
• In addition to parents, there are health professionals that can help adolescents make	
healthy decisions to avoid risk-taking behaviors related to substance use. (3.1)	
o School counselors, psychologists, social workers.	
o School substance abuse counselors.	
o Health care providers.	
o Community Services Board staff and resources for community prevention	
initiatives.	

Strand: Safety/Injury Prevention

Standards:

- 6.1.m Identify strategies to prevent injuries, including safety habits in vehicles, on the Internet, in public areas, and during recreational activities.
- 6.2.m Explain the importance of accepting responsibility for personal actions to avoid risk-taking behaviors and injury.
- 6.3.m Develop a plan to remain injury-free, including avoiding risk-taking behaviors online and in the community and using safety equipment.
- 6.1.n Describe basic first aid and emergency procedures for common injuries, including sunburn, cuts, scrapes, and insect stings.
- 6.2.n Use a decision-making process to determine when medical assistance is needed.
- 6.3.n Demonstrate basic first aid and emergency procedures for common injuries, including sunburn, cuts, scrapes, and insect stings.
- 6.1.0 List types and purposes of school safety drills.
- 6.2.0 Describe the consequences of not following school safety drill procedures.
- 6.3.0 Demonstrate appropriate behaviors during lockdown, fire/evacuation, tornado, earthquake, and other safety drills.

Essential Understandings	Essential Knowledge and Skills
Safety rules are put in place to help prevent injuries, accidents, and keep tragic	In order to meet these standards, it is expected
events from happening.	that students will
Motor vehicle safety: Children 12 and younger should always ride in the back	list strategies to prevent injuries when

you, or wants pictures of you.	demonstrate basic first aid procedures and

- Tell a trusted adult before sharing any personal information—name, address, phone number, school.
- Do not meet someone in person that you have only met online.
- Do not be mean or rude online.
- Safety in the community/public areas:
 - o Ensure that parents/guardians know where you are/where you are going and the route(s) you will take.
 - o Be aware of your surroundings.
 - o Do not talk to or go places with people you do not know.
 - o Know neighbors and places you can go to get adult help if needed (police, community centers, open school buildings).
- Recreational activities (1.m)
 - Biking: Wear a helmet; wear bright color clothing; only bike on roads or trails you are comfortable on; ride on a sidewalk, trail, or the right side of the road; use hand/arm signals to let others know you are turning; stop at stop signs; walk your bike across the road; look for cars before crossing the road.
 - o Recreational equipment (scooter, skateboard, inline skates/rollerblading): Wear a helmet, gloves, elbow and knee pads, wrist guards, and sneakers; be aware of others when using a skate park; only ride in appropriate areas; be aware of others on sidewalks.
 - o Water: Learn how to float and swim, wear a personal flotation device (life jacket) when boating or if not comfortable in the water when swimming; do not swim alone; follow the lifeguard's directions; walk around the pool; and don't push or jump on others.
- The section of the brain most involved in emotional and social interaction becomes very active during puberty, while the section most critical for regulating behavior is still maturing into early adulthood. This helps to explain

Essential Knowledge and Skills

- use decision-making skills to determine when medical assistance is needed (2.n, 3.n);
- describe school safety drills, associated safety procedures, and the need to follow safety procedures (1.0, 2.0);
- demonstrate appropriate behavior during school safety drills (3.0);
- identify locations where swim lessons are provided in your community;
- describe the importance of following online safety rules (3.m).

Additional resources:

Health Smart Virginia EVERFI

Essential Understandings Essential Knowledge and Skills why adolescents engage in risky behaviors; however, research has found that adolescents possess the knowledge, values, and processing efficiency to evaluate risky decisions as competently as adults. Accepting responsibility for personal actions to avoid risk-taking behaviors and injury is a sign of maturity. Having the skills of decision making, being goal-oriented, and having supportive friends and family can help with responding to peer pressure, dares, and engaging in risky behaviors to fit in. (2.m) First aid is the emergency care or treatment given to a sick or injured person before regular medical aid can be obtained. Call 911 for emergency services in any situation when the scene of the injury is unsafe or the person is unresponsive or not breathing, Seek adult assistance. Tell a parent/guardian of any injuries. Basic first aid for common injuries including:(1.n) Sunburn Cuts and scrapes Insect bites and stings Additional first aid for common injuries may be included at teacher discretion. Decision-making process: (2.n) Identify the decision to be made. List all of the possible options. Evaluate the pros and cons of each option. Make your decision based on the evaluation of each option. Reflect on the decision that was made. School safety drills are designed to keep students and school personnel safe when a danger exists inside or outside the school building.

Esse	ential Understandings	Essential Knowledge and Skills
•	Types and purposes of school safety drills may include (1.o):	
	o Lockdown: Used to prevent people from leaving the building (stay in	
	classrooms) due to a threat inside or outside the school, or due to a	
	dangerous person, chemical, or other threat (Virginia requires four	
	lockdown drills each school year [Code of Virginia §22.1-137.2])	
	o Fire/evacuation: Used to get people out of a building safely when	
	conditions inside have become life-threatening (Virginia requires four	
	fire/evacuation drills each school year [Code of Virginia §22.1-137])	
	o School bus evacuation/emergency: Exiting a school bus safety due to an	
	emergency inside or outside the bus (Virginia requires at least one bus	
	emergency drill each school year [Code of Virginia §22.1-184])	
	o Tornado: The outside of the building is unsafe because of dangerous wind	
	or precipitation; go to interior spaces of building with no windows to avoid	
	injury and take cover (Virginia requires two tornado drills each school year	
	[<u>Code of Virginia §22.1-137.1]</u>)	
	o Earthquake: When moving around could cause serious injury, students and	
	employees learn the areas in their building or classrooms that will be safest	
	to be in and how to take cover to avoid serious injury (Virginia does not	
	have a requirement for earthquake drills).	
	o Note: School drills may have different names. Teachers should use the	
	school-specific names and include any other types of drills conducted by	
	the school.	
•	School safety drills play an important role in keeping students and staff safe in	
	the event of an emergency. Drills are used to train school staff to know their	
	responsibilities. It's equally important for students to know the planned	
	procedures so they can work cooperatively with adults. Familiarizing teachers	
	and students with the emergency plan helps to reduce anxiety, panic, and	
	confusion and helps everyone remain calm. Mock drills serve as a means to	

Essential Understandings	Essential Knowledge and Skills
evaluate the reaction of adults and students, how effectively they follow the	
emergency procedures, and the length of time it takes to evacuate and account	
for everyone. It gives an opportunity to reduce evacuation time, ensures that	
everyone is using the most effective exit route, ensures all students are	
accounted for, and teaches students to follow instructions and remain calm.	
(2.0)	
• Review classroom- and school-specific expectations for school safety drills.	
(3.0)	

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 6.1.p Define body image and explain the importance of having a positive body image.
- 6.2.p Describe how culture, media, and other external factors influence perceptions about body image.
- 6.3.p Analyze the influence of media on issues related to body image.
- 6.1.q Analyze factors that contribute to group success (e.g., respecting individual differences and opinions, accepting responsibility, contributing positively, knowing when to lead and when to follow, dealing with conflict, using effective face-to-face and online communication skills).
- 6.2.q Explain the importance of understanding the feelings and perspectives of others.
- 6.3.q Demonstrate ways to show respect for individual differences, opinions, and beliefs.
- 6.1.r Define mental health and describe what it means to be mentally healthy.
- 6.2.r Identify protective and risk factors for mental illnesses and challenges.
- 6.3.r Compile and promote personal, family, and community resources that can help oneself and others with mental illnesses and challenges.
- 6.1.s Describe personal strengths and areas for growth.
- 6.2.s Describe strategies to work through adversity and challenges.
- 6.3.s Ability to set and monitor a personal goal to address one area of growth.
- 6.1.t Identify potential positive and negative responses to stress and criticism.
- 6.2.t Analyze internal factors, such as responses to criticism or stress, which influence emotional and social health.
- 6.3.t Ability to a plan to manage stress.
- 6.1.u Explain the importance of personal boundaries for physical, emotional, and social health.
- 6.2.u Identify ways to set and communicate personal boundaries and how to respect the boundaries of others.
- 6.3.u Practice ways to communicate personal boundaries for privacy, safety, and expression of emotions and opinions.

Having a positive body image affects self-esteem and self-image.

- Body image is a subjective picture of one's own physical appearance, established both by self-observation and by noting the reactions of others. althy body image means a person feels comfortable in their body and feels good about the way they look. This includes how they think and feel about their appearance and how they judge their self-worth. A negative body image may occur when someone is overly focused on comparing their size, shape, or appearance to unrealistic ideals. A negative body image can put a person at higher risk of certain mental health conditions, such as eating disorders and depression. (U.S. Department of Health & Human Services Office on Women's Health) (1.p)
- Culture is the beliefs, customs, and arts of a particular society, group, place, or time. Culture can include family, community, and peer groups. Body image can be influenced by the different cultures that a person is part of, how a person feels about themselves, and how they feel about their body. (2.p)
- Forms of media include TV, print, movies, music, advertisements, Internet, and social media. Images and behaviors portrayed by the media can positively and negatively influence what people think is normal, expected, achievable, or will make a person happy or popular. Comparisons with unrealistic or unattainable bodies can lead to negative self-image/body image (body shame and low body esteem), which can lead to serious behaviors. There can be positive images and behaviors in media that challenge harmful stereotypes about appearance ideals. (3.p)

Teamwork is the cooperative or coordinated effort of a group of people acting together as a team or in the interests of a common cause. Teamwork skills are needed in family, school, and work/career collaborations throughout life.

• Factors that contribute to group success may include respecting individual differences and opinions, empathy, honesty, awareness, collaboration,

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- select a variety of advertisements and analyze the possible impact on body image; include definition of body image and the importance of a positive body image (1.p, 2.p, 3.p);
- analyze group dynamics to determine factors that influence success in positive and/or negative ways (1.q);
- participate in a group collaboration towards a goal and track/reflect on factors that were used and ways that respect for individual differences, opinions, and beliefs were demonstrated (2.q, 3.q);
- describe what it means to be mentally health (1.r);
- list risk and protective factors for mental illnesses and challenges;
- list resources for help and assistance with mental health concerns (2.r, 3.r);
- list personal strengths and areas of interest for growth (1.s);
- select an area for growth to develop a SMART goal and action steps; include possible challenges and strategies to address/manage the challenges (2.s, 3.s);
- describe/role play a stressful situation that involves criticism and identify both positive

compromise, accepting responsibility, contributing positively, knowing when to lead and when to follow, dealing with conflict, and using effective face-to-face and online communication skills. (1.q)

- Respecting individual differences, perspectives, and opinions, and having empathy will affect group success by ensuring that everyone's voices are heard, people feel valued, individuals' strengths and talents are used, everyone is engaged and committed to the success of the group, and everyone learns through the contributions of others. (2.q)
- Ways to show respect for individual differences may include (3.q):
 - o Try to learn something from the other person.
 - o Show interest and appreciation for the culture and background of others.
 - o Don't insult, tease, or make fun of people.
 - o Listen to others when they speak.
 - o Be considerate of people's likes and dislikes.
 - o Don't talk about people behind their backs.
 - o Be sensitive to other people's feelings.

According to the World Health Organization (<u>WHO</u>), health is a state of complete physical, mental, and social well-being, not merely the absence of disease or infirmity.

- "[Mental health is] a state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community. With respect to children...having a positive sense of identity, the ability to manage thoughts, emotions, as well as to build social relationships, and the aptitude to learn and to acquire an education, ultimately enabling their full active participation in society." (WHO Mental Health Action Plan 2013-2020) (1.r)
- Mental health includes our emotional, psychological, and social well-being. It

Essential Knowledge and Skills

and negative ways to respond (1.t, 2.t, 3.t);

Grade: Six

- explain the importance of setting personal boundaries and respecting the boundaries of others (1.u);
- role-play conversations/situations for setting and respecting personal boundaries (2.u, 3.u).

Everyone has different strengths that make them unique/different from others.	
• Personal strengths are the things a person is good at and likes to do. Strengths	
may include (1.s):	
o things of interest (music, art, science, building things, cooking, reading)	
o skills (painting, playing an instrument, playing a sport);	
o good qualities (kindness, humor, leadership).	
 Strengths and skills can change throughout life with a desire to learn or with the 	
interest, time, experience, and practice (learning to play the piano). Skills to be	a
leader and social skills (being kind, communication) are ongoing life skills	
 Adversity and challenges are a part of life and help to build strength, character, 	
perseverance, and resilience. (2.s)	
o Adversity is a state or instance of serious or continued difficulty or	
misfortune.	
 Strategies for working through adversity and challenges may include: 	
 Healthy habits—getting enough sleep, eating well, and 	
exercising—can reduce stress, which may, in turn, boost	
resilience.	
 Caring relationships with adults. Looking to loved ones for help 	
and emotional support, increasing self-care, and focusing on the	
aspects of the situation that are under your control. Learning to b	e

Essential Understandings	Essential Knowledge and Skills
OK with making mistakes, big or small, is a critical skill.	
• Goal setting using SMART (specific, measurable, attainable, realistic, timely)	
goals. Plans to meet goals should include thinking about potential challenges	
(things that might stop progress) in advance and include possible strategies to	
address those challenges. (3.s)	
Everyone—adults, teens, and even children—experiences stress. Learning healthy ways	
to cope and getting the right care and support can help reduce stressful feelings and	
symptoms. (<u>CDC</u>)	
• Stress is a reaction to a situation where a person feels threatened or anxious.	
Stress can be positive, also called eustress (e.g., preparing for a wedding), or	
negative (e.g., dealing with a natural disaster). (1.t)	
o Positive responses to stress may include increased alertness, motivation,	
and focus. Talking with friends, family, or others may also help work	
through stress. Positive responses can lead to growth, adaptation, and	
learning that promotes coping skills and resilience. (1.t)	
o Negative responses to stress may include overeating, smoking, and the use of alcohol or drugs. (1.t)	
Criticism, the act of criticizing: to consider the merits and demerits of and judge	
accordingly; to find fault with, point out the faults of .(1.t)	
o Positive responses to criticism may include asking for clarification and	
learning from constructive criticism (speaks to an issue and offers a	
learning experience) while ignoring/walking away from irrelevant (has	
nothing to do with the situation) or destructive criticism (meant to hurt	
someone).	
o Negative responses to criticism can include anger, name-calling, conflict,	
and other responses associated with distress. (1.t)	
Responses to stress/distress may cause physical health problems including	

are, being an active listener, and listening for verbal and watching for nonverbal

Essential Understandings	Essential Knowledge and Skills
cues (if someone steps back, the other person may be too close). (2.u, 3.u)	
Teacher note: Reminder that all school personnel are mandated reporters. Child abuse	
and recognition training is required for initial licensure and renewals; training and	
resources are available at the <u>Virginia Department of Education</u> .	

Strand: Violence Prevention

Standards:

- 6.1.v Analyze the role of emotions and media influences on conflict and violence.
- 6.2.v Explain methods to reduce violence and peacefully resolve conflict.
- 6.3.v Practice ways to resolve conflict peacefully.
- 6.1.w Describe the possible effects of bullying and cyberbullying, including the increased risk for harm and violence when bullying aggression persists.
- 6.2.w Recognize the role of family, peers, community, and the media in preventing bullying and cyberbullying.
- 6.3.w Evaluate a plan to prevent or manage the effects of bullying and cyberbullying.
- 6.1.x Explain what a gang is and identify gang-related behaviors.
- 6.2.x Explain the importance of friends or adult mentors in avoiding gang involvement.
- 6.3.x Identify resistance skills to avoid violence, gangs, weapons, alcohol, tobacco, and other drugs.

Essential Understandings

Youth violence is a serious problem that can have lasting, harmful effects on victims and their families, friends, and communities. (Youth Violence)

- Although experts agree that no single factor can cause a nonviolent person to act aggressively, some studies (though not all) suggest that heavy exposure to violent media can be a risk factor for violent behavior. Research shows that viewing (or playing) violent content could increase the chance that a child will act aggressively. Heavy exposure to violent media can lead to desensitization—being less affected by violence. There is a small, reliable association between violent video game use and aggressive outcomes, such as yelling and pushing. However, these research findings are difficult to extend to more violent outcomes. (1.v)
- Emotions can help and hinder problem solving. When it comes to dealing with conflict, many if not most people ignore or suppress emotions. Yet no matter how hard people try to remain unemotional, during a conflict their hearts tend to beat faster,

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- analyze a variety of conflict situations or situations that may escalate to use of violence to explain the role of emotions, possible media influences, and possible methods to reduce potential violence and resolve conflict peacefully (1.v, 2.v, 3.v);
- examine a variety of bullying and cyberbullying situations to explain the possible effects and how peers, family, community, and the media

Grade: Six

Essential Understandings

their palms sweat, and their breathing quickens. All of these physical signs attest to underlying emotions that can complicate the discussion. (1.v)

- Youth violence can include fighting, bullying, threts with weapons, and gang-related violence. A young person can be involved with youth violence as a victim, offender, or witness. Youth violence has serious and lasting effects on the physical, mental, and social health of young people. Youth violence is preventable. Strategies to prevent youth violence include (Youth Violence): (2.v)
 - o Promote family environments that support healthy development.
 - o Provide quality education early in life.
 - Strengthen youth's skills (communication, problem-solving, conflict resolution and management, empathy, impulse control, and emotional regulation and management).
 - o Connect to caring adults and activities.
 - o Create protective community environments.
- Skills to address conflict (2.v):
 - o Be able to reduce your own stress quickly (calming down before addressing the conflict).
 - o Be emotionally aware of yourself and the other person (how are you feeling, how is the other person feeling).
 - o State what the conflict is about.
 - o Communication skills
 - Listen carefully to others.
 - Speak directly to each other.
 - Speak honestly and with kindness.
 - Focus on your body language (nonverbal communication).
 - Eye contact
 - □ Facial expressions (smile, frown)
 - ☐ Gestures (nodding)

Essential Knowledge and Skills

can help prevent the bullying (1.w, 2.w, 3.w);

- evaluate the school's current bullying/cyberbullying prevention measures and make recommendations to strengthen plans to prevent or manage the effects of bullying and cyberbullying (3.w);
- explain what a gang is and ways to help students avoid gang involvement (1.x, 2.x);
- research and present local gang statistics related to violence (1.x);
- use communication skills to demonstrate resistance to negative pressure for engaging in violence, gangs, weapons, alcohol, tobacco, and other drugs (3.x).

Posture (face person you are speaking with)	
☐ Tone of voice	
□ Volume of voice	
o Propose solutions or compromises.	
o Agree on a solution or compromise to try.	
o Ask an adult for help if the conflict is not addressed.	
Bullying and cyberbullying are serious problems. Kids who are bullied can experience	
negative physical, school, and mental health issues. (Effects of Bullying)	
Cyberbullying is bullying that takes place over digital devices and can occur through	
text, apps, or online in social media, forums, or gaming where people can view,	
participate in, or share content. Cyberbullying includes sending, posting, or sharing	
negative, harmful, false, or mean content about someone else. It can include sharing	
personal or private information about someone else causing embarrassment or	
humiliation. Some cyberbullying crosses the line into unlawful or criminal behavior.	
(What is Cyberbullying) (1.w)	
• Effects of cyberbullying are the same as bullying that may be done face-to-face,	
including depression and anxiety, increased feelings of sadness and loneliness,	
changes in sleep and eating patterns, loss of interest in activities that used to be	
enjoyable, physical health complaints, decreased academic achievement (missing,	
skipping, or dropping out of school), and substance use. Some of these issues may	
persist into adulthood. A small number of bullied children might retaliate through	
extremely violent measures. Kids who bully others can also engage in violent and	
other risky behaviors into adulthood. (1.w)	
• Everyone can have a role in preventing and responding to bullying and cyberbullying.	
(2.w)	
o Peers can help prevent bullying and cyberbullying by understanding what it is,	
how to respond, how to support someone who is bullied, and how to report and get	

sen	tial Understandings	Essential Knowledge and Skills
	help.	
o	Families/parents can open lines of communication about bullying before their child	
	is involved in bullying to make it easier for them to tell when something happens.	
	It is also important to work with the school to help prevent bullying before it starts	
	or share what is happening with the school if it is happening.	
О	Schools can help by establishing a supportive and safe school climate where all	
	students are accepted and knowing how to respond when bullying happens are key	
	to making sure all students are able to learn and grow.	
o	Community members can help by knowing what bullying is and how to respond.	
o	Media can help prevent bullying with accurate reporting that is presented in a	
	balanced way and that considers the effect of the reporting on the children and	
	families involved.	
Pı	reventing bullying should include promoting an understanding of what bullying and	
су	berbullying are, how to recognize it, how to respond, how to support someone who	
is	bullied, and how to report and get help. Managing bullying should include how to	
re	spond and clear expectations and support for reporting. (3.w)	
О	Reporting: When cyberbullying happens, it is important to document and report	
	the behavior so it can be addressed.	
	 Do not respond to and don't forward cyberbullying messages. 	
	 Keep evidence of cyberbullying. Record the dates, times, and descriptions of 	
	instances when cyberbullying has occurred.	
	 Save and print screenshots, emails, and texts. Use this evidence to report 	
	cyberbullying to online service providers.	
	 Block the person who is cyberbullying. 	
	 Report to parents, online service providers, law enforcement (if it includes 	
	threats of violence or private images), and school personnel (teacher,	
	counselor, or administrator).	
R	eview school-specific reporting protocols for bullying and cyberbullying.	

Essential Understandings Essential Knowledge and Skills Gang members generally range in age from 13 to 24 but can be as young as nine. Gangs can include all ethnic groups. Many gang members are boys, but ten percent of all gang members are girls and that number is growing. A gang is a group of two or more persons, whether formal or informal, and which individually or collectively engage in activities that are illegal, destructive, disruptive, or intimidating. (1.x)Gang activities: All use threat, intimidation, and violence to control neighborhoods and boost their illegal money-making activities, which include robbery, drug and gun trafficking, prostitution and human trafficking, and fraud (Gangs). In a school setting, gang members may engage in threats and intimidation, physical bullying and cyberbullying, fighting, recruiting, and criminal activities such as the introduction and use of weapons, assault, sex trafficking, vandalism, and illegal drug sales (Gangs in Schools). Gangs are typically organized upon racial, ethnic, or political lines and employ common names, slogans, aliases, symbols, tattoos, style of clothing, hairstyles, hand signs or graffiti (About Violent Gangs). (1.x) Having friends who are involved in school and activities in the community, respect and accept one another, and help provide a sense of belonging can help prevent someone from joining a gang. Adult mentors: Mentoring works on the foundation that youths benefit from close, enduring, caring relationships with adults. By providing adult support and guidance through adolescence, mentoring has been found to provide benefits to both youths and mentors, including the prevention of juvenile delinquency and youth gang involvement. Mentoring is popularly used in school and after-school programs, as well as in the broader community. (Prevention Efforts) (2.x) Resistance is an act or instance of opposing. Resistance skills give people confidence to say, "No," to violence, gangs, weapons, alcohol, tobacco, and other drugs. (3.x) o Resistance skills help people assert themselves, make their voices heard, and

	_

Essential Understandings	Essential Knowledge and Skills
express opinions. These skills can help to make the appropriate and healthy	
decision when faced with negative pressure to engage in activities that make the	
person uncomfortable, goes against values/beliefs, or are not a healthy or safe	
choice. Resistance skills can include:	
 Identifying the right decision. 	
 Valuing your own opinion. 	
 Stating your views assertively. 	
Use verbal and nonverbal communication skills.	
Say "No", repeatedly if needed.	
Use "I" statements.	
 Walk away or avoid negative pressure situations. 	
 Clarifying and questioning. 	

Strand: Community/Environmental Health

Standards:

- 6.1.y Assess environmental health and safety issues in the community.
- 6.2.y Explain the role of the Environmental Protection Agency (EPA) and local agencies in protecting the environment.
- 6.3.y Identify careers and professions associated with environmental health.
- 6.1.z Recognize that all individuals have a responsibility to protect and preserve the environment.
- 6.2.z Create and monitor progress toward a personal goal, service learning, or group project to protect the environment.
- 6.3.z Develop a plan to work collaboratively with peers, families, and community groups to address community environmental health and safety issues.

Essential Understandings	Essential Knowledge and Skills
Environmental health is the science and practice of preventing human injury and	In order to meet these standards, it is expected that

corporations, federal government (EPA, CDC), and international organizations.	<u>EVERFI</u>
Environmental health professionals specialize in a particular area. (3.y)	
o Reducing air, water, soil, noise, or radiation pollution.	
o Protecting our food supply.	
o Improving safety in schools, public areas, and the workplace.	
o Ensuring safe living conditions in housing.	
o Promoting public health with a focus on environmental hazards.	
o Research, education, public policy, improved practices, new technologies.	
• Individuals who succeed in this field tend to be team players with a strong interest	
in science, a commitment to public welfare, and an ability to see the big picture.	
The work enables those in the field to apply science to making the world a better	
place. Some public health workers inspect facilities containing hazardous	
substances or respond to emergency situations. Some ensure worker safety in	
factories and plants. Others travel to inspect facilities or work from offices. (3.y)	
Examples of career and professions include built environment specialist,	
environmental health advocate, environmental health practitioner, food safety	
specialist, occupational health and safety expert, air pollution specialist, solid	
waste specialist, hazardous waste specialist, emergency management specialist,	
industrial hygienist, occupational safety expert, emergency response specialist,	
epidemiologist, surface water specialists, drinking and groundwater specialists,	
environmental science, science and engineering, air quality technician, disease	
control, food and restaurant quality control and inspections, public utilities,	
sanitation services, and toxicologist. (3.y)	
Caring for the environment is everyone's responsibility. (1.z)	
There are many ways to get involved in the community to address environmental	
health and safety issues, such as volunteering for community and school clean-up activities. (2.z, 3.z)	

Grade: Six

Strand: Body Systems

Standards:

- 7.1.a Identify and describe the major structures and functions of the circulatory system.
- 7.2.a Describe how healthy food choices and physical activity keep the circulatory system healthy.
- 7.3.a Promote strategies for maintaining a healthy circulatory system.

Essential Understandings

The circulatory system is the network of blood vessels (arteries, veins, and capillaries) that carry blood to and from all areas of the body. Blood carries the oxygen and nutrients that the organs need to work properly; and blood also carries carbon dioxide to the lungs so that it can be released out of the body through breathing out. (NIH National Heart, Lung, and Blood Institute)

- The heart is located in the center of the chest, near the lungs. It has four chambers surrounded by muscle and other heart tissue. The four chambers include (1.a):
 - o Right and left atrium, located at the top.
 - o Right and left ventricle, located at the bottom.
- Blood flows from the right atrium into the right ventricle and from the left atrium to the left ventricle.
- Chambers are separated by heart valves, which make sure that the blood keeps flowing in the right direction. Valves allow blood to flow out of a chamber and then close to allow the chamber to refill with blood. Valves include (1.a):
 - o Tricuspid: separates the right atrium and right ventricle; acts like a door between the atrium and ventricle to prevent blood from flowing backward into the atrium.
 - o Pulmonary: separates the right ventricle and the pulmonary artery, which carries blood to the lungs to drop off carbon dioxide and pick up oxygen.
 - o Aortic: separates the left ventricle and aorta; opens to allow oxygen-rich blood to leave the heart from the left ventricle through the aorta to the rest of the body.
 - Mitral: separates the left atrium and left ventricle; acts like a door between the

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Seven

- create a diagram that illustrates the circulatory system; label structures and describe the functions of each structure (1.a);
- research and present three strategies (food choices and physical activity) to promote heart and circulatory health (2.a);
- develop and present a public service announcement or other promotional advocacy strategy to promote circulatory system health (3.a).

diabetes.		
o Physical activity can help mair	tain a healthy weight and lower blood pressure,	
blood cholesterol, and blood su	gar levels. Children, adolescents, and adults	
should follow the Centers for I	Disease Control (CDC) Physical Activity	
Guidelines for Americans. (2.a	(3.a)	

Strand: Nutrition

Standards:

- 7.1.b Describe the value of nutrient-dense foods.
- 7.2.b Analyze the effects of nutrition on daily performance (i.e., mind and body).
- 7.3.b Encourage nutrient-dense food choices at home, at school, and in restaurants.
- 7.1.c Describe the benefit of eating foods to meet recommendations for iron, calcium, potassium, vitamin D, and dietary fiber.
- 7.2.c Explain the cognitive and physical benefits of eating a healthy breakfast.
- 7.3.c Educate peers and family members on the importance of eating a healthy breakfast and being physically active.
- 7.1.d Identify decision-making steps for selecting healthy foods and beverages.
- 7.2.d Use a decision-making process to evaluate daily food intake and nutritional requirements.
- 7.3.d Explore opportunities to engage with local school wellness policy committees to advocate for nutritional food and beverage choices for all school-sponsored events.
- 7.1.e Explain how allergens cause an allergic reaction.
- 7.2.e Discuss the concept of an allergen-safe zone.
- 7.3.e Promote understanding of the importance of handwashing, not sharing food, and allergen safe-zones.

Essential Understandings	Essential Knowledge and Skills
Nutrient-dense foods are high in nutrients but relatively low in calories.	In order to meet these standards, it is expected that
Nutrient-dense foods contain vitamins, minerals, complex carbohydrates, lean	students will
protein, and healthy fats. Examples include fruits and vegetables, whole grains,	create messaging to promote nutrient-dense
low-fat or fat-free milk products, seafood, lean meats, eggs, peas, beans, and nuts.	food choices (what and why they are
(National Cancer Institute) (1.b)	important) for a variety of audiences (peers,
Nutrient-dense foods provide the macronutrients and micronutrients for the body to	parents) and situations (home, school,
function without adding empty calories and help to maintain health-enhancing	restaurants) (1.b, 2.b, 3.b);
weight. (1.b)	• research/describe the importance of iron,
Nutrition affects brain health, mood, cognition (thought, mental processes),	calcium, potassium, vitamin D, and dietary

Essential Understandings

creativity, energy, and physical performance. (2.b)

• Restaurants: Most restaurants provide menus and nutritional information online that could be evaluated prior to dining. Nutritional information may be available on menus or asking the server how foods are prepared are ways to make healthy food choices when dining out. (3.b)

A majority of Americans consume sufficient amounts of most nutrients; some nutrients, including iron (girls and women), calcium, potassium, vitamin D, and dietary fiber, are not consumed in sufficient amounts/below the recommended levels. (<u>USDA Dietary</u> Guidelines 2020-2025)

- Iron: Needed to make healthy oxygen-carrying red blood cells. Iron is an important component of hemoglobin, the substance in red blood cells that carries oxygen from the lungs to the heart and to the rest of the body (systemic circulation). The recommendation for ages 9-13 is 8 milligrams (.0003 ounces) per day. Iron is found in lean meats, poultry, and seafood, legumes (beans and peas) and dark-green vegetables, as well as foods enriched or fortified with iron, such as many breads and ready-to-eat cereals. (1.c)
- Calcium: Makes up much of the bones and teeth and helps heart health, muscle function, and nerve signaling. The recommendation for ages 9-13 is 1,300 milligrams (.5 ounce) per day. Calcium is found in dairy (milk, cheese, yogurt, seafood, leafy greens, legumes, dried fruit, tofu, and foods fortified with calcium). (1.c)
- Potassium: A mineral important for nerves and muscles, including the heart. The recommendation for ages 9-13 is 4,500 milligrams (.16 ounce) per day. Potassium is found in vegetables, fruits, and dairy, white potatoes, beet greens, white beans, plain yogurt, and sweet potatoes. Note: Too much potassium can cause kidney problems. (1.c)
- · Vitamin D: Helps the body absorb calcium, facilitates immune system function, and

Essential Knowledge and Skills

fiber on body function (1.c);

• develop a presentation to be used at school or at home that supports and explains the importance of consuming a healthy breakfast and also highlights menu items for breakfast that includes healthy breakfast foods that can be easily made when in a hurry (2.c, 3.c);

Grade: Seven

- use a decision-making process to evaluate and reflect on daily food and beverage intake and nutritional requirements (1.d, 2.d);
- explore opportunities to engage with the local school wellness committee to advocate for healthy nutrition and beverage choices at all school-sponsored activities (including before, after, and during school activities such as classroom celebrations) (3.d);
- share allergen-free strategies with others that includes knowledge of how allergens cause reactions (1.e, 2.e, 3.e).

