Grade 4 Sample Lesson Plan: 
Unit 3 – Air Pollution and Trees

SOLs
• 4.1 R Describe the efforts of air pollution on health
• 4.2 S Explain the health consequences associated with air pollution
• 4.2 O Develop strategies to reduce air pollution

Objectives/Goals
• The student will be able to identify ways trees work to protect our natural resources.
• The students will be able to describe several ways trees enhance human environments and natural ecosystems.
• The students will learn basic facts about trees as a natural resource and why they are so important to our well-being.

Materials
• Book: We Planted A Tree by Diane Muldrow
• You Tube Video: Trees http://www.youtube.com/watch?v=Si7u5FMQxHA
• Venn Diagram
• Unit Assessment

Procedure
Step 1
• Fill out a KWL chart to see how much students already know about trees.

Step 2
• Show the video Trees. Trees http://www.youtube.com/watch?v=Si7u5FMQxHA Follow up with a discussion about what they learned in the video. Make sure they understand basic facts, such as: Trees provide us with oxygen, provide food for both humans and animals, clean the pollution in the air by turning carbon dioxide into oxygen, provide us with shade, cool the Earth from the heat by cooling the ground and air around them.

Step 3
• Discuss climate change and how greenhouse gasses keep the heat in the Earth. This results in higher temperatures and the melting of our ice caps. Trees reduce the amount of harmful greenhouse gases.

Step 4
• Discuss how rising temperatures affects our health. Eg. Asthma, Bronchitis, etc.
Step 5
- Read book: *We Planted A Tree* by Diane Muldrow Discuss differences in the families. Fill out a Venn Diagram comparing and contrasting how the families benefitted from planting a tree.

Step 6
- Tell the students that tomorrow we will be planting our own trees at school in order to make our school and the air we breathe healthier. See Lesson “Planting a Tree”

Step 7
- Give Assessment

- Assessment by Nancy Lewis

Handout
The next page includes a handout for the lesson. The handout is designed for print use only.
Name______

Air Pollution Quiz

1. Give 2 examples of air pollution:
   1. ______________________________
   2. ______________________________

2. Name 2 things we can do to help reduce air pollution
   1. ______________________________
   2. ______________________________

3. Circle the items below that are ways trees help us:
   Cools the air   Gives us food   Helps us walk
   Breathes for us  Makes oxygen  Cleans the air
   Gives us rain   Helps control erosion   Absorbs carbon dioxide

4. How can air pollution harm your health?
   __________________________________________________________________________
   __________________________________________________________________________
   __________________________________________________________________________
   __________________________________________________________________________

5. Greenhouse gases can cause temperatures to: ____________________________

6. How many trees are there on earth? ______________________________

7. Name 3 foods we get from trees:
   __________________________, ____________________________, __________________________

8. We breathe in _______________ and trees take in __________________________