Additional resources:

<u>Health Smart Virginia</u>

EVERFI

Essential Understandings	Essential Knowledge and Skills
is important for the normal growth and development of bones and teeth. The	
recommendation for ages 9-13 is 600 International Units (IU) per day. Vitamin D is	
found in seafood such as salmon, herring, mackerel, and tuna, and foods fortified	
with vitamin D, especially almond milk, cow's milk, soy beverage (soymilk),	
yogurt, orange juice, and breakfast cereals. (Note: Vitamin D is unique in that	
sunlight on the skin enables the body to make vitamin D. Recommendations for	
vitamin D assume minimum sun exposure.) Vitamin D fortified milk – one cup	
equals 65 percent of the daily recommended allowance. (1.c)	
• Dietary fiber: Helps to maintain a healthy weight and lower the risk of diabetes (by	
helping lower glucose levels), heart disease (by helping lower blood cholesterol),	
and some types of cancer. The recommendation for ages 9-13 is 22-25 grams (.7 to	
.9 ounces) per day. Dietary fiber is found in whole-wheat flour, wheat bran, oats,	
nuts, beans, vegetables (cauliflower, green beans, potatoes, peas, carrots), and fruits	
(apples, citrus fruits). (1.c)	
Eating a healthy breakfast is associated with improved cognitive function	
(especially memory), reduced absenteeism, and improved mood. (School Meals)	
Carbohydrates for breakfast provides the body energy to get started and gives fuel	
to the brain. Protein provides the body with fuel to repair tissue and is a longer	
lasting energy source than carbohydrates. Protein also helps one feel full until the	
next meal. (2.c)	
o Carbohydrates (e.g., whole-grain cereals, bread, fresh fruit, or vegetables)	
o Protein (e.g., low-fat milk, yogurt, cottage cheese, nuts, legumes)	
Setting personal goals and identifying nutritional needs will help decision making.	
• Decision-making process for selecting healthy foods and beverages: (1.d)	
o Identify the decision to be made.	
o List all of the possible options.	
o Evaluate the pros and cons of each option, using criteria such as	

Essential Understandings	Essential Knowledge and Skills
Is this option healthful? Is this a "sometimes" food/beverage?	
What do I need to add to meet my nutrition goals/needs?	
o Make your decision based on the evaluation of each option.	
o Reflect on the decision that was made.	
• In compliance with Public Law 111-296, Healthy, Hunger-Free Kids Act of 2010	
(HHFK), division-level wellness committees are required, and many school	
divisions may require each individual school to have a wellness committee of	
school staff, parents, students, and food and nutrition services staff to support	
ongoing requirements of wellness policy implementation, assessment, and public	
updates. (3.d)	
People who have allergic reactions to food can be supported by helping to keep surfaces	
clean, keep hands clean, and getting help from an adult if needed.	
A food allergy occurs when the body has a specific and reproducible immune	
response to certain foods. The body's immune response can be severe and life	
threatening, such as anaphylaxis. Although the immune system normally protects	
people from germs, in people with food allergies, the immune system mistakenly	
responds to food as if it were harmful. There is no cure for food allergies. Strict	
avoidance of the food allergen is the only way to prevent a reaction. (<u>Food</u>	
Allergies) (1.e)	
Symptoms and the severity of allergic reactions to food can be different among	
individuals and can be different for one person over time. Anaphylaxis is a sudden	
and severe allergic reaction that may cause death. Not all allergic reactions will	
develop into anaphylaxis. Allergic reactions to food may include an upset stomach,	
runny nose, itchy skin rash such as hives, or trouble breathing. People at risk for	
serious allergic reactions have to be very careful and need a plan for handling	
emergencies when they might need to get special medicine to stop these symptoms	
from getting worse. (1.e)	

Essential Understandings	Essential Knowledge and Skills
Strategies for schools to assist those with food allergies may include:	
o No nuts/peanuts in any food brought into a classroom.	
o Designate an "allergen-free" table in the cafeteria.	
o Hold foodless classroom celebrations.	
o Offer gluten-free (wheat-free) options for class parties.	
o Keep surfaces clean in classrooms and cafeterias where food is eaten.	
o Wash hands before and after eating.	
o Do not share food.	
o Know how to get help from an adult if someone is having a food allergy	
problem. (2.e)	

Strand: Physical Health

Standards:

- 7.1.f Explain the concept of active transportation (e.g., walking, biking).
- 7.2.f Analyze the physical and mental health benefits of active transportation.
- 7.3.f Design and promote safe walking and bike routes to and from school or another location in the community.

Essential Understandings

Active transportation is any mode of nonmotorized transportation, such as walking or jogging, biking, and any other human-powered transportation (i.e., rolling, wheelchair users).

- Active transportation includes safe walking and biking to school, work, or services
 that has the benefits of increasing physical activity and reducing congestion and air
 pollution. Public transportation can also increase physical activity as people walk or
 bike to and from public transportation. (1.f, 2.f)
- Physical activity can reduce rates of obesity, diabetes, heart disease, stroke, and other chronic health conditions. (2.f)
- Physical activity affects mental health positively by building confidence, managing anxiety and depression, and increasing self-esteem and cognitive skills. Exercise also releases endorphins, which correlates to happiness. (2.f)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Seven

- explain active transportation and the benefits (1.f, 2.f);
- design a walking and biking route to school or other neighborhood/community destinations, including safety tips and maps (3.f);
- Discuss how you can get involved locally to make your community safer to actively transport (city council, city planning, streetlights, are there bike lanes, crosswalks, etc.) (3.f);
- create an illustration of a safe walking/biking path to a favorite recreational site (3.f).

Strand: Disease Prevention/Health Promotion

Standards:

- 7.1.g Evaluate the impact of sleep and rest on physical, social, and emotional health and on cognitive performance.
- 7.2.g Compare current personal sleep and rest habits with recommended guidelines for teenagers.
- 7.3.g Engage family to create a personal plan to meet recommended guidelines for sleep and rest.
- 7.1.h Explain the impact of weather- or climate-related physical conditions on individuals, including allergies, asthma, sunburn, dehydration, heatstroke, heat exhaustion, and hypothermia.
- 7.2.h Describe ways to prevent weather- or climate-related physical environmental conditions, such as allergies, asthma, sunburn, dehydration, heatstroke, heat exhaustion, and hypothermia.
- 7.3.h Determine strategies to protect against the harmful effects of the sun, heat, and cold.
- 7.1.i Describe how the school and the community can impact personal health practices and behaviors, including the availability of physical, emotional, and social health services; emergency response systems; healthcare products; and recreational and leisure opportunities.
- 7.2.i Identify resources in the community that are dedicated to promoting health.
- 7.3.i Define public health and describe the associated health and medical careers and the training required for these occupations.
- 7.1.j Identify government agencies that provide consumer protections for health products and services.
- 7.2.j Identify state and federal laws that provide consumer protections.
- 7.3.j Evaluate and promote a health care product or service for students, families, schools, or communities that will help others to make positive health choices.

Essential Understandings	Essential Knowledge and Skills
Getting enough sleep is as important as eating the right foods and exercising daily.	In order to meet these standards, it is expected that
Sleep helps your brain, mood, and dealing with stress. Lack of sleep can affect	students will
mood, energy, attention, and academic performance. The ability to stay focused and	explain the importance of sleep and keep a
concentrate can be affected by a lack of sleep and may lead to behavior problems.	sleep log for three to five school nights;
Insufficient sleep has been linked to increased risk for poor mental health, injuries,	compare log with recommended guidelines

Essential Understandings

and the development and management of a number of chronic diseases and conditions, including type 2 diabetes, cardiovascular disease, obesity, and depression. (1.g)

- Different age groups need different amounts of sleep. Centers for Disease Control and Prevention (CDC) guidelines for ages 6-12 is 9-12 hours and teens ages 13-18 is 8-10 hours. (How Much Sleep Do I Need) (2.g)
- Good sleep habits (sleep hygiene) (<u>Tips for Better Sleep</u>) (3.g):
 - o Be consistent. Go to bed at the same time each night and get up at the same time each morning, including on the weekends.
 - o Make sure your bedroom is quiet, dark, relaxing, and at a comfortable temperature.
 - o Remove electronic devices, such as TVs, computers, and smartphones, from the bedroom.
 - o Avoid large meals and caffeine before bedtime.
 - o Get some exercise. Being physically active during the day can help you fall asleep more easily at night.

Weather and climate can trigger illnesses (e.g., allergies and asthma) and cause coldand heat-related illnesses including hypothermia, heat exhaustion, heat stroke, dehydration, and sunburn.

- Weather is a common allergy trigger. Dry, windy days blow pollen into the air, causing hay fever. On rainy or humid days, moisture makes mold indoors and outside along with dust mites that also thrive in humid air. Seasonal allergies include tree pollen in spring; grass pollen, ragweed, and other weeds in summer; ragweed in fall; and indoor allergies in winter. (1.h)
- Asthma (<u>Asthma</u>): A disease that affects the lungs, causes wheezing, breathlessness, chest tightness, and nighttime or early morning coughing; can be controlled but not cured; medication may be needed and staying away from

Essential Knowledge and Skills

(1.g, 2.g);

- create a personal goal and plan with family/caregivers to meet/continue to meet recommended sleep guidelines (3.g);
- describe how climate/weather affects allergies, asthma, sunburn, dehydration, heat stroke, heat exhaustion, and hypothermia and identify prevention strategies (1.h, 2.h, 3.h);

Grade: Seven

- conduct an evaluation of the community for available health services (physical, emotional, and social health services; emergency response systems; health care products; and recreational and leisure opportunities) (1.i, 2.i);
- explain what public health professionals do and select one career/position and describe the training to be in that career (3.i);
- identify state/federal consumer protection agencies and use information from a state or federal consumer protection agency to evaluate a health care product or service (1.j, 2.j, 3.j);
- create an advertisement to promote a health care product or service for good health (3.j).

Health Smart Virginia
EVERFI

Essential Understandings	Essential Knowledge and Skills
possible weather-related triggers such as bad weather—thunderstorms, high	
humidity, or freezing temperatures (asthma may also be triggered by strenuous	
physical activity, some medicines, foods and food additives, dust mites, tobacco	
smoke, and strong emotional states) (1.h)	
• Sunburn (<u>Sun Exposure – Sunburn</u> ; <u>Skin Cancer Awareness</u>): Sunburn is an often	
painful sign of skin damage from spending too much time outdoors without	
wearing a protective sunscreen or ultraviolet (UV) protective clothing. Years of	
overexposure to the sun lead to premature wrinkling, aging of the skin, age spots,	
and an increased risk of skin cancer. Eyes can also get burned from sun exposure.	
UV rays, not the temperature, do the damage. Anyone can get skin cancer.	
Sunburns get better on their own, but they still affect your health. Each time you get	
a blistering sunburn, it damages skin cells and increases your chance of developing	
skin cancer. That's especially true if you get sunburns as a kid or teen. Symptoms	
usually start about four hours after sun exposure, worsen in 24-36 hours, and	
resolve in three to five days. Symptoms may include red, warm, and tender skin,	
swollen skin, blistering, headache, fever, nausea, and fatigue. The pain from	
sunburn is worse six to 48 hours after sun exposure. Skin peeling usually begins	
three to eight days after exposure. (1.h)	
• Dehydration: Exercising at an intensity that causes sweating and hot weather and	
humidity can cause the body to sweat leading to water loss. Dehydration is a result	
of the amount of water lost through perspiration, fever, vomiting, and diarrhea, and	
results in the body not having enough water for normal body function. Not	
replacing the fluid can make a person feel ill. Even mild dehydration can affect	
physical and mental performance. Signs of dehydration include thirst, muscle	
fatigue, reduced cognitive processing, dizziness, confused or dazed states of	
awareness, infrequent urination and dark-colored urine, and dry mouth. Plain water	
is the best option to replace the fluid loss. (1.h)	
Heat-related illness (<u>Frequently Asked Questions about Extreme Heat</u>): People	

Essential Understandings	Essential Knowledge and Skills
suffer heat-related illness when the body's temperature control system is	
overloaded. The body normally cools itself by sweating. But under some	
conditions, sweating just isn't enough. In such cases, a person's body temperature	
rises rapidly. Very high body temperatures may damage the brain or other vital	
organs. Several factors affect the body's ability to cool itself during extremely hot	
weather. When the humidity is high, sweat will not evaporate as quickly,	
preventing the body from releasing heat quickly. Other conditions that can limit the	
ability to regulate temperature include old age, youth (newborn to age four),	
obesity, fever, dehydration, heart disease, mental illness, poor circulation, sunburn,	
and prescription drug use and alcohol use. (1.h)	
o Heat exhaustion: A milder form of heat-related illness that can develop after	
several days of exposure to high temperatures and inadequate or unbalanced	
replacement of fluids. Those most prone to heat exhaustion are adults over 65,	
those with high blood pressure, and those working or exercising in a hot	
environment. A person with heat exhaustion often might have cool and moist	
skin, indicating that the body's ability to cool itself is still present, but the	
person's pulse rate is fast and weak, and breathing is rapid and shallow. If	
untreated, heat exhaustion may progress to heat stroke.	
o Heat stroke: The most serious heat-related illness. It occurs when the body	
becomes unable to control its temperature: The body's temperature rises	
rapidly, the sweating mechanism fails, and the body is unable to cool down.	
Body temperature may rise to 106°F or higher within 10 to 15 minutes. Heat	
stroke can cause death or permanent disability if emergency treatment is not	
provided. It is characterized by the following symptoms: a body temperature	
greater than 103°F (39.4°C); red, hot, and dry skin (no sweating); rapid, strong	
pulse; throbbing headache; dizziness; nausea; confusion; and unconsciousness.	
Cold-related Illness (1.h)	
Hypothermia (<u>Prevent Hypothermia & Frostbite</u>): Caused by prolonged exposure to	

Essential Understandings	Essential Knowledge and Skills
very cold temperatures. When exposed to cold temperatures, the body begins to	
lose heat faster than it is produced. Lengthy exposures will eventually use up the	
body's stored energy, which leads to lower body temperature. Body temperature	
that is too low affects the brain, making the victim unable to think clearly or move	
well. This makes hypothermia especially dangerous because a person may not	
know that it's happening and won't be able to do anything about it. While	
hypothermia is most likely at very cold temperatures, it can occur even at cool	
temperatures (above 40°F) if a person becomes chilled from rain, sweat, or	
submersion in cold water. Symptoms/warning signs include shivering, exhaustion	
or feeling very tired, confusion, fumbling hands, memory loss, slurred speech, and	
drowsiness.	
• Prevention/protection:	
o Heat-related protection/prevention includes wearing appropriate clothing	
(lightweight, light-colored, loose fitting); staying cool indoors (home,	
shopping malls, public library); cutting down on exercise in high heat;	
wearing sunscreen (SPF 30 or higher UVA/UVB broad spectrum), wearing a	
hat and sunglasses (that block UVA and UVB rays), avoiding hot and heavy	
meals, staying hydrated, and staying away from drinks high in sugar. If	
feeling parched/thirsty or dizzy outdoors, take a break and sit in the shade or someplace cool and drink water.	
o To prevent dehydration: The easiest way to avoid dehydration is to drink lots	
of fluids, especially water, especially on hot days. Drinking water does not	
add calories to your diet and is great for your health. The amount that people	
need to drink will depend on age, size, level of physical activity, and the	
weather. Wear appropriate clothing, layers, and limit prolonged exposure to	
very cold temperatures to prevent hypothermia. (2.h)	
Access to health care services affects one's overall physical, social, and mental health	

Essential Understandings	Essential Knowledge and Skills
status and quality of life.	
School resources to support physical, emotional, and social health include access to	
the school nurse or a public health nurse, school counselors, school psychologists,	
school social workers, health and physical education instruction, and facilities and	
programs for physical activity, social gatherings, sports, and athletics. (1.i)	
Community resources vary by area. Resources that support physical, emotional, and	
social health services may include emergency response systems (e.g., fire, rescue,	
police); hospitals, county health departments, health care providers (e.g.,	
physicians, nurses, dentists, eye doctors), local stores that have health care	
products, and safe space and facilities for recreational and leisure opportunities	
(e.g., recreation centers, public fields, recreation sport leagues). (2.i)	
• Public health is the art and science of dealing with the protection and improvement	
of community health by organized community effort and including preventive	
medicine and sanitary and social science. Public health promotes and protects the	
health of people and the communities where they live, learn, work and play. (3.i)	
o Work focuses on prevention and protection to include wellness activities and	
promoting healthy behaviors. In addition, public health professionals:	
 Work in labs to determine what causes certain diseases and to develop 	
vaccines to protect us from them (i.e., scientists, lab technicians,	
researchers, epidemiologists, and public health doctors).	
 Educate people how to eat more nutritious foods, protect their children from 	
toxic substances, and avoid safety hazards (i.e., health educators, public	
health nurses, nutritionists, dieticians, and environmental health	
professionals).	
 Analyze data to better understand how infectious diseases are spread (i.e., 	
scientists, statisticians, and analysts).	
 Manage health care clinics and nursing homes (i.e., health care 	
administrators, nurses, and therapists).	

Essential Understandings	Essential Knowledge and Skills
 Work for government agencies that monitor the quality of the air we breathe and the water we drink (i.e., air pollution specialist, solid waste specialist, hazardous waste specialist, surface water specialists, drinking and ground 	
water specialists, environmental science, science and engineering, and air quality technician.)	
 Study soil and food samples to uncover health hazards (i.e., food safety specialist, disease control, and food and restaurant quality control and inspections). 	
• Work with firefighters, police, hospitals, and emergency specialists to develop plans and strategies to prevent and mitigate manmade and natural	
disasters (i.e., built environment specialist, occupational safety expert, emergency response specialist, and emergency management specialist). Develop policies that affect how we access health care services (i.e.,	
environmental health advocate). First responders and health care providers.	
 Federal laws govern the agencies that provide consumer protections for health products and services. 	
o Food and Drug Administration (FDA): The FDA protects public health by ensuring the safety, efficacy, and security of human and veterinary drugs,	
biological products, and medical devices; by ensuring the safety of the nation's food supply, cosmetics, and products that emit radiation; regulating the	
manufacturing, marketing, and distribution of tobacco products; working to reduce tobacco use by minors; helping to speed innovations that make medical	
products more effective, safer, and more affordable; and by helping the public get the accurate, science-based information they need to use medical products	
and foods to maintain and improve their health. (1.j) o Federal Trade Commission (FTC) Bureau of Consumer Protection: The Bureau	

Essential Understandings	Essential Knowledge and Skills
of Consumer Protection stops unfair, deceptive, and fraudulent business	
practices by collecting complaints and conducting investigations, suing	
companies and people that break the law, developing rules to maintain a fair	
marketplace, and educating consumers and businesses about their rights and	
responsibilities. It provides consumer tips for health and fitness products and	
services. (1.j)	
o U.S. Consumer Product Safety Commission: Protects the public against	
unreasonable risks of injury or death from consumer products through	
education, safety standards activities, regulation, and enforcement. Protects	
consumers and families from products that pose a fire, electrical, chemical, or	
mechanical hazard. Ensures the safety of consumer products, such as toys, crib	S,
power tools, cigarette lighters, and household chemicals. (1.j)	
• Virginia state law that provides consumer protections (2.j):	
o <u>Virginia Consumer Protection Act of 1977 – §59.1-197.</u> Promotes fair and	
ethical standards of dealings between suppliers and the consuming public.	
 Advertising or sale of goods or services for personal or household uses. 	
 Advertising or sale of business opportunities requiring a person's money or 	r
property and personal services.	
Can file complaints for:	
Misrepresenting the goods or services as those of another.	
Misrepresenting the geographic origin of goods or services (such as a	
label that says "Made in the USA").	
 Misrepresenting that the goods or services have certain quantities, uses. 	,
ingredients, or benefits.	
 Advertising secondhand or used goods without clearly indicating that 	
the goods are not brand new.	
Advertising goods with the intent not to sell them as advertised or with	
the intent not to sell at the advertised price.	

Ess	ent	ial Understandings	Essential Knowledge and Skills
•	Fe	deral laws that provide consumer protections (3.j):	
	o	The Federal Food, Drug, and Cosmetic Act of 1938: Authorized the FDA to	
		demand evidence of safety for new drugs, issue standards for food, and conduct	
		factory inspections.	
	o	The Kefauver-Harris Amendments of 1962: Strengthened the rules for drug	
		safety and required manufacturers to prove their drugs' effectiveness.	
	o	The Medical Device Amendments of 1976: Applied safety and effectiveness	
		safeguards to new devices.	
	O	Consumer Product Safety Act 1972: Authorized the U.S. Consumer Product	
		Safety Commission to develop standards and bans. It also gives CPSC the	
		authority to pursue recalls and to ban products under certain circumstances.	

Strand: Substance Use/Misuse Prevention

Standards:

- 7.1.k Explain the link between addiction to alcohol, tobacco, and other drugs; chronic disease; and engaging in risky behaviors.
- 7.2.k Understand that addiction is a compulsive physiological need for and use of a habit-forming substance.
- 7.3.k Identify ways to participate in school and community efforts to promote a drug-free lifestyle.
- 7.1.1 Define prescriptions, controlled substances, nicotine vaping products, hemp, and marijuana-derived cannabidiol (CBD) products, and explain their uses.
- 7.2.1 Explain the purpose of the Food and Drug Administration (FDA) and differentiate between FDA-approved and non-FDA-approved substances.
- 7.3.1 Create strategies to identify types of advertising techniques used in a variety of media, including social media, that may influence adolescents' decisions concerning alcohol, tobacco and nicotine products, and other drugs.
- 7.1.m Identify the types of behavior associated with drug use and abuse that reflect positive norms (e.g., drug use is not cool, drunken driving is stupid, most teens do not use drugs).
- 7.2.m Identify short-term, social and negative consequences of engaging in risky behaviors, including the use of alcohol, tobacco, nicotine products, marijuana, and other drugs.
- 7.3.m Identify and demonstrate strategies and skills for avoiding alcohol, tobacco, inhalants, and other harmful substances (e.g., effective refusal skills).

Essential Understandings	Essential Knowledge and Skills
Drug addiction is a chronic disease. Drug use is linked to risky behaviors such as needle	In order to meet these standards, it is
sharing and can also weaken the immune system. This combination greatly increases the	expected that students will
likelihood of contracting human immunodeficiency virus (HIV), hepatitis, and other	define/describe addiction and substance
infectious diseases (<u>Health Consequences of Drug Use</u>).	use disorder (1.k);
• Drugs that may cause cancer include alcohol, marijuana/cannabis, tobacco, and steroids.	• explain the risks of use and addiction to
(Young adult males who use marijuana/cannabis and began their use during adolescence	alcohol, tobacco, and other drugs,
are at risk for an aggressive form of testicular cancer.) Most drugs can have adverse	including health effects and risk for
cardiovascular effects, ranging from abnormal heart rate to heart attack. Drug use can	trauma, violence, injury, and

Essential Understandings

lead to respiratory problems. Smoking cigarettes, marijuana/cannabis, and crack cocaine can cause bronchitis, emphysema, lung damage, and lung cancer. The use of some drugs, such as opioids, may cause breathing to slow, block air from entering the lungs, or make asthma symptoms worse. (Health Consequences of Drug Use) Alcohol can cause stroke, high blood pressure, cirrhosis (scarring of the liver), and cancer (Alcohol's Effect on the Body). (1.k)

- Addiction is a compulsive physiological need for and use of a habit-forming substance.
 The preferred term for drug addiction is substance use disorder (SUD) or substance abuse
 disorder. Drug addiction/SUD is defined as a chronic, relapsing disorder characterized by
 compulsive drug seeking and use despite adverse consequences. (<u>Understanding Drug</u>
 Use) (2.k)
- Drug addiction/SUD is considered a brain disorder because it involves functional changes to brain circuits involved in reward, stress, and self-control, and those changes may last a long time after a person has stopped taking drugs. These changes to the brain affect how a person thinks (impairs judgment) and acts, which can lead to risky behaviors that may cause chronic disease, viral infections, and injury to self and others (e.g., driving under the influence, engaging in violent/aggressive behaviors, or engaging in illegal behaviors to obtain money for or to obtain the drug). Compassion and understanding about SUD are important for people to obtain the treatment needed for the disorder. (2.k)

All drugs (i.e., medicines, medications, and illicit drugs) will affect the body and how it functions. Some effects are helpful, but some are harmful if used incorrectly or at all.

- Prescription medications require a doctor's order to obtain. They are used to treat a specific illness or condition. (1.1)
- Controlled substances are drugs that require permission from a doctor to use In legal terms, controlled substances are regulated under federal law with legal consequences for illegal use and distribution (<u>The Controlled Substances Act DEA</u>). (1.l)

Essential Knowledge and Skills

communicable and chronic diseases (1.k, 2.k)

- describe ways to promote a drug-free lifestyle (3.k);
- explain the use and concerns with prescriptions, controlled substances, nicotine vaping products, hemp, and marijuana-derived cannabidiol (CBD) products (1.l);
- research and compare the harmful effects of vaping versus smoking cigarettes (1.l);
- explain the role of the FDA and the approval process (2.l);
- critique media (social media, print, television, movies, gaming, music) representations and advertising techniques for alcohol, tobacco, nicotine products, marijuana/cannabis, and/or other drugs (3.1);
- explain positive social norms for a drugfree lifestyle (1.m);
- role-play situations in which refusal skills should be used (2.m);
- explain the negative consequences of engaging in risky behaviors (2.m);
- promote a drug-free lifestyle that includes positive social norms about

• Nicotine vaping products: Vapes, vaporizers, vape pens, hookah pens, vape pods, electronic cigarettes (e-cigarettes or e-cigs), and e-pipes are some of the many terms used to describe electronic nicotine delivery systems (ENDS). These products use an "e-liquid" that may contain nicotine, as well as varying compositions of flavorings, propylene glycol, vegetable glycerin, and other ingredients. The liquid is heated to create an aerosol that the user inhales. ENDS may be manufactured to look like conventional cigarettes, cigars, or pipes. Some resemble pens or USB flash drives. (Vaporizers, E-

designed for smoking cessation. (1.l)
Hemp (What is Hemp?): Another name for the Cannabis sativa plant and its products.
This same species of plant is also called marijuana. Hemp and marijuana are both names for the Cannabis sativa plant, but people usually use these terms to talk about two different varieties of the plant. Varieties grown to make hemp rope and other products you might see on store shelves (e.g., hats, shampoo) have a lot less of the chemical that makes marijuana users feel high. Those varieties are sometimes called "industrial hemp." Varieties grown for use as a drug have been specifically bred to have lots of delta-9-tetrahydrocannabinol (THC), which is the chemical that makes users feel high. (1.l)

<u>cigarettes</u>, and other <u>Electronic Nicotine Delivery Systems</u>) There is no medical use for nicotine products. Note: There are nicotine products such as patches and gum that are

• Marijuana-derived cannabidiol (CBD) products (<u>Say What? "Cannabidiol [CBD]"</u>): CBD stands for cannabidiol (pronounced ca-nuh-bi-DYE-ol). CBD is a "non-psychoactive" ingredient in marijuana and hemp. This means it does not make a person high. CBD is typically found in very small amounts in the marijuana/cannabis plant. Unlike THC, the chemical in marijuana that causes the high, there are no known harms of taking CBD on its own. So far, scientific research has found that CBD can help to treat two types of seizure disorders in children when it's in a medication (called Epidiolex) that's been approved by the FDA. Scientists are studying whether CBD might be effective in treating other conditions including anxiety, sleep, pain, and drug and alcohol use disorders. CBD products—like lotion, bath oil, or honey—have not been proven to be effective medical

Essential Knowledge and Skills

drug use and family, school, and community activities to engage in (3.m).

Grade: Seven

Additional resources:

Health Smart Virginia

Essential Understandings	Essential Knowledge and Skills
treatments for any conditions. (1.1)	
o Note: The FDA has seen only limited data about CBD safety, and these data point to	
real risks that need to be considered before taking CBD for any reason. Some CBD	
products are being marketed with unproven medical claims and are of unknown	
quality. The FDA will continue to update the public as it learns more about CBD.	
• FDA (<u>Food and Drug Administration</u>): Protects public health by ensuring the safety,	
efficacy, and security of human and veterinary drugs, biological products, and medical	
devices, and by ensuring the safety of the nation's food supply, cosmetics, and products	
that emit radiation. FDA also has responsibility for regulating the manufacturing,	
marketing, and distribution of tobacco products to protect public health and to reduce	
tobacco use by minors. (2.1)	
o To get a drug approved, drug manufacturers must conduct lab, animal, and human	
clinical testing and submit their data to FDA. FDA's Center for Drug Evaluation and	
Research (CDER) is comprised of a team of physicians, statisticians, chemists,	
pharmacologists, and other scientists who review the company's data and proposed	
labeling. FDA approval of a drug means that data on the drug's effects have been	
reviewed by CDER and the drug is determined to provide benefits that outweigh its	
known and potential risks for the intended population. (All drugs/medications have	
side effects.) All medications must receive FDA approval; however, there are some	
over-the-counter drugs and dietary supplements that do not require FDA approval to	
be sold. This includes but is not limited to vitamins and certain weight-loss	
supplements. (<u>FDA Dietary Supplements</u>)	
Advertising techniques: The goal of advertisements is to sell and influence buyers by	
promoting a product, service, or company. Advertisement techniques may include: (3.1)	
o Bandwagon (everyone else is doing it).	
o Fear (scare people into buying/believing something).	
o Conflict (uses an unresolved problem or situation).	
o Shock (uses controversy to gain attention.)	

Essential Understandings	Essential Knowledge and Skills
o Problem/Benefit (convince someone they have a problem and the product is the	
solution).	
o Testimonial/Celebrity/Endorsements (provide credibility; believe a personal story).	
o Anti-Ad (tells the audience they are smart enough to see through the tricks played	
by advertisers).	
o Association (linking the product to certain values, groups, or people).	
o Additional advertising tactics include recognizable logos, repetition, bribery	
(deals/sales), emotional appeal, and slogans.	
Social norms are the behaviors, attitudes and/or standards that the majority of people in a	
group think are acceptable or unacceptable, the norm.	
What people do is influenced by what they think their peers are doing. If people think a	
certain behavior is typical or the norm, they are more likely to participate in it because	
they believe most are doing it and they want to belong. However, sometimes a norm or	
behavior is misread or misperceived and people think that their peers engage in risky	
behavior much more than they really do. Example misconceptions: All cool teens use	
drugs, everyone drinks and drives, and drugs will not harm you if you do it just once.	
Correcting misconception and establishing drug-free social norms may include messaging	
and facts: Drug use is not cool, drunken driving is foolish and may lead to injury and	
death, most teens do not use drugs, and the consequences of first-time/one-time drug use.	
(1.m)	
• Short-term effects of substance use can range from changes in appetite, wakefulness,	
heart rate, blood pressure, and/or mood, to heart attack, stroke, psychosis, overdose, and	
even death. These health effects may occur after just one use. These effects often depend	
on the specific drug or drugs used, how they are taken, how much is taken, the person's	
health, and other factors. Between March 2019 and March 2021, the United States saw an	
increase in drug overdose deaths by 29.6 percent, while Virginia saw a 39 percent	
increase. (National Center for Health Statistics)	

Es	sential Understandings	Essential Knowledge and Skills
•	Drug use can also have indirect effects on the people who are taking drugs and on those	
	around them. This can include affecting a person's nutrition; sleep; decision-making and	
	impulsivity; and risk for trauma, violence, injury, and communicable diseases. (Health	
	Consequences of Drug Misuse) (2.m)	
•	Strategies and skills for avoiding alcohol, tobacco, inhalants, and other harmful	
	substances: having personal goals for current and future pursuits; engaging in family,	
	school, and/or community activities; having trusted adults to talk with; having the	
	confidence, skill, and positive self-image/self-esteem to say "No"; and engaging with	
	peers/friends that are supportive of a drug-free lifestyle. Parents and children can talk with	
	physicians about non-opioid pain options for surgical procedures or other medical needs.	
	(3.m)	
•	Refusal Skills (3.m)	
	o Verbal	
	Say "no." There is no substitute for the word "no." It makes any refusal stronger.	
	 Repeat the refusal. 	
	 Suggest an alternative (suggest something to do instead). 	
	 Build the friendship (say something to let the person know you are his/her friend 	
	and want to spend time with him/her.) This is especially important because a	
	major reason for ineffective refusals is not wanting to hurt the other person's	
	feelings or make him/her mad.	
	 Use a firm tone of voice. Be strong and business-like. 	
	o Nonverbal	
	 Direct eye contact (look the person in the face). 	
	 Serious expression (use your best "I mean it" face). 	
	 Hands-off hands (put your hands up in front of you when you refuse). This is 	
	especially useful in situations involving physical pressure.	
	 Leave (get out of the situation). 	
	 Avoid situations where there may be pressure. 	

2020 Health Education Standards of Learning Curriculum Framework

Strand: Safety/Injury Prevention

Standards:

- 7.1.n Identify potential safety issues related to babysitting, caring for younger siblings, being alone at home, in the neighborhood (e.g., water sports, recreation areas, shopping areas), and being online.
- 7.2.n Explain the importance of recognizing harmful and risky behaviors related to personal safety.
- 7.3.n Describe ways to maintain a safe and healthy environment at school, in the community, at home, and online.

Essential Understandings

Prevention is the act or practice of preventing; to keep from happening or existing. While all safety issues cannot be prevented, knowing the safety issues, and having the knowledge and skills to take precautions, recognize, and address issues if they occur, can help lessen the effects on self and others.

- Babysitting and caring for younger siblings: Children need constant attention/supervision. Safety concerns include accidental poisoning (drinking, eating), injuries (falls, cuts), choking on objects, food or other allergens, and the hazards that are associated with baths and pools (other bodies of water). It is important to have a list of emergency phone numbers and contact information in case of an emergency. Trainings and certifications for babysitting and CPR are available (e.g., Red Cross, community centers, some hospitals, and online). (1.n, 2.n)
- Being alone at home: Safety concerns include preventing injury or illness, use of kitchen items (e.g., appliances, utensils), strangers coming to the door (e.g., keeping doors and windows locked), plumbing or electrical issues (e.g., toilet overflows), fires, and online safety concerns. (1.n, 2.n)
- Safety in the neighborhood: Safety concerns include injury, strangers with ill intentions, and dangerous situations. Safety tips include (1.n, 2.n):
 - o Ensure that parents/guardians know where you are/where you are going and the route(s) you will take.
 - o Be aware of your surroundings.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Seven

- list safety hazards that teens may experience at home, school, and in the neighborhood/community, to include babysitting, caring for younger siblings, being alone at home, in the neighborhood (e.g., water sports, recreation areas, shopping areas), and being online (1.n);
- select one safety hazard and further explain associated harmful and risky behaviors and ways to stay safe and healthy (2.n, 3.n);
- identify locations where swim lessons are provided in your community.

Health Smart Virginia EVERFI

Essential Understandings			Essential Knowledge and Skills
	О	Do not talk to or go places with people you do not know.	
	O	Know neighbors and places you can go (police, community centers, open	
		school buildings) to get adult help if needed.	
•	Recreational activities can improve health and well-being but also can cause		
	injuries. (1.n, 2.n)		
	o	Biking: Wear a helmet; wear bright color clothing; only bike on roads or	
		trails you are comfortable on; ride on a sidewalk, trail, or the right side of	
		the road; use hand/arm signals to let others know you are turning; stop at	
		stop signs; walk your bike across roads; look for cars before crossing the	
		road.	
	o	Recreational equipment (scooter, skateboard, inline skates/rollerblading):	
		Wear a helmet, elbow and knee pads, wrist guards, and sneakers; be aware	
		of others when using a skate park; only ride in appropriate areas; be aware	
		of others on sidewalks.	
	o	Water: Learn to float and swim; wear a personal flotation device (life	
		jacket) when boating or when swimming if not comfortable in the water; do	
		not swim alone; follow the lifeguard's directions; walk around the pool;	
		and don't push or jump on others.	
•	On	line safety: People are not always who they say they are, and this could be	
	dangerous. Kids and adults have been tricked by online strangers. If you feel		
	unc	comfortable or do not know a person trying to contact you, tell a trusted	
	adu	lt. Do not give personal information on websites or gaming applications,	
	inc	luding name, age, where you live, your phone number or what school you	
	attend. Only visit sites approved by a parent/guardian, teacher, or another		
	trusted adult. (1.n, 2.n)		

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 7.1.0 Identify the body's physical and psychological responses to stress.
- 7.2.0 Analyze and explain the benefits of emotional flexibility, stress management, and stress-reduction techniques for physical and emotional health.
- 7.3.0 Develop achievable goals for handling stressors in healthy ways.
- 7.1.p Identify the characteristics of healthy interpersonal relationships.
- 7.2.p Explain how empathy, compassion, and acceptance of others support healthy relationships.
- 7.3.p Design ways to demonstrate empathy, compassion, and acceptance for others to support healthy relationships.
- 7.1.q Recognize the impact of disappointment or adversity on physical, social, and emotional health and how to cope effectively and change one's feelings.
- 7.2.q Develop strategies for coping with disappointment, stress, anxiety, anger, and adversity.
- 7.3.q Promote strategies for coping with disappointment and adversity.
- 7.1.r Describe situations that can cause a range of emotions and feelings, and describe how to recognize these feelings and emotions and predict how long they may last.
- 7.2.r Develop healthy ways to identify, express, and respond to emotions and identify resources for help and support.
- 7.3.r Promote help-seeking for mental health concerns.
- 7.1.s Identify healthy verbal, nonverbal, written, and visual communication.
- 7.2.s Describe the relationship between healthy communication skills and healthy relationships.
- 7.3.s Demonstrate healthy verbal, nonverbal, written, and visual communication skills.
- 7.1.t Define disordered eating and describe types of eating disorders.
- 7.2.t Describe the warning signs, risk factors, and protective factors for eating disorders.
- 7.3.t Identify school and community resources for help and support with eating disorders.

- 7.1.u Define depression and describe the warning signs, risk factors, and protective factors for anxiety and depression.
- 7.2.u Explain when mental illnesses and mental challenges require support or assistance (e.g., when they affect one's relationships, responsibilities, and involvement in activities).
- 7.3.u Identify personal, family, school, community, and healthcare professional resources that can help oneself and others with mental illnesses and challenges.

Essential Understandings

Stress can affect your health. It is important to pay attention to how you deal with minor and major stressors, so you know when to seek help. (<u>5 Things You Should Know</u> About Stress).

- Stress is how the brain and body respond to any demand. Stress may cause (1.0):
 - o Breathing or heartbeat to increase.
 - o Fear and worry, anger, irritability.
 - o Changes in sleep or eating patterns.
 - o Difficulty sleeping or concentrating.
 - o Worsening of chronic health problems.
 - o Worsening of mental health conditions.
 - o Increased use of tobacco, and/or alcohol, and other substances.
- Emotional flexibility: The ability to respond in a context-appropriate emotional manner and recover from one's initial emotional responses when the context changes. Emotional flexibility has been associated with psychological health. (2.0)
- Stress management: A range of strategies to help people better deal with stress and difficulty (adversity) in life. Taking practical steps to manage stress may reduce the risk of negative health effects. (2.0)
- Stress-reduction techniques (such as slowing heart rate, lowering blood pressure, slowing breathing rate, improving digestion, reduce muscle tension, and reducing anger and frustration) can be used before or during stress to lessen the possible responses. While there are strategies to manage stress, sometimes, people need help to deal with difficult situations that lead to intense or lasting stress. (2.0)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- identify responses to stress (1.o.);
- explain stress management and reduction techniques (including emotional flexibility)
 (2.0);
- develop personal goals and strategies to manage stress (3.0);
- identify characteristics of healthy relationships and the importance of empathy, compassion, and acceptance (1.p, 2.p);
- create ways to show empathy, compassion, and acceptance of others to support healthy relationships at home and/or school (3.p);
- identify effects on health and strategies for coping with disappointment, stress, anxiety, anger, and adversity (2.q);
- select, apply, and reflect on one or more coping strategies for disappointment, stress, anxiety, anger, and adversity to share with others (3.q);
- list different emotions and feelings and

Essential Understandings

Research has shown that people with social supports are happier, have fewer health problems, and live longer.

- Benefits of healthy relationships include boosting happiness, increased sense of belonging and purpose, reduces stress, helps to cope with challenges, and improves self-confidence, self-image, and self-worth. Components of healthy relationships include mutual respect, trust, honesty, support, fairness, separate identities, good communication, and kindness. (1.p)
- Social skills that promote healthy relationships include empathy, compassion, and acceptance. (2.p, 3.p)
 - o Empathy: The action of understanding, being aware of, being sensitive to, and vicariously experiencing the feelings, thoughts, and experience of another and allowing people to understand and relate to others; can be shown by active listening, thinking about how you might feel in the same situation, being sensitive of other people's feelings.
 - o Compassion: A feeling of wanting to help someone who is sick, injured, in trouble, needs help, needs a friend, and is an important part of good communication; can be shown by offering help to someone, advocating for others.
 - o Acceptance: The act of accepting someone as they are. Appreciating differences helps to understand how people are unique and special, can be shown by offering friendship to others, not judging others, showing interest and appreciation for other people's cultures and backgrounds, learning about others.

Everyone experiences disappointment, adversity, stress, and anxiety. There are ways to cope.

• Disappointment: An emotion that happens when something was not as good as expected or something that was hoped for or expected did not happen (e.g., rain

Essential Knowledge and Skills

situations that may cause the emotions and feelings(1.r);

Grade: Seven

- practice identifying emotions and healthy ways to respond (written or role-plays) (2.r);
- list and promote resources that can help peers with mental health concerns (3.r);
- describe healthy communication skills (verbal, nonverbal, written, and visual communication) and how they can affect relationships in a positive way (1.s, 2.s);
- apply healthy communication skills (verbal, nonverbal, written, and visual communication) to a variety of situations (3.s);
- apply knowledge of eating disorders to share awareness with others including school and community resources for help and support (1.t, 2.t, 3.t);
- define and describe anxiety and depression
 (1.u):
- explain when mental illnesses and challenges require support or assistance and the health care professionals who can help (2.u, 3.u);
- promote help-seeking for mental health illnesses and challenges, sharing information and resources for help and assistance including school and community resources (3.u).

Additional resources:

Essential Understandings	Essential Knowledge and Skills
caused a game to not happen), causing sadness or feelings of hopelessness. (1.q)	Health Smart Virginia
Adversity is a state or instance of serious or continued difficulty or misfortune	<u>EVERFI</u>
Adversity can help develop persistence, self-control, conscientiousness, self-	
confidence, and curiosity. Overwhelming (strong, frequent, or prolonged) adversity	
can lead to feelings of helplessness and hopelessness. (1.q)	
• Strategies for coping with (2.q)	
o Disappointment: Accept that disappointment happens to everyone. Learn from	
the experience—disappointments can teach you about yourself and what you	
really want. Make a plan to move forward; start with small steps.	
o Stress: Review information provided in this content section.	
o Anxiety (body's natural response to stress): Challenge negative thoughts;	
practice focused, deep breathing; go for a walk or other physical activity; write	
down your thoughts; and/or consult with a health care provider if needed.	
o Anger is a normal emotion. Name the anger as an emotion when it occurs and	
think about positive ways to respond before acting.	
 Strategies for dealing with adversity and challenges may include factors that 	
appear to make a person more resilient, such as a positive attitude,	
optimism, the ability to regulate emotions, and the ability to see failure as a	
form of helpful feedback (Resilience). Healthy habits—getting enough	
sleep, eating well, and exercising—can reduce stress, which may, in turn,	
boost resilience. Looking to loved ones for help and emotional support,	
increasing self-care, and focusing on the aspects of the situation that are	
under your control. Learning to be OK with making mistakes, big or small,	
is a critical skill. Talk about feelings with a parent or other adult you trust.	
Being aware of our emotions can help us talk about feelings more clearly, avoid or	
resolve conflicts better, and move past difficult feelings more easily.	
Emotions come and go. Most of us feel many different emotions throughout the	

Essential Understandings	Essential Knowledge and Skills
day. Some last just a few seconds. Others might linger to become a mood. (1.r)	
Knowing what we are feeling and why it is a skill called emotional awareness. To	
build emotional awareness (1.r):	
o Make a habit of tuning in to how you feel in different situations throughout the	
day. Simply notice whatever emotion you feel, then name that emotion in your	
mind. Notice that each emotion passes and makes room for the next experience.	
o Rate how strong the feeling is. After you notice and name an emotion, rate how	
strongly you feel the emotion on a scale of 1–10, with 1 being the mildest	
feeling and 10 the most intense.	
o Share your feelings with the people closest to you. This is the best way to	
practice putting emotions into words.	
• Expressing/learning to cope with emotions in a healthy way is a skill. (2.r)	
o Name and accept emotion.	
o Consider ways to express the emotion that does not harm self or others.	
■ Write about it.	
Express through art.	
Physical activity.	
Crying.	
 Talk with someone. 	
o Get help, if needed (if feelings of sadness or worry or other difficult emotions	
last more than a couple of weeks).	
• For help and support with feelings and emotions, talk with parents/guardians,	
school counselor, school psychologist, school social worker, health care provider	
(therapist), or another adult you trust. (3.r)	
Communication is an important part of any relationship. Positive relationships require	
communication, compromise, and understanding. (1.s)	
• Positive and respectful ways to communicate include talking in an appropriate tone,	

ssential Understandings	Essential Knowledge and Skills
waiting for a turn to speak, allowing others to provide feedback, and body language	
(eye contact, gestures).	
Effective communication gives the best chance of successfully delivering a	
message.	
Verbal communication: The term usually associated with oral communication, it is	
the use of words to send an oral or written message (e.g., conversation, text	
messages, phone calls, social media posts). Verbal communication skills may	
include:	
o Be friendly.	
o Think before you speak.	
o Be clear.	
o Focus on your body language (nonverbal communication).	
o Be an active listener.	
 Active listening: Focus on what the other person is saying, make sure you 	
understand what they are saying (ask questions), and show respect.	
Nonverbal communication includes facial expressions, body language, gestures,	
tone, and voice volume. Nonverbal communication skills may include:	
o Eye contact.	
o Facial expressions (smile, frown).	
o Gestures (nodding).	
o Posture (face the person you are speaking with).	
o Tone of voice.	
o Volume of voice.	
Written communication skills are those necessary to get your point across in	
writing—grammar, punctuation, and word choice. Written communication does not	
always convey feelings, emotions, and intent of the words.	
Visual communication does not always convey the context of a situation or the	
reality of a situation.	

Essential Understandings	Essential Knowledge and Skills
• Photos, videos, and comments made online usually can't be taken back once they're	
posted. Even when a person thinks something has been deleted, it can be impossible	
to completely erase it from the Internet.	
· Healthy communication skills allow people in a relationship to talk about successes,	
failures, everyday life, stresses, and anything else. Communication is two-way,	
making it just as important to listen as to speak. Healthy relationships include trust,	
respect, and honesty which can be expressed through all forms of communication.	
(2.s)	
Eating disorders are serious illnesses. Complete recovery is possible with treatment and	
time. (1.t, 2.t)	
• Disordered eating is different from the term "eating disorder." The term "disordered	
eating" is a descriptive phrase, not a diagnosis. Disordered eating is used to	
describe irregular eating behaviors that may or may not warrant a diagnosis of a	
specific eating disorder. Eating concerns falling short of a diagnosis deserve	
attention and treatment because they may turn into more problematic eating	
disorders and put individuals at risk of serious health problems.	
• Eating disorders are serious and often fatal medical illnesses that are associated	
with severe disturbances in people's eating behaviors and related thoughts and	
emotions. Eating disorders are caused by a combination of genetic, biological,	
behavioral, psychological, and social factors. An eating disorder is not a trend or a	
choice. They affect people of all ages, races and ethnicities, and genders. People	
with eating disorders can be underweight, normal weight, or overweight. Complete	
recovery is possible with treatment and time. Common eating disorders include	
anorexia nervosa, bulimia nervosa, and binge-eating disorder. (Eating Disorders)	
o Anorexia nervosa: People with anorexia nervosa see themselves as overweight,	
even when they are dangerously underweight, typically weigh themselves	
repeatedly, severely restrict the amount of food they eat, often exercise	

ssential Understandings	Essential Knowledge and Skills
excessively, and/or may force themselves to vomit or use laxatives to lose	
weight. Symptoms include:	
 Extremely restricted eating. 	
Extreme thinness.	
 A relentless pursuit of thinness and unwillingness to maintain a normal o 	or
healthy weight.	
Intense fear of gaining weight.	
 Distorted body image, a self-esteem that is heavily influenced by 	
perceptions of body weight and shape, or a denial of the seriousness of lo	ow
body weight.	
o Bulimia nervosa: Recurrent and frequent episodes of eating unusually large	
amounts of food and feeling a lack of control over these episodes. This binge	e
eating is followed by behavior that compensates for the overeating, such as	
forced vomiting, excessive use of laxatives or diuretics, fasting, excessive	
exercise, or a combination of these behaviors. People with bulimia nervosa n	may
be slightly underweight, normal weight, or overweight. Symptoms include:	
 Chronically inflamed and sore throat. 	
 Swollen salivary glands in the neck and jaw area. 	
 Worn tooth enamel and increasingly sensitive and decaying teeth as a res 	sult
of exposure to stomach acid.	
 Acid reflux disorder and other gastrointestinal problems. 	
 Intestinal distress and irritation from laxative abuse. 	
 Severe dehydration from purging of fluids. 	
 Electrolyte imbalance (too low or too high levels of sodium, calcium, 	
potassium, and other minerals), which can lead to stroke or heart attack.	
o Binge-eating disorder: Loss of control over food intake. Unlike bulimia	
nervosa, periods of binge-eating are not followed by purging, excessive	
exercise, or fasting. As a result, people with binge-eating disorder often are	

ential Understandings	Essential Knowledge and Skills
overweight or obese. Binge-eating disorder is the most common eating disorder	
in the United States. Symptoms include:	
 Eating unusually large amounts of food in a specific amount of time, such as 	
a two-hour period.	
 Eating even when you're full or not hungry. 	
 Eating fast during binge episodes. 	
 Eating until you're uncomfortably full. 	
 Eating alone or in secret to avoid embarrassment. 	
 Feeling distressed, ashamed, or guilty about your eating. 	
 Frequently dieting, possibly without weight loss. 	
Risk Factors (2.t)	
o Eating disorders can affect people of all ages, racial/ethnic backgrounds, body	
weights, and genders. Eating disorders frequently appear during the teen years	
or young adulthood but may also develop during childhood or later in life.	
These disorders affect both genders, although rates among women are higher	
than among men. Like women who have eating disorders, men also have a	
distorted sense of body image.	
o Researchers are finding that eating disorders are caused by a complex	
interaction of genetic, biological, behavioral, psychological, and social factors.	
Eating disorders run in families. Researchers are working to identify DNA	
variations that are linked to the increased risk of developing eating disorders.	
o Individuals who suffer from body dysmorphia are more likely to develop an	
eating disorder. Body dysmorphic disorder is more serious than having poor	
self-image. It is a mental health disorder in which a person cannot stop thinking	
about one or more perceived defects or flaws in their appearance, such as body	
weight.	
Protective factors for eating disorders (<u>Risk and Protective Factors</u>) (2.t):	
o Individual: Positive body image, high self-esteem, media literacy (including	

Essential Understandings	Essential Knowledge and Skills
social media), emotional well-being, school achievement, being self-directed	
and assertive, social skills, problem solving, and coping skills.	
o Social: Peer or other social support structures and relationships where weight	
and physical appearance are not of high concern.	
• Resources for help and support with eating disorders (3.t):	
o Talk with a parent/guardian.	
o School (counselor, psychologist, social worker; public health nurse).	
o Community	
 Health care providers (specialized therapists) 	
 Local Community Services Board 	
 Substance Abuse and Mental Health Services Administration (SAMHSA) 	
Treatment Referral Helpline at 1-800-662-HELP (4357). SAMHSA also has	
a <u>Behavioral Health Treatment Locator</u> that can be searched by location.	
Depression is a serious medical illness with many symptoms, including physical ones, and is treatable. (Depression) (1.u)	
• Depression (major depressive disorder or clinical depression) is a common but serious mood disorder. It causes severe symptoms that affect how you feel, think,	
and handle daily activities, such as sleeping, eating, or working. To be diagnosed	
with depression, the symptoms must be present for at least two weeks. Research	
suggests that depression is caused by a combination of genetic, biological,	
environmental, and psychological factors. Not everyone who is depressed	
experiences every symptom. Some people experience only a few symptoms while	
others may experience many.	
• Signs and symptoms of depression (lasting at least two weeks and for most of or all	
day):	
o Persistent sad, anxious, or "empty" mood.	
o Feelings of hopelessness, or pessimism.	

Esse	ntial Understandings	Essential Knowledge and Skills
,	Irritability.	
	Feelings of guilt, worthlessness, or helplessness.	
	Loss of interest or pleasure in hobbies and activities.	
	Decreased energy or fatigue.	
	Moving or talking more slowly.	
	Feeling restless or having trouble sitting still.	
	Difficulty concentrating, remembering, or making decisions.	
	Difficulty sleeping, early morning awakening, or oversleeping.	
	Appetite and/or weight changes.	
	Thoughts of death or suicide, or suicide attempts.	
	Aches or pains, headaches, cramps, or digestive problems without a clear	
	physical cause and/or that do not ease even with treatment.	
•	Risk factors for depression include:	
	Personal or family history of depression.	
	Major life changes, trauma, or stress.	
	Certain physical illnesses and medications.	
• .	Anxiety (<u>Anxiety Disorders</u>): Occasional anxiety is an expected part of life. For a	
1	erson with an anxiety disorder, the anxiety does not go away and can get worse	
(over time. The symptoms can interfere with daily activities such as job	
1	erformance, schoolwork, and relationships. People with anxiety disorders respond	
1	o certain objects or situations with fear and dread. They have physical reactions to	
	hose objects, such as a rapid heartbeat and sweating. People with generalized	
,	nxiety disorder display excessive anxiety or worry most days for at least six	
1	nonths. Generalized anxiety disorder symptoms include:	
	Feeling restless, wound up, or on edge.	
	Being easily fatigued.	
	Having difficulty concentrating; mind going blank.	
	Being irritable.	

Ess	sent	ial Understandings	Essential Knowledge and Skills
	О	Having muscle tension.	
	o	Difficulty controlling feelings of worry.	
	o	Having sleep problems, such as difficulty falling or staying asleep, restlessness,	
		or unsatisfying sleep.	
	O	There are several types of anxiety disorders, including generalized anxiety	
		disorder, panic disorder, and various phobia-related disorders.	
		(National Institute of Mental Health)	
•	Me	ental illnesses and mental challenges require support or assistance when they	
	aff	ect one's relationships, responsibilities, and involvement in activities. Talk to	
	pa	rents/guardians or a trusted adult if any of these things are experienced. (2.u)	
	O	Can't eat or sleep.	
	О	Can't perform daily tasks, like going to school.	
	О	Don't want to hang out with your friends or family.	
	O	Don't want to do things you usually enjoy.	
	О	Fight a lot with family and friends.	
	О	Feel like you can't control your emotions and it's affecting your relationships	
		with your family and friends.	
	О	Have low or no energy.	
	О	Feel hopeless.	
	O	Feel numb or like nothing matters.	
	O	Can't stop thinking about certain things or memories.	
	O	Feel confused, forgetful, edgy, angry, upset, worried, or scared.	
	O	Want to harm yourself or others.	
	O	Have random aches and pains.	
	О	Smoke, drink, or use drugs.	
	О	Hear voices.	
•	Re	sources that can help oneself and others with mental illnesses and challenges	
	(3.	u):

academic safety, and wellness.

- Students can contribute to a positive school climate by being involved on a school climate team; looking at data for their school; working with teachers, administrators, and parents to implement activities and programs to promote student engagement, safety, and environmental changes; design and implement programs to prevent violence, bullying, and harassment. (1.v)
- Research shows that bullying, cyberbullying, and harassment are significantly associated with decreases in perceptions of school safety, connection, and equity. (2.v)
- A negative school climate facilitates opportunities for bullying and violence. (<u>Impact of School Climate</u>) (2.v)
- Effects of bullying/cyberbullying include depression and anxiety, increased feelings of sadness and loneliness, changes in sleep and eating patterns, loss of interest in activities, physical health complaints, decreased academic achievement (missing, skipping, or dropping out of school), and substance use. (2.v)
- Harassment means to annoy or bother someone in a constant or repeated way.
 Harassment may include annoying someone, making threats or using intimidation, or putting a person in fear of their safety. Harassment is unwanted, unwelcome, and uninvited behavior that demeans, threatens, or offends the victim and results in a hostile environment for the victim. (2.v)

Bullying/cyberbullying is a public health concern because it can have significant mental, developmental, and social effects. Caring, inclusive school climates and changing social norms about bullying and cyberbullying can help with prevention.

• Empathy is the feeling that you understand and share another person's experience and emotions/the ability to share another's feelings. One of the reasons that bystanders intervene in bullying situations is because they have empathy—they can see things from the perspective of the person being bullied and understand how they might be feeling. (1.w)

Essential Knowledge and Skills

cyberbullying, empathy, bystander intervention, and positive school climate to create and implement a school campaign to prevent bullying and cyberbullying (1.w, 2.w, 3.w);

Grade: Seven

- apply knowledge of the myths and facts of gang involvement to bring awareness to peers (1.x);
- apply knowledge of why students may join gangs and positive school climate to promote healthy alternatives to gang involvement (1.v, 2.x, 3.x).

Additional resources:

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
Being able to identify bullying behavior can help people prevent, intervene, or take	
other actions to stop bullying and cyberbullying. Bystanders can take positive actions	
to prevent bullying and to address it while it is happening or after it occurs. (2.w)	
o Prevention steps include:	
 Being inclusive by welcoming or inviting others to join their activities and groups. 	
 Walking or sitting with or near vulnerable kids who may be targets of bullying. 	
 Being a role model for pro-social behavior by showing kindness, respect, and empathy for others. 	
 Getting involved with bullying prevention efforts at school or in the community. 	
o Bystander interventions during a bullying incident may include:	
 Defending the target of the bullying. 	
 Using humor to lighten up a serious situation. 	
Intervening as a group.	
 Openly stating an objection to bullying. 	
Changing the subject.	
 Questioning the bullying behavior. 	
o Bystanders can address bullying after it happens by:	
 Reaching out privately to the target of bullying to express support or concern. 	
 Reaching out privately to the person doing the bullying to express concern, if they feel safe to do so. 	
 Reporting the bullying to a trusted adult, parent, teacher, or school administrator. 	
All gangs use threat, intimidation, and violence to control neighborhoods and boost their	
illegal money-making activities, which include robbery, drug and gun trafficking,	
prostitution and human trafficking, and fraud (Gangs).	

Essential Understandings	Essential Knowledge and Skills
A gang is a group of two or more persons, whether formal or informal, and which	
individually or collectively engage in activities that are illegal, destructive, disruptive,	
or intimidating. Crimes among gangs can include drug dealing, theft, assault, rape,	
prostitution, and murder. Gang members generally range in age from 13 to 24 years	
old but can be as young as nine. Gangs can include all ethnic groups. Many gang	
members are boys, but ten percent of all gang members are girls and that number is	
growing.	
• Young people are recruited into gangs, or find them appealing, based on many things	
that are not true. (Fairfax County Gang Prevention Guide) (1.x)	
o MYTH: A gang will keep me safe.	
FACT: You will be more at risk of imprisonment, violence from rival gangs, or	
even fighting in your own gang over money and power. Many people get attacked	
over what seems like a small thing, like saying something that is taken as an insult.	
o MYTH: A gang will give me a better life because I will get money and nice things.	
FACT: Any money you get won't last long. You'll live in constant fear of getting	
caught, be more likely to end up in prison, and reduce your chances of getting	
future jobs.	
o MYTH: In a gang, someone will always have my back.	
FACT: Gang members are all about money, not loyalty. You are a friend only as	
long as you are useful to them. They will pin the blame on you to avoid getting in	
trouble themselves because they can just recruit someone new to replace you.	
o MYTH: Gang life is exciting.	
FACT: You will always be looking over your shoulder out of fear of being caught,	
injured, or killed.	
Among the leading reasons given by kids involved with gangs, either as members or	
gang associates, is a desire to be loved, accepted, or to be part of a group. That is what	
gang members commonly promise when they are recruiting. Additional reasons that	
kids join gangs (2.x)	

Ess	ent	ial Understandings	Essential Knowledge and Skills
	0	Fun and excitement: Gang members, recruiters, and the media glamorize the gang	
		lifestyle.	
	0	Identity and a sense of belonging: Gangs may offer a sense of identity to their	
		members and a way to gain attention or status. Kids who do not have strong ties to	
		their families, communities, schools, or places of worship may turn to gangs for	
		companionship and as a substitute family.	
	0	Peer pressure: If friends or family members are in a gang, kids may be pressured to	
		join a gang.	
	o	Financial gain: Being in a gang is often seen as a way to obtain money or	
		possessions.	
	0	Failure to realize what being in a gang means: Kids often do not fully understand	
		the dangers, risks, and legal problems associated with being in a gang.	
	o	Protection: In neighborhoods and areas where gangs are present, kids sometimes	
		feel, or are told, that belonging to a gang will provide protection from other gangs.	
•	He	althy alternatives to gang involvement: Being involved in and having friends who	
	are	e involved in school, community, and/or faith-based activities; and respecting and	
	aco	cepting one another help provide a sense of belonging and support that can help	
	pre	event someone from joining a gang. (3.x)	

Strand: Community/Environmental Health

Standards:

- 7.1.y Describe human behaviors that contribute to air, water, soil, and noise pollution.
- 7.2.y Explain how environmental health is essential to personal and community health.
- 7.3.y Demonstrate ways to conserve and promote the conservation of natural resources.

Essential Understandings

Caring for the environment is everyone's responsibility.

Human behaviors that contribute to:

- Air pollution: Outdoor air pollution involves exposures that take place outside the built environment. Examples include (1.y):
 - o Fine particles produced by the burning of fossil fuels (i.e., the coal and petroleum used in energy production)
 - o Noxious gases (sulfur dioxide, nitrogen oxides, carbon monoxide, chemical vapors, etc.), such as from vehicle emissions.
 - o Ground-level ozone (a reactive form of oxygen and a primary component of urban smog).
 - o Tobacco smoke.
- Indoor air pollution involves exposures to particulates, carbon oxides, and other pollutants carried by indoor air or dust. Examples include (1.y):
 - o Gases (i.e., carbon monoxide, radon).
 - o Household products and chemicals.
 - o Building materials (i.e., asbestos, formaldehyde, lead).
 - o Tobacco smoke.
 - o Mold and pollen.
 - o Outdoor air pollution can make its way indoors by way of open windows, doors, and ventilation.
- Water pollution: People can reduce water pollution by recycling plastics, throwing garbage away in proper containers, and not littering, including when on boats. Litter can be washed into lakes, rivers, streams, oceans, and water systems. Only flush toilet

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- describe human activities that contribute to air, water, soil, and noise pollution (1.y);
- list ways that human behaviors can affect the environment and the impacts on health (1.y, 2.y);
- research, explain, and present ways to conserve natural resources (3.y).

Additional resources:

Health Smart Virginia

EVERFI

Essential Understandings	Essential Knowledge and Skills
paper in toilets (no paper towels, tissues, plastics, or medications). (1.y)	
• Soil pollution: Soil pollution is defined as the presence of toxic chemicals (pollutants or	
contaminants) in soil, in high enough concentrations to pose a risk to human health	
and/or the ecosystem. Human activities that cause soil pollution range from agricultural	
practices that infest crops with pesticide chemicals to urban or industrial wastes or	
radioactive emissions that contaminate the soil with various toxic substances. (1.y)	
Noise pollution: Primary sources of noise in the United States include road and rail	
traffic, air transportation, and occupational and industrial activities. Additional	
individual-level exposures include amplified music, recreational activities (including	
concerts and sporting events), and firearms. Personal music player use appears to be	
common among adolescents and may involve potentially harmful sound levels.	
Exposures from recreational activities and music are not "noise" in the sense of being	
unwanted sound, but adverse health effects are possible even from desirable sounds.	
(1.y)	
• Environmental health is the branch of public health that: focuses on the relationships	
between people and their environment; promotes human health and well-being; and	
fosters healthy and safe communities. (2.y)	
• Ways to conserve (3.y):	
o Taking shorter showers, turn off water when brushing teeth, and keep a gallon of	
drinking (tap) water in the refrigerator rather than running the tap for cold water.	
o Reduce, reuse, and recycle.	
o Dispose of trash properly.	
o Use active transportation or public transportation.	
o Do not dispose of gasoline, oil, or weed killers and other lawn and garden	
pesticides down the drain, into surface water, onto the ground, or in the trash.	

Strand: Body Systems

Standards:

- 8.1.a Identify and describe the major structures and functions of the brain and nervous system and identify brain and nervous system disorders.
- 8.2.a Describe ways to maintain brain and nervous system health.
- 8.3.a Design strategies to protect and promote brain and nervous system health.

ability to read and recognize printed words, and other aspects of vision.

Essential Understandings	Essential Knowledge and Skills
Your brain is who you are. It's what allows you to think, breathe, move, speak, and feel.	In order to meet these standards, it is expected that
• Information from the environment, outside the body (what the eyes see and skin	students will
feels) and inside the body (heart rate and body temperature), makes its way to the	• identify major structures and functions of the
brain, which receives, processes, and integrates it so that we can survive and	nervous system (brain and spinal cord/nerves)
function under all sorts of changing circumstances and learn from experience.	(1.a);
(Brain and Addiction)	• explain how messages travel from one neuron
• Major structures and functions of the brain and nervous system.(1.a)	to another (1.a);
o Cerebrum: The largest part of the brain; divided into two halves/hemispheres.	• identify causes of brain and nervous system
Each hemisphere of the cerebrum is divided into broad regions called lobes.	disorders (2.a);
Each lobe is associated with different functions:	• advocate for brain and nervous system health
• Frontal lobes: The largest of the lobes; located in the front part of the brain.	(3.a).
They coordinate high-level behaviors, such as motor skills, problem solving,	
judgment, planning, and attention; manage emotions and impulse control.	Additional resources:
 Parietal lobes: Located behind the frontal lobes and involved in organizing 	Health Smart Virginia
and interpreting sensory information from other parts of the brain.	
 Temporal lobes: Located on either side of the head on the same level as the 	
ears. These lobes coordinate specific functions, including visual memory	
(such as facial recognition), verbal memory (such as understanding	
language), and interpreting the emotions and reactions of others.	
 Occipital lobes: Located in the back of the brain; heavily involved in the 	

Essential Understandings		Essential Knowledge and Skills
0	Cerebellum: Located in the back of the brain, just below the occipital lobes.	
	Involved with fine motor skills (coordination of smaller, or finer, movements,	
	especially those involving the hands and feet). Helps the body maintain its	
	posture, equilibrium, and balance.	
О	Brain stem: Located in front of the cerebellum and connected to the spinal cord.	
	It consists of three major parts:	
	 Midbrain: Helps control eye movement and processes visual and auditory 	
	information.	
	• Pons: The largest part of the brain stem located below the midbrain. A	
	group of nerves that help connect different parts of the brain. Contains the	
	start of some of the cranial nerves involved in facial movements and	
	transmitting sensory information.	
	 Medulla oblongata: The lowest part of the brain. Acts as the control center 	
	for the function of the heart and lungs. Helps regulate many important	
	functions, including breathing, sneezing, and swallowing.	
	mbic system: Brain structures that deal with motivation, learning, memory, and	
	notions, and regulates autonomic function in response to emotional stimuli. Good	
	elings motivate us to repeat the behavior, which can be good because some	
	tions and behaviors are critical to our lives. Each part of this system is duplicated	
in	the opposite half of the brain. (<u>Brain and Addiction</u>)	
О	The thalamus acts as a gatekeeper for messages passed between the spinal cord	
	and the cerebral hemispheres.	
О	Hypothalamus: A brain structure that regulates involuntary or automatic	
	responses (fight, flight; hunger, thirst). Body temperature should be about	
	98.6°F. If the body is too hot, the hypothalamus tells it to sweat. If the body is	
	too cold, the hypothalamus causes shivering.	
0	Hippocampus: The part of the limbic system deep inside the brain that sends	
	memories to be stored in appropriate sections of the cerebrum and then recalls	

Essential Understandings	Essential Knowledge and Skills
them when necessary (converts short-term memory into long-term memory).	
o Amygdala: A collection of cells on each side of the brain shaped like an	
almond; scientists believe that the amygdala is responsible for emotion (if	
stimulated, it evokes anger, violence, fear, anxiety; if the amygdala is destroyed,	
it causes a mellow effect, or causes impulsive actions (disinhibited behavior).	
Nervous system: includes the central nervous system and peripheral nervous system.	
(Brain and Addiction) (1.a)	
 The brain is a complex communications network of billions of neurons, 	
neurotransmitters, and receptors. Networks of neurons pass messages back and	
forth thousands of times a minute within the brain, spinal column, and nerves.	
These nerve networks control everything we feel, think, and do.	
• The central nervous system includes the brain and the spinal cord.	
o Spinal cord: A bundle of nerves protected by the spine (vertebrae). The spinal	
cord is the main pathway for information to flow from brain to the rest of the	
body.	
• Peripheral nervous system: Threadlike nerves that branch out from the spinal cord	
to every organ and body part.	
• Nerves are made up of tiny cells, called neurons. Sensory neurons send information	
from the eyes, ears, nose, tongue, and skin to the brain. Motor neurons carry	
messages away from the brain to muscles, glands, and organs throughout the body.	
The neural networks are made up of:	
o Neurons: The brain contains about 100 billion neurons—nerve cells that work	
nonstop to send and receive messages. Within a neuron, messages travel from	
the cell body down a nerve fiber called an axon in the form of electrical	
impulses. From there, the message is sent to other neurons.	
o Neurotransmitters: the brain's chemical messengers. Neurotransmitters help	
messages travel from one neuron to another. Branches of the axon, called axon	
terminals, release neurotransmitters into the space between two nerve cells,	

Essential Understandings		Essential Knowledge and Skills
	called a synapse.	
О	Receptors: The brain's chemical receivers. As the neurotransmitter approaches	
	the nearby neuron, it attaches to a special site on that neuron called a receptor.	
	A neurotransmitter and its receptor operate like a key and lock—a specific	
	mechanism makes sure that each receptor will forward the right message only	
	after interacting with the right kind of neurotransmitter.	
О	Transporters: The brain's chemical recyclers. Once neurotransmitters do their	
	job, they are pulled back into their original neuron by transporters. This	
	recycling process shuts off the signal between the neurons.	
О	To send a message, a nerve cell releases a chemical (neurotransmitter) into the	
	space separating two nerve cells, called the synapse. The neurotransmitter	
	crosses the synapse and attaches to proteins (receptors) on the receiving nerve	
	cell. This causes changes in the receiving nerve cell, and the message is	
	delivered.	
Note:	Inderstanding neurotransmission is foundational to understanding how substance	
use cha	anges the brain.	
• Bı	ain disorders/conditions: Most fall within one of five main categories:	
О	Brain injuries, such as concussions.	
О	Cerebrovascular injuries, such as aneurysms or strokes.	
О	Brain tumors.	
О	neurodegenerative disorders, such as dementia, Parkinson's disease, or	
	Huntington's disease.	
О	Psychological conditions, such as anxiety, depression, or schizophrenia.	
• No	ervous system disorders (1.a):	
О	Vascular disorders, such as stroke, transient ischemic attack (TIA), subdural	
	hemorrhage, and hematoma.	
О	Infections, such as meningitis, encephalitis, polio, and epidural abscess.	
О	Structural disorders, such as a brain or spinal cord injury (concussion, blood	

Esse	ntial Understandings	Essential Knowledge and Skills
	clots), Bell's palsy, carpal tunnel syndrome, brain or spinal cord tumors.	
(Functional disorders, such as headache, epilepsy, dizziness, and neuralgia.	
(Degeneration, such as Parkinson's disease, multiple sclerosis, amyotrophic	
	lateral sclerosis (ALS), and Alzheimer's disease.	
• 7	To help protect brain and nervous system health (2.a):	
(Keep the brain stimulated and the mind calm.	
(Protect your head; wear a helmet when biking and during other activities.	
(Exercise regularly.	
(Avoid alcohol, tobacco, and cannabis and resist engaging in substance	
	use/misuse.	
(Be aware of your emotions and seek help from friends, family, or other trusted	
	adult when needed.	
(Eat nutrient-dense foods and avoid a high-sugar diet.	
(Wear a seat belt in all motorized vehicles.	
(Get the recommended amount of sleep and rest (teens ages 13-18 need 8-10	
	hours of sleep a night to maintain health (How Much Sleep Do I Need?).	
(Stay hydrated.	
(Build positive social networks.	

Strand: Nutrition

Standards:

- 8.1.b Determine the nutrients needed for proper brain function.
- 8.2.b Explain how nutrients contribute to brain function.
- 8.3.b Create a plan to make healthy food choices, including choosing fruits and vegetables and increasing water and healthy beverage choices in a variety of settings.
- 8.1.c Examine the health risks posed by food contaminants during food preparation and food storage.
- 8.2.c Describe food safety techniques (e.g., hand washing, food washing, cross contamination, proper handling and storing of foods).
- 8.3.c Create strategies to promote food safety at home.
- 8.1.d Identify the nutritional impact of disordered eating.
- 8.2.d Analyze the effects of society (i.e., media, family, peers) on eating habits and attitudes toward weight and body size.
- 8.3.d Identify and promote resources for help and assistance with disordered eating.
- 8.1.e Compare health benefits and risks associated with trending diets, dietary supplements, and popular beverages, including sugar-sweetened and caffeinated beverages.
- 8.2.e Evaluate the accuracy of claims about trending diets, dietary supplements, and popular beverages.
- 8.3.e Develop factual advertising to help family and peers evaluate healthy food and beverage choices.

Essential Understandings	Essential Knowledge and Skills
Brain function can be enhanced by eating nutritious foods that support brain health, not	In order to meet these standards, it is expected that

soybeans, flaxseed, other seeds, and nuts [especially walnuts]): build brain and	vegetables, water, and healthy beverage
nerve cells (neurons) and are essential for learning and memory.	choices, at home, during school, and/or in

Essential Understandings

- Antioxidants (found in blueberries, and other deeply colored berries, broccoli, kale, pumpkin seeds, dark chocolate, cocoa powder, and green tea): have been found to improve communication between brain cells, improve memory and mood, help protect the brain from damage, and reduce cellular stress and inflammation, which are linked to brain aging and neurodegenerative disorders (like Alzheimer's).
- Minerals: zinc for nerve signaling, magnesium for learning and memory, copper helps to control nerve signals, and iron improves brain function (found in pumpkin seeds).
- o Vitamin E (found in nuts, brown rice, barley, oatmeal, whole-grain bread, and whole-grain pasta): improves cognition, memory.
- o Vitamin C (oranges, bell peppers, guava, kiwi, tomatoes, and strawberries): a powerful antioxidant and key factor in preventing mental decline.
- o Vitamins B6 and B12, folate and choline (found in eggs): proper brain functioning and development and regulating mood.
- o Healthful unsaturated fats (avocados, almonds, cashews, peanuts, walnuts, Brazil nuts, flaxseed, chia seeds, soybean, sunflower, canola oils, and fish): reduce blood pressure (reducing risk of cognitive decline).

Foodborne illness is a common, costly, sometimes life threatening—yet largely preventable—public health problem. Anyone can get a foodborne illness.

- Foodborne illnesses result from consuming one of the two most common types of foodborne pathogens: bacteria (like Salmonella, Listeria, or E. coli) and viruses (such as norovirus or hepatitis A). Symptoms may include nausea, vomiting, diarrhea, cramps, and fever. (1.c)
- Safe steps in food handling, cooking, and storage are essential in preventing foodborne illness. You cannot see, smell, or taste harmful bacteria that may cause illness. (Keep Food Safe! Food Safety Basics) (2.c)

Essential Knowledge and Skills

restaurants; (1.b, 2.b, 3.b);

Health Smart Virginia EVERFI

Ess	Essential Understandings		Essential Knowledge and Skills
	О	Always wash your hands with soap and warm water for 20 seconds before and	
		after handling food.	
	o	Don't cross-contaminate. Keep raw meat, poultry, fish, and their juices away	
		from other food. After cutting meats, wash the cutting board, knife, and	
		countertops with hot, soapy water.	
	o	Marinate meat and poultry in a covered dish in the refrigerator.	
	o	Before eating or preparing fresh fruits and vegetables, wash the produce under	
		cold running tap water to remove any lingering dirt. This reduces bacteria that	
		may be present. If there is a firm surface, such as on apples or potatoes, the	
		surface can be scrubbed with a brush. Consumers should not wash fruits and	
		vegetables with detergent or soap.	
	o	Sanitize cutting boards by using a solution of one tablespoon of unscented,	
		liquid chlorine bleach in one gallon of water.	
	О	Avoiding unpasteurized (raw) milk and unpasteurized juices such as fresh apple	
		cider.	
	О	Cook foods thoroughly.	
•	Fo	od storage (<u>Keep Food Safe! Food Safety Basics</u>) (2.c)	
	О	Always refrigerate perishable food within two hours (one hour when the	
		temperature is above 90°F).	
	О	Check the temperature of your refrigerator and freezer with an appliance	
		thermometer. The refrigerator should be at 40°F or below and the freezer at 0°F	
		or below.	
	O	Cook or freeze fresh poultry, fish, ground meats, and variety meats within two	
		days; other beef, veal, lamb, or pork, within three to five days.	
	О	Perishable food such as meat and poultry should be wrapped securely to	
		maintain quality and to prevent meat juices from getting onto other food.	
	О	To maintain quality when freezing meat and poultry in its original package,	
		wrap the package again with foil or plastic wrap that is recommended for the	

Essential Understandings	Essential Knowledge and Skills
freezer.	
Eating concerns falling short of a diagnosis deserve attention and treatment because	
they may turn into more problematic disordered eating and put individuals at risk of	
serious health problems.	
Disordered eating is the use of any unhealthy weight-control behaviors, such as	
skipping meals, cutting out food groups in the absence of a medical diagnosis, or	
behaviors such as using laxatives, diuretics, diet pills, restriction, or binge eating.	
An individual with disordered eating is often engaged in some of the same behavior	
as those with eating disorders but at a lesser frequency or lower level of severity.	
Disordered eating may or may not warrant a specific eating disorder diagnosis.	
Detrimental consequences can include a greater risk of obesity and eating disorders,	
bone loss, gastrointestinal disturbances, electrolyte and fluid imbalances, low heart	
rate and blood pressure, increased anxiety, depression, and social isolation. (1.d)	
Influences on body image include the media, which can target adolescents, and peers	
who help shape beliefs about the perceived body ideal. (2.d)	
"The culture in which we [live] has a significant impact on how we feel about	
ourselves and the manner in which we think about our body. Many cultural	
traditions also contribute to body image and can influence either negative or	
positive body image and/or self-esteem. Depending on the culture and overall	
emphasis of traditions involved, a person may find their surroundings either	
[supportive] to or [negatively impacting] the building of a healthy body image and	
self-esteem."	
• Research shows that there is consistent evidence that [social] norms influenced food	
choices. Information about eating norms influences choice and quantity of food	
eaten. Norms that promote healthful eating influenced people's choice of foods.	
Norms that promote adequate quantities of food as opposed to large quantities of	

Essential Understandings	Essential Knowledge and Skills
food influenced the amount of food eaten. (PubMed.gov)	
Research study results of middle school students indicate that the standard of	
beauty widely represented on television, movies, and video games is having a	
powerful effect on adolescents. This effect reinforces the low self-esteem that can	
lead to risky behavior such as excessive dieting.	
Another study found that all demographic groups were equally affected by the link	
between social media and developing eating and body image concerns.	
• Researchers are finding that eating disorders are caused by a complex interaction of	
genetic, biological, behavioral, psychological, and social factors. Protective factors	
for eating disorders:	
Individual: Positive body image, high self-esteem, media literacy (including)	
social media), emotional well-being, school achievement, being self-directed	
and assertive, social skills, problem solving and coping skills.	
Family: Research suggests that family support and connectedness, frequent	
family meals, and avoiding comments/teasing about weight may help protect against disordered eating.	
 Social: Peer or other social support structures and relationships where weight 	
and physical appearance are not of high concern.	
Resources for help and support with disordered eating/eating disorders include	
talking with a parent/guardian and/or access resources (3.d)	
o School (counselor, psychologist, social worker; public health nurse).	
o Community	
 Health care providers (specialized therapists). 	
 Registered dietitian nutritionists. 	
 Local Community Services Board. 	
Dietary supplements are products intended to supplement the diet. They are not	
medicines and are not intended to treat, diagnose, mitigate, prevent, or cure diseases.	
medicines and are not intended to treat, diagnose, nitrigate, prevent, or cure diseases.	

Essential Understandings	Essential Knowledge and Skills
The Food and Drug Administration (FDA) is the federal agency that oversees	
supplements and medicines, but the FDA regulations for dietary supplements are	
different from those for prescription or over-the-counter medicines. All prescription	
medications must receive FDA approval; however, there are some over-the-counter	
drugs and dietary supplements that do not need FDA approval to be sold.	
According to the Academy of Nutrition and Dietetics, avoid the following diet	
claims of fad diets (1.e):	
o Rapid weight loss: If you lose weight quickly, you'll lose muscle, bone, and	
water. You also will be more likely to regain the pounds. Instead, focus on	
eating in a way that helps you feel nourished, satisfied, and energized.	
o Quantities and limitations: Avoid diets that limit most foods and promote	
unlimited quantities of specific foods. Avoid any diet that eliminates or severely	
restricts entire food groups or macronutrients, such as carbohydrates. Even if	
you take a multivitamin, you'll still miss some critical nutrients.	
o Specific food combinations: There is no evidence that combining certain foods	
or eating foods at specific times of day will help with weight loss. Eating the	
"wrong" combinations of food doesn't cause them to turn to fat immediately or	
to produce toxins in your intestines, as some plans claim.	
o Rigid menus: Limiting food choices or following rigid meal plans can be an	
overwhelming task. With any new diet, always ask yourself, "Can I eat this way	
for the rest of my life?" If the answer is no, the plan is not for you.	
o Diet plans should be evaluated for effectiveness, deficiencies, and ways to	
overcome any deficiencies.	
Dietary supplements: Some dietary supplements can help a person get adequate	
amounts of essential nutrients if they don't eat a nutritious variety of foods.	
However, supplements can't take the place of the variety of foods that are important	
to a healthy diet. Manufacturers may add vitamins, minerals, and other	
supplemental ingredients to foods, especially breakfast cereals and beverages. As a	

concentrating, decreased desire to socialize, flu-like symptoms, irritability,

Essential Understandings	Essential Knowledge and Skills
result, a person may get more of these ingredients than they think, and more might	
not be better. Consult a health care provider before taking dietary supplements to	
treat a health condition; before taking dietary supplements in place of, or in	
combination with, prescribed medicines; and if scheduled to have any type of	
surgical procedure. The term "natural" doesn't always mean safe. A dietary	
supplement's safety depends on many things, such as its chemical makeup, how it	
works in the body, how it is prepared, and the amount taken. (What you Need to	
Know: Dietary Supplements) (1.e)	
Sugar-sweetened beverages are drinks with added sugar, including non-diet soft	
drinks/sodas, flavored juice drinks, sports drinks, sweetened tea, coffee drinks,	
energy drinks, and electrolyte replacement drinks. The calories in sugar-sweetened	
beverages can contribute to weight gain and provide little to no nutritional value.	
Sugar-sweetened beverages do not fill you up (satiate) the same way that food does.	
Those extra calories can lead to other health risks, including obesity, tooth decay,	
heart disease and type 2 diabetes. (1.e)	
Total amount of caffeine contained in some cans or bottles of energy drinks can	
exceed 500 mg (equivalent to 14 cans of common caffeinated soft drinks). A lethal	
dose of caffeine is considered to be 200 to 400 mg/kg. The effects of caffeine on	
various organ systems include increases in heart rate, blood pressure, speech rate,	
motor activity, attentiveness, gastric secretion, diuresis, and temperature. Sleep	
disturbances or improved moods are considered variable and individualized effects.	
Caffeine can increase anxiety in those with anxiety disorders, and it is known also	
to play a role in triggering arrhythmias. Dental/enamel erosion is also a concern in	
children and adolescents. Additional concerns regarding the use of caffeine in	
children include its effects on the developing neurologic and cardiovascular	
systems and the risk of physical dependence and addiction. Symptoms of caffeine	
withdrawal include headache, fatigue, decreased alertness, drowsiness, difficulty	

Essential Understandings	Essential Knowledge and Skills
depressed mood, muscle pain or stiffness, and nausea or vomiting. Because of the	
potentially harmful adverse effects and developmental effects of caffeine, dietary	
intake should be discouraged for all children. (1.e)	
The accuracy of claims about trending diets, dietary supplements, and popular	
beverages can be researched through the National Institutes of Health (NIH), FDA,	
Federal Trade Commission Bureau of Consumer Protection, U.S. Consumer	
Product Safety Commission, medical associations, and medical research sites. (2.e)	

Strand: Physical Health

Standards:

- 8.1.f Evaluate the physical, mental, and social health benefits of physical activity.
- 8.2.f Assess the health risks of a sedentary lifestyle.
- 8.3.f Create environmental design solutions that promote physical and mental health.

Essential Understandings

A balanced healthy lifestyle includes physical activity, healthy food choices, and sleep. Physical activity improves physical, mental, and social health.

- Adolescents (6-17 years) should do 60 minutes or more of physical activity each day. Physical activity requires energy expenditure.
- Physical health Physical activity improves brain health (improve thinking, cognition, learning), weight management, reduces disease (heart disease and some cancers), strengthens bones and muscles, and improves ability to do everyday activities. Better sleep.
- Mental Health Physical activity can reduce risk of depression and anxiety and reduce stress. Improvements are seen in components of executive function including the ability to plan and organize; monitor, inhibit, or facilitate behaviors; initiate tasks; and control emotions. Increases self-esteem and self-confidence. (Why It Matters)
- Social Health improvements in physical and mental health can improve your ability to do daily activities leading to more enjoyment in interacting with others. (1.f, 2.f)
- Environmental design questions to promote physical activity (3.f)
 - o Is a sidewalk present? Is there a ramp at the curbs?
 - o Is a pedestrian walk signal present?
 - o Are there sections of sidewalk that need maintenance (incomplete sections, cracks, uneven that may cause tripping hazards)?
 - o Is there a marked crosswalk?
 - o Is there a designated bike path or bike lane?
 - o How many public parks are present?
 - o Are there streetlights?

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Eight

• conduct an assessment of the environment (school, home, community) for access to safe physical activity and apply knowledge of benefits of physical activity and health risks of a sedentary lifestyle to make/justify recommendations for change (1.f, 2.f, 3.f).

Additional resources:

Health Smart Virginia EVERFI

Strand: Disease Prevention/Health Promotion

Standards:

- 8.1.g Explain the difference between rest, sleep, sleep deprivation, and sleep debt.
- 8.2.g Identify sleep hygiene strategies to support recommendations for optimal sleep.
- 8.3.g Create specific, measurable, attainable, relevant and timely (SMART) goals to get optimal sleep to promote cognitive performance and academic success.
- 8.1.h Identify environmental and personal factors that influence the degree of risk of diabetes, heart disease, cancer, obesity, and stroke.
- 8.2.h Describe preventive health measures, including immunizations, regular health and medical screenings, nutrition, physical activity, sleep, and limiting personal technology use, in preventing diabetes, heart disease, stroke, cancer, obesity, and other chronic diseases.
- 8.3.h Design a plan of action with short- and long-term goals to prevent diabetes, heart disease, stroke, cancer, obesity, and other chronic diseases and conditions.

Essential Understandings

Getting enough sleep is not a luxury—it is something people need for good health. Not getting enough sleep is linked with many chronic diseases and conditions (type 2 diabetes, cardiovascular disease, obesity, and depression) and can lead to motor vehicle crashes. (Sleep and Chronic Disease)

- Rest: Quiet wakefulness—resting with your eyes closed—can calm your mind, give at least some neurons a break (because the neurons are not actively thinking or concentrating on something), and let muscles and organs relax. It can also reduce stress, improve mood, and increase alertness, mental clarity, creativity, and motivation. All of these changes can enhance productivity. (1.g)
- Sleep: Marked by the absence of wakefulness and by the loss of consciousness of
 one's surroundings; accompanied by a typical body posture (such as lying down
 with the eyes closed), the occurrence of dreaming, and changes in brain activity and
 physiological functioning; is made up of cycles of non-REM sleep and REM sleep;

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- identify the differences between rest, sleep, sleep deprivation, and sleep debt (1.g);
- evaluate how current sleep habits (hours of sleep and sleep hygiene practices) meet/do not meet recommended guidelines (2.g);
- create a SMART goal for sleep, to include action steps for sleep hygiene practices to maintain or improve current sleep habits (3.g);
- evaluate current environmental and personal factors that may influence the degree of risk for diabetes, heart disease, cancer, obesity, and

Essential Understandings

and is usually considered essential to the restoration and recovery of vital bodily and mental functions. Teens 13-18 should get 8-10 hours of sleep each night (<u>How Much Sleep Do I Need?</u>). (1.g)

- Sleep deprivation: Defined as not obtaining adequate total sleep. A chronic sleep-restricted state may result in excessive daytime sleepiness, fatigue, clumsiness, and weight gain or weight loss. Being sleep-deprived affects the brain and cognitive function. Effects may include accidents from lack of attention, moodiness, and hunger. (1.g)
- Sleep debt: Also known as sleep deficit, the cumulative effect of a person not having sufficient sleep. A large sleep debt can lead to physical and/or mental fatigue. Two known kinds of sleep debt: total sleep deprivation (when a person is kept awake for a minimum of 24 hours) and partial sleep deprivation (when a person has limited sleep for several days or even weeks). (1.g)
- Good sleep habits (sometimes referred to as "sleep hygiene") can help get a good night's sleep. Some habits that can improve sleep health (2.g):
 - o Be consistent. Go to bed at the same time each night and get up at the same time each morning, including on the weekends.
 - o Make sure the bedroom is quiet, dark, relaxing, and at a comfortable temperature.
 - o Remove electronic devices from the bedroom (TVs, computers, and phones).
 - o Avoid large meals and caffeine before bedtime.
 - Exercise. Being physically active during the day can help fall asleep more easily at night.
- SMART goals are specific, measurable, attainable, relevant and timely (3.g).

Noncommunicable/chronic diseases (e.g., diabetes, heart disease, cancer, obesity, and stroke) are not contagious, and many develop from unhealthy lifestyle choices over time or may be inherited. Healthy choices begin early in life.

Essential Knowledge and Skills

stroke (1.h);

- identify prevention strategies for chronic diseases (2.h);
- create short- and long-term SMART goals for health measures to prevent chronic disease to include action steps (3.h).

Grade: Eight

Additional resources:

Health Smart Virginia

EVERFI

Essential Understandings	Essential Knowledge and Skills
Noncommunicable diseases, also known as chronic diseases, tend to be of long	
duration and are the result of genetic, physiological, environmental and behavioral	
factors. While genetic-related chronic diseases may not be preventable, people can	
reduce their risk. (Noncommunicable diseases) (1.h)	
Environmental facts such as air pollution, can contribute to a range of chronic	
diseases including asthma and other chronic respiratory diseases. (Chronic	
Respiratory Diseases) (1.h)	
For nongenetic related chronic diseases, many can be prevented by	
reducing/eliminating common risk factors such as tobacco use, alcohol use,	
physical inactivity, and unhealthy eating habits. Other preventive health measures	
include immunizations, regular health and medical screenings, sleep, and limiting	
personal technology use. (2.h)	
• For any disease or illness, identifying it early allows for treatments to begin—from	
monitoring, to medications, to medical procedures, if needed—and lifestyle	
changes to begin or change (not smoking, not using alcohol, increasing physical	
activity, and making healthy food and beverage choices). (3.h)	

Strand: Substance Use/Misuse Prevention

Standards:

- 8.1.i Describe the short- and long-term health issues and effects on the brain related to the use of alcohol, tobacco, nicotine products, and other drugs, including inhalants, marijuana, cocaine, stimulants, methamphetamines, opiates, steroids, and performance-enhancing drugs.
- 8.2.i Analyze the social, economic, and family and peer pressure influences on the use of tobacco, nicotine products (e.g., ecigarettes), alcohol, marijuana, and other drugs.
- 8.3.i Design persuasive advertising to eliminate drug use.
- 8.1.j Research the signs, symptoms, and causes of addiction and the impact of substance use disorder on relationships and behavior.
- 8.2.j Have and express positive norms regarding why most teenagers do not use alcohol, tobacco, prescription opioids, or other drugs (e.g., do not think use and abuse are acceptable or appropriate).
- 8.3.j Create a campaign that emphasizes the importance of prevention and early identification of drug use disorder.

Essential Understandings

Drugs can alter important brain areas that are necessary for life-sustaining functions and can drive the compulsive drug use that marks addiction. (<u>Introducing the Human Brain</u>)

- Health effects (1.i) (information about drug effects are from <u>National Institute on Drug Abuse</u> unless otherwise specified):
 - o Short-term effects of substance use can range from changes in appetite, wakefulness, heart rate, blood pressure, motor coordination, impaired judgment, and/or mood to unconsciousness, heart attack, stroke, psychosis (hallucinations and delusions), overdose, and even death. These health effects may occur after just one use. These effects often depend on the specific drug or drugs used, how they are taken, how much is taken, the person's health, and other factors.
 - o Long-term effects:
 - Drugs that may cause cancer include alcohol, tobacco, steroids, and marijuana/cannabis. Young adult males that use marijuana/cannabis and begin their use during adolescence are at risk for an aggressive form of testicular

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

• research the short- and long-term health issues and brain effects related to alcohol, tobacco, nicotine products, and other drugs, including inhalants, marijuana/cannabis, cocaine, stimulants, methamphetamines, opiates, steroids, and performance-enhancing drug (1.i);

- analyze the influences on teen drug use (2.i);
- apply knowledge of effects and influences to develop persuasive advertising (print, video, or other media) to eliminate drug

Essential Understandings Essential Knowledge and Skills use (3.i); cancer. explain addiction and the effects of Most drugs can have adverse cardiovascular effects, ranging from abnormal heart rate to heart attack. Drug use can lead to respiratory problems. Smoking substance use disorder on the individual cigarettes, marijuana/cannabis, and crack cocaine can cause bronchitis, and on others (1.j); design messaging that promotes positive emphysema, lung damage, and lung cancer. The use of some drugs, such as opioids, may cause breathing to slow, block air from entering the lungs, or make social norms and/or corrects asthma symptoms worse. misconceptions of social norms related to Alcohol can cause stroke, high blood pressure, cirrhosis (scarring of the liver), teen drug use (2.j, 3.j). and cancer (Alcohol's Effects on the Body). Nicotine products (vaping)/e-cigarettes produce dangerous chemicals, including Additional resources: acetaldehyde, acrolein (used to kill weeds), and formaldehyde. These can cause Health Smart Virginia lung disease, acute lung injury, chronic obstructive pulmonary disease (COPD), **EVERFI** cardiovascular (heart) disease, asthma, and lung cancer. Long-term effects of inhalant use may include liver and kidney damage, hearing loss, bone marrow damage, loss of coordination from nerve damage, delayed behavioral development from brain problems, and brain damage (from cut-off oxygen flow to the brain). Abuse of prescription stimulants can increase heart rate, blood pressure, and body temperature. Stimulant medications can decrease sleep and appetite, and abuse can lead to malnutrition and its consequences. Long-term use of methamphetamine can cause changes to the structure of the brain in areas involved with memory and emotions. Long-term use can also cause paranoia, hallucinations, and violent behavior. Methamphetamine can cause the gums to decay and the teeth to rot, a condition known as "meth mouth."

Grade: Eight

Performance-enhancing drugs (anabolic steroids). Misuse of anabolic steroids

o Negative mental effects (paranoia [extreme, unreasonable] jealousy, extreme

might lead to:

Essent	ial Und	erstandings	Essential Knowledge and Skills
		irritability, and aggression ["roid rage"]).	
	o	Delusions (false beliefs or ideas, impaired judgment, and mania).	
	О	Serious health problems (kidney problems or failure, liver damage and	
		tumors, enlarged heart, high blood pressure, increased risk of heart attack or	
		stroke even in young people, increased risk of blood clots)	
	0	In men, shrinking testicles, baldness, development of breasts, increased risk of prostate cancer.	
	O	In women, the growth of facial hair or excess body hair, decreased breast	
		size, male-pattern baldness, a change or stop in the menstrual cycle,	
		deepened voice.	
	0	In teens, stunted growth or stunted height.	
		cts. Drugs interfere with the way neurons send, receive, and process signals ransmitters. (1.i)	
О	Mariju	ana/cannabis and heroin can activate neurons because their chemical structure	
	mimic	s that of a natural neurotransmitter in the body. This allows the drugs to attach	
	onto a	nd activate the neurons. Although these drugs mimic the brain's chemicals,	
	they de	o not activate neurons in the same way as a natural neurotransmitter, and they	
		abnormal messages being sent through the network.	
О	-	etamines/prescription stimulants/methamphetamines or cocaine can cause the	
		as to release abnormally large amounts of natural neurotransmitters or prevent	
		rmal recycling of these brain chemicals by interfering with transporters. This	
	-	ies or disrupts the normal communication between neurons.	
О	-	ls can affect other parts of the brain, such as the brain stem. The brain stem	
		ls basic functions critical to life, such as heart rate, breathing, and sleeping.	
О	•	drugs—nicotine, cocaine, marijuana/cannabis, and others—affect the brain's	
		d" circuit, which is part of the limbic system (thalamus, hypothalamus,	
	hippoc	campus). Normally, the reward circuit responds to healthy, pleasurable	

Essen	tial Understandings	Essential Knowledge and Skills
	activities by releasing the neurotransmitter dopamine, which teaches other parts of	
	the brain to repeat those activities. Drugs take control of this system, releasing large	
	amounts of dopamine—first in response to the drug but later mainly in response to	
	situational cues associated with the drug, such as being with other drug users or	
	being in places where you used drugs. The brain remembers the high, craves the	
	drug, and seeks to re-create the feeling. Dopamine does not cause the rush of	
	feelings; instead, it reinforces the desire to use drugs.	
0	Alcohol: Affects the ability to make decisions and impairs motor coordination, has	
	negative effects on information processing and learning, and increases the risk of	
	developing alcohol use disorder.	
0	Tobacco/nicotine products increase levels of the neurotransmitter dopamine.	
0	Inhalants: Causes damage to nerve fibers in the brain, hurting the ability of nerve	
	cells to send messages, which can cause muscle spasms and tremors or even	
	permanent trouble with basic actions like walking, bending, and talking. Can cause	
	damage to brain cells by preventing cells from getting enough oxygen, affecting the	
	ability to learn, solve complex problems, plan ahead, and motor coordination.	
0	Performance-enhancing drugs: Even though anabolic steroids do not cause the same	
	high as other drugs, they can lead to a substance use disorder.	
• B	eyond the harmful consequences for the person with the addiction, drug use can cause	
Se	erious health problems for others. Some of the more severe consequences of addiction	
(1	.i):	
0	Neonatal abstinence syndrome (NAS): A mother's substance use or medication use	
	during pregnancy can cause her baby to go into withdrawal after it is born.	
	Symptoms will differ depending on the substance used but may include tremors,	
	problems with sleeping and feeding, and even seizures. Some drug-exposed children	
	will have developmental problems with behavior, attention, and thinking.	
0	Injection of drugs accounts for one in ten cases of HIV. Injection drug use is also a	
	major factor in the spread of hepatitis C and can be the cause of endocarditis	

Essential Understandings	Essential Knowledge and Skills
(inflammation of the lining of the heart and heart valves) and cellulitis	
(inflammation of tissue).	
o The use of illicit drugs or the misuse of prescription drugs can make driving a car	
unsafe, just like driving after drinking alcohol. Drugged driving puts the driver,	
passengers, and others who share the road at risk. Research studies have shown	
negative effects of marijuana/cannabis on drivers, including an increase in lane	
weaving, poor reaction time, and altered attention to the road.	
• Influences on substance use (2.i):	
o Peers: to fit in, to feel good, to feel better (relieve mental health disorders, stress,	
physical pain-"self-medicate"), to do better (use stimulants or performance-	
enhancing drugs), to experiment.	
o Family: Drug/substance use in the household increases the likelihood an adolescent	
will use drugs. Research found that a healthy person was at a higher risk if a sibling	
or spouse abused drugs. An adolescent's inherited genetic vulnerability; personality	
traits like poor impulse control or a high need for excitement; mental health	
conditions such as depression, anxiety, or attention deficit hyperactivity disorder	
(ADHD); and beliefs such as drugs are "cool" or harmless make it more likely that	
an adolescent will use drugs.	
o Social: Being around people who use drugs, may start to feel like everyone is doing	
it and like it is no big deal.	
o Media influence: People on TV talk about drugs a lot. Drugs are in the news and	
joked about on programs. Drug culture may be glorified on programs, social media,	
and video gaming applications without showing the consequences.	
Advertising techniques: The goal of advertisements is to sell, to influence buyers by	
promoting a product, service, or company. Advertisement techniques may include (3.i)	
o Bandwagon (everyone else is doing it).	
o Fear (scare people into buying/believing something).	
o Conflict (uses an unresolved problem or situation).	

Essent	ial Understandings	Essential Knowledge and Skills
О	Shock (uses controversy to gain attention).	
О	Problem/Benefit (convince someone they have a problem and the product is the	
	solution).	
О	Testimonial/Celebrity/Endorsements (provide credibility; believe a personal	
	story).	
0	Anti-Ad (tells the audience they are smart enough to see through the tricks played by advertisers).	
	Association (linking product to certain values, group, or person).	
0	Additional advertising tactics include recognizable logos, repetition, bribery	
0		
	(deals/sales), emotional appeal, and slogans.	
Over t	me, drug use can lead to addiction, a devastating brain disease. People can't stop	
using o	lrugs even when they really want to, and even after it causes consequences to their	
health	and other parts of their lives.	
• Th	ne preferred term for drug addiction is substance use disorder or substance abuse	
di	sorder. Addiction is a compulsive physiological need for and use of a habit-forming	
su	bstance. Drug addiction/substance use disorder is defined as a chronic, relapsing	
di	sorder characterized by compulsive drug seeking and use despite adverse	
co	nsequences. (<u>Understanding Drug Use and Addiction</u>) (1.j)	
• D ₁	rug addiction/substance use disorder is considered a brain disorder because it involves	
fu	nctional changes to brain circuits involved in reward, stress, and self-control, and	
th	ose changes may last a long time after a person has stopped taking drugs. Smoking a	
dr	ug or injecting it into a vein increases its addictive potential. These changes to the	
br	ain affect how a person thinks (impairs judgment) and acts, which can lead to risky	
be	haviors that may cause chronic disease, viral infections, and injury to self and others	
(d	riving under the influence, engaging in violent/aggressive behaviors, or engaging in illegal	
be	haviors to obtain money for or to obtain the drug). (1.j)	
• In	dications that someone has a developing drug problem: (1.j)	

Ess	ential Understandings	Essential Knowledge and Skills
	o Hanging out with different friends.	
	o Not caring about their appearance.	
	o Getting worse grades in school.	
	o Missing classes or skipping school.	
	o Losing interest in their favorite activities.	
	o Getting in trouble in school or with the law.	
	o Having different eating or sleeping habits.	
	o Having more problems with family members and friends.	
•	Social norms are the behaviors, attitudes and/or standards that the majority of people in a	
	group think are acceptable or unacceptable. What people do is influenced by what they think	
	their peers are doing. If people think a certain behavior is typical or the norm, they are more	
	likely to participate in it because they believe most are doing it and they want to belong.	
	However, sometimes a norm or behavior is misread or misperceived, and people think that	
	their peers engage in risky behavior much more than they really do. (2.j)	
	o Misconceptions include:	
	• Everyone uses drugs.	
	 Everyone drinks and drives. 	
	 Drugs will not harm you if you do them just once. 	
•	Early identification of substance use disorder is important because there are treatments to	
	help manage addiction, but there is no cure. It is a chronic disease, meaning it lasts a long	
	time and needs to be managed with regular treatment. If people follow treatment plans, they	
	can go for many years leading healthy lives. It can be similar to other chronic conditions	
	that people learn to manage, like diabetes or heart disease. (3.j)	

Strand: Safety/Injury Prevention

Standards:

- 8.1.k Explain the need for school safety drills and procedures.
- 8.2.k Explain the potential consequences of following and not following safety protocols for school drills.
- 8.3.k Develop a personal action plan during an emergency situation for a variety of locations outside school (e.g., shopping areas, recreation areas).
- 8.1.1 Identify risky behaviors associated with Internet use, online gaming, and social media use.
- 8.2.1 Explain the role of decision making when faced with potentially harmful situations when using the Internet, online gaming, and social media.
- 8.3.1 Develop appropriate personal guidelines for online gaming and social media use.
- 8.1.m Identify the benefits and risks of social media.
- 8.2.m Develop strategies to assess and manage the effects of social media use.
- 8.3.m Develop and promote guidelines for using social media.
- 8.1.n Describe how to assess levels of stress based on physical and psychological responses.
- 8.2.n Identify personal stress-management skills that help respond to different kinds of stress.
- 8.3.n Practice and promote stress-management skills.
- 8.1.0 List the skills and strategies for refusal and negotiation.
- 8.2.0 Explain the benefits of using refusal and negotiation skills for a variety of risk-taking situations.
- 8.3.0 Analyze a variety of situations to determine when to use refusal and negotiation skills to avoid risk.

Essential Understandings	Essential Knowledge and Skills
School safety drills are designed to keep students and school personnel safe when	In order to meet these standards, it is expected
danger exists inside or outside the school building.	that students will
• Types and purposes of school safety drills may include (1.k):	identify school safety drills, their purpose
o Lockdown: To prevent people from leaving the building (stay in	and importance (1.k);

Essential Understandings

- classrooms) due to a threat inside or outside the school or due to a dangerous person, chemical, or other threat (Virginia requires four lockdown drills each school year *Code of Virginia §22.1-137.2*).
- o Fire/evacuation: Used to get people out of the building safely when conditions inside a building have become life-threatening (Virginia requires four fire/evacuation drills each school year *Code of Virginia §22.1-137*).
- o School bus evacuation/emergency: Exiting a school bus safely due to an emergency inside or outside the bus (Virginia requires at least one bus emergency drill each school year *Code of Virginia §22.1-184*).
- o Tornado: The outside of the building is unsafe because of dangerous wind or precipitation; going to interior spaces of the building with no windows to avoid injury and taking cover (Virginia requires two tornado drills each school year *Code of Virginia §22.1-137.1*).
- o Earthquake: Students and employees learn the areas in their building or classrooms that will be safest to be in and how to take cover to avoid serious injury (Virginia does not have a requirement for earthquake drills).
- Note: Drills may have different names. Teachers should use the schoolspecific names and include any other necessary drills conducted by the school.
- School safety drills play an important role in keeping students and staff safe in the event of an emergency. Drills are used to train school staff to know their responsibilities so they can take the lead in an emergency. It's equally important for students to know the planned procedures so they can work cooperatively with adults. Familiarizing teachers and students with the emergency plan helps to reduce anxiety, panic, and confusion, and helps everyone remain calm. Mock drills give an opportunity to reduce evacuation time, ensure that everyone is using the most effective exit route, ensure every student is accounted for, and teaches students to follow instructions and remain calm. (2.k)

Essential Knowledge and Skills

 select a location outside school (e.g., community center, park) and create an action plan for an emergency situation (e.g., fire, weather);

Grade: Eight

- explain the need for using caution when interacting online (Internet, online gaming, social media) (1.1);
- promote online (Internet, online gaming, social media) safety guidelines with others;
- list the pros and cons of using social media;
- identify positive and negative stressors and the potential physical and psychological responses;
- practice and promote stress-management skills;
- apply refusal or negotiation skills to different risky situations and explain why the selected skill set was beneficial to the situation (1.n, 2.n).

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
Review classroom- and school-specific expectations for school safety drills.	
(1.k, 2.k)	
• In any building or facility in the community, know where exits are located. (3.k)	
Internet use, online gaming, and social media use can be sources of information,	
entertainment, and social connection; however, caution should be used when	
interacting online.	
Risky online behaviors (1.1):	
o People are not always who they say they are online. Teens have been tricked	
by people who pretend to be something or someone that they're not (say	
they are a teen but they are an adult). Some teens have found themselves in	
a dangerous situation when they agreed to meet in person.	
o Digital footprint: All of the information online about a person, either posted	
by that person or others, intentionally or unintentionally.	
 Be cautious about sharing photos and what is written/texted. Nothing is 	
ever really deleted online. Screen shots can be taken of anything and	
shared with anyone.	
 Personal information: Pictures and seemingly harmless sharing can put 	
people at risk and make it easy to be taken advantage of. Minimal	
information is needed to determine who a person is and where they live	
or go to school. Do not provide personal information on websites or	
gaming applications; don't give name, age, address/neighborhood,	
school name, or phone number. Ask a parent/guardian before providing	
information.	
• Use decision-making skills when interacting online. (2.l) Ask yourself:	
o Is this option healthful, and does it reflect my beliefs and values?	
o Is this option safe?	
o Is this option respectful to myself and my family?	

Essential Understandings	Essential Knowledge and Skills
o Is this option responsible?	
Social media can be a useful communication and learning tool that can be used for	
building relationships, education, and to help others. There are cautions that need to	
be taken with social media.	
• Benefits of social media (1.m):	
o Connect with peers, friends, and family; cost savings to connect with others.	
 Overcome geographical barriers to connect and for learning. 	
o Opportunities to connect with others that share common interests.	
o Promotes and enables collaboration.	
o Can be used to help others, start or promote a business.	
o Access information for health, education, and real-time news.	
o Fun and enjoyment.	
• Risks of social media (1.m):	
o Overuse/dependence can lead to sleep deprivation, less face-to-face	
interactions; take time away from physical activity and time with	
family/friends; being overwhelmed with information and influences.	
o Social pressure: Comparisons with "ideal" lives and pictures of others may	
affect self-esteem and self-image and may cause depressed feelings.	
o Misunderstandings from communications; conflict; cyberbullying; damage	
reputation.	
o Meeting people who may not be who they say they are can be dangerous.	
o Leaving a digital footprint puts personal information at risk.	
o Exposure to frauds and scams.	
o May lead to dangerous activities, such as trying stunts or challenges posed	
online that can cause injury or death.	
 Assess and manage social media effects (2.m): 	
o Questions that may help determine whether social media is having a negative	

Essential Understandings	Essential Knowledge and Skills
effect on your life	
Is your social media use deeply integrated into your daily life?	
 Do you depend on social media use for excitement throughout the day? 	
Do you need to spend more time to get a "buzz" from social media?	
 Do you get nervous when you are not on social media? 	
 Does your use of social media cause you trouble? 	
 Have you tried to cut back on your use of social media but failed? 	
 Do you spend less than two hours of screen time a day including social 	
media?	
o Manage social media by setting a limit for time spent on social media	
(determine the current time and try to cut that time in half); use social media	
to connect with friends and not just browsing.	
Everyone feels stress (positive or negative) at times. There are positive and negative	
ways to handle stress.	
• Stress is a state of mental tension and worry due to problems in life.	
• Physical responses may include increased heartbeat or breathing, sweaty palms,	
or knees get shaky, crying. (1.n)	
• Emotional responses may include feeling tense, nervous, or on edge. (1.n)	
• Sometimes stress occurs when facing difficult situations and the stress can last	
longer and leave a person feeling tired or overwhelmed. There are strategies to	
manage stress, but sometimes people need help to deal with difficult situations	
that lead to intense or lasting stress. (2.n)	
• Strategies and positive ways to manage stress can include physical activity, time	
management, communication, count to ten, think positive, relaxation and	
breathing exercises, mindfulness, break down larger problems into smaller	
problems, make time for hobbies, interests, and fun, eat a healthy diet, exercise,	
get enough sleep, positive self-talk (e.g., "I can do this"), and spend time with	

Essential Understandings	Essential Knowledge and Skills
people you enjoy. Talk with a parent, counselor, or friend. (2.n)	
Negative ways to manage stress may include overeating, drinking alcohol,	
smoking, yelling, acting out (with anger or violence), or using caffeine or	
drugs/pills. (2.n)	
Negotiation and refusal skills are part of problem solving that can help a person	
make and commit to healthy decisions.	
Refusal Skills (1.0)	
o Verbal	
 Say "no." There is no substitute for the word "no." It makes any refusal 	
stronger.	
 Repeat the refusal. 	
 Suggest an alternative (suggest something to do instead). 	
 Build the friendship (say something to let the person know you are their 	
friend and want to spend time with them). This is especially important	
because a major reason for ineffective refusals is not wanting to hurt the	
other person's feelings or make them mad.	
 Use a firm tone of voice. Be strong and business-like. 	
o Nonverbal	
 Direct eye contact (look the person in the face). 	
 Serious expression (use your best "I mean it" face). 	
 Hands-off hands (put your hands up in front of you when you refuse). 	
This is especially useful in situations involving physical pressure.	
 Leave (get out of the situation). 	
 Avoid situations where there may be pressure. 	
Negotiation skills (1.0)	
o State what you need.	
o Listen and clarify.	

Essential Understandings	Essential Knowledge and Skills
o Identify other perspectives.	
o Determine common ground.	
o Elicit an agreement.	
• Teens may engage in risky behaviors, not because they want to or do not know	
whether something is an unhealthy or unsafe choice, but because they do not	
know how to respond, are afraid of losing a friend, looking uncool, or of being	
left out. Practicing and using refusal and negotiation skills can help teens with	
peer pressure situations and help build confidence and strength. (2.0)	

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 8.1.p Describe characteristics of healthy and unhealthy relationships, including establishing and communicating boundaries.
- 8.2.p Explain the importance of developing relationships that are positive and promote wellness.
- 8.3.p Ability to develop safe, respectful, and responsible relationships.
- 8.1.q Describe the warning signs, risk factors, and protective factors for self-harm behaviors, depression, and suicide.
- 8.2.q Explain why mental health issues such as self-harm behaviors, depression, and suicidal ideation cannot be managed independently and require support/assistance.
- 8.3.q Identify and recognize family, school, and community resources for helping oneself and others with mental health needs.
- 8.1.r Identify factors that can influence mental health (e.g., family, environment, trauma, genetics, brain chemistry, health behaviors, nutrition, personal values, peers, media, technology, culture, community).
- 8.2.r Explain how negative perceptions of mental health promote a stigma about mental illnesses and emotional challenges.
- 8.3.r Explain the effects of stigma on accessing help and assistance for mental illnesses and emotional challenges.
- 8.1.s Identify and describe careers associated with mental health care (e.g., social worker, psychologist, psychiatrist).
- 8.2.s Describe the role of mental health professionals in schools (e.g., school counselors, psychologists, social workers).
- 8.3.s Promote the availability of school and community mental health resources.

Essential Understandings	Essential Knowledge and Skills	
Respect for oneself and others is a key characteristic of healthy relationships. In	In order to meet these standards, it is expected that	
contrast, in unhealthy relationships, one partner tries to exert control and power over	students will	
the other physically, sexually, and/or emotionally. (Characteristics of Healthy and &	explain the importance of healthy	
<u>Unhealthy Relationships</u>)	relationships, what contributes to healthy	
Healthy relationships share certain characteristics that include (note: characteristics	relationships, and signs that a relationship is	
apply to all relationships, not only dating relationships) (1.p):	unhealthy (1.p, 2.p, 3.p);	
o Mutual respect: Respect means that each person values who the other is and	demonstrate an understanding of the warning	
understands the other person's boundaries.	signs, risk factors, and protective factors for	

Essential Understandings

- o Trust: Partners should place trust in each other and give each other the benefit of the doubt.
- o Honesty: Honesty builds trust and strengthens the relationship.
- Compromise: In a dating relationship, each partner does not always get their way. Each should acknowledge different points of view and be willing to give and take.
- o Individuality: Neither partner should have to compromise who they are, nor their identity should not be based on a partner's. Each should continue seeing friends and doing the things they love. Each should be supportive of their partner wanting to pursue new hobbies or make new friends.
- o Good communication: Each partner should speak honestly and openly to avoid miscommunication. If one person needs to sort out their feelings first, the other partner should respect those wishes and wait until they are ready to talk.
- o Anger control: We all get angry, but how we express it can affect our relationships with others. Anger can be handled in healthy ways, such as taking a deep breath, counting to ten, or talking it out.
- Fighting fair: Everyone argues at some point, but those who are fair, stick to the subject, and avoid insults are more likely to come up with a possible solution.
 Partners should take a short break away from each other if the discussion gets too heated.
- o Problem solving: Dating partners can learn to solve problems and identify new solutions by breaking a problem into small parts or by talking through the situation.
- o Understanding: Each partner should take time to understand what the other might be feeling.
- o Self-confidence: When dating partners have confidence in themselves, it can help their relationships with others. It shows that they are calm and comfortable enough to allow others to express their opinions without forcing their own

Essential Knowledge and Skills

self-harm behaviors, depression, and suicide, how to help, resources for assistance, how to advocate for help and seeking help from peers (1.q, 2.q, 3.q);

Grade: Eight

- describe factors that influence mental health (1.r);
- explain stigma and how stigma creates barriers to mental health help and support (2.r, 3.r);
- describe roles of school-related mental health professionals (2.s);
- explore a mental health career, including a description of the career, the academic requirements (courses for background knowledge that can be taken in high school and higher education requirements), and work environments of the professionals (1.s, 3.s).

Health Smart Virginia

EVERFI

Essential Understandings	Essential Knowledge and Skills
opinions on them.	
o Being a role model: By embodying what respect means, partners can inspire	
each other, friends, and family to also behave in a respectful way.	
• Unhealthy relationships involve behaviors that are mean, disrespectful, controlling,	
exerting power over, intense jealousy, or are abusive (emotionally, verbally, or	
physically). (1.p)	
o Physical abuse (includes pinching, hitting, shoving, or kicking).	
o Emotional/verbal abuse: Involves threatening a partner or harming their sense	
of self-worth. Examples include name-calling, controlling/jealous behaviors,	
consistent monitoring, shaming, bullying (online, texting, and in person),	
intentional harassment, keeping them away from friends and family.	
• Setting and communicating personal boundaries may include physical closeness to	
another person (personal space), emotions and thoughts, time and energy, and	
things or possessions. Boundaries may be flexible depending on the people or	
situation. Boundaries should reflect basic rights of saying no, being treated with	
respect, making personal needs as important as others, being accepting of one's	
mistakes and failures, and not having to meet the unreasonable expectations of	
others. (1.p)	
 Boundaries are a personal choice and vary from one person to the next. 	
Communicate boundaries using "I" statements and assertive communication.	
o Example: I feel when because What I need is	
o Say "no." It is OK to say no without explanation.	
o Use features on tech devices such as setting a cut-off time for reading and	
answering texts. (1.p)	
 Positive social connections with people at all stages in life help ensure healthy 	
development, physically, socially, and emotionally .Healthy relationships boost	
happiness, increase a sense of belonging and purpose, reduce stress, help to cope	
with challenges, and improve self-confidence, self-image, and self-worth. Research	

Essential Understandings	Essential Knowledge and Skills
has shown that people with social supports are happier, have fewer health problems,	
and live longer. (2.p)	
Social skills that help develop healthy relationships include communication (verbal)	
and nonverbal), listening, empathy, cooperation, express feelings in a positive way,	
negotiation, and compromise. (3.p)	
Help and resources are available for people with mental health issues and challenges.	
Talk with a parent or other adult you trust if you or someone you know needs help with	
a mental health issue or challenge. (1.q)	
Self-harm or self-injury means hurting yourself on purpose. One common method	
is cutting with a sharp object. Any time someone deliberately hurts themselves is	
classified as self-harm. Some people feel an impulse to cause burns, pull out hair or	
pick at wounds to prevent healing. Self-harm also causes feelings of shame. The	
scars caused by frequent cutting or burning can be permanent. Drinking alcohol or	
doing drugs while hurting yourself increases the risk of a more severe injury than	
intended.	
o Self-harm is not a mental illness but a behavior that indicates a need for better	
coping skills. Several illnesses are associated with it, including borderline	
personality disorder, depression, eating disorders, anxiety, or posttraumatic	
stress disorder. Self-harm occurs most often during the teenage and young adult	
years, though it can also happen later in life. Those at the most risk are people	
who have experienced trauma, neglect, or abuse.	
o Self-harm isn't the same as attempting suicide. However, it is a symptom of	
emotional pain that should be taken seriously. If someone is hurting themselves,	
they may be at an increased risk of feeling suicidal. It's important to find	
treatment for the underlying emotions. (<u>Self-harm</u>)	
• <u>Depression</u> : A common but serious mood disorder; a medical illness. It causes	
severe symptoms that affect how you feel, think, and handle daily activities, such as	

Essential Understandings	Essential Knowledge and Skills
sleeping, eating, or working. To be diagnosed with depression, the symptoms must	
be present for most of the day, nearly every day, for at least two weeks. Not	
everyone who is depressed experiences every symptom. Some people experience	
only a few symptoms, while others may experience many. Signs and symptoms of	
depression:	
o Persistent sad, anxious, or "empty" mood.	
o Feelings of hopelessness, pessimism, guilt, worthlessness, or helplessness.	
 Loss of interest or pleasure in hobbies and activities. 	
o Decreased energy or fatigue.	
o Difficulty concentrating, remembering, or making decisions.	
o Difficulty sleeping, early-morning awakening, or oversleeping.	
o Appetite and/or weight changes.	
o Thoughts of death or suicide, or suicide attempts.	
 Risk factors for depression: Depression is one of the most common mental 	
disorders in the United States. Current research suggests that depression is caused	
by a combination of genetic, biological, environmental, and psychological factors.	
Depression can happen at any age. Risk factors (1.q):	
o Personal or family history of depression.	
o Major life changes, trauma, or stress.	
o Certain physical illnesses and medications.	
• Suicide (Suicide Prevention): Extreme depression can lead a child to think about	
suicide or plan for suicide. For 10- to 24-year-olds, suicide is among the leading	
causes of death. The behaviors listed below may be signs that someone is thinking	
about suicide. (1.q)	
o Talking about wanting to die or wanting to kill themselves.	
o Talking about feeling empty, hopeless, or having no reason to live.	
o Making a plan or looking for a way to kill themselves, such as searching for	
lethal methods online, stockpiling pills, or buying a gun.	

Essential Understandings	Essential Knowledge and Skills
o Talking about great guilt or shame.	
o Talking about feeling trapped or feeling that there are no solutions.	
o Feeling unbearable pain (emotional pain or physical pain).	
o Talking about being a burden to others.	
o Using alcohol or drugs more often.	
o Withdrawing from family and friends.	
o Changing eating and/or sleeping habits.	
o Talking or thinking about death often.	
o Giving away important possessions.	
o Saying goodbye to friends and family.	
o Putting affairs in order, making a will.	
• Risk factors for suicide: Suicide does not discriminate. People of all genders, ages,	
and ethnicities can be at risk. Suicidal behavior is complex, and there is no single	
cause. Many different factors contribute to someone making a suicide attempt. But	
people most at risk tend to share specific characteristics. Many people have some	
risk factors but do not attempt suicide. It is important to note that suicide is not a	
normal response to stress. Suicidal thoughts or actions are a sign of extreme	
distress, not a harmless bid for attention, and should not be ignored. Suicide is	
complex. Treatments and therapies for people with suicidal thoughts or actions will	
vary with age, gender, physical and mental well-being, and with individual	
experiences. The main risk factors for suicide (1.q):	
o Depression, other mental health disorders, or substance use disorder.	
o Certain medical conditions.	
o Chronic pain.	
o A prior suicide attempt.	
o Family history of a mental health disorder, substance abuse, or suicide.	
o Family violence, including physical or sexual abuse.	
o Having guns or other firearms in the home.	

Essential Understandings	Essential Knowledge and Skills
o Being exposed to others' suicidal behavior, such as that of family members, peers, or celebrities.	
 Stressful events, such as relationship problems, financial difficulties, or public humiliation. 	
• Protective factors for suicide (<u>National Strategy for Suicide Prevention U.S.</u>	
Surgeon General).	
 Factors that make it less likely that individuals will develop a disorder. Protective factors may encompass biological, psychological, or social factors. Individual: Coping and problem-solving skills; reasons for living; moral objection to suicide. Relationship: Connectedness to individuals, family, community, and social institutions; supportive relationships with health care providers. Community: Safe and supportive school and community environments; sources of continued care. Societal: Availability of physical and mental health care; restrictions on 	
lethal means of suicide. (1.q)	
• Help for mental health issues (2.q).	
o Self-injury comes with many risks. For example, cutting can lead to infections, scars, and even death. Sharing tools for cutting puts a person at risk of diseases like HIV and hepatitis (sharing tools of an infected person). Also, once a person starts self-injuring, it may be hard to stop. Teens who continuously hurt themselves are less likely to learn how to deal with their feelings in healthy ways. People who display self-harming behaviors may have mental health disorders that are treatable.	
o Depression is a medical illness that needs treatment and support. Thoughts of suicide/suicide ideation also need treatment and support.	
o Talk with a parent or other adult you trust if you or someone you know needs help with a mental health issue or challenge. The first step to treatment is to talk	

Essential Understandings	Essential Knowledge and Skills
with a health care provider, such as primary care provider or a mental health	
specialist, about getting an evaluation. It is important to get a careful evaluation	
to get the best diagnosis, treatment, and support.	
Resources for mental health issues: Often, family and friends are the first to	
recognize the warning signs of suicide and can be the first step toward helping an	
at-risk individual find treatment with someone who specializes in diagnosing and	
treating mental health conditions. Resources are available on NIMH's Find Help for	
Mental Illnesses webpage. Students can talk to parents/guardians, a school	
counselor, a school psychologist, a school social worker, a school nurse, a health	
care provider, specialized therapists, and the local Community Services Board.	
(3.Q)	
Mental health is an important part of overall health for children and adolescents. Stigma	
continues to be a significant barrier to mental health treatment for children and their	
families.	
• Mental health includes our emotional, psychological, and social well-being. It	
affects how we think, feel, and act as we cope with life. It also helps determine how	
we handle stress, relate to others, and make choices. Mental health is important at	
every stage of life, from childhood and adolescence through adulthood and aging.	
• Factors that can influence mental health include family, environment, trauma,	
genetics, brain chemistry, health behaviors, nutrition, personal values, peers, media,	
technology, culture, and community. (1.r)	
• To improve mental health:	
o Exercise regularly.	
o Maintain healthy relationships.	
o Practice gratitude.	
o Take care of your physical health (be physically active, enough sleep, healthy	
eating, stop consuming caffeine, quit smoking).	

Essential Understandings	Essential Knowledge and Skills
o Develop a sense of meaning and purpose in life (career, volunteering, learning	
new skills, exploring spirituality).	
o Develop coping skills.	
o Set goals to stay positive.	
o Practice meditation and other relaxation techniques.	
Stigma is defined as a mark of shame or discredit. Negative attitudes and beliefs	
toward people who have a mental health condition are common. Stigma is usually	
based on a lack of understanding rather than information based on facts. (2.r, 3.r)	
o People are twice as likely today than they were in 1950 to believe that mentally	
ill people tend to be violent.	
o One in four adults has a diagnosable mental illness, according to the National	
Institute of Mental Health. That's about 76 million Americans who live with the	
fear that others may find out about their disorder and think less of them or even	
keep them from getting jobs or promotions. People with mental illness or	
emotional challenges often avoid treatment due to the all-too-reasonable worry	
they'll be found out and discriminated against.	
o People with mental illness often internalize society's beliefs about them—that	
they are incompetent, irrational and untrustworthy—and that can lead to distress	
that's sometimes worse than the mental illness itself.	
o People fear that those with mental illness are violent. The vast majority of	
people with mental illness are not violent—though they are 2.5 times more	
likely to be victims of violence than members of the general population.	
o Stigma can also keep people from taking their medications.	
Mental health professionals help children, adolescents, and adults deal with life stresses	
and problems, including addiction/substance abuse; problems with self-esteem; aging-	
related mental health issues; family, parenting or marital problems; grief, anger or	
depression; and other emotional or behavioral issues. (1.s)	

Essential Understandings	Essential Knowledge and Skills
Social worker: Helps people solve and cope with problems in their everyday lives	
and diagnose and treat mental, behavioral, and emotional issues. A social worker	
can work in a variety of settings, including mental health clinics, schools, hospitals,	
and private practices.	
Psychologist: Some psychologists work independently, doing research or working	
only with patients or clients. Others work as part of a health care team,	
collaborating with physicians, social workers, and others to treat illness and	
promote overall wellness. (Psychologists have a doctorate in psychology.)	
Psychiatrist: A medical specialty (trained as physicians) that involves the treatment	
of mental disorders. Psychiatrists are physicians who evaluate, diagnose, and treat	
patients who are affected by a temporary or chronic mental health problem.	
Counselor: Provides mental health and substance abuse care; treats a wide	
assortment of mental, behavioral, and emotional problems and disorders.	
Counselors may work in schools, community health centers and agencies, or in	
private practices. (Professional counselors have a master's degree.)	
Psychiatric nurse: Treats patients diagnosed with mental illnesses.	
Mental health professionals in schools (2.s)	
o School counselors: Support student success by providing academic, college and	
career, and personal and social counseling.	
o School psychologists: Help students foster social skills, address mental health	
concerns, and enhance self-regulation skills. School psychologists collaborate	
with families, teachers, counselors, administrators, community agencies, and	
private providers.	
o School social workers: Provide individual and group counseling to empower	
students with the skills to develop social-emotional competencies, foster	
resiliency, and cope with crisis situations and conflicts. Social workers also	
serve as a liaison between home, school, and community, linking students and	
families to community resources.	

Essential Understandings	Essential Knowledge and Skills
Teacher note: Reminder that all school personnel are mandated reporters. Child abuse	
and recognition training is required for initial licensure and renewals; training and	
resources are available at the Virginia Department of Education.	

Strand: Violence Prevention

Standards:

- 8.1.t Differentiate between bullying behaviors, arguments, peer conflict, harassment, teasing, taunting, and joking situations.
- 8.2.t Explain the effects of bullying on individuals, including vulnerable populations.
- 8.3.t Recommend strategies to prevent, safely defend oneself and others, or get help with bullying.
- 8.1.u Identify the consequences of weapon use, physical violence, and gang involvement.
- 8.2.u Analyze the risks associated with weapon use, physical violence, and gang-related activities for oneself, the family, and the community.
- 8.3.u Describe ways for students to develop relationships that are positive, promote wellness, and prevent weapon use, physical violence, and gang involvement.

Essential Understandings

Treat others with respect. Not everyone welcomes teasing or joking. Intentions are not always clear to the people involved or to those who see the activity.

- Bullying behaviors: Bullying is unwanted, aggressive behavior that involves a real or perceived power imbalance. The behavior is repeated, or has the potential to be repeated, over time. Bullying includes actions such as making threats, spreading rumors, attacking someone physically or verbally, and excluding someone from a group on purpose. (1.t)
- Cyberbullying is bullying that takes place over digital devices like smartphones, computers, and tablets. Cyberbullying can occur through Short Message Service (SMS), text, and apps, or online in social media, forums, or gaming where people can view, participate in, or share content. Cyberbullying includes sending, posting, or sharing negative, harmful, false, or mean content about someone else. It can include sharing personal or private information about someone else, causing embarrassment or humiliation. Some cyberbullying crosses the line into unlawful or criminal behavior. (1.t)
- Peer conflict: It is not bullying when two kids with no perceived power imbalance

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- analyze behaviors and situations to determine whether they involve bullying/cyberbullying, arguments, peer conflict, harassment, teasing, taunting, and/or joking; include possible effects of the behaviors (1.t);
- advocate for bullying prevention, strategies to support self or others who are bullied, how to get help, and include the importance of protecting vulnerable populations (2.t, 3.t);
- research Virginia rules, cite and

Essential Understandings

fight, have an argument, or disagree. (1.t)

- Harassment: Although bullying and harassment sometimes overlap, not all bullying is harassment, and not all harassment is bullying. Under federal civil rights laws, harassment is unwelcome conduct based on a protected class (race, national origin, color, sex, age, disability, religion) that is severe, pervasive, or persistent and creates a hostile environment. (1.t)
 - o Disability/racial/sexual harassment is "intimidation or abusive behavior toward a student based on disability/race/sex that creates a hostile environment by interfering with or denying a student's participation in or receipt of benefits, services, or opportunities in the institution's program (e.g., school)." <u>Health Smart</u> Virginia
- Teasing and taunting can be considered bullying behaviors. (1.t)
 - o Teasing: To laugh at and criticize (someone) in a way that is friendly and playful or cruel and unkind.
 - o Taunting: To say insulting things to (someone) in order to make that person angry.
- Joking: Something said or done to cause laughter. (1.t)
- Effects of bullying. Kids who are bullied are more likely to have (2.t):
 - o Depression and anxiety: Signs of these include increased feelings of sadness and loneliness, changes in sleep and eating patterns, and loss of interest in activities they used to enjoy. These issues may persist into adulthood.
 - o Health complaints.
 - o Decreased academic achievement and school participation. They are more likely to miss, skip, or drop out of school.
- Children with physical, developmental, intellectual, emotional, and sensory disabilities are more likely to be bullied than their peers. Any number of factors—physical vulnerability, social skill challenges, or intolerant environments—may increase their risk. Research suggests that some children with disabilities may bully others as well. Kids with special health needs, such as epilepsy or food allergies, may also be at

Essential Knowledge and Skills

present findings about the consequences of teens and violence and gang involvement (1.u, 2.u);

Grade: Eight

• promote positive and healthy relationships, activities, and school climates to promote wellness and prevent weapon use, physical violence, and gang involvement (3.u).

Additional resources:

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
higher risk of being bullied. For kids with special health needs, bullying can include	
making fun of kids because of their allergies or exposing them to the things they are	
allergic to. In these cases, bullying is not just serious; it can mean life or death. (2.t)	
• Bullying prevention: Understand what bullying is and the roles children can play (kids	
who bully, kids who are bullied, and kids who witness bullying). Promote norms that	
bullying is unacceptable. (3.t)	
• Safely standing up to bullying: Speak up and tell an adult; support the student being	
bullied; intervene if safe to do so (3.t).	
 Question the bullying behavior. Simple things like changing the subject or 	
questioning the behavior can shift the focus.	
 Use humor to say something funny and redirect the conversation. 	
o There is strength in numbers, too! Bystanders can intervene as a group to show	
there are several people who don't agree with the bullying.	
o Walk with the person who is the target of bullying to help diffuse potential	
bullying interactions.	
o Reach out privately to check in with the person who was bullied to let them know	
you do not agree with it and that you care. It makes a difference.	
• Reporting bullying: Speak up. Report bullying to a parent/guardian, school staff, or	
other trusted adult. (3.t)	
• Note: Teachers should review school-specific reporting for bullying, harassment, and	
other unwanted behaviors.	
Compared to non-gang members, gang members commit a disproportionate amount of	
violent crimes and offenses across the country. Gangs and gang involvement result in	
short- and long-term negative outcomes for gang-involved youth, their friends and	
families, and the surrounding communities. (Gang Involvement Prevention)	
• A weapon is something (such as a club, knife, or gun) used to injure, defeat, or	
destroy. Weapon use and physical violence can lead to injury of self and others, death,	

Essential Understandings	Essential Knowledge and Skills
result in school suspension/expulsion, arrest, and legal actions. (1.u)	
• Gang members cut ties to other important social groups and organizations, such as	
family, friends, schools, and religious community, to focus more intensively on gang	
participation and identity, leading to higher levels of delinquency. Gang involvement	
can have long-term effects, including increased participation in crime, school	
problems, decreased employment prospects, exposure/involvement with drug and	
alcohol use/abuse and sales, and increased risk of victimization. Long-term gang	
membership is associated with an escalating succession of effects, such as dropping	
out of school, an increased risk of teen fatherhood/pregnancy, and lack of employment	
success, arrests, being stopped by police, living under the threat of victimization,	
involvement with the criminal justice system, negative contacts with law enforcement,	
and victimization by other gang members (including physical violence and weapon	
use leading to injury and death). (1.u)	
Gang membership can lead to the recruitment of family members (siblings) and	
violence against family members. Gangs affect communities by instilling fear through	
intimidation, vandalism, graffiti, drug sales, intimidation of witnesses to gang	
activity/violence, getting caught in gang crossfire, trafficking, and gang-related	
homicides. Fear is higher where gangs are more prevalent and dangerous. (1.u)	
• Protective factors for gang involvement include self-esteem, educational aspirations,	
positive and healthy relationships with friends and family, parental supervision, school	
achievement, bonding to school, and a positive school climate. (3.u)	
Note: Teachers may wish to review healthy and unhealthy relationships from the Mental	
Wellness/Social and Emotional Skills topic.	

Strand: Community/Environmental Health

Standards:

- 8.1.v Define and describe renewable resources and sustainable energy.
- 8.2.v Explain how humans and the environment are interdependent.
- 8.3.v Analyze opportunities for community service and advocacy for policies that promote environmental health.

Essential Understandings

Humans influence their environment through their habits, actions, and choices.

- Renewable resources are energy sources that cannot be depleted and are able to supply a continuous source of clean energy. Renewable resources include biomass energy (e.g., ethanol), hydropower (e.g., hydroelectric power), geothermal power, wind energy, and solar energy. (1.v)
- Sustainable energy is produced using the sun, wind, heat of the earth, water, or from crops, rather than using fuels such as oil or coal which cannot be replaced.(1.v)
- Humans depend on Earth's land, ocean, atmosphere, and biosphere (organisms, forms of life [e.g., plants, animals]) for food, water, and air to breathe. Humans pollute water with trash and contaminants, harming aquatic creatures; introduce invasive species which may have no natural predators; and use dangerous pesticides which can have unexpected consequences further up the food chain. By disrupting the plants and animals, [humans] also affect the larger ecosystems. (2.v)
- Community service opportunities for environmental health may include watershed projects, reduce/reuse/recycle, waste disposal, cleanup days for school or community, water quality, water conservation, and clean air. (3.v)
- Policy advocacy may begin with review of school's or school division's environmental health policies. (3.v)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Eight

- define and identify types of renewable resources and sustainable energy (1.v);
- explain the relationship between the environment and human health (2.v);
- explore and share community service projects and policy advocacy opportunities to promote environmental health (3.v).

stimulate or suppress hormone secretion from the pituitary gland.	
o Pituitary gland: Located at the base of the brain. The anterior lobe	Additional resources:
regulates the thyroid, adrenal, and reproductive glands. The posterior	Health Smart Virginia
lobe helps control water balance in the body and produces oxytocin,	<u>EVERFI</u>
which is important in childbirth, and it secretes endorphins to reduce the	
perception of pain.	
o Pineal body: Located in the middle of the brain, it secretes melatonin	
that helps regulate when to sleep and wake.	
o Thyroid gland: Located in the front part of the lower neck. It secretes	
hormones that control the rate at which cells burn fuel from food to	
produce energy, and these hormones aid in bone growth and	
development and brain and nervous system development.	
o Parathyroid glands: Attached to the thyroid. These glands secrete a	
hormone to regulate level of calcium in the blood.	

Essential Understandings	Essential Knowledge and Skills
o Adrenal glands: Sit on top of each kidney. The outer part, called the	
adrenal cortex, produces hormones to regulate salt and water balance,	
the body's response to stress, metabolism, immune system, and sexual	
development and function. The inner part, called the adrenal medulla,	
produces catecholamines such as epinephrine.	
o Reproductive glands (ovaries and testes): Secrete androgens including	
testosterone in males and estrogen and progesterone in females;	
hormones control growth and changes that occur during puberty;	
estrogen and progesterone are involved in the regulation of the	
menstrual cycle and play a role in pregnancy.	
o Pancreas: Located deep in the abdomen. It is also associated with the	
digestive system. The pancreas secretes insulin and glucagon that work	
together to maintain steady level of glucose in the blood and keep body	
supplied with fuel.	
Too little or too much of a hormone can be harmful to the body. Many	
problems affecting the endocrine system are treatable. Doctors can often	
treat imbalanced hormones with medications to replace hormones or by	
controlling the production of hormones. (2.a)	
• Endocrine problems that may affect teens (2.a):	
o Adrenal insufficiency.	
o Diabetes (type 1 or type 2).	
o Growth hormone problems.	
o Hyperthyroidism.	
o Hypothyroidism.	
o Precocious puberty (early puberty, when signs of puberty start before	
age seven or eight in girls and age nine for boys).	
• To keep endocrine system healthy (3.a):	
o Get plenty of exercise.	

Grade: Nine

Essen	tial Understandings	Essential Knowledge and Skills
0	Eat a nutritious diet.	
О	Go for regular medical checkups.	
О	Talk to the doctor before taking any supplements or herbal treatments.

Essential Understandings

keeping bones, muscles, heart, and brain working properly. The Dietary Guidelines for Americans 2020-2025 recommends that people should aim to meet their nutrient requirements through a healthy eating pattern that includes nutrient-dense forms of foods. (Vitamins and Minerals) (1.b)

- Multivitamins/multi-minerals are the most frequently used dietary supplements, with close to half of American adults taking them. Multivitamins/multi-minerals cannot take the place of eating a variety of foods that are important to a healthy diet. Foods provide more than vitamins and minerals. Many foods also have fiber and other substances that can provide health benefits. However, some people who do not get enough vitamins and minerals from food alone, or who have certain medical conditions, might benefit from taking one or more of these nutrients found in single-nutrient supplements or in multivitamins/multi-minerals. However, evidence to support their use for overall health or disease prevention in the general population remains limited. (Vitamins and Minerals) (1.b)
- Taking multivitamins/multi-minerals increases overall nutrient intake and helps some people get the recommended amounts of vitamins and minerals when they cannot or do not get them from food alone. Taking multivitamins/multi-minerals can also raise the chances of getting too much of some nutrients, like iron, vitamin A, zinc, niacin, and folate/folic acid, especially when a person takes more than a basic, once-daily product that provides 100 percent of the daily value (DV) of nutrients. (Vitamins and Minerals) (1.b)
- Each vitamin has a specific job. A person with low levels of certain vitamins may develop health problems. For example, if a person does not get enough vitamin C, they could become anemic. Some vitamins may help prevent medical problems. Vitamin A prevents night blindness. Additional information on vitamins is available at NIH Office of Dietary Supplements.

Essential Knowledge and Skills

raised, "lite," low-fat, and fat-free foods (1.c);

Grade: Nine

- research community resources for locally grown foods and farm-to-table restaurants (2.c);
- for a selected career related to healthy food choices, identify the type or work, academics/course work that support that profession, work settings (office, outdoors, laboratories), and earning potential (3.c).

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
(1.b)	
The best way to get enough vitamins is to eat a balanced diet with a variety	
of foods. In some cases, people may need to take vitamin supplements. It's a	
good idea to ask a health care provider first. High doses of some vitamins	
can cause problems. (1.b)	
Dietary reference intakes (DRIs): Represent the most current scientific	
knowledge on the nutrient needs of healthy populations. Individual	
requirements may be higher or lower than the DRIs. DRI charts can be	
found on NIH site Office of Dietary Supplements. (2.b)	
SMART goals are specific, measurable, attainable, relevant and timely.	
(3.b)	
Food labeling should be carefully read prior to making healthy food choice	
decisions.	
Organic: Organic products are managed according to defined processes for	
planting, growing, raising, and handling. For example, the USDA organic	
label on dairy or meat products means that the animals from which it	
originated were raised in living conditions that accommodated their natural	
behaviors, without being administered hormones or antibiotics, and while	
grazing on pasture grown on healthy soil. Then during processing, the meat	
or dairy product was handled in a facility that was inspected by an organic	
certifier and processed without any artificial colors, preservatives, or flavors	
before being packaged to avoid contact with any prohibited, nonorganic	
substances. (<u>USDA Organic 101</u>) (1.c)	
Fresh: Suggests or implies that the food is unprocessed, means that the food	
is in its raw state and has not been frozen or subjected to any form of	
thermal processing or any other form of preservation. (1.c)	
Natural: According to the USDA definition, food labeled "natural" does not	

Essential Understandings	Essential Knowledge and Skills
contain artificial ingredients or preservatives and the ingredients are only	
minimally processed. However, they may contain antibiotics, growth	
hormones, and other similar chemicals. Regulations are fairly lenient for	
foods labeled "natural." (1.c)	
Farm-raised: Fish are commercially raised in controlled pens that exist	
within lakes, oceans, or rivers, and in large tanks. (1.c)	
• Lite or light: Can mean lower in calories, fat, or sodium. If less than 50	
percent of the calories in the food are from fat, it can mean that a food has	
been changed so it contains one-third fewer calories or no more than half the	
fat of the regular version of this food. (1.c)	
• Low-fat: For every 100 calories, if the product has three grams of fat or less,	
it's a low-fat product. This means 30 percent or less of the calories come	
from fat. (1.c)	
Fat-free foods: "Free" means that a product does not have any of that	
nutrient, or so little that it's unlikely to make any difference to your body.	
o For example, "calorie-free" means less than five calories per serving.	
"Sugar-free" and "fat-free" both mean less than 0.5 g (grams) per	
serving. (1.c)	
Community resources for purchasing locally grown/sourced foods include	
farmers markets and farm-to-table restaurants. (2.c)	
Careers associated with healthy food choices include dietetics, nutritionists, food	
production, food safety, culinary arts, and restaurant ownership. Agriculture careers	
include farmers, farm workers, equipment operators, food packers and packagers,	
business (bookkeeping, accounting, auditing), food scientists, and environmental	
scientists. (3.c)	

Strand: Physical Health Standards:

- 9.1.d Describe the prevalence, causes, and long-term consequences of unhealthy eating, sleep deprivation, extended screen time, and a sedentary lifestyle.
- 9.2.d Explain the physical, mental, and academic benefits of proper nutrition, sleep and rest, physical activity, maintaining a healthy body weight, and other personal wellness behaviors.
- 9.3.d Design a wellness plan for physical activity, sleep, rest, and nutrition to meet current health goals.

Essential Understandings

Unhealthy eating, sleep deprivation, and a sedentary lifestyle can contribute to the development of chronic disease, feeling tired or lethargic, obesity and obesity-related disease, cancers, depression, and osteoporosis.

- Unhealthy eating: Fewer than one in ten adults and adolescents eat enough fruits and vegetables, and nine in ten Americans aged two years or older consume more than the recommended amount of sodium. Six in ten young people and five in ten adults consume at least one sugary drink on a given day. In the United States, 19 percent of young people aged two to 19 and 40 percent of adults have obesity, which can put them at risk for heart disease, type 2 diabetes, and some cancers. Consuming too much sodium can increase blood pressure and the risk for heart disease and stroke.

 Overweight and obesity are associated with at least 13 types of cancer.

 (CDC Poor Nutrition) (1.d)
- Sleep deprivation is not getting enough sleep (less than eight to ten hours per night). An NHLBI (National Heart Lung and Blood Institute) funded study found that more than 70 percent of high school students in the United States get less than eight hours of sleep per night, falling short of the eight to ten hours they required for optimal health. When someone is in a chronic sleep-restricted state, they will notice excessive daytime sleepiness, fatigue, clumsiness, and weight gain or weight loss. In addition, being sleep-

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- explain concerns for unhealthy eating, sleep deprivation, extended screen time, and sedentary lifestyle (1.d);
- promote the benefits of proper nutrition, sleep and rest, physical activity, maintaining a healthy body weight, and other personal wellness behaviors (2.d);
- assess current wellness related to proper nutrition, sleep and rest, physical activity, maintaining a healthy body weight, and other personal wellness behaviors, and develop a wellness plan with SMART goals, action steps, monitoring, and reflection to maintain or improve (3.d).

Essential Understandings	Essential Knowledge and Skills
deprived affects the brain and cognitive function. Effects may include	
accidents from a lack of attention, moodiness, and hunger. (1.d)	Additional resources: <u>Health Smart</u>
• Extended screen time can negatively affect sleep, mental, emotional, and	<u>Virginia</u>
social health, physical health (posture, lack of physical activity, affect	<u>EVERFI</u>
vision, lead to weight gain, increased risk of diabetes and heart disease);	
much is unknown about long-term effects of screen time on health. (1.d)	
 Sedentary lifestyle: Children and adolescents spend an average of six to 	
eight hours per day, respectively, in sedentary behaviors, during and outside	
school. Older children and teens are more likely to spend more time in	
sedentary behaviors and to exceed recommended limits on sedentary time	
than younger children. According to data, there seems to be a sharper-than-	
expected decline of physical activity during childhood—starting in	
elementary school and continuing through middle school and high school.	
By age 19, the average American is as sedentary as a 60-year-old. (1.d)	
 Proper nutrition: Proper nutrition provides vitamins and minerals to support 	
the immune system, support normal growth and development, and help cells	
and organs to function. It helps with reaching and maintaining a healthy	
weight (as does physical activity), reduces the risk of chronic diseases (like	
heart disease and cancer), and promotes overall health. Risk factors for adult	
chronic diseases, like high blood pressure and type 2 diabetes, are	
increasingly seen in younger ages, often a result of unhealthy eating habits	
and increased weight gain. Dietary habits established in childhood often	
carry into adulthood. (2.d)	
 Physical activity improves brain health (improves thinking, cognition, 	
learning), weight management, reduces disease (heart disease, type 2	
diabetes, and some cancers), strengthens bones and muscles, and improves	
the ability to do everyday activities. Better sleep and physical activity can	
reduce the risk of depression and anxiety and reduce stress. Improvements	

Essential Understandings	Essential Knowledge and Skills
are seen in components of executive function, including the ability to plan	
and organize; monitor, inhibit, or facilitate behaviors; initiate tasks; and	
control emotions. Physical activity increases self-esteem and self-	
confidence. (CDC Physical Activity Why It Matters) (2.d)	
Sleep is required for survival, is important for normal motor and cognitive	
function, gives the body rest, helps thinking, feeling good (mood), helps	
with energy, and helps children do better in school. (2.d)	
Healthy body weight: Body weight is the weight of all body tissues	
combined. Body composition is the proportion of fat and lean tissue mass in	
the body and is measured using BMI or body fat percentage. Body	
composition in the healthy range is correlated to a lower risk of diabetes,	
high blood pressure, and some cancers. When body composition is too low,	
it can affect the delivery of vitamins to the organs, reproductive function,	
and general well-being. (2.d)	
Planning for physical activity and wellness can help improve and maintain	
health. (3.d)	
o Guidelines for sleep are 9-10 hours per night for teens.	
o Limit foods high in solid fats, added sugars, and salt. Most food intake	
should be from vegetables, fruits, whole grains, low-fat dairy products,	
and lean proteins.	
o Children and teens need 60 minutes of physical activity per day.	
Physical activity for children and teens should include aerobic, muscle	
strengthening, and bone strengthening activities.	

Health Education Curriculum Frameworks for Instruction

Grade Nine

Grade: Nine

Strand: Disease Prevention/Health Promotion

Standards:

- 9.1.e Identify common types of chronic disease including diabetes, heart disease, cancer, obesity, and stroke.
- 9.2.e Identify behaviors that contribute to heart disease, stroke, diabetes, cancer, obesity, and other chronic diseases and conditions.
- 9.3.e Assess personal risk factors for diabetes, heart disease, cancer, obesity, and stroke, and develop personal prevention strategies.
- 9.1.f Define herd immunity and explain how immunizations can prevent the spread of diseases.
- 9.2.f Understand the difference between an epidemic and a pandemic and how they affect populations.
- 9.3.f Analyze data on the spread of diseases and develop personal prevention strategies based on information analyzed.
- 9.1.g Describe the importance of health habits that promote vision, hearing, and dental health.
- 9.2.g Determine strategies to protect vision, hearing, and dental health.
- 9.3.g Promote vision, hearing, and dental health.

Essential Understandings	Essential Knowledge and Skills
Noncommunicable diseases/chronic diseases are not contagious, and many	In order to meet these standards, it is
develop from unhealthy lifestyle choices over time or may be inherited. Healthy	expected that students will

Essential Understandings

insulin properly, and this called insulin resistance. When glucose does not get into the body's cells, blood sugar levels get too high, making people sick without treatment. Someone with type 1 diabetes has to take insulin. Someone with type 2 diabetes has to be careful to eat a healthy diet, get regular physical activity, maintain a healthy weight, monitor their blood sugar on a regular basis, and have regular checkups with a health care provider. They may also have to take insulin. (1.e, 2.e)

- o Maintaining a healthy weight, eating well, and getting regular physical activity can help you manage type 2 diabetes.
- Risk factors for type 2 diabetes include age, family history of diabetes, obesity, history of gestational diabetes, inactivity, and race/ethnicity. African Americans, Hispanic/Latino Americans, American Indians, and some Asian Americans and Pacific Islanders are at higher risk.
- Risk factors for type 1 diabetes include autoimmune, genetic, and environmental factors.
- Heart Disease: Includes hardening of the arteries, chest pain, and heart attacks. (1.e, 2.e)
 - o Causes: Heart disease isn't contagious (communicable). Risk factors such as smoking, high blood pressure, and physical inactivity increase a person's chances of getting cardiovascular disease.
 - o Prevention: Risk factors that cannot be controlled are age and family history (genetics). Risk factors that can be controlled include smoking, having high blood pressure, being overweight, and not exercising.
- Cancer: There are more than 100 types of diseases known collectively as cancer. Cancer results from an overgrowth of cells, tiny units that make up all living things. Cancer (malignancy) occurs when cells begin to grow and multiply in an uncontrolled way. These cells gather to form tumors. Tumors are growths that can interfere with the body's normal processes. Scientists and researchers are working to

Essential Knowledge and Skills

plan in physical health topic) (3.e);

Grade: Nine

- explain epidemic and pandemic (2.f);
- analyze data on the spread of diseases, including the effect of immunizations (as available) and herd/community immunity (1.f. 2.f):
- apply knowledge of importance of health habits and protective strategies to promote vision, hearing, and dental health (1.g, 2.g, 3.g).

Additional resources:

Health Smart Virginia **EVERFI**

Essential Understandings	Essential Knowledge and Skills
discover why some people get cancer and others do not. Currently, the main reasons	
are genetics/inherited and certain environmental or behavioral triggers. Some	
behavioral and environmental triggers include cigarettes (increase the risk of lung	
cancer) and too much exposure to the sun (increase the risk of skin cancer). These	
types of triggers act on the body slowly over time, so the cancers that may result	
from them will not show up until a person is an adult. Cancer screening can result in	
earlier detection, which increases the likelihood of effective treatment and cure.	
o Common cancers include non-melanoma, bladder, breast, colon and rectal,	
endometrial, kidney, leukemia, lung, melanoma, non-Hodgkin lymphoma,	
pancreatic, prostate, and thyroid.	
o Common risk factors for different cancers include smoking, obesity, unhealthy	
diet, genetic factors, and age. Specific types of cancer may have additional or	
different risk factors. Healthy choices begin early in life. Common prevention	
strategies include a healthy diet, regular physical activity, taking medications to	
treat precancerous conditions, and avoiding known carcinogens. (1.e, 2.e)	
• Obesity: Well above the normal or healthy weight for a person's age and	
height. Causes of excess weight gain in young people are similar to those in	
adults, including factors such as a person's behavior and genetics. Behaviors	
that influence excess weight gain include eating high-calorie, low-nutrient	
foods and beverages, not getting enough physical activity, sedentary	
activities such as watching television or other screen time on devices,	
medication use, and sleep routines. Consuming a healthy diet and being	
physically active can help children grow as well as maintain a healthy weight	
throughout childhood. Balancing energy or calories consumed from foods	
and beverages with the calories burned through activity plays a role in	
preventing excess weight gain. In addition, eating healthy and being	
physically active helps to prevent chronic diseases such as type 2 diabetes,	
cancer, and heart disease. (1.e, 2.e)	

Essential Understandings	Essential Knowledge and Skills
<u>Stroke</u> : Occurs when something blocks the blood supply to part of the brain	
or when a blood vessel in the brain bursts (aneurysm). If something happens	
to block the flow of blood, brain cells start to die within minutes because	
they can't get oxygen. A stroke can cause lasting brain damage, long-term	
disability, or even death. Anyone can have a stroke at any age. (1.e, 2.e)	
o Risks for stroke: unhealthy diet, physical inactivity, obesity, too much	
alcohol, tobacco use, genetics and family history, age, sex (gender-men	
are more likely than women to have a stroke), race or ethnicity, previous	
stroke, high blood pressure, high cholesterol, heart disease, diabetes, and	
sickle cell disease.	
It is always better to prevent a disease than to treat it after it occurs. Diseases that	
used to be common in this country and around the world, including polio,	
measles, diphtheria, pertussis (whooping cough), rubella (German measles),	
mumps, tetanus, rotavirus, smallpox, and Haemophilus influenzae type b (Hib)	
can now be prevented by vaccination.	
A sufficient proportion of a population is immune to an infectious disease	
(through vaccination and/or prior illness) to make its spread from person to	
person unlikely. Even individuals not vaccinated (such as newborns and	
those with chronic illnesses) are offered some protection because the disease	
has little opportunity to spread within the community. (1.f)	
Germs can travel quickly through a community and make people sick. If	
enough people get sick, it can lead to an outbreak. However, when enough	
people are vaccinated against a certain disease, the germs cannot travel as	
easily from person to person and the entire community is less likely to get the	
disease. That means even people who are not vaccinated will have some	
protection from getting sick. If a person does get sick, there is less chance of	
an outbreak because it is harder for the disease to spread. Eventually, the	

Essential Understandings	Essential Knowledge and Skills
disease becomes rare and sometimes it is wiped out altogether. (Vaccines	
Protect Your Community) (1.f)	
• Epidemic refers to an increase, often sudden, in the number of cases of a	
disease above what is normally expected in that population in that area.	
Outbreak carries the same definition as epidemic, but it is used for a more	
limited geographic area. Pandemic refers to an epidemic that has spread over	
several countries or continents, usually affecting a large number of people.	
(Introduction to Epidemiology) (2.f)	
• Data for the spread of diseases can be found on CDC website. Teachers may	
also wish to have students analyze data related to chronic diseases. (3.f)	
Vision and hearing are used to navigate the world by helping to process sights	
and sounds. Good dental health improves a person's ability to speak, smile, smell,	
taste, touch, chew, swallow, and make facial expressions to show feelings and	
emotions.	
• Vision: Eyes take in visual information about the world around us and sends	
the information to the brain to process. (Protect Your Eyes)	
o Wear sunglasses. Protect your eyes from the sun by wearing sunglasses,	
even on cloudy days! Be sure to look for sunglasses that block 99 percent	
to 100 percent of UVA and UVB radiation. Damage to the eyes by lights	
includes light emitted by electronic devices.	
o Wear protective eyewear. Safety glasses and goggles are designed to	
protect your eyes during certain activities, like playing sports, doing	
construction work, or doing home repairs.	
o Give your eyes a rest. Looking at a computer for a long time can tire out	
your eyes. Rest your eyes by taking a break every 20 minutes to look at	
something about 20 feet away for 20 seconds. (1.g, 2.g)	
 Hearing: Ears take in sounds and balance information and send the 	

Essential Understandings	Essential Knowledge and Skills
information to the brain to process. (October Is National Protect Your	
Hearing Month and Your Ears)	
o Move away from the noise. If you can't lower the volume, put some	
distance between you and the source.	
o Lower the volume. Know which noises can damage your hearing, such as	
listening to music at a high volume. While sound at or below 70 A-	
weighted decibels (dBA) is generally considered safe, sounds at or above	
85 dBA can damage your hearing over time. Turn down the volume on	
video games, TV, and phones (especially music apps).	
o Wear hearing protectors, such as earplugs or earmuffs, when involved in	
a loud activity (at a concert, using lawn mowers or other loud	
equipment). Activity-specific earplugs and earmuffs are available at	
hardware and sporting goods stores.	
o Do not stick things like cotton swabs and fingernails into your ears.	
Doing so can scratch the ear canal, push earwax deeper into the ear, and	
even rupture the eardrum. If earwax bothers you, talk to a parent, who	
can let your doctor know. (1.g, 2.g)	
Dental health: Oral health care minimizes bacteria in the mouth and gum	
disease, which can lead to heart problems. Oral infections include tooth	
decay and gum disease. Oral diseases include cavities and oral cancer. Poor	
oral health is affected by behaviors including tobacco use, excessive alcohol	
use, and poor nutrition. Poor oral health is also affected by conditions	
including diabetes.	
o Oral Health Tips: Drink fluoridated water and brush with fluoride	
toothpaste. Practice good oral hygiene. Brush teeth thoroughly twice a	
day and floss daily between the teeth to remove dental plaque. Visit your	
dentist at least once a year, even if you have no natural teeth or have	
dentures. Do not use any tobacco products. If you smoke, quit. Eat a	

Essential Understandings	Essential Knowledge and Skills
healthy diet and limit food and beverages with added sugar. Protect teeth	
and gums by using a mouth guard when playing contact and collision	
sports. (1.g, 2.g)	

Strand: Substance Use/Misuse Prevention

Standards:

- 9.1.h Explain how alcohol and other drugs increase the risk of injury.
- 9.2.h Evaluate the effects of alcohol and other drugs on human body systems, brain function, and behavior, and describe health benefits associated with abstaining from alcohol, tobacco, or other drugs.
- 9.3.h Promote ways to encourage reporting peer substance use to trusted adults (e.g., parents, teachers, coaches, doctors).
- 9.1.i Analyze the consequences of binge drinking.
- 9.2.i Develop a set of personal standards to resist the use of alcohol, tobacco, and other harmful substances and behaviors.
- 9.3.i Develop a personal plan to prevent substance use.
- 9.1.j Explain facts about opioids and why teens are more vulnerable to heroin and prescription opioids.
- 9.2.j Analyze and draw inferences about behaviors connected to addiction and mental health.
- 9.3.j Research consequences of drug abuse, including stealing to support a drug habit, arrest, prosecution, and jail.

Essential Understandings	Essential Knowledge and Skills

Alcohol can block messages in the brain. Alcohol intoxication may result in	• promote the health benefits of
someone being talkative and outgoing or angry and aggressive. (2.h)	abstaining from alcohol, tobacco, and

Essential Understandings

- Many factors influence how drugs affect the body, brain, and behavior, including the kind of drug taken, how much of the drug is taken, how often the drug is used, what other food, drugs, or substances are used at the same time, and individual body size and chemistry. (2.h)
- Drugs may intensify or dull the senses, alter the sense of alertness, and may decrease physical pain. Drugs may also affect the ability to learn, solve complex problems, plan ahead, and affect motor coordination. Drug use may lead to aggressive behavior, extreme mood swings, paranoia, delusional behavior, and a feeling of invincibility. (2.h)
- Drugs may alter the brain by affecting cognition (learning and memory), emotion, and perception of pain. Drugs interfere with the way neurons send, receive, and process signals via neurotransmitters. This can lead to abnormal messages being sent, can amplify or disrupt the normal communication between neurons, and reinforces the desire to use drugs. Over time, drug use can lead to addiction, a devastating brain disease—when people can't stop using drugs even when they really want to. (2.h)
- Specific information on the effects of alcohol and other drugs on body systems, brain, and behavior may be found at NIDA (<u>National Institute on Drug Abuse</u>).
 (2.h)
- Outside of medications from a pharmacy or hospital, drugs obtained in other ways may include additional or more potent ingredients that make the drug more harmful. (2.h)
- Getting help: Drug addiction is a complex disease, and quitting usually takes more than good intentions or a strong will. Drugs change the brain in ways that make quitting hard, even for those who want to. Fortunately, researchers know more than ever about how drugs affect the brain and have found treatments that can help people recover from drug addiction and lead productive lives. (3.h)

Youths who binge drink are at higher risk for the health, injury, school, social, and

Essential Knowledge and Skills

other drugs, and promote seeking help for self and others (2.h, 3.h);

Grade: Nine

- identify resources available for teens and youth for help with addiction (3.h);
- describe binge drinking and the increased health and safety risks (1.i);
- develop personal strategies and a plan to prevent substance use and to resist substance use; apply personal strategies to a variety of role-play situations (2.i, 3.i);
- explain the connection between prescription opioids and heroin and why teens are more vulnerable (1.j);
- explain the connection between substance use disorder and mental health (2.j);
- explain the potential legal and school consequences of substance use and the possible effects on a student's future (3.j).

EVERFI

Essential Understandings	Essential Knowledge and Skills
legal consequences associated with underage drinking.	
• Binge drinking is defined as four or more drinks for women and five or more drinks for	
men during a single occasion (in about two hours).	
Binge drinking is associated with many health problems (1.i):	
o Unintentional injuries, such as car crashes, falls, burns, and alcohol poisoning.	
o Violence, including homicide, suicide, intimate partner violence, and sexual assault.	
o Sexually transmitted infections/diseases.	
o Unintended pregnancy and poor pregnancy outcomes, including miscarriage and	
stillbirth.	
o Fetal alcohol spectrum disorders.	
o Sudden infant death syndrome.	
o Chronic diseases, such as high blood pressure, stroke, heart disease, and liver	
disease.	
o Cancer of the breast, mouth, throat, esophagus, liver, and colon.	
o Memory and learning problems.	
o Alcohol use disorders.	
• Resistance skills: Verbal (2.i)	
o Say "no." There is no substitute for the word "no." It makes any refusal	
stronger.	
o Repeat the refusal.	
o Suggest an alternative (suggest something to do instead).	
o Build the friendship (say something to let the person know you are his/her	
friend and want to spend time with them.) This is especially important	
because a major reason for ineffective refusals is not wanting to hurt the	
other person's feelings or make them.	
o Use a firm tone of voice. Be strong and business-like.	
• Resistance skills: Nonverbal (2.i)	
o Direct eye contact (look the person in the face).	

Essential Understandings	Essential Knowledge and Skills
o Serious expression (use your best "I mean it" face).	
o Hands-off hands (put your hands up in front of you when you refuse). This is	
especially useful in situations involving physical pressure.	
o Leave (get out of the situation).	
o Avoid situations where there may be pressure.	
Opioids are among the most addictive drugs. Opioid misuse has become a nationwide	
public health crisis. <u>Information on drug effects obtained from NIH National Institute</u>	
on Drug Abuse.	
Opioids are a class of drugs that include the illegal drug heroin (not a	
medication), synthetic opioids such as fentanyl, and pain relievers available	
legally by prescription, such as oxycodone (OxyContin), hydrocodone (Vicodin),	
codeine, morphine, and many others. (1.j)	
All opioids are chemically related and interact with opioid receptors on nerve cells in	
the body and brain. Opioids block pain messages sent from the body to the brain, which	
is why they are prescribed for serious injuries or illnesses. Regular use—even as	
prescribed by a doctor—can lead to dependence and, when misused, opioid pain	
relievers can lead to addiction, overdose incidents, and deaths. In the short term, the	
release of dopamine into the body can make some people feel really relaxed and happy.	
But it can also cause more harmful effects, like extreme sleepiness, confusion, nausea,	
vomiting, and constipation. Over time, opioids can lead to insomnia, muscle pain, heart	
infections, pneumonia, and addiction. Note: Parents and children can talk with	
physicians about non-opioid pain options for surgical procedures or other medical	
needs.	
Outside of medications from a pharmacy or hospital, drugs obtained in other	
ways may include additional ingredients that make the drug more harmful. (1.j)	
Using drugs, especially early in life, increases mortality and the likelihood of	
addiction, can lead to poor grades, a decreased level of performance in sports,	

Essential Understandings	Essential Knowledge and Skills
and affect relationships with friends and family. Opioids alter judgment, which	
can cause risky behaviors. (1.j)	
• Heroin is a dangerous drug that can be injected, sniffed, snorted, or smoked, but is most	
often used by injecting it directly into a vein with a needle. The chemical makeup of	
heroin is the same as that of pain relievers, and both can be addictive and cause deadly	
opioid overdoses. (1.j)	
Teens who use prescription opioids to get high are more likely to start using	
heroin by high school graduation. (1.j)	
Research now suggests that the human brain is still maturing during the	
adolescent years. The developing brain may help explain why adolescents	
sometimes make decisions that are risky and can lead to safety or health	
concerns, including unique vulnerabilities to drug abuse and that drug use during	
adolescence may significantly increase a young person's risk for developing a	
substance use disorder later in life. (1.j)	
Many individuals who develop substance use disorders are also diagnosed with	
mental health disorders, and vice versa. Multiple national population surveys	
have found that about half of those who experience a mental illness during their	
lives will also experience a substance use disorder and vice versa. Research	
suggests that adolescents with substance use disorders also have high rates of co-	
occurring mental illness; over 60% of adolescents in community-based substance	
use disorder treatment programs also meet diagnostic criteria for another mental	
illness. (2.j)	
Help and resources are available for mental health and substance use disorders.	
Talk with a parent, a trusted adult at school, home, or in the community if you	
have concerns for yourself, friend, or loved one.	
 Parents can help access the health care and resources needed. 	
 School counselors, psychologists, and social workers can also help with 	
accessing community services.	

Essential Understandings	Essential Knowledge and Skills
o In Virginia, the Community Services Boards in many areas of the state can	
be accessed for information and treatment.	
• In addition to the health effects, substance use and misuse can lead to risky	
behaviors (e.g., stealing for money to buy drugs) and involvement with law	
enforcement and the judicial system. Types of drug crimes include possession,	
sale or distribution, and manufacturing. The type of controlled substance and the	
type of drug crime determine legal penalties, to include fines and imprisonment.	
Legal penalties may affect a person's future. Note: Teachers should also review	
their school division's Students Rights and Responsibilities. (3.j)	
• Under Code of Virginia §18.2-251.03, someone who seeks or obtains emergency	
medical attention for himself or for another individual because of a drug- or	
alcohol-related overdose in progress may be protected from being convicted for	
certain possession or intoxication crimes if the person reports an overdose to a	
firefighter, EMS personnel, or a law enforcement officer (most commonly by	
calling 911 for emergency medical response). To be eligible for this "affirmative	
defense," the person reporting the overdose must identify themselves as being	
the one who reported the overdose. (3.j)	
Note: Naloxone is a prescription medication designed to rapidly reverse opioid	
overdose. It is an opioid antagonist—meaning that it binds to opioid receptors	
and can reverse and block the effects of other opioids. It can quickly restore	
normal respiration to a person whose breathing has slowed or stopped as a result	
of overdosing with heroin or prescription opioid pain medications. Naloxone is	
used by paramedics, emergency room doctors, and other specially trained first	
responders. Revive! is a free one-hour training offered in Virginia for members	
of the community to administer Naloxone; information available at VDH and	
local health departments. Naloxone can be purchased in many pharmacies in	
Virginia without bringing in a prescription from a physician. A common brand	
of naloxone is Narcan.	

2020 Health Education Standards of Learning Curriculum Framework

Strand: Safety/Injury Prevention

Standards:

- 9.1.k Identify behaviors that contribute to injuries and that may result in irreversible consequences.
- 9.2.k Evaluate the long-term consequences of injury and describe controllable and uncontrollable risk factors.
- 9.3.k Demonstrate adult and child cardiopulmonary resuscitation (CPR), the use of an automated external defibrillator (AED), and first aid skills for choking, bleeding, contusions, fractures, and anaphylactic shock.
- 9.1.1 Define traumatic and non-traumatic brain injury and identify examples of each, including concussion.
- 9.2.1 Identify common signs/symptoms (e.g., cognitive, emotional, physical, sleep) of a concussion.
- 9.3.1 Advocate for reporting signs and symptoms and for safety practices to prevent brain injury.
- 9.1.m Describe actions, behaviors, and signs that may indicate potential threats to individuals or the school.
- 9.2.m Identify strategies to respond to and report potential threats to individuals or the school.
- 9.3.m Develop action steps to promote a safe and inclusive school environment.

Essential Understandings	Essential Knowledge and Skills

(ABI). ABI is a result of an illness or condition within the body, and it is not

Essential Understandings Essential Knowledge and Skills factors include age, family history, race, and gender. For example, older (3.k): people are at higher risk for falling. Controllable risk factors include diet, explain the difference between activity level, obesity, and alcohol, tobacco, or other drug use. Individuals traumatic and non-traumatic can use decision-making strategies to limit risk of injury. (2.k) brain injuries (1.1); Adult and child cardiopulmonary resuscitation (CPR), the use of an promote awareness of signs and automated external defibrillator (AED), and first aid skills for choking, symptoms of a concussion, importance of reporting, and bleeding, contusions, fractures, and anaphylactic shock. (3.k) prevention strategies (2.1, 3.1); identify actions, behaviors, and Traumatic brain injury (TBI) is a serious public health problem in the United States. Each year, traumatic brain injuries contribute to a substantial number of signs that indicate potential deaths and cases of permanent disability. (Get the Facts About TBI). Traumatic threats to individuals and brain injuries have many causes, including falls, sports, violence, and motorschools (1.m); vehicle crashes. promote the importance of reporting potential threats and A TBI is caused by a bump, blow, or jolt to the head or a penetrating head injury that disrupts the normal function of the brain. Not all blows or jolts to ways to report (2.m); evaluate the current school climate and the head result in a TBI. The severity of a TBI may range from mild (a brief change in mental status or consciousness) to severe (an extended period of make recommendations for ways unconsciousness or amnesia after the injury). students and staff can promote a safe o A concussion is a type of TBI caused by a bump, blow, or jolt to the and inclusive school environment head or by a hit to the body that causes the head and brain to move (3.m).rapidly back and forth. This sudden movement can cause the brain to bounce around or twist in the skull, creating chemical changes in the Additional resources: Health Smart brain and sometimes stretching and damaging brain cells. Effects of Virginia concussions are serious, include affecting memory, judgment, reflexes, **EVERFI** speech, balance, and coordination. (1.1)

Essential Understandings	Essential Knowledge and Skills
traumatic brain injury include stroke (leading cause), a lack of oxygen	
(hypoxia), tumors, other illnesses such as cancer, brain infections or	
inflammation, and other infections. (1.1)	
• Signs and symptoms of a concussion generally show up soon after the	
injury. However, a person may not know how serious the injury is at first	
and some symptoms may not show up for hours or days. Signs/symptoms of	
a concussion (2.1):	
o Cannot recall events prior to or after a hit or fall.	
o Appears dazed or stunned.	
o During physical activity, forgets an instruction, is confused about an	
assignment or position, or is unsure of the game, score, or opponent.	
o Moves clumsily.	
o Answers questions slowly.	
o Loses consciousness (even briefly).	
 Shows mood, behavior, or personality changes. 	
o Headache or "pressure" in head.	
o Nausea or vomiting.	
o Balance problems, dizziness, or double or blurry vision.	
o Bothered by light or noise.	
o Feeling sluggish, hazy, foggy, or groggy.	
o Confusion, concentration or memory problems.	
o Just not "feeling right" or "feeling down."	
o Changes in sleep or feeling sleepy.	
• Anyone with signs or symptoms of a concussion should be seen by a health	
care provider. (3.1)	
• To reduce or prevent TBI, wear seat belts for every ride/drive in a motor	
vehicle, never drive under the influence, and wear a helmet or appropriate	
head/protective gear for sports and recreational activities. (3.1)	

Essential Understandings	Essential Knowledge and Skills
Speaking up about violence, weapons, or threats not only protects you but your	
friends and classmates too.	
A threat is an expression of intent to physically or sexually harm someone.	
This expression may be spoken, written, or gestured. Threats can be	
expressed directly or indirectly to the victim or to others and may be explicit	
or implied. Threats sometimes, but rarely, actually involve guns or	
explosive devices. Most students who pose a threat indicate their intentions	
in some way. Examples include statements to friends, ideas in written work,	
drawings, and postings on social media that threaten harm. (1.m)	
Someone on the verge of violence may display warning signs (1.m)	
o Playing with weapons of any kind.	
o Bragging about acts of violence one would like to commit.	
o Showing an obsession with violent movies or playing violent games.	
o Bullying or threatening other people.	
o Cruelty to pets or other animals.	
These signs do not necessarily mean that a person will become violent or	
bring a weapon to school. Still, all threats should be taken seriously and be	
reported to a trusted adult. That person could be a teacher, parent, school	
counselor, or religious leader. (2.m)	
Note: Teachers should review school-specific reporting procedures.	
Students who are connected to their peers, educators, and communities in	
meaningful ways can improve the school climate and prevent violence.	
Research suggests that a positive school climate can lead to a significant	
decrease in the likelihood of crime, aggression, and violent behavior.	
(<u>School Climate</u>) (3.m)	
Students can contribute to a positive school climate by being involved on a	
school climate team, looking at data for their school, and working with	

Essential Understandings	Essential Knowledge and Skills
teachers, administrators, and parents to implement activities and programs	
to promote student engagement, safety, and environmental changes and	
design and implement programs to prevent violence, bullying, and	
harassment. (3.m)	

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 9.1.n Identify effective time-management and organizational skills.
- 9.2.n Analyze how time management might contribute to stress reduction.
- 9.3.n Create strategies to manage deadlines for a school-related activity (e.g., studying for a test, completing a project).
- 9.1.0 Describe the positive and negative effects of social media and of sharing personal information online.
- 9.2.0 Explain limitations to effective communication online.
- 9.3.0 Create strategies to manage personal information and communicate effectively online, and balance technology use with offline activities.
- 9.1.p Identify signs and symptoms of mental illnesses or challenges (e.g., anxiety, depression, suicide, eating disorders, self-harm behaviors).
- 9.2.p Identify school and community mental health resources to help with mental illnesses or challenges.
- 9.3.p Promote access to mental health resources to help oneself and others.
- 9.1.q Identify causes of conflict with friends and family and feelings/emotions both sides might experience.
- 9.2.q Identify strategies for peaceful resolution of conflict.
- 9.3.q Apply appropriate conflict-resolution skills to prevent, manage, de-escalate, defuse, and/or resolve conflict in a variety of situations.

Essential Understandings	Essential Knowledge and Skills
Good time management allows a person to accomplish more in a shorter period of	In order to meet these standards, it is
time, which leads to more free time, which lowers stress and helps with focus.	expected that students will
• Time-management skills (1.n, 2.n):	apply time management and
o Identify time wasters and set goals: Make a list of things to do. Identify	organization skills by creating a plan
time wasters. Set goals for completing tasks.	for a school-related activity (projects,
o Plan ahead by creating a to-do list: Divide your list into things to do now	assignments, or assessments (1.n, 2.n,
and things to do later, and prioritize the list. Set due dates.	3.n);

Essential Understandings

- o Tackle small tasks to start: Prioritize your list by what can be done in a few minutes and what will take longer to complete. Start with shorter, simpler to-do items and then move on to larger projects or assignments.
- o Only do one thing at a time: Don't multitask. Remove distractions.
- o Establish routines: A set routine can also help you accomplish the things you need to do.
- o Use breaks wisely: Work in short intervals and take short, regular, timed breaks. For example, work for 25 minutes then take a five-minute break.
- Take time off: It's important to take time for yourself. Long study sessions or chunks of time working on assignments should be broken up with time away from screens or textbooks. You need to give your mind a rest. Mindfulness practices can help reduce stress.

Electronic media, including social networking, can be used in positive and beneficial ways, but users need to be aware of risks and protect themselves online. (1.0)

- Social media has benefits, such as communication, education, and entertainment. Social media can negatively affect lives, including how we interact with others in day-to-day life, self-expression, bullying, friendships, and mental health. (1.0)
 - o Benefits of social media:
 - Connect with peers, friends, and family; cost savings to connect with others.
 - Overcome geographical barriers to connect and for learning.
 - Opportunities to connect with others of shared interests.
 - Promotes and enables collaboration.
 - Can be used to help others, start a business.
 - Access information for health, education, and real-time news.
 - Fun and enjoyment.
 - o Risks of social media:

Essential Knowledge and Skills

- compare and contrast the positive and negative effects of social media, sharing personal information, and communicating online (1.o, 2.o);
- develop personal strategies to mitigate the negative effects of social media and sharing personal information online (3.0);

Grade: Nine

- explore/research one or more mental illnesses or challenges and the resources available for help (1.p, 2.p);
- promote help seeking and available resources for mental illness or challenges (3.p);
- apply knowledge of conflict resolution skills and strategies to situations that demonstrates understanding of the emotions of all parties involved and when it is appropriate to prevent, manage, de-escalate, defuse, and/or resolve conflict (1.q, 2.q, 3.q).

Additional resources: <u>Health Smart Virginia</u> EVERFI

Essential Understandings	Essential Knowledge and Skills
Overuse/dependence can lead to sleep deprivation, less face-to-face	
interactions; take time away from physical activity and time with	
family/friends; being overwhelmed with it all.	
 Social pressure: Comparisons with "ideal" lives and pictures of others may 	
affect self-esteem and self-image and may cause feelings of depression.	
 Misunderstandings from communications; conflict; cyberbullying; damage to 	
your reputation.	
 Meeting people who may not be who they say they are can be dangerous. 	
 Leaving a digital footprint puts personal information at risk. 	
 Exposure to frauds and scams. 	
 May lead to dangerous activities, such as trying stunts or challenges posed 	
online that can cause injury or death.	
o Inappropriate online behavior includes cheating, accessing and/or sending	
inappropriate images, hacking, downloading illegally recorded movies or music,	
cyberbullying.	
o Inappropriate online behavior may result in legal consequences, identity theft, the	
loss of college admission or job, and financial loss.	
o Accepting location services—the features of an app that track and use your	
geographical location (or geolocation)—can be helpful and harmful. Location	
services features—information about where your device (and you) are in the	
world—is collected and, in many cases, the information is shared.	
Online Communication: Getting to know someone online and communicating	
online with someone a person knows, without nonverbal cues or being able to	
see them, can be risky—from simple misunderstandings to manipulation.	
People do not always represent their true selves online, which may increase	
risk. (2.o)	
eens experience many changes and situations that may lead to stress, anxiety,	

Essential Understandings	Essential Knowledge and Skills
and self-destructive behaviors. Resources are available to help teens manage	
stress, anxiety, self-destructive behaviors, eating disorders, and other mental	
illnesses or challenges. (1.p)	
• <u>Anxiety</u>	
 Common signs and symptoms of anxiety include: 	
 Feeling restless or nervous; 	
 Being easily fatigued; 	
 Having difficulty concentrating; mind going blank; 	
 Being irritable; 	
 Having muscle tension or an upset stomach; 	
 Difficulty controlling feelings of worry; 	
 Having sleep problems, such as difficulty falling or staying asleep, 	
restlessness, or unsatisfying sleep.	
• <u>Depression</u> : Signs and symptoms of depression may include persistent	
feelings of sadness, anxiousness, or emptiness; feeling hopeless, guilty, and	
helpless; loss of interest in activities or hobbies; fatigue; difficulty	
concentrating and making decisions; headaches, digestive problems that do	
not get better with treatment; overeating or loss of appetite; thoughts of	
suicide or suicide attempt.	
• <u>Suicide</u> : Warning signs of suicide include talking about suicide, having a	
plan, preoccupation with death, self-destructive behavior, loss of interest in	
activities or hobbies, giving away possessions, visiting or calling family and	
friends.	
• <u>Eating disorders</u> : Some signs of eating disorders include becoming very thin;	
obsession with food, weight control, counting calories; unhappy with body	
size; excessive exercise; vomiting after meals or making excuses to go to the	
bathroom after eating; withdrawing from social activities.	
• <u>Self-harm</u> or self-injury signs may include someone with frequent bruises or	

Essential Understandings	Essential Knowledge and Skills
bandages. If someone is wearing long sleeves and pants even in hot weather, they	
may be trying to hide injuries or scarring. This behavior might be part of a larger	
condition. There also may be additional signs of emotional distress. They might	
make statements that sound hopeless or worthless, have poor impulse control, or	
have difficulty getting along with others.	
Other instructional topics may include challenges such as stress:	
o Signs and symptoms of stress include headache, muscle tension, fatigue,	
sleep problems, anxiety, lack of motivation or focus, irritability,	
depression, drug or alcohol abuse, social withdrawal, and overeating or	
undereating.	
Mental health professionals help children, adolescents, and adults deal with	
life stresses and problems, including addiction/substance abuse; problems	
with self-esteem; age-related mental health issues; family, parenting or	
marital problems; grief, anger or depression; and other emotional or	
behavioral issues. (2.p)	
o Mental health professionals in schools	
 School counselor: Supports student success by providing academic, college 	
and career, and personal and social counseling.	
 School psychologist: Helps students foster social skills, address mental health 	
concerns, and enhance self-regulation skills.	
 School social worker: Provides individual and group counseling to students to 	
develop social-emotional competencies, foster resiliency, and cope with crisis	
situations and conflicts. Help students and families access resources.	
o Community resources include local Community Services Boards and a	
variety of mental health professionals.	
 Social worker: Helps individuals develop skills to solve and cope with 	
problems in their everyday lives and can diagnose and treat mental,	
behavioral, and emotional issues.	

Essential Understandings	Essential Knowledge and Skills
 Psychologist: Collaborates with physicians, social workers, and others 	
to treat illness and promote overall wellness.	
 Psychiatrist: Physician who evaluates, diagnoses, and treats patients 	
affected by a temporary or chronic mental health problem.	
 Counselor: Provides mental health and substance abuse care. 	
 Psychiatric nurse: Treats patients diagnosed with mental illnesses. 	
Conflicts with friends and family will occur but can be effectively managed.	
Conflicts with friends and family may result from many situations including	
different values, different interests, changes in personal interests during	
adolescence, developing a sense of self that may be different from a parent's	
or family's, a change in the family makeup (e.g., birth, divorce, remarriage,	
extended family), family or personal finances. (1.q)	
Conflict is better managed when you have self-control, empathy, and	
emotional maturity. Knowing when emotions are too high (anger or upset) to	
engage in resolving a conflict is important. If either or both people involved	
are too angry or upset, it can lead to saying or doing things that will not	
resolve the situation. When emotions run high, rational thinking is usually	
low. (1.q)	
Guidelines for resolving conflict include making the relationship the priority,	
focusing on the present—not what happened in the past, considering whether	
the issue is worth the time and energy to resolve or whether you can let it go,	
being willing to forgive and not punish, and knowing when it is OK to	
disagree. (2.q, 3.q)	
o De-escalate or de-escalation in a conflict means to reduce the intensity or	
potential violence of a situation. This can be done by active listening,	
empathy (identify and understand the other person's situation, feelings,	
and motive), establishing rapport, providing information and support, and	

Essential Understandings	Essential Knowledge and Skills
following up if appropriate.	
o Defuse means to make a situation less harmful, potent, or tense. This can	
be done by addressing the conflict early so that it does not escalate, but	
only if it is safe to do so. Avoiding conflict will not necessarily make it go	
away. Identify the problem, gather information, stay calm (tone of voice,	
demeanor, and being sincere in what is said), and come to a conclusion	
(negotiation) if possible.	
o Skills to address conflict:	
 Reducing stress quickly (calming oneself before addressing the conflict). 	
 Being emotionally aware of yourself and the other person. (How are 	
you feeling? How is the other person feeling?)	
 Stating what the conflict is about. 	
 Having effective communication skills include; 	
 Listening carefully to others. 	
 Speaking directly to each other. 	
Speaking honestly and kindly.	
 Focusing on your body language (nonverbal communication). 	
Proposing solutions or compromises:	
 Agree on solution or compromise to try. 	
 Asking an adult for help if the conflict is not addressed. 	
Teacher note: Reminder that all school personnel are mandated reporters. Child abuse	e and
recognition training is required for initial licensure and renewals; training and resource	ces
are available at the Virginia Department of Education.

	criminal street gang, (b) to remain as a participant in or a member of a	
	criminal street gang, or (c) to submit to a demand made by a criminal	
	street gang to commit a felony violation of this title, (i) uses force against	
	the individual or a member of his family or household or (ii) threatens	
	force against the individual or a member of his family or household,	
	which threat would place any person in reasonable apprehension of death	
	or bodily injury, is guilty of a Class 6 felony. The definition of 'family or	
	household member' set forth in § 16.1-228 applies to this section."	
• A	lditional risky behaviors may be included, such as:	
О	Hazing: Any activity expected of someone joining or participating in a	
	group that humiliates, degrades, abuses, or endangers them, regardless of	
	a person's willingness to participate. Hazing incidents occur in many	
	types of clubs, organizations, and teams and in diverse settings including	
	middle and high schools, colleges and universities, the military, and	
	workplaces. The intimidating, harassing, and sometimes even violent	
	nature of hazing can threaten the health and safety of its victims. It can	
	even be deadly.	
О	Hate crimes: Defined by the FBI as a "criminal offense against a person or	
	property motivated in whole or in part by an offender's bias against a race,	
	religion, disability, sexual orientation, ethnicity, gender, or gender	
	identity." Hate crimes can be prosecuted at the state or federal level.	
• De	ecision-making process includes (3.s):	

Essential Understandings		Essential Knowledge and Skills
o Identify the decisi	on to be made.	
o List all of the poss	ible options.	
o Evaluate the pros	and cons of each option (research consequences), using	
criteria such as:		
Is this option l	nealthful and does it reflect my beliefs and values?	
Is this option l	egal?	
Is this option s	afe?	
Is this option r	espectful to my family and myself?	
Is this option r	esponsible?	
o Make your decision	n based on the evaluation of each option (act on the	
decision selected)		
o Reflect on the dec	ision that was made.	

Strand: Community/Environmental Health

Standards:

- 9.1.t Identify health-related social issues, such as homelessness, underage drinking, and substance abuse.
- 9.2.t Evaluate strategies for improving health-related social issues.
- 9.3.t Develop a long-term plan for oneself and/or the family to positively influence a health-related social issue.
- 9.1.u Identify global environmental health issues.
- 9.2.u Examine the effects of global environmental health issues on local communities.
- 9.3.u Promote global environmental health and/or disease prevention projects.

Essential Understandings	Essential Knowledge and Skills

(<u>CDC</u>)	
o Underage drinking: Alcohol is the most commonly used substance	
among young people in the United States. Underage drinking is a	
significant public health problem. Excessive drinking is responsible for	
more than 3,500 deaths and 210,000 years of potential life lost among	
people under age 21 each year. (CDC)	
o Substance use/misuse: Alcohol and drug misuse and related disorders	
are major public health challenges that are taking an enormous toll on	
individuals, families, and society. Neighborhoods and communities as a	
whole are also suffering as a result of alcohol- and drug-related crime	
and violence, abuse and neglect of children, and the increased costs of	
health care associated with substance misuse. The health care system	
has not given the same level of attention to substance use disorders as it	
has to other health concerns that affect similar numbers of people.	
Substance-use disorder treatment in the United States remains largely	
segregated from the rest of health care and serves only a fraction of	
those in need of treatment. Only about 10 percent of people with a	
substance use disorder receive any type of specialty treatment. Further,	
over 40 percent of people with a substance use disorder also have a	
mental health condition, yet fewer than half (48 percent) receive	
treatment for either disorder. (Surgeon General's Report on Alcohol,	
Drugs, and Health [2015])	
according to the World Health Organization (WHO), "Clean air, stable climate,	
dequate water, sanitation and hygiene, safe use of chemicals, protection from

supportive cities and built environments, and a preserved nature are all	
prerequisites for good health."	
An estimated 12.6 million deaths each year—nearly one in four of total	
global deaths—are attributable to unhealthy environments. Environmental	
risk factors, such as air, water and soil pollution, chemical exposures,	
climate change and ultraviolet radiation, contribute to more than 100	
diseases and injuries. (<u>WHO</u>) (1.u)	
As globalization continues, the international spread of disease can affect	
travel and trade worldwide, as seen with COVID-19. International health	
regulations encourage countries to work together and share information	
about disease and other health-related issues with potential international	
effects. (2.u)	

Grade: Nine

Standards:

- 10.1.a Identify and describe the major structures and functions of the lymphatic system.
- 10.2.a Describe the role of the lymphatic system in providing protection against the spread of disease and cancer.
- 10.3.a Promote strategies for maintaining healthy cardiovascular and lymphatic systems.

Essential Understandings

Strand: Body Systems

The lymphatic system, which is a part of the immune system, works to keep body fluid levels in balance and to defend the body against infections.

- The lymphatic system is a network of very small tubes (or vessels) that drain lymph fluid from all over the body. Lymph is a clear, watery fluid that contains proteins, salts, and other substances. The major parts of the lymphatic system (1.a):
 - o Lymph.
 - Lymph nodes.
 - o Lymphatic vessels.
 - Collecting ducts.
 - o Spleen.
 - o Thymus.
 - Tonsils and adenoid.
 - o Bone marrow.
 - Appendix.
- The lymphatic system helps defend the body against germs (viruses, bacteria, and fungi) that can cause illnesses. Lymph nodes filter germs. Inside the lymph nodes, lymphocytes called T-cells and B-cells help the body fight infection. B cells make antibodies—special proteins that stop infections from spreading by trapping disease-causing germs and destroying them. (2.a) T-Cells migrate to the infection to help destroy it.
- When a person has an infection, germs collect in the lymph nodes and cause swelling. If the throat is infected, the lymph nodes in the neck may swell. That is

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

Grade: Ten

- explain the structures and functions of the lymphatic system (1.a);
- promote the importance of maintaining healthy cardiovascular and lymphatic systems for good health and disease prevention (2.a, 3.a).

Additional resources:

Health Smart Virginia

EVERFI

Essential Understandings	Essential Knowledge and Skills
why doctors check for swollen lymph nodes (sometimes called swollen "glands") in	
the neck when someone has a sore throat. (2.a)	
Some cells of the immune system can recognize cancer cells as abnormal and kill	
them. Unfortunately, this may not be enough to get rid of a cancer altogether. But	
some new treatments aim to use the immune system to fight cancer. (2.a)	
• To keep the lymphatic system strong and healthy (3.a):	
 Avoid exposure to pollutants, unhealthy environments, and toxic chemicals like 	
those found in pesticides or cleaning products. These chemicals can build up in	
your system and make it harder for the body to filter waste.	
o Drink plenty of water to stay hydrated so lymph can easily move throughout the	
body.	
 Maintain a healthy lifestyle that includes regular exercise and a healthy diet. 	

Strand: Nutrition

Standards:

- 10.1.b Identify a variety of diets (e.g., typical American, Mediterranean, vegetarian, vegan).
- 10.2.b Compare and contrast diverse diets (e.g., typical American, Mediterranean, vegetarian, vegan).
- 10.3.b Create or modify a personal wellness plan (i.e., goals and action steps based on current guidelines) for healthy eating to meet current and future needs.

Essential Understandings

Proper nutrition promotes optimal growth and dental health, prevents high blood pressure, and decreases the risk of chronic diseases, obesity, and osteoporosis.

Teacher Note: The term "diet" has two meanings: (1) food and drink regularly provided and consumed and (2) to cause to eat and drink sparingly or according to prescribed rules; a regimen of eating and drinking sparingly to reduce one's weight (Merriam-Webster). While a nutritious diet may result in weight loss, for the purposes of this learning objective, diets explored should be nutritious in nature (long term) and not for the purpose of losing weight (short term).

- Diets and food choices are influenced by culture, religion, geographic area, food availability, health concerns, and personal choice.
- Typical American diet: The typical eating patterns/diets currently consumed by many in the United States do not align with the dietary guidelines.
 - o About three-fourths of the population has an eating pattern that is low in vegetables, fruits, dairy, and oils.
 - o More than half of the population is meeting or exceeding total grain and total protein foods recommendations but are not meeting the recommendations for the subgroups within each of these food groups.
 - o Most Americans exceed the recommendations for added sugars, saturated fats, and sodium.
 - o Sixty percent of adults have one or more diet-related chronic diseases, such as cardiovascular disease, type 2 diabetes, obesity, liver disease, some types of cancer, and dental caries. (<u>USDA Dietary Guidelines 2020-2025</u>) (1.b, 2.b)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- compare and contrast two or more diets for nutritional content and distinguishing components (1.b, 2.b);
- assess current wellness related to proper nutrition and develop a wellness plan with SMART goals, action steps, monitoring, and reflection to maintain or improve wellness (3.b).

Additional resources:

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
A Mediterranean diet is typically less dairy and meat than the typical American	
diet. (1.b, 2.b)	
• Vegetarian diets (MyPlate) can meet all of the recommendations for nutrients. The	
key is to consume a variety of foods and the right amount of foods to meet calorie	
needs. Nutrients that vegetarians may need to focus on include protein, iron,	
calcium, zinc, and vitamin B12. (1.b, 2.b)	
• Vegan or plant-based diet excludes meat, poultry, fish, eggs, and dairy products,	
and foods that contain these products. (1.b, 2.b)	
• Note: Additional diets may be explored, such as those related to health issues (i.e.,	
DASH diet for lowering blood pressure).	
• See <u>USDA Dietary Guidelines 2020-2025 for current nutrition guidelines.</u>	

Strand: Physical Health

Standards:

- 10.1.c Explain the physical, mental, social, and academic benefits of sufficient sleep and the relationship between sleep deficiency, chronic disease, and the increased risk for injury and substance use.
- 10.2.c Explain the role of the environment, individual behavior, family history, social norms, legislation, and policies in preventing chronic diseases.
- 10.3.c Create or modify a personal wellness plan for physical activity, sleep, personal hygiene, and other health-enhancing behaviors to prevent communicable and chronic disease.

Essential Understandings

Choices related to physical activity, sleep, personal hygiene, and other health-enhancing behaviors made as a teen might positively or negatively affect an individual's lifestyle now and in the future.

- Teens ages 13-18 should get 8-10 hours of sleep each night (CDC).
- Physical benefits: Getting enough sleep is not a luxury—it is something people need for good health. Sleep helps the brain, mood, and dealing with stress. Sufficient sleep may improve memory, focus, and reflexes. (1.c)
- Sleep deprivation in teens can cause effects such as poor concentration, focus, and attention and affect executive functioning.
- Insufficient sleep affects growth, stress hormones, appetite, and breathing, and impairs higher-level reasoning, problem solving, and attention to detail. Lack of sleep can affect mood, energy, and academic performance, affecting the ability to stay focused and concentrate, and may lead to behavior problems. Not getting enough sleep is linked with many chronic diseases and conditions (i.e., type 2 diabetes, heart disease, obesity, and depression) and can lead to motor vehicle crashes. (Sleep and Chronic Disease) (1.c)
- Sleep difficulties and hours of sleep are a significant predictor of a number of substance-related problems among adolescents. Sleep deprivation can impair emotion regulation and executive function (inhibitory control), which is likely

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- compare and contrast the benefits of sleep and the effects of insufficient sleep;
- explain the factors affecting chronic disease prevention;
- assess current wellness related to proper
 physical activity, sleep, personal hygiene, and
 other health-enhancing behaviors, and develop
 a wellness plan with SMART goals, action
 steps, monitoring, and reflection to maintain or
 improve.

Additional resources:

Health Smart Virginia

EVERFI

Essential Understandings	Essential Knowledge and Skills
involved in the link between insufficient sleep and substance use. The effects of a	
lack of sleep on dopamine receptors also suggests that stimulant misuse and	
impaired sleep could be a vicious cycle: Stimulants impair sleep, and reduced sleep	
produces changes in the brain that predispose to further drug use and addiction.	
(The Concerning Link Between Inadequate Sleep and Adolescent Substance Use)	
(1.c)	
Noncommunicable/chronic diseases (i.e., asthma, diabetes, heart disease, cancer,	
obesity, and stroke) are not contagious and may be inherited or may develop from	
unhealthy lifestyle choices over time. Healthy choices begin early in life. (2.c)	
A noncommunicable disease is a noninfectious health condition that cannot be	
spread from person to person. This is also known as a chronic disease and it lasts	
for a long period. A combination of genetic, physiological, lifestyle, and	
environmental factors can cause these diseases. While genetic-related chronic	
diseases may not be preventable, people can reduce their risk. (2.c)	
For non-genetic related chronic diseases, many are prevented by	
reducing/eliminating common risk factors such as tobacco use, alcohol use,	
physical inactivity, and unhealthy eating habits. Other preventive health measures	
include immunizations, regular health and medical screenings, sleep, and limiting	
personal technology use. (2.c)	
Environmental factors, such as air pollution, can contribute to chronic diseases	
including asthma and other chronic respiratory diseases. (WHO) (2.c)	
The growing epidemic of chronic disease is due to tobacco use, unhealthy diet,	
physical inactivity, and other risk factors. Policymakers play a crucial role in	
reducing the risk and burden of chronic diseases by implementing policies and	
programs that create a healthy environment and improve access to care. A formal	
national policy and planning framework is essential to give chronic diseases	
appropriate priority and to organize resources efficiently. (Preventing Chronic	
<u>Diseases</u>) (2.c)	

Essential Understandings		Essential Knowledge and Skills
•	Recommendations for physical activity (3.c)	
•	Sleep guidelines (<u>CDC)</u> (3.c)	
•	Nutrition (USDA Dietary Guidelines 2020-2025) (3.c)	

Strand: Disease Prevention/Health Promotion

Standards:

- 10.1.d Identify technologies individuals can use to assess, monitor, improve, and maintain health.
- 10.2.d Research the costs and benefits of various technologies that allow individuals to assess, monitor, improve, and maintain health.
- 10.3.d Promote strategies to help individuals select technologies to assess, monitor, improve, and maintain health.
- 10.1.e Identify regular screenings, immunizations, vaccines, tests, and other medical examinations needed for different stages of life and their role in reducing health risks.
- 10.2.e Explain the purpose of medical screenings, immunizations, vaccines, and tests for different stages of life and the importance of access to health care throughout life.
- 10.3.e Determine strategies for improving access to health care and medical services for different stages of life.
- 10.1.f Identify and research a selected personal, community, or global health issue.
- 10.2.f Explain the effects of the social determinants of health on a selected personal, community, or global health issue.
- 10.3.f Design strategies to address and communicate to others about a selected personal, community, or global health issue.

Essential Understandings

Technologies allow individuals to have a more active role in maintaining their health, help with day-to-day management of chronic illnesses, and may motivate individuals to make healthy life choices by tracking, monitoring, and providing reminders.

- Technologies are available to help individuals monitor their personal physical activity time, heart rate, and sleep. Health-related applications may be wearable (watch) or accessed on phones and other personal devices. Apps allow individuals to track food intake and energy expenditure, and sleep. Individuals can set goals and participate in challenges and social networking to provide motivation. Technologies and apps may help with motivation and give a general idea of activity, sleep, caloric intake, and caloric expenditure, but they are not completely accurate. (1.d)
- Additional technologies may be available, such as full-body scans that use

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- compare and contrast several health-related technologies designed to assess, monitor, improve, and maintain health, including benefits, limitations, and costs (1.d, 2.d);
- create and promote strategies to help self and others evaluate and select health-related technologies (3.d);
- research age-appropriate screenings, immunizations, vaccines, tests, and other medical examinations needed for different

Essential Understandings

computed tomography (CT) (using radiation) to examine the entire body or specific parts, such as the heart and lungs. These are marketed by promising to catch dangerous diseases in earlier, more curable stages. Any technologies should be thoroughly reviewed and discussed with a health care provider. (1.d)

Appropriate medical screenings, immunizations, vaccines, and tests change at different stages of life and help prevent or detect disease early, leading to the best chance of successful outcomes.

- It is always better to prevent a disease than to treat it after it occurs. Diseases that used to be common in this country and around the world, including polio, measles, diphtheria, pertussis (whooping cough), rubella (German measles), mumps, tetanus, rotavirus, smallpox, and Haemophilus influenzae type b (Hib) can now be prevented by vaccination (CDC). See Immunizations for school Virginia Department of Health for further requirements (1.e. 2.e)
 - o Diphtheria, tetanus (lockjaw), pertussis (whooping cough): one shot for all three given multiple times between infancy and age 7; booster shot at age 10 or 11.
 - o Bacterial meningitis (an infection of the tissue covering the brain and spinal cord, which can lead to lasting brain damage and deafness): between infancy and age five.
 - o Hepatitis A (virus that causes jaundice [yellow skin or eyes], tiredness, stomachache, nausea, and diarrhea): two doses on schedule starting at 12 months.
 - o Hepatitis B (can lead to chronic hepatitis [liver inflammation], liver cancer, and death): newborns to adults.
 - o Human papillomavirus (HPV) (virus that causes some cancers): three shots given on a schedule between the ages 9 and 45.
 - o Influenza/flu: annual shot or nasal spray to protect against different types of flu
 - o Measles (respiratory disease), mumps (fever, swollen cheeks, and jaw), and

Essential Knowledge and Skills

stages of life and how they reduce health risks (1.e, 2.e);

Grade: Ten

- create strategies for improving access to health care and medical services for different stages of life (3.e);
- explain advanced care planning and advanced directives (3.e);
- research a selected personal, community, or global health issue (1.f);
- for the selected personal, community, or global health issue (2.f, 3.f)
 - o explain the effects of the social determinants of health; and
 - design strategies to address and communicate to others about the issue.

О	Access to mass media and emerging technologies (e.g., cell phones, the	
	Internet, and social media).	
О	Culture.	

Strand: Substance Use/Misuse Prevention

Standards:

- 10.1.g Research trends and factors that contribute to teen use/abuse and nonsubstance use of alcohol, tobacco, nicotine products (e.g., e-cigarettes), opioids, and other drugs and their impact on the community.
- 10.2.g Explain reasons why teenagers use or avoid drugs or alcohol and how positive role models can influence that decision.
- 10.3.g Demonstrate assertive communication skills to resist pressure to use alcohol, tobacco, and other drugs.
- 10.1.h Evaluate the causal relationship between tobacco, alcohol, inhalant, and other drug use and chronic disease.
- 10.2.h Evaluate the protective factors needed to reduce or prevent risk-taking behaviors, acts of violence, and substance use.
- 10.3.h Educate others about the dangers of electronic cigarettes through a brochure, social media campaign, or school club.
- 10.1.i Identify unsafe behaviors that may result in unintentional injury while riding in or operating a vehicle.
- 10.2.i Explain the role of the environment, individual behavior, social norms, legislation, and policies in preventing motor vehicle-related injuries.
- 10.3.i Encourage responsible teen driving behaviors, and practice using refusal and negotiation skills to avoid riding in a car with someone who has been using alcohol or other drugs.

Essential Understandings

Every day we make choices that affect our health. People take drugs for many different reasons, such as dealing with life's challenges, escaping reality, relieving pain, or trying to fit in. (Start a Conversation)

- For information on current drug use behavior trends:
 - o <u>Youth Risk Behavior Surveillance (YRBS)</u>: The Youth Risk Behavior Surveillance System (YRBSS) monitors six categories of health-related behaviors that contribute to the leading causes of death and disability among youth and adults. (1.g)
 - Monitoring the Future National Survey (grades eight, ten, twelve): Monitoring the Future is an annual drug use survey of eighth-, tenth-, and twelfth-grade students conducted by researchers at the University of Michigan, Ann Arbor, and funded by the National Institute on Drug Abuse. Results from the survey are released each fall.

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- research current teen use of alcohol, tobacco, nicotine products (e.g., ecigarettes), opioids, and other drugs (1.g);
- explain factors that influence use and reasons to not use substances and what affects decision making (2.g);
- demonstrate the use of appropriate assertive, refusal, and negotiation skills

Essential Understandings

(1.g)

- Influences on substance use (2.g):
 - o Peers: To fit in, to feel good, to feel better (relieve mental health disorders, stress, physical pain—"self-medicate"), to do better (use stimulants or performance-enhancing drugs), to experiment.
 - Family: Drug use in the household increases the likelihood an adolescent will use drugs. Research found that a healthy person was at a higher risk if a sibling or spouse abused drugs. An adolescent's inherited genetic vulnerability; personality traits like poor impulse control or a high need for excitement; mental health conditions such as depression, anxiety, or attention deficit hyperactivity disorder (ADHD); and beliefs such as that drugs are "cool" or harmless make it more likely that an adolescent will use drugs.
 - o Social: Teens who are around other teens who use drugs may have the false impression that everyone their age is using drugs.
 - Media: People on various media (e.g., movies, streamed shows, music, video gaming) talk and joke about drugs and may glorify drug culture without showing the consequences. Some teens might be curious to learn what it's about.
- Teens may engage in risky behaviors not because they want to or do not know whether something is an unhealthy or unsafe choice but because they do not know how to respond, are afraid of losing a friend, looking uncool, or being left out. Practicing and using assertive communication, refusal, and negotiation skills can help teens with peer pressure situations and help build confidence and strength. (2.g)
- Assertive communication skills include listening to others' views and responding appropriately, accepting responsibility, expressing appreciation, admitting mistakes and apologizing, maintaining self-control, acting as an equal to others, using "I" statements, practicing saying "no," remaining calm, rehearsing what you will say, making eye contact, maintaining an upright posture, and maintaining a neutral or positive facial expression. (3.g)

Essential Knowledge and Skills

to resist pressure to use alcohol, tobacco, and other drugs in situations, to include avoiding riding in a car with someone who has been using alcohol or other drugs (3.g);

Grade: Ten

- explain the relationship between chronic disease and substance use/abuse (1.h);
- explore protective factors to reduce/prevent risk-taking behaviors (2.h);
- create an educational message about the dangers and consequences of nicotine products for a variety of audiences (i.e., peers, family, younger students, adults) (3.h);
- identify unsafe behaviors that may result in unintentional injury while riding in or operating a vehicle (1.i);
- explain how the environment, individual behavior, social norms, legislation, and polices can prevent motor vehicle-related injuries (2.i);
- advocate for responsible teen driving behaviors (3.1).

Additional resources:

<u>Health Smart Virginia</u> EVERFI

Essential Understandings

Addiction is defined as a chronic, relapsing disorder characterized by compulsive drug seeking and use despite adverse consequences. (Drug Misuse and Addiction)

- Substance use disorder and chronic disease: Drugs that may cause cancer include alcohol, tobacco, steroids, and marijuana/cannabis. (Young adult males who use marijuana/cannabis and began use during adolescence are at risk for an aggressive form of testicular cancer.) Most drugs can have adverse cardiovascular effects, ranging from an abnormal heart rate to a heart attack. Drug use can lead to respiratory problems. Smoking cigarettes, marijuana/cannabis, or crack cocaine can cause bronchitis, emphysema, lung damage, and lung cancer. The use of some drugs, such as opioids, may cause breathing to slow, block air from entering the lungs, or make asthma symptoms worse. Alcohol use can cause stroke, high blood pressure, cirrhosis (scarring of the liver), and cancer (Alcohol's Effect on the Body). (1.h)
- Protective factors to reduce risk-taking behaviors are high personal integrity, performing community service, having teachers recognize good work, having community adults to talk to, participating in extracurricular activities, and having parents available for help. Having three protective factors is essential to reducing risk. (2.h)
- Nicotine products (e-cigarettes/vaping): E-cigarettes produce dangerous chemicals including acetaldehyde, acrolein (used to kill weeds), and formaldehyde. These can cause lung disease, acute lung injury, chronic obstructive pulmonary disease (COPD), cardiovascular (heart) disease, asthma, and lung cancer. (3.h)

Driver performance is influenced by many environmental, psychological, and vehicle design factors. One thing is certain: Teens are not ready to have the same level of driving responsibility as adults. Teen drivers have a higher rate of fatal crashes, mainly because of their immaturity, lack of skills, and lack of experience. They speed, they make mistakes, and they get distracted easily—especially if their friends are in the car.

Speeding: Speeding endangers not only the life of the speeder but all of the people on the

road around them, including law enforcement officers. For more than two decades,

Ess	senti	al Understandings	Essential Knowledge and Skills
	spe	eding has been involved in approximately one-third of all motor vehicle fatalities. In	
	201	7, speeding was a contributing factor in 26 percent of all traffic fatalities. (1.i)	
•	Dro	wsy driving: Effects of fatigue/sleep deficiency include impaired cognition and	
	per	formance, motor vehicle crashes, workplace accidents, and health consequences.	
	NH	TSA estimates that in 2017, 91,000 police-reported crashes involved drowsy drivers.	
	The	ese crashes led to an estimated 50,000 people injured and nearly 800 deaths. But there	
	is t	road agreement across the traffic safety, sleep science, and public health communities	
	tha	this is an underestimate of the effects of drowsy driving. (1.i)	
•	Res	earch has shown that factors that help to keep teens safe include parental	
	inv	olvement, a minimum legal drinking age and zero tolerance laws, and graduated	
	dri	ver licensing systems. These proven steps can protect the lives of young drivers and	
	eve	ryone who shares the road with them. (<u>Teen Drinking and Driving</u>) (2.i)	
•	Re	iusal skills (3.i)	
	0	Verbal	
		• Say "no." There is no substitute for the word "no." It makes any refusal stronger.	
		 Repeat the refusal. 	
		 Suggest an alternative (suggest something to do instead). 	
		 Build the friendship (say something to let the person know you are their friend 	
		and want to spend time with them). This is especially important because a major	
		reason for ineffective refusals is not wanting to make them mad.	
		 Use a firm tone of voice. Be strong and business-like. 	
	0	Nonverbal	
		 Direct eye contact (look the person in the face). 	
		 Serious expression (use your best "I mean it" face). 	
		 Hands-off hands (put your hands up in front of you when you refuse). This is 	
		especially useful in situations involving physical pressure.	
		 Leave (get out of the situation). 	
		 Avoid situations where there may be pressure. 	

Essential Understandings	Essential Knowledge and Skills
Negotiation skills (3.i)	
o State what you need.	
o Listen and clarify.	
o Identify other perspectives.	
o Determine common ground.	
o Elicit an agreement.

Strand: Safety/Injury Prevention

Standards:

- 10.1.j List examples and describe the risks of sharing/posting personal information online.
- 10.2.j Identify what needs to be considered before posting pictures, videos, and communicating with others online.
- 10.3.j Promote safe practices related to online communication and in-person interactions with individuals one meets online.

Essential Understandings

Electronic media, including social networking, can be used in positive and beneficial ways, but users need to be aware of the risks and protect themselves online.

- Personal information: What is posted online can be seen by anyone. Sharing sensitive information such as your address, phone number, family members' names, car information, passwords, Social Security numbers, birth date, school names, passport information, driver's license numbers, insurance policy numbers, loan numbers, credit/debit card numbers, PIN numbers, and bank account information is risky and should be avoided. Sharing personal information can expose people to theft, frauds and scams. (1.i)
- Photos/videos taken from smartphones embed the GPS coordinates in the photo, which will allow others to know the location where the picture was taken and may be used to find you. Beware of this when posting photos to online social media sites. Remember that pictures posted online may be copied, altered, and shared with many people without your knowledge or consent, unless you use privacy settings to limit who has access to the pictures. (<u>U.S. Attorney's Office Northern District of Georgia</u>) Even if privacy settings are set, people can take screenshots of someone else's phone and share or alter the photos or video. (2.i)
- Webcams: Be careful when using webcams. They can be hijacked and turned on remotely. This allows others to illegally view and listen to individuals without their knowledge. Consider turning them off or disconnecting them when not in use. (2.i)

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- explain what students should know about the risks of interacting online, including sharing/posting personal information, posting pictures and videos, and communicating with others and in-person interactions with individuals one meets online (1.i, 2.i, 1.j, 2.j);
- advocate for safe online practices (3.i).

<u>Health Smart Virginia</u> EVERFI

Essential Understandings	Essential Knowledge and Skills
Online communication: Getting to know someone online and communicating	
online, even with someone a person knows, without nonverbal cues or being able	
to see them, can be risky, causing simple misunderstandings or conflict,	
cyberbullying, damaged reputations, and manipulation. (2.i)	
o People do not always represent their true selves online, which may increase risk.	
Beware of meeting people in person whom you meet online, meet through online	
channels/texts, or through other forms of electronic communication. Not	
everyone is honest with their identity, age, gender, and intentions.	
o The recommendation for teens is never to meet someone in person they have	
only met online and not talk to people they do not know. As teens move into	
adulthood (college/career), this may become impractical. As an adult, do your	
research using public records and consider seeking reputable references. If you	
decide to meet someone, never go alone, let others know where you are going,	
meet in a very public place, and have your smartphone readily available.	
Meeting people who may not be who they say they are can be dangerous (known	
as catfishing—a person who sets up a false personal profile on a social	
networking site for fraudulent or deceptive purposes). (3.i)	

Strand: Mental Wellness/Social and Emotional Skills

Standards:

- 10.1.k Identify factors that can influence an individual's mental health, including family, social environment, trauma, genetics, brain chemistry, health behaviors, personal values, peers, media, technology, culture, and community.
- 10.2.k Describe the stigma surrounding mental illness and challenges and effects of stigma and discrimination on help-seeking behavior.
- 10.3.k Explain how demonstrating empathy, compassion, and acceptance can support others who are dealing with mental illnesses and challenges and help reduce stigma.
- 10.1.1 Identify characteristics of healthy, unhealthy, and abusive peer, family, and dating relationships.
- 10.2.1 Explain the role of respecting the experiences of others; accepting differences; and establishing, communicating, and respecting boundaries for healthy relationships.
- 10.3.1 Promote resources and strategies to address unhealthy and abusive peer, family, and dating relationships.
- 10.1.m Identify health professionals and types of services available for mental illnesses and emotional challenges.
- 10.2.m Identify help-seeking strategies and resources and when to seek support for oneself and others with signs of mental illnesses or challenges (e.g., depression, suicidal ideation).
- 10.3.m Advocate for the use of and the additional need for mental health resources at school and in the community.
- 10.1.n Identify different personal relationships teens are involved in and the characteristics of each.
- 10.2.n Evaluate potentially harmful and abusive relationships, including dangerous dating situations.
- 10.3.n Describe strategies to set personal boundaries to reduce and prevent relationship and dating violence.

Essential Understandings	Essential Knowledge and Skills
Mental health is an important part of overall health for children and adolescents. Stigma	In order to meet these standards, it is expected
continues to be a significant barrier to mental health treatment for children and their	that students will
families.	describe the influences/factors that affect
• Mental health includes our emotional, psychological, and social well-being. It	mental health (1.k);
affects how we think, feel, and act. It also helps determine how we handle stress,	describe the stigma associated with mental

Essential Understandings

relate to others, and make choices. Mental health is important at every stage of life, from childhood and adolescence through adulthood and aging.

- Many factors contribute to mental health problems, including:
 - o Biological factors, such as genes or brain chemistry.
 - o Life experiences, such as trauma or abuse.
 - o Family history of mental health problems.
 - o Lifestyle, such as diet, physical activity, and substance use. (1.k)
- Stigma is discrimination against an identifiable group of people, a place, or a nation. Stigma is associated with a lack of knowledge, a need to blame someone, fears, and gossip that spreads rumors and myths. Stigma causes people to feel ashamed for something that is out of their control. There are still many harmful attitudes and misunderstandings around mental health and mental illness, which make people ignore mental health, fuel stigma about mental illness, and make it harder to reach out for help. (CDC) (2.k)
- Harmful effects of the stigma related to mental health can lead to a reluctance to seek help or treatment (2.k):
 - o Lack of understanding by family, friends, co-workers, or others.
 - o Can lead to discrimination.
 - Fewer opportunities for work, school or social activities, or trouble finding housing.
 - o Bullying, physical violence, or harassment.
 - o Health insurance that doesn't adequately cover mental illness treatment.
 - o Stigma causes people to feel ashamed for something that is out of their control.
- Ways to fight stigma may include (<u>National Alliance on Mental Illness</u>) (3.k):
 - o Be open to conversations about mental health.
 - o Educate yourself and others (be understanding of what you might not understand).
 - o Be respectful and conscious of language (don't use mental health conditions as

Essential Knowledge and Skills

health and how stigma affects one's ability to seek help (2.k);

- promote ways to reduce stigma for mental illnesses and challenges (3.k);
- compare and contrast healthy, unhealthy, and abusive relationships (1.l);
- describe strategies to build healthy relationships, including setting and respecting boundaries (2.1);
- promote resources to assist teens (self and others) with getting help for addressing unhealthy and abusive peer, family, and dating relationships (3.1);
- advocate with a variety of audiences for the use of and need for mental health professionals and services, including when to seek assistance and the types of professionals and services available (1.m. 2.m, 3.m);
- describe a variety of different teen relationships (1.n);
- describe warning signs for potentially harmful and abusive relationships with family, peers, and in dating relationships (2.n);
- describe strategies to set personal boundaries to reduce and prevent relationship and dating violence (3.n).

Essential Understandings	Essential Knowledge and Skills
adjectives for people).	
o Be supportive of other people's struggle and recovery (show empathy,	Additional resources:
compassion, and acceptance for those with mental illness).	Health Smart Virginia
o Be active in spreading mental health awareness; encourage equality between	<u>EVERFI</u>
physical and mental illness; let the media know when they are being	
stigmatizing.	
Respect for oneself and others is a key characteristic of healthy relationships with peers,	
family, and dating relationships.	
• Components of healthy relationships include mutual respect, trust, honesty, support,	
fairness, separate identities, good communication, equality, compromise, and	
kindness. Learning to give and to receive, revealing feelings (likes/dislikes, dreams	
and worries, proud moments, disappointments), listening, and supporting others are	
skills developed through healthy relationships. (Characteristics of Healthy &	
<u>Unhealthy Relationships</u>) (1.1)	
Characteristics of unhealthy relationships include control, hostility, dishonesty,	
disrespect, dependence, intimidation, physical violence, and sexual violence	
(Characteristics of Healthy & Unhealthy Relationships). (1.1)	
Abusive peer, family, or dating relationships may include physical, emotional, or	
sexual abuse. (1.l)	
o Physical abuse: This includes pinching, hitting, shoving, or kicking.	
o Emotional/verbal abuse: This involves threatening a person/partner or harming	
their sense of self-worth. Examples include name calling, controlling/jealous	
behaviors, consistent monitoring, shaming, bullying (online, texting, and in	
person), intentionally embarrassing the person, keeping them away from friends	
and family. (<u>Dating Violence Prevention</u>)	
o Sexual abuse: This is defined as forcing a partner to engage in a sex act when	
they do not or cannot consent (<u>Dating Violence Prevention</u>). <u>Child sexual abuse</u>	

Essential Understandings	Essential Knowledge and Skills
refers to the involvement of a child (a person younger than 18) in sexual activity	
that violates the laws or social taboos of society and that the child (1.1);	
 Does not fully comprehend, 	
 Does not consent to or is unable to give informed consent to, or 	
 Is not developmentally prepared for and cannot give consent to. 	
• Abusive family/parent(s) may also include neglect: The failure to provide adequate	
food, shelter, affection, supervision, education, or dental or medical care. Neglect is	
when the parent(s) have the financial means to provide these things but do not. (1.1)	
Setting and communicating personal boundaries may include physical closeness to	
another person (personal space), emotions and thoughts, time and energy, and stuff or	
possessions. Boundaries may be flexible depending on the people or situation.	
Boundaries should reflect basic rights of saying "no," being treated with respect,	
making personal needs as important as others, being accepting of one's mistakes and	
failures, and not having to meet unreasonable expectations of others.	
• Boundaries are a personal choice and vary from one person to the next. Communicate	
boundaries using "I" statements and assertive communication. Example, "I feel	
when because" "What I need is" Say, "No" —it is OK to say "no"	
without an explanation. Use features on devices such as setting a cut-off time for	
reading and answering texts. (2.1)	
• To address unhealthy and abusive peer, family, and dating relationships, talk to (3.1):	
o A parent, adult family member, adult in your faith community, or other adult you	
trust.	
o School personnel (teacher, administrator, counselor, psychologist, social worker,	
nurse).	
o Health care provider.	
o Community resources.	
Teacher note: Reminder that all school personnel are mandated reporters. Child abuse	

Essential Understandings	Essential Knowledge and Skills
and recognition training is required for initial licensure and renewals; training and	
resources are available at the Virginia Department of Education.	
Talk with a parent or other adult you trust if you or someone you know needs help with a	
mental health issue.	
Resources are available on the <u>National Institute of Mental Health's (NIMH) Find</u>	
Help for Mental Illnesses webpage. Students can talk to parents/guardians, school	
counselors, school psychologists, school social workers, school nurses, health care	
providers, specialized therapists, and local Community Services Board. (1.m)	
Social worker: Helps individuals develop skills to solve and cope with problems in	
their everyday lives and may diagnose and treat mental, behavioral, and emotional	
health issues. (1.m)	
• Psychologist: Collaborates with physicians, social workers, and others to treat illness	
and promote overall wellness. (1.m)	
• Psychiatrist: Medical specialty (trained as a physician) that involves the treatment of	
mental health disorders. Psychiatrists are physicians who evaluate, diagnose, and	
treat patients who are affected by a temporary or chronic mental health problem.	
(1.m)	
Counselor: Provides mental health and substance abuse care. They work in	
partnership with individuals, families, and groups to treat mental, behavioral, and	
emotional problems and disorders. (1.m)	
• Psychiatric nurse: Treats patients diagnosed with mental illnesses. (1.m)	
Mental health professionals in schools (1.m)	
o School counselor: Supports student success by providing academic, college and	
career, and personal and social counseling.	
o School psychologist: Helps students foster social skills, address mental health	
concerns, and enhance self-regulation skills.	
o School social worker: Provides individual and group counseling to students to	

Essential Understandings	Essential Knowledge and Skills
develop social-emotional competencies, foster resiliency, and cope with crisis,	
conflicts and other stressful situations. They also serve as liaison between home,	
school, and community, linking students and families to community resources	
and agency services.	
• Often, family and friends are the first to recognize the warning signs of suicide and	
can be the first step toward helping an at-risk individual find treatment with someone	
who specializes in diagnosing and treating mental health conditions. If someone	
engages in unsafe behavior or talks about wanting to hurt themselves or someone	
else, do not keep it a secret or dismiss it. Seek help immediately. Tell an adult. (2.m)	
• Call 911 if you or someone you know is in immediate danger or go to the nearest	
emergency room. (2.m)	
National Suicide Prevention Lifeline (2.m)	
o Call 1-800-273-TALK (8255); En Español 1-888-628-9454; TTY 1-800-799-	
4889.	
o The Lifeline is a free, confidential crisis hotline that is available to everyone 24	
hours a day, seven days a week. The Lifeline connects callers to the nearest crisis	
center in the Lifeline national network. These centers provide crisis counseling	
and mental health referrals.	
• Crisis Text Line (2.m)	
o Text "HELLO" to 741741.	
o The Crisis Text hotline is available 24 hours a day, seven days a week	
throughout the United States. The Crisis Text Line serves anyone, in any type of	
crisis, connecting them with a crisis counselor who can provide support and	
information.	
Respect for oneself and others is a key characteristic of healthy relationships with peers,	
family, and dating relationships.	
• Teens are involved in a variety of relationships with family, extended family,	

ssential Understandings	Essential Knowledge and Skills
community groups (faith community, recreation and athletics, service groups), school	
groups, school personnel, peers, and others. Each relationship is slightly different. A	
teen may share more of a personal relationship with one individual over another.	
(1.n)	
Teen dating violence is a type of intimate partner violence. It occurs between two	
people in a close relationship. Teen dating violence includes four types of behavior.	
(2.n)	
o Physical violence is when a person hurts or tries to hurt a partner by hitting,	
kicking, or using another type of physical force. Nearly 1 in 11 female and about	
1 in 15 male high school students report having experienced physical dating	
violence in the last year.	
o Sexual violence is forcing or attempting to force a partner to take part in a sex act,	
sexual touching, or a nonphysical sexual event (e.g., sexting) when the partner	
does not or cannot consent. About 1 in 9 female and 1 in 36 male high school	
students report having experienced sexual dating violence in the last year.	
o Psychological aggression is the use of verbal and nonverbal communication with	
the intent to harm another person mentally or emotionally and/or exert control	
over another person.	
o Stalking is a pattern of repeated, unwanted attention and contact by a partner that	
causes fear or concern for one's own safety or the safety of someone close to the	
victim.	
Teen dating violence can take place in person or electronically, such as through	
repeated texting or posting of sexual pictures of a partner online without consent.	
Unhealthy relationships can start early and last a lifetime. Teens often think some	
behaviors, like teasing and name-calling, are a "normal" part of a relationship, but	
these behaviors can become abusive and develop into serious forms of violence.	
However, many teens do not report unhealthy behaviors because they are afraid to	
tell family and friends. There is help and assistance: Tell a trusted adult. (2.n)	

E	ssential Understandings	Essential Knowledge and Skills
•	Power and control are the reasons abusers choose to use violence and other tactics	
	against their dating partners. They want complete power over and control of their	
	partners. Note: There are a variety of power and control wheels available online that	
	may be helpful for instruction. (2.n)	
•	Setting and respecting boundaries. See 2.1 above. (3.n)	
•	To address unhealthy and abusive peer, family, and dating relationships, talk to (3.n):	
	o A parent, adult family member, adult in your faith community, or other adult you	
	trust.	
	o School personnel (teacher, administrator, counselor, psychologist, social worker,	
	nurse).	
	o Health care provider.	
	o Community resources.

people, and in turn, their families, schools, and communities. (Youth Violence)

- Youth violence is the intentional use of physical force or power to threaten or harm others by young people ages 10-24. It typically involves young people hurting peers who are unrelated to them and who they may or may not know well. Youth violence can include fighting, bullying, threats with weapons, and gang-related violence. A young person can be involved with youth violence as a victim, offender, or witness. (Preventing Youth Violence) (1.p)
- Weapon use and physical violence can lead to injury of self and others, death, result in school suspension/expulsion, arrest, and legal actions. (1.p)
- A weapon is something (such as a club, knife, or gun) used to injure, defeat, or destroy. (1.p)
- Protective factors may lessen the likelihood of youth violence victimization or perpetration. (Risk and Protective Factors) (2.p)
 - o Individual protective factors
 - Intolerant attitude toward deviance;
 - High IQ;
 - High grade-point average (as an indicator of high academic achievement);
 - High educational aspirations;
 - Positive social orientation:
 - Popularity acknowledged by peers;
 - Highly developed social skills/competencies;
 - Highly developed skills for realistic planning;
 - Religious beliefs.
 - Family protective factors
 - Connectedness to family or adults outside the family;
 - Ability to discuss problems with parents;
 - Perceived parental expectations about school performance are high;
 - Frequent shared activities with parents;

- 10.3.w Identify high school courses that lead to health and medical science industry certifications.

Essential Understandings

Natural disasters and many emergency situations can result in life-threatening injuries or circumstances. Preparing and planning in advance can increase survival.

- Natural disasters include earthquake, flood, landslide, hurricane, tornado, volcanic eruption, winter storm, avalanche, blizzard, lightning, hailstorm, ice storm, drought, wildfire, extreme temperatures (cold or heat wave), and famine. (1.s)
- Emergency situations include poisoning, chemical emergency, fire, power outage, terrorism, falls, choking, medical-related (e.g., stop breathing, heart attack, stroke), and drowning. (1.s)
- Life-threatening situations that may result from an emergency situation or natural disaster including lack of food and clean water; injuries (blunt trauma, crush-related, drowning); disease transmission; destruction of shelter; release of dust, ash, chemicals into the environment; and medical effects. (1.s)
- Young children, seniors, and people with disabilities may be more vulnerable in emergency situations. Community resources for emergency preparedness (2.s):
 - o Fire and rescue services.
 - American Red Cross.
 - o Federal Emergency Management Agency (FEMA).
 - o Centers for Disease Control and Prevention (CDC).
 - o Department of Homeland Security.
 - o Virginia Department of Emergency Management (know your evacuation zone for coastal communities).
- Emergency preparedness: Build a kit, have a plan, and access alert options (local and social media outlets). Considerations when preparing for an emergency situation include having (3.s):
 - o nonperishable food and bottled water available;
 - o manual can opener (for food);
 - o extra medications available;
 - o emergency radio;

Essential Knowledge and Skills

In order to meet these standards, it is expected that students will

- research a natural disaster or an emergency situation that can affect a local community (1.s);
- identify community emergency preparedness resources designed for a life-threatening situation that may be caused by an emergency and/or natural disaster (2.s);
- develop a crisis-management plan with strategies for a natural disaster or emergency situation (3.s);
- research the health effects of environmental concerns and explain how these can affect someone's health (1.t);
- explain how health, wellness, education, safety, and business professionals can positively affect environmental health concerns (2.t);
- establish goals and strategies for improving and reducing the risk for environmental health for home, school, or community (3.t);
- for a selected health-related social issue, describe the issue and effects on the community, where/how to access community resources, and create a plan to address the issue (1.u, 2.u, 3.u);
- analyze how health literacy and health-

Essential Understandings

- o emergency contact information for each family member;
- o evacuation plan to two or three different destinations;
- o flashlight and extra batteries;
- o whistle (to signal for help);
- o extra blankets;
- o first aid kit;
- someone trained in CPR and first aid.

Harmful exposures anywhere in a person's environment might affect their health. Any exposure to hazardous substances or dangerous events in the environment can cause harmful health effects. (CDC)

- Environmental health is the branch of public health that focuses on the relationships between people and their environment, promotes human health and well-being, and fosters healthy and safe communities. The field works to advance policies and programs to reduce chemical and other environmental exposures in air, water, soil and food to protect people and provide communities with healthier environments.
- Health can be affected through outdoor air quality, surface and ground water quality, toxic substances and hazardous wastes, and indoor environments. (<u>Environmental</u> <u>Quality</u>) (1.t)
 - o Poor environmental quality has the greatest impact on individuals whose health is already at risk.
 - o Outdoor air quality may result in premature death, cancer, respiratory and cardiovascular disease.
 - Surface and ground water quality includes both drinking water and recreational waters that may be contaminated by infectious agents or chemicals and can cause mild to severe illness.
 - o The effects of toxic substances and hazardous wastes are not completely understood, and research is ongoing.

Essential Knowledge and Skills

science skills prepare one to become a productive citizen and help to reduce health risks and enhance the health and wellness of oneself and others throughout life (1.v, 2.v);

Grade: Ten

- identify health promotion opportunities to enhance the health and wellness of oneself and others (3.v);
- for one or more health-related professions
 - o describe the attributes, characteristics, and interests of individuals in the profession (1.w)
 - o identify core academic skills needed for workplace skills in the profession (1.w)
 - o research available high school health and medical science courses that lead to industry-recognized credentials (2.w, 3.w).

Health Smart Virginia EVERFI

Essential Understandings	Essential Knowledge and Skills
 o Homes and communities may expose people to indoor air pollution, inadequate heating, poor sanitation, structural hazards, fire hazards, and lead-based paint; all of which can affect health and safety. o Radon is a radioactive, naturally occurring gas. Radon can enter homes and other buildings through cracks in floors and walls, spaces around pipes and in suspended floors, or in the water supply. Radon is the second leading cause of lung cancer in the United States. 	2550 and 14110 weage and 511115
• Community members and organizations can work together to address community health concerns and improve the environment for those who live and work there. (2.t)	
 Individuals and families can positively affect environmental health through different practices in homes, yards, and offices. Some examples: Clean or replace air filters. Unplug appliances that are not used often. Turn off lights and electronics when not in use. Plant trees to shade homes. Use cold water instead of hot when possible. Test paint in the home for lead. Test the home for radon. Leave grass clippings on the yard. Minimize the use of pesticides. Use recycled paper. Walk or ride a bike instead of driving when possible. (3.t) 	
Healthy physical, social, and economic environments strengthen the potential to achieve health and well-being. (<u>Healthy People 2030 Framework Foundational Principle</u>) • Organ donation: There are currently more than 115,000 people in the United	

Essential Understandings	Essential Knowledge and Skills
States waiting for organ transplants. Each year, approximately 8,000 people	
die waiting for an organ transplant that would have given them a second	
chance at life. Additionally, each year, hundreds of thousands of people	
benefit from donated tissue that is used for life-saving and reconstructive	
purposes, and corneas that restore sight.	
• Homelessness (<u>CDC</u>): On any given night, hundreds of thousands of people	
are homeless in the United States. These people might be chronically	
homeless, have temporarily lost their shelter, be fleeing domestic violence, or	
facing any number of other issues. Homelessness is closely connected to	
declines in physical and mental health. Homeless people experience high	
rates of health problems, such as HIV infection, alcohol and drug abuse,	
mental illness, tuberculosis, and other conditions. Health problems among	
the homeless result from various factors, such as barriers to care, lack of	
access to adequate food and protection, and limited resources and social	
services.	
o Resources: (1.u, 2.u)	
 Virginia Department of Housing and Community Development. 	
■ The Continuum of Care (CoC) community programs for information	
about access to shelter, housing, and other resources.	
 A 211 hotline is available in many communities and offers trained 	
staff 24/7 to help residents access services like shelter, health care,	
food, and other social services programs.	
 The National Coalition for the Homeless offers basic information on 	
how people experiencing homelessness can get help and access	
resources.	
 School resources include school counselor, psychologist, and social 	
worker, who can help access appropriate information and services.	
• Spread of infectious diseases (<u>CDC</u> 's <u>Infectious Disease Framework</u>):	

Essential Understandings	Essential Knowledge and Skills
Infectious diseases are a leading cause of illness and death throughout the	
world. The enormous diversity of microbes combined with their ability to	
evolve and adapt to changing populations, environments, practices, and	
technologies creates ongoing threats to health and continually challenges our	
efforts to prevent and control infectious diseases. We are living in an	
interconnected world where an outbreak of infectious disease is just a plane	
ride away. (1.u, 2.u)	
Underage drinking: Alcohol is the most commonly used and abused drug among	
youth in the United States (<u>Underage Drinking</u>). Consequences of underage drinking	
can affect everyone, regardless of age or drinking status. We all feel the effects of	
the aggressive behavior, property damage, injuries, violence, and deaths that can	
result from underage drinking. This is not simply a problem for some families—it is	
a nationwide concern. (<u>Underage Drinking</u>)	
o Resources: School resources include school counselor, psychologist, and social	
worker, who can help access appropriate information and services; Community	
Services Board; health care providers (1.u, 2.u).	
Substance use/misuse: Beyond the health-related and other effects on an	
individual with substance use disorder and families, substance use/misuse	
affects the community through associated crime and violence, injuries,	
accidents (some fatal), involvement of law enforcement, and the health care	
system.	
o Resources: School resources include school counselor, psychologist, and	
social worker, who can help access appropriate information and services;	
Community Services Board; health care providers (1.u, 2.u).	
Violence (<u>CDC</u>): Youth violence affects entire communities. Violence	
increases health care costs, decreases property values, and disrupts social	
services. Youth violence negatively affects perceived and actual safety,	
participation in community events, school attendance, and the viability of	

Essential Understandings	Essential Knowledge and Skills
businesses. Addressing the short- and long-term consequences of violence	
strains community resources and limits the resources that states and	
communities have to address other needs. (Preventing Youth Violence)	
o Resources: School resources include school counselor, psychologist, and	
social worker, who can help access appropriate information and services	
(1.u, 2.u).	
Awareness of health- and wellness-related issues allows individuals to make informed	
choices in matters that affect their overall health and the health of family and	
community.	
Health literacy: <u>Healthy People 2030</u> defines personal health literacy as the degree	
to which individuals have the ability to find, understand, and use information and	
services to inform health-related decisions and actions for themselves and others.	
<u>NIH National Library of Medicine Skills Needed for Health Literacy</u> : Patients are	
often faced with complex information and treatment decisions. Patients need to:	
(1.v)	
o Access health care services.	
o Analyze relative risks and benefits.	
o Calculate dosages.	
o Communicate with health care providers.	
o Evaluate information for credibility and quality.	
o Interpret test results.	
o Locate health information.	
In order to accomplish these tasks, individuals may need to be:	
o Visually literate (able to understand graphs or other visual information).	
o Computer literate (able to operate a computer).	
o Information literate (able to obtain and apply relevant information).	
o Numerically or computationally literate (able to calculate or reason numerically).	

Essential Understandings	Essential Knowledge and Skills
o Oral language skills are important as well. Patients need to articulate their health	
concerns and describe their symptoms accurately. They need to ask pertinent	
questions, and they need to understand spoken medical advice or treatment	
directions.	
 Health science skills may include (<u>VDOE CTE Workplace Readiness Skills</u>) (1.v) 	
o Creativity and innovation.	
o Critical thinking and problem solving.	
o Initiative and self-direction.	
o Work ethic.	
o Conflict resolution skills.	
o Communication skills (listening, speaking, writing, reading).	
o Respect for diversity.	
o Customer service skills.	
o Collaboration.	
o Continuous learning and adaptability.	
o Information-literacy skills.	
o Science and mathematics skills.	
Careers in health and medical sciences are varied and provide opportunities to promote	
he health and wellness of individuals and the local and global community.	
• There are many career opportunities in the health and medical sciences, including	
athletic trainer, audiologist, chiropractor, dentist, dietitian, emergency medical	
technician, home health aide, massage therapist, medical and clinical laboratory	
technologist, nurse, occupational therapist, optician, optometrist, orthotists and	
prosthetists, pharmacist, physical therapist, and speech-language pathologist.	
· Individuals in health and medical science careers are interested in helping others,	
often enjoy science, are good problem solvers, and can work collaboratively with	
others. (1.w)	

Essential Understandings	Essential Knowledge and Skills
Science courses such as biology, anatomy and physiology, chemistry, and physics	
help prepare students to pursue health and medical careers. (1.w)	
Students in Virginia may take career and technical education (<u>Health & Medical</u>)	
Sciences) courses that (2.w, 3.w):	
o Introduce secondary students to nursing, medical, dental, and other health	
occupations, such as athletic training and sports medicine.	
o Prepare students with basic skills for employment in nursing homes, clinics,	
medical and dental offices, hospitals, homes, and certain public health settings.	
o Facilitate entry into advanced health occupations programs that require post-high	
school education leading to state licensure, certification, registration, or national	
credentialing.	
o Enable students to become knowledgeable consumers of health services.	
• The occupational preparation programs prepare students for entry-level positions in	
a particular health field or for advanced training in health occupations at the	
technical and professional levels. (Health & Medical Sciences) (2.w)	
o Entry-level positions may include	
 Nursing (certified nurse aide or licensed practical nurse). 	
 Medical (medical assistant, emergency medical technician, or surgical 	
technologist).	
Dental (dental assistant).	
 Other health occupations (physical or occupational therapy aide, respiratory 	
therapy assistant, rehabilitation aide, dietary aide, laboratory aide, geriatric	
aide, home health aide, housekeeping aide, sterile supply aide, transportation	
aide, veterinary assistant, personal trainer).	
 Note: Teachers may want to review school-specific CTE, science, advanced 	
placement (such as psychology), and health and physical education electives	
available for students.
